This presentation and the accompanying slides (the “Presentation”), which have been prepared **by MTAR Technologies Limited** (the “Company”), have been prepared solely for information purposes and do not constitute any offer, recommendation or invitation to purchase or subscribe for any securities, and shall not form the basis or be relied on in connection with any contract or binding commitment whatsoever. No offering of securities of the Company will be made except by means of a statutory offering document containing detailed information about the Company.

This Presentation has been prepared by the Company based on information and data which the Company considers reliable, but the Company makes no representation or warranty, express or implied, whatsoever, and no reliance shall be placed on, the truth, accuracy, completeness, fairness and reasonableness of the contents of this Presentation. This Presentation may not be all inclusive and may not contain all of the information that you may consider material. Any liability in respect of the contents of, or any omission from, this Presentation is expressly excluded.

Certain matters discussed in this Presentation may contain statements regarding the Company’s market opportunity and business prospects that are individually and collectively forward-looking statements. Such forward-looking statements are not guarantees of future performance and are subject to known and unknown risks, uncertainties and assumptions that are difficult to predict. These risks and uncertainties include, but are not limited to, the performance of the Indian economy and of the economies of various international markets, the performance of the industry in India and world-wide, competition, the company’s ability to successfully implement its strategy, the Company's future levels of growth and expansion, technological implementation, changes and advancements, changes in revenue, income or cashflows, the Company's market preferences and its exposure to market risks, as well as other risks. The Company's actual results, levels of activity, performance or achievements could differ materially and adversely from results expressed in or implied by this Presentation. The Company assumes no obligation to update any forward-looking information contained in this Presentation. Any forward-looking statements and projections made by third parties included in this Presentation are not adopted by the Company and the Company is not responsible for such third-party statements and projections.

All Maps used in the presentation are not to scale. All data, information, and maps are provided "as is" without warranty or any representation of accuracy, timeliness or completeness

# **A leader in critical and differentiated engineered products**

**Strong Order Book Position**

**Q3 & YTD FY23 Financial Performance**

**Certifications under Progress**

**Expanding Product Portfolio & Capabilities**

**Exiting Customers & Customers in Pipeline**

**Well Balanced Portfolio**

**Experienced Board of Directors & Well Qualified Management Team**

# Strong Orderbook Position

## Receipt of Major New Orders

### Existing Business

Received Rs. 893.1 Cr of orders in YTD FY 23 in various sectors including Clean Energy – Civil Nuclear Power, Fuel cells and Hydel. In addition, the company has received Rs. 140.0 Cr of orders in Q4 as on Feb 7 2023.

### Diversified Order Book of Rs. 1,183 crs as on 31<sup>st</sup> Dec 2022

## Order book Build-Up (Rs. in Crs)

\* Sales restated at order book excluding forex fluctuations, price escalations and scrap sales

# Q3 & 9M FY23 Financial Performance

Revenues (Rs. Crs)

Gross Profit (Rs. Crs)

EBIDTA (Rs. Crs)

PAT (Rs. Crs)

- Revenue for Q3 FY23 stood at Rs. 160.2 crs as compared to Rs. 78.1 Crs in Q3 FY22, a growth of 105% YoY and 9MFY23 growth of 69% YoY
- EBIDTA for Q3 FY 23 stood at Rs. 45.0 Crs, as compared to Rs. 22.8 Crs in Q3 FY22 with a growth of 97% and 9MFY23 growth of 57% YoY basis
- EBIDTA margins for Q3FY23 stood at 28.1%
- PAT for the quarter stood at Rs. 31.4 Crs as compared to Rs. 13.3 Crs in Q3 FY22 up by 136% YoY and 9MFY23 growth of 76% compared with 9MFY22
- PAT margins for Q3 FY23 stood at 19.6%

## Net Working Capital (in Days)

- Rs 38 Crs was received from Bloom Energy on 7th Jan'23 on account of Christmas holidays. This resulted in 39 days increase in WC days; the working capital days would have been 248 Days had the amount been received in Dec'22.
- Out of Rs. 241 Crs of receivables, Rs. 195 Crs of receivables are not overdue
- Inventory RM higher by Rs 96 Crs for higher sale projected in Q4, which includes Rs. 52 Crs worth of material in transit
- Inventory WIP is higher by Rs 37 Crs due to long lead projects

# Q3 & 9M FY23 Consolidated Profit & Loss Statement

Particulars (Rs. Crs)	Q3 FY23	Q3 FY22	Y-o-Y (%)	Q2 FY23	Q-o-Q	9M FY23	9M FY22	Y-o-Y (%)

# Certifications for Adibatla Plant

Certification	Expected Timeline to get Certified
 <p>ISO 9001:2015 – Quality Management Systems</p>	<b>Received</b>
 <p>AS9100: Quality Systems - Aerospace</p>	<b>Received</b>
 <p>ISO 14001:2015 Environmental Management Systems</p>	<b>Received</b>
 <p>ISO 45001:2018 Occupational Health &amp; Safety</p>	<b>Received</b>

Certification	Expected Timeline to get Certified
 <p>ISO 27001:2013 Information Security Management Systems</p>	<b>Received</b>

Certifications are expected to enhance our customer base specifically in Aerospace and Specialized fabrication in a significant way

# Expanding Product Portfolio & Establishment of New Capabilities

Roller Screws

Electro-Mechanical Actuators

Electro-Mechanical Actuators

High End Fabrication

High Precision Sheet Metal

## Expanding Product Portfolio

- ✓ Executed the FAI orders of **Roller Screws**
- ✓ The company has also **initiated the development of Electro-mechanical actuators**, which find application in Space and Defense sectors. In FY 22 we have received orders worth Rs. 7.6 crs from Defense; the company shall be executing all the orders by FY 24.
- ✓ The company has commenced the production of **ASP Assemblies** in Q4 FY23
- ✓ The company has initiated the development process of **ceramic assemblies**, which are currently being imported

## Establishment of sheet metal and specialized fabrication facilities

### Specialized fabrication

- ✓ Specialized fabrication facility to be functional in a full-fledged way by Mar '23

### Sheet Metal

- ✓ MTAR has got qualified for 67 sheet metal assemblies and enclosures during Q1 in Clean Energy segment
- ✓ Commenced shipments to South Korea and USA; supplied **Rs. 24.6 Crs** worth of sheet metal orders for Clean Energy sector during YTD 31 Dec 2022
- ✓ The new capabilities are expected to bring in lot more customers

# Key Products under Development

## Defence

- **Valves:** The company has started working on the design of valves, which has an immense market potential in Defence. Received orders for First Articles.

## Space

- **Semicryo Engine:** MTAR is in the process of developing Semi Cryo Engine, the next generation liquid propulsion engines that enhances the payload carrying capacity of GSLV Mark III from 4 tons to 6 tons. First engine is expected to be rolled out by FY 24.

## Clean Energy

**Bloomenergy®**

- **Bellows (Import Substitutes):** Indigenizing bellows for fuel cells that were being imported to achieve better realizations. The company has got qualified for bellows and production has commenced
- **Heaters(Import Substitutes):** The company has initiated the development process, which are currently being imported

# Establishment of New Capabilities – Electronics Control Systems

- ✓ The company has got the in-principle approval from the board to establish electronics manufacturing in-house
- ✓ The company has initiated work on cable harnessing assemblies
- ✓ MTAR shall take up more projects related to electronic systems going forward

# Entered into MoU Framework for SSLV Project

- **MTAR has signed an MoU (memorandum of understanding)** with Indian National Space Promotion and Authorization Centre (IN-SPACe) for design and development of a two-stage to low-earth orbit all-liquid small satellite launch vehicle powered by semi cryogenic technology with a payload capacity of 500 kilogram
- As per the MOU framework the company has sought support from ISRO for various requirements including avionics, sub systems testing, facilitation of launch etc. and any other requirements that might emerge during the course of design, development and launch phase.
- The MoU shall remain in force for three years.

# Existing Customers

## Defence & Aerospace

## Nuclear Power

## Space

## Clean Energy

## Marine, Oil & Energy

## Others

# Customers in Pipeline

## Defence & Aerospace

ELTA

MTAR is currently in discussions with a significant number of new customers from various sectors

## Clean Energy

## Others

# Well-balanced Portfolio (1/2)

Revenue in Rs. Crs

# Well-balanced Portfolio (2/2)

Revenue in Rs. Crs

# Supported by an Experienced Board of Directors

**Parvat Srinivas Reddy**

*Managing Director and Promoter*

- 30+ years of rich work experience in Manufacturing and Construction industries
- Master's degree in science, specializing in industrial engineering from Louisiana Tech University

**Subbu Venkata Rama Behara**

*Chairman and Independent Director*

- Director - Sona BLW Precision Forgings and KPIT Technologies Limited
- Alumnus of IIFT

**Praveen Kumar Reddy Akepati**

*Executive Director*

- Has worked with the company for 20+ years
- Bachelor's degree in engineering from the Faculty of Engineering, Andhra University

**Venkatasatishkumar Reddy Gangapatnam**

*Non-Executive Director*

- Director - Rasun Ace Infra Pvt Ltd, Acecorp Group Pvt Ltd and Magnatar Aero Systems Pvt Ltd
- Alumnus of Bradley University

**Anushman Reddy**

*Executive Director*

- Nearly eight years of experience in manufacturing
- Holds Master's degree in global supply chain management from Marshall School of Business (University of Southern California), and Executive post graduate diploma from Narsee Moinjee Institute of Management.

**Krishna Kumar Aravamudan**

*Independent Director*

- Previously served as MD, State Bank of India
- Ex-director - CDSL, REC Ltd, TVS Wealth Pvt Ltd and SBI Payment Services Pvt Ltd

**Ameeta Chatterjee**

*Independent Director*

- Director - Nippon Life Asset Management Ltd and JSW Infrastructure Ltd
- Alumnus of IIM, Bangalore

**Gnana Sekaran Venkatasamy**

*Independent Director*

- Previously worked at DRDO
- Master's degree in engineering from the Indian Institute of Science, Bengaluru

**Udaymitra Chandrakant Muktibodh**

*Independent Director*

- Served NPCIL at various capacities including technical director
- Had been awarded NPCIL Excellence Award

# Experienced and Qualified Management Team

**Parvat Srinivas Reddy - *Managing Director and Promoter***

- Entrusted with the overall responsibility of management
- 30+ years of rich work experience in Manufacturing and Construction industries
- Master's degree in science, specializing in industrial engineering from Louisiana Tech University

**Raja Sheker Bollampally , *Chief Operating Officer***

- Responsible for leading the day to day operations in the company (w.e.f Apr 23)
- 23 years of experience in operations including engineering concept design, manufacturing process development, program management, and strategic vendor development in Clean Energy & Automotive sectors.
- Worked in reputed Companies – Bloom Energy, Ohmium, Ford Motors etc

**Gunneswara Rao Pusarla – *Chief Financial Officer***

- Responsible for leading the financial operations in the company
- 23 years of experience across finance spectrum in strategic planning, P&L management, fund raising, financial accounting, and setting up green field projects.
- previously associated with Tata Sikorsky Aerospace Ltd for a span of 11 years

**Pusparaj Satpathy, *Vice President, Human Resources***

- Responsible for the HR development
- 24+ yrs. Of experience in human resources
- Previous organisations - Century Enka Ltd., Hindustan Zinc Ltd. and Hindalco Industries Ltd.
- Alumnus of Jaipuria Institute of Management, Lucknow

**Praveen Kumar Reddy - *Executive Director***

- Responsible for heading business development in the organization
- Has worked with the company for 20+ years in various functions including operations, supply chain and business development
- Bachelor's degree in engineering from the Faculty of Engineering, Andhra University

**Tata Madhusudhan, *Head SCM***

- Worked in reputed global organizations including BOF Steel Melt Shop, Bhilai Steel Plant, Global Steel Holdings Ltd, Adhunik Metallics Limited, Arya Iron & Steel Company Pvt Ltd, Jindal Shadeed Iron and Steel Llc, Al Arkan Holdings Company Llc, Moon Iron and Steel Company
- Responsible for handling supply chain function in MTAR

**Anushman Reddy - *Executive Director***

- Responsible for heading exports division in MTAR
- Nearly eight years of experience in manufacturing
- Holds Master's degree in global supply chain management from Marshall School of Business (University of Southern California), and Executive post graduate diploma from Narsee Moinjee Institute of Management.

**Shubham Sunil Bagadia, *CS and Compliance Officer***

- Responsible for ensuring compliance with statutory and regulatory requirements
- Member -Institute of Company Secretaries of India

**A leader in critical and differentiated  
engineered products**

## **A leader in critical and differentiated engineered products**

**Wide Portfolio of Products**

**Serving Multiple Sectors + Segments**

**Multiple Companies entrust MTAR**

**Diversity in Supplier Base**

# Wide Product Portfolio

Rocket engines

Healthy mix of developmental versus volume-based products

Hot boxes

Rotor Mast Bearing Housing - Titanium

Mix of regular (less complex) products versus highly complex assemblies

Control Plug for Reactor

Precision machined components

Manufactures small products to large products (few gms to tons)

Bridge & Column

Roller screws

Manufactures import substitute products which have application across industries

Ball Screws

**Wide portfolio of critical and differentiated engineered products with a healthy mix of developmental and volume-based production, customized to meet the specific requirements of its customers**

# Serving Multiple Sectors + Segments

FY21

Sectorwise Break-up

FY22

Sectorwise Break-up

- Nuclear
- Space
- Defence
- Clean Energy
- Products & Others

Has developed **wide product portfolio** catering to diverse sectors

**Export contributor >60% of FY22 revenue** has been derived from orders by customers located outside India

FY21

Geographical Break-up

FY22

Geographical Break-up

- Domestic
- Export

# Multiple Companies entrust MTAR

## Large MNCs

### Bloomenergy

Elbit	Andritz Hydropower	Kongsberg
Rafael		

Long standing relationship with large MNC's, Government Departments and Large Indian Public and Private sector companies

- Strong relationship with a multitude of global defence, space and clean energy players- both state-owned and private
- Strong repeat business due to MTAR's engineering capability

Long term relationships

## Government Departments

ISRO	Defence Research and Development Organisation
Indira Gandhi Centre for Atomic Research	
Aeronautical Development Agency	Liquid Propulsion Systems Centre

- Ability to provide exceptional quality products as per customer specifications
- Consistent customer servicing standards
- Continuous learning adopted to reduce cost to customer over time ex. Bloom energy

High customer dependence

## Indian Companies

Nuclear Power Corporation of India Limited	HAL
BHEL	TASL
	Bharat Dynamics

- Strive to understand our customers' business requirements and provide products that maximize their returns
- Develop leadership in key product segments

Customer understanding

# Diversity in Supplier Base

## Established long term supplier relationship

- Ensures quality raw material within prescribed timelines.
- No long term contracts yet managing consistent supply of materials due to long standing relationships
- Enables better insight on the raw material markets, which helps in managing the supply chain, resulting in greater predictability of supply and, consequently, a greater ability to meet production schedules

## Large & diversified supplier base

- Maintains robust database of suppliers with constant engagement to ensure material availability options
- Created a global supplier base over the years and procures materials from US, Brazil, Europe among others
- Low supplier dependency on account of the diversified supplier base, which also enables negotiation of favorable terms
- Global network provides the option to take advantage of better pricing as available in a particular market

## Ability to source specialized materials

- Developed a robust supply chain for sourcing of wide variety of specialized raw materials . Select Eg. Include:
- Specialized steels (17-4 PH, SS 410, 13-8 MO PH) for the nuclear sector; Alloy steels and aluminum including bearing and seals for space and defence clients, Inconel sheets of various grades for clean energy clients
- Select clients (mostly Space & Defence) directly procure & supply raw materials given the sensitivity of the end projects

## Stringent quality checks

- Company performs extensive evaluation on their ability to provide quality products in a timely manner
- Stringent vendor qualification process, which enables to keep a periodic check on suppliers with regard to the quality of materials supplied and corresponding prices
- In place stringent inspection of raw materials to check their tensile strength, surface finish, resistivity, among others given the criticality of the products

**A leader in critical and differentiated  
engineered products**

**Projects of Pride, Glory & Prestige**

**Advanced Manufacturing Capabilities**

**Technology & Innovation Capabilities**

**State-of-the-Art Manufacturing Facilities**

**End to End Manufacturing Capabilities**

# Projects of Pride, Glory & Prestige

Manufactures hi-precision indigenous components, subsystems, assemblies for projects of National Importance

Supplied engine for the PSLV-C25, which launched the Mars Orbiter Mission Spacecraft

Integral for the GSLV Mark III engine for the Chandrayaan II mission

# Advanced Manufacturing Capabilities

## Legacy

Legacy of over **50 years of manufacturing** a wide range of mission critical precision components and assemblies with currently over **145 engineers on roll**

## Engineering

Ability to manufacture within **5-10 micron tolerance** product through precision machining, assembly, specialised fabrication, heat treatment, surface treatment and others

## Manufacturing

**State of the art manufacturing** facilities with over 400 machines capable of micron level adherence to specifications across products

## R&D

Extensive R&D for **cycle time reduction**, development of manufacturing processes & design specifications to achieve accuracy irrespective of size

## Quality Control

Extensive & stringent testing & quality control mechanism undertaken at each stage through high precision quality inspection equipment

### Case Study #1

#### Precision Engineering Solutions

- ✓ Product example: Liquid Propulsion Engine
- ✓ End use: Space Vehicles

### Case Study #2

#### Complex Product Manufacturing

- ✓ Product example: Fuel Machining Head Assembly
- ✓ End use: Nuclear Reactor

- Used in space launch vehicles for various space missions such as **Chandrayaan-II and Mangalyaan**
- Engine is used in the **GSLV** launch vehicle

- Manufacture and assembly of **600 components**
- FM Head is used for handling fuel bundles in nuclear reactors

**High Entry Barriers**

**Increased customer dependency on MTAR**

**Long standing Client relationship**

# Technology & Innovation Capabilities

## Manufacturing Capabilities

- 400+ Total machines
- 100+ Conventional / CNC Turning machines
- 60+ Milling / CNC milling machines

## Manufacturing Units

- 7 manufacturing units including an EOU

## Advanced Machinery

- High end machines like 7 axis mill-turns, 5 axis VMC, 3D CNC CMM etc.

## Quality Manpower

- 448 staff, 772 workmen and 427 third party contractors
- Experienced business heads with in-depth technical & industry knowledge
- Average tenor of 15 yrs with low attrition rate

## Strategically located

- Plants located in proximity to major defense organizations
- Provides R&D, high volume projects access
- Ease of coordination

## Flexibility

- No dedicated production lines for products
- Flexibility to allow maximum utilization
- Wide range of products manufactured from few kgs to several tons

## Engineering capability

- In house development of special purpose machines
- SPM 99, Gantry SPM machines manufactured in house instead of importing similar machinery at higher cost

## End to end capabilities

- End to end In house capabilities of developing customized high quality complex products for customers

# State of Art Manufacturing Facilities

Units	Products manufactured	Sectors catered	Facilities offered
Unit 1	Complex nuclear assemblies & high end defence products such as base shroud assembly for Agni missiles	Nuclear, defence and aerospace	Advanced computerized numerical control, machining & QC
Unit 2	Liquid propulsion engines, cryogenic engines, semi cryo engines and electro pneumatic modules used in PSLV and GSLV and satellite valves	Space	Advanced CNC machining, assembly, specialized fabrication, QC and testing
Unit 3	High volume nuclear assemblies such as coolant channel assemblies including end fittings, liner tubes, sealing and shield plug; products such as ball screws and WLBs and other nuclear site orders	Nuclear, defence and aerospace	Advanced CNC machining and quality control
Unit 4	Supporting unit which undertakes rough machining	-	Rough machining
Unit 5	Supporting unit which undertakes surface treatment such as nitriding, anodization and heat treatment such as gas carbonizing	-	Surface treatment, heat treatment and special processes
Unit 6	Supporting unit with fabrication facility and large clean rooms	-	Assembly
EOU	Power units for supply to Bloom Energy and high end defence components to be supplied to an Israeli defense technology company	Clean energy and export defence	Advanced CNC machining, Brazing, assembly, special processes such as painting, and QC

## Accreditations

ISO 9001:2015

AS9100D

## Capex (Rs. Crs.)

# Manufacturing Facilities

## High End Machinery

## Assembly, Testing and Clean rooms

## Specialized Fabrication facilities

## Surface treatment, heat treatment, Painting

# End to End Manufacturing Capabilities

## Machining

- Manufacturing of precision components with close tolerances to the extent of 5-10 microns supported by
  - ✓ series of high-end machines such as 7 axis Mill-turns, 5 axis vertical machining centers (“VMCs”), 4.5 axis machining centres
  - ✓ milling centres, turning centres, grinding centres
  - ✓ tool room machines, deep hole boring and honing machines, among others;

## Assembly and Testing

- Assembly and testing capabilities are supported by
  - ✓ 10,000 class clean rooms and 100 class laminar table with facilities for high as well as low temperatures
  - ✓ undertaking vibration, flow and helium leak tests

## Surface & Heat Treatment

- Surface treatment activities such as - nitriding, anodization, hard chrome plating, nickel plating, induction hardening, electro polishing, pickling, passivation, zinc plating and painting, among others
- Heat treatment such as - gas carbonizing, through their various furnaces
- Special processes facilities such as - painting and plating are also available in-house

## Specialized fabrication unit

- Equipment to undertake
  - ✓ automatic tungsten inert gas (“TIG”) welding, metal inert gas (“MIG”) welding, submerged arc welding, welding head manipulator
  - ✓ job manipulator / positioner, electron-beam (“EB”) welding, orbital welding
- Specialized fabrication jobs - May be taken up by Vacuum brazing furnace and rotary vacuum brazing furnace

.....  
**A leader in critical and differentiated  
engineered products**

**Three Decades in Precision Engineering**

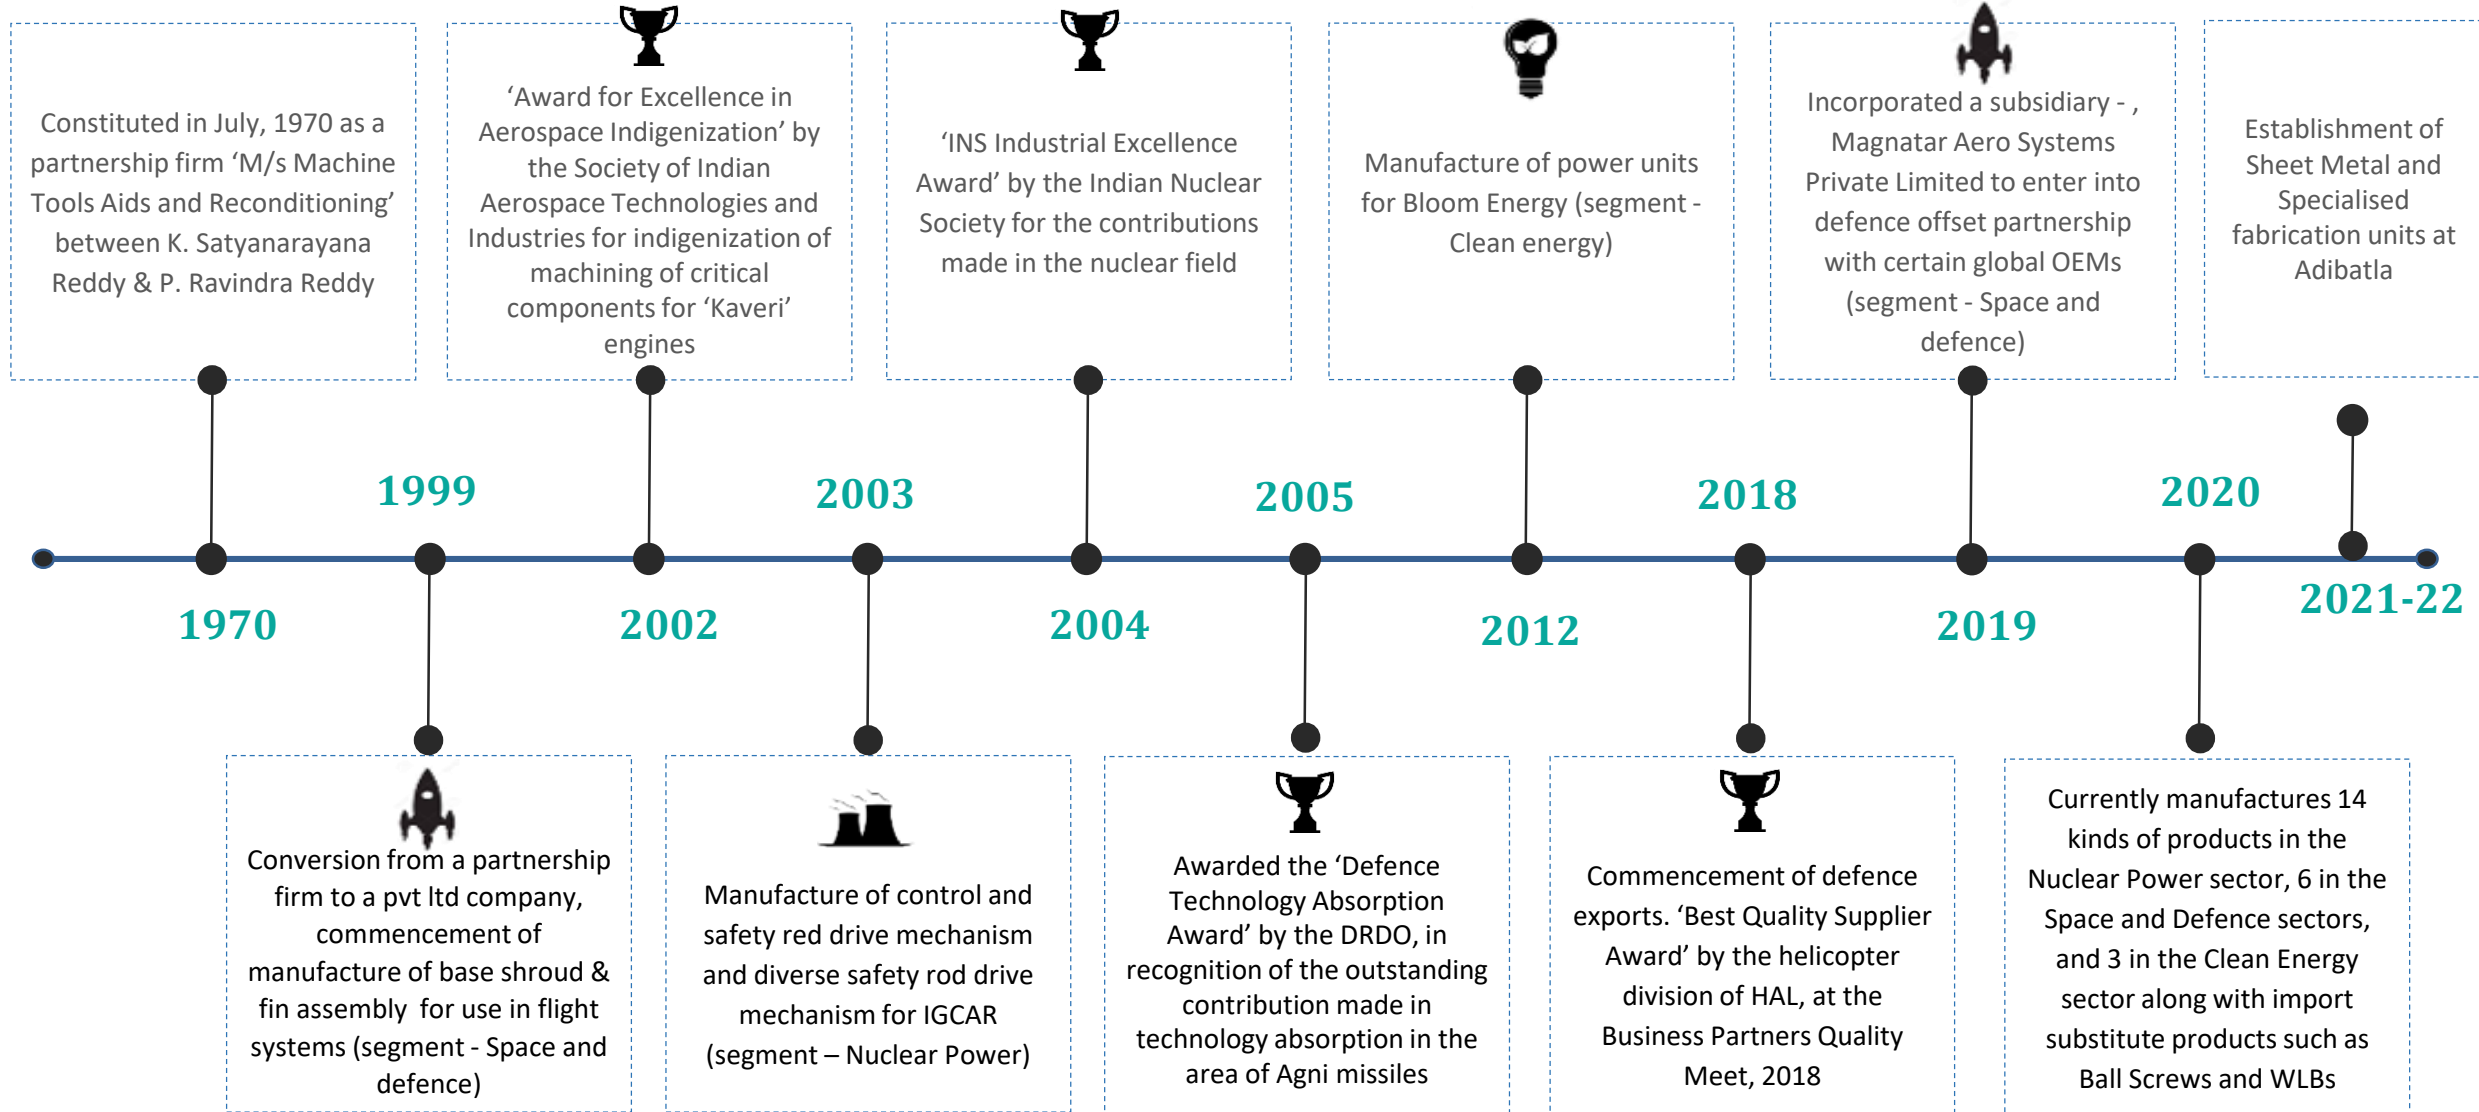

**Product Offerings - Nuclear Power**

**Product Offerings - Space & Defense**

**Product Offerings - Clean Energy**

# Three Decades in Precision Engineering

# Awards & Certifications – FY22

**ISO 14001 & ISO 45001 Certification**

Received ISO 14001 & ISO 45001 certification for its **100% Export Orient Unit (EOU) and Unit 2** for a period of 3 years, valid until March 2024, for **manufacturing of precision engineering components & assemblies** for Aero Space, Energy & Defence Applications

**NADCAP Certification**

Received NADCAP certification for its **100% Export Orient Unit (EOU) and Unit 5** for a period of 12 months, valid until November 2022

**National Level Champion Award**

Received National Level Champion Award from **Society of Indian Defence Manufacturers (SIDM)** under **Import substitution** for Mission Critical Parts/Systems/Sub-systems medium category for Ball Screws

**Ball Screws are the highly complex import substitutes** that are used in various mission critical assemblies including nuclear island assemblies, motion control actuation systems in Missiles and Launch Vehicles in Civil Nuclear Power, Space & Defence sectors

# Product Offerings – Nuclear Power Segment

## Nuclear Sector Products

### Fuel Machining Head

Comprises of 600 components; Used in loading & unloading of fuel bundles in nuclear reactor

### Grid Plate

Used for resting the fuel sub-assemblies in prototype fast breeder reactor

### Bridge & Column

Moves fuel machining head in sideways and vertical directions to allow loading and unloading of various fuel bundles in the nuclear reactor

Shield Plug

Sealing Plug

Liner Tube

### Coolant Channel assemblies - Sealing Plug, Shielding Plug, End Fittings

Used in the core of civilian reactor

### Drive Mechanisms

Critical equipment used for regulating purpose and shutdown of nuclear reactors under normal and undesirable operating conditions

### Top hatch cover beams and deck plate assembly

Requires high positional and dimensional accuracies

**High criticality** of products given safety requirements

**35+ years** of serving customers in Nuclear sector

**14 kinds of products** for a wide range of applications

**Partnered with NPCIL** which controls all operational, under construction and planned reactors in the country given India does not allow private participation

# Product Offerings – Space and Defence

## Space & Defence Sectors

**Base shroud assembly and air frames**  
Used in Agni missiles such as A1, A2 A3, A4, A5, A1 P.

**Components for Aircraft**

**Main Gear Box – Magnesium**

**Titanium Center Piece**

**Sukhoi – HPC Shaft Nickel Alloy**

**Control Manifold HAL Tejas**

**Ball Screws**

**Ball screws and Water Lubricated Bearings**  
Import substitutes used in actuators of nuclear reactors, space launch vehicles, missiles etc.

**Roller Screws** (under development) - Used in various assemblies in missiles, space launch vehicles and nuclear reactors

### Components for Geosynchronous Satellite Launch Vehicle (GSLV)

**Cryogenic Engine - Turbo Pump, Injector Head, Gas Generator, Booster Pumps, Interfaces And Start Up Systems**

**POGO Command Module**

← Stage 3

→ Stage 4 – Inside Satellite

→ Stage 2 - 4 Nos.

→ Stage 1 - 4 Nos.

**Liquid Propulsion Rocket Engine (Vikas Engine)**

**High precise, reliable & complex** product requirements

**30+ years** of serving customers in Space & Defence sector

**6 kinds of products** for a wide range of applications

**Existing relationship with ISRO** procurement & assembly of satellites and launch vehicles and **with DRDO** which is the R&D organization focused on military technology

## Clean Energy Sector

Existing Product Supplies

- Fuel Cell Products
- SOFC Hot boxes - Use methane to generate power

Under Development and manufacturing

- MTAR is developing the following products in collaboration with Bloom to expand its product portfolio in clean energy sector:
  - Hydrogen boxes- Use Hydrogen to generate power
  - Electrolyzers - generate green hydrogen from water that shall be used in power units to generate power with zero carbon emissions
- Establishment of sheet metal vertical at Adibatla unit to cater to Bloom Energy and other customers

**9+ years** of strong partnership with Bloom

**Existing product** in high demand, **new products** under development for the Clean Energy sector

**Only supplier to Bloom from India as of FY22.** Bloom is one of the largest and the fastest growing player globally in the stationary hydrogen fuel cell segment and has 70% of its revenues coming from products segment and balance from services

# **A leader in critical and differentiated engineered products**

**Looking Ahead**

**Industry Opportunity - Nuclear Power**

**Industry Opportunity - Space & Defense**

**Industry Opportunity - Clean Energy**

**Strategic Roadmap for Sustained Growth**

# Looking Ahead

- Power demand in India to grow at a **CAGR of 3-4% over the next 5 years**
- India plans to nearly **double its nuclear capacity from 6.26 GWe to 11.5 GWe**
- Further plans to augment India's nuclear capacity by **10.5 GWe in the medium to long term**
- Govt has **sanctioned 14 fleet reactors, with a combined generation capacity of 7,000 MW**
- Under **Govt's 'Atmanirbhar Bharat' initiative**, a policy to construct a fleet of reactors with a single timeframe which will increase opportunities for domestic suppliers like MTAR
- **Large** refurbishment and maintenance market which is expected to increase by 1.6x

- **ISRO Plans for next 2 years** : 31 satellite missions/ 32 launch missions
- Future missions include- Chandrayaan-3, Gaganyaan (human spaceflight mission), Aditya-L1 (proposed mission to study the Sun), and a new port in Tamil Nadu for SSLVs
- Over the next five years, the **private sector will receive the mandate for ~70%** of all the upcoming space missions

- **Defence FDI Policy 2020** – FDI limit increased from 49% to 74% under automatic route for items with 50% indigenous production
- **DAP 2020** - 101 banned Defence import items for which only Indian Companies shall be eligible for bidding
- **Indigenization of 108 systems and sub-systems** that include mini and micro UAVs, ROVs, uncooled NV-IR sights for weapons (short-range), mountain footbridge, floating bridge (both metallic), mines laying and marking equipment

- **Government targets for clean energy**, budgets allocations, and incentives are the strongest driver for fuel cell market
- **Hydrogen is emerging as a clean solution** that can help curb carbon emissions globally and many countries are taking an active approach by implementing hydrogen-focused strategies and investments
- **Europe, USA, South Korea and Japan** are regions with the strongest government support in the field of fuel cells
- In India, **Bloom Energy signed an MoU with GAIL** to deploy fuel cell technology by using natural gas as fuel
- **Demand of Fuel Cell EVs** to increase given Fuel Cells can be refueled, which is considerably faster than recharging.
- Fuel cell system are highly reliable in emergency situation and can be used effectively for **power backup technology**
- Application in niche sectors such as **marine and aviation**

## Nuclear Segment

## Space and Defence

## Clean Energy

# Industry Opportunity – Nuclear Power

Net nuclear power capacity target of 26.2 GWe by 2031	# 22 Operational Reactors – Capacity of 6.3 GWe	Additional # 7 Reactors to be operational in next 5 years	# 14 New reactors planned and tenders to be released	NPCIL is the key entity managing all nuclear reactors in India	Government is also taking steps for development of Small Modular Reactors (SMR) with up to 300 MW capacity to fulfill its commitment to Clean Energy transition
---	---	---	--	--	---

In India, NPCIL controls all the operational, under construction and planned reactors in the country and MTAR has a relationship of 16+ years with NPCIL which has created entry barriers for other players

# Industry Opportunity - Space and Defence

ISRO Successfully completed 118 spacecraft missions and 78 launch missions	ISRO Conducted 14 missions in FY19 and more than 11 missions in FY20	ISRO is the key entity spearheading India's space programme	Armed forces likely to spend Rs. 4,000 Bn over next 5 - 7 years	Defence exports grew at 82% CAGR to Rs. 91 Bn over the past 3 - 4 years	Satellites launches by ISRO are expected to increase in Mar'23 and beyond
--	--	---	---	---	---

**MTAR will benefit from the strong expected growth in India's space and defence budgets along with its 30+ years strong relationship with ISRO and 40+ years strong relationship with DRDO**

# Industry Opportunity - Clean Energy

- Renewable accounts for 26% of global electricity generation
- Fuel cell market growing at 15% CAGR with increased R&D
- Fuel cells are able to produce electricity with near zero greenhouse emissions
- Bloom is a key player globally in the fuel cell technology
- 45% CAGR in Bloom's operating revenues from 2017 to 2019
- Subsidies have been announced by developed Nations for production of Green Hydrogen to support the hydrogen economy

Bloom is one of the largest and amongst the fastest growing players globally in the fuel cell segment. MTAR has a 11+ years of strong relationship with Bloom & will start manufacturing more products for them like Hydrogen boxes and electrolyzers

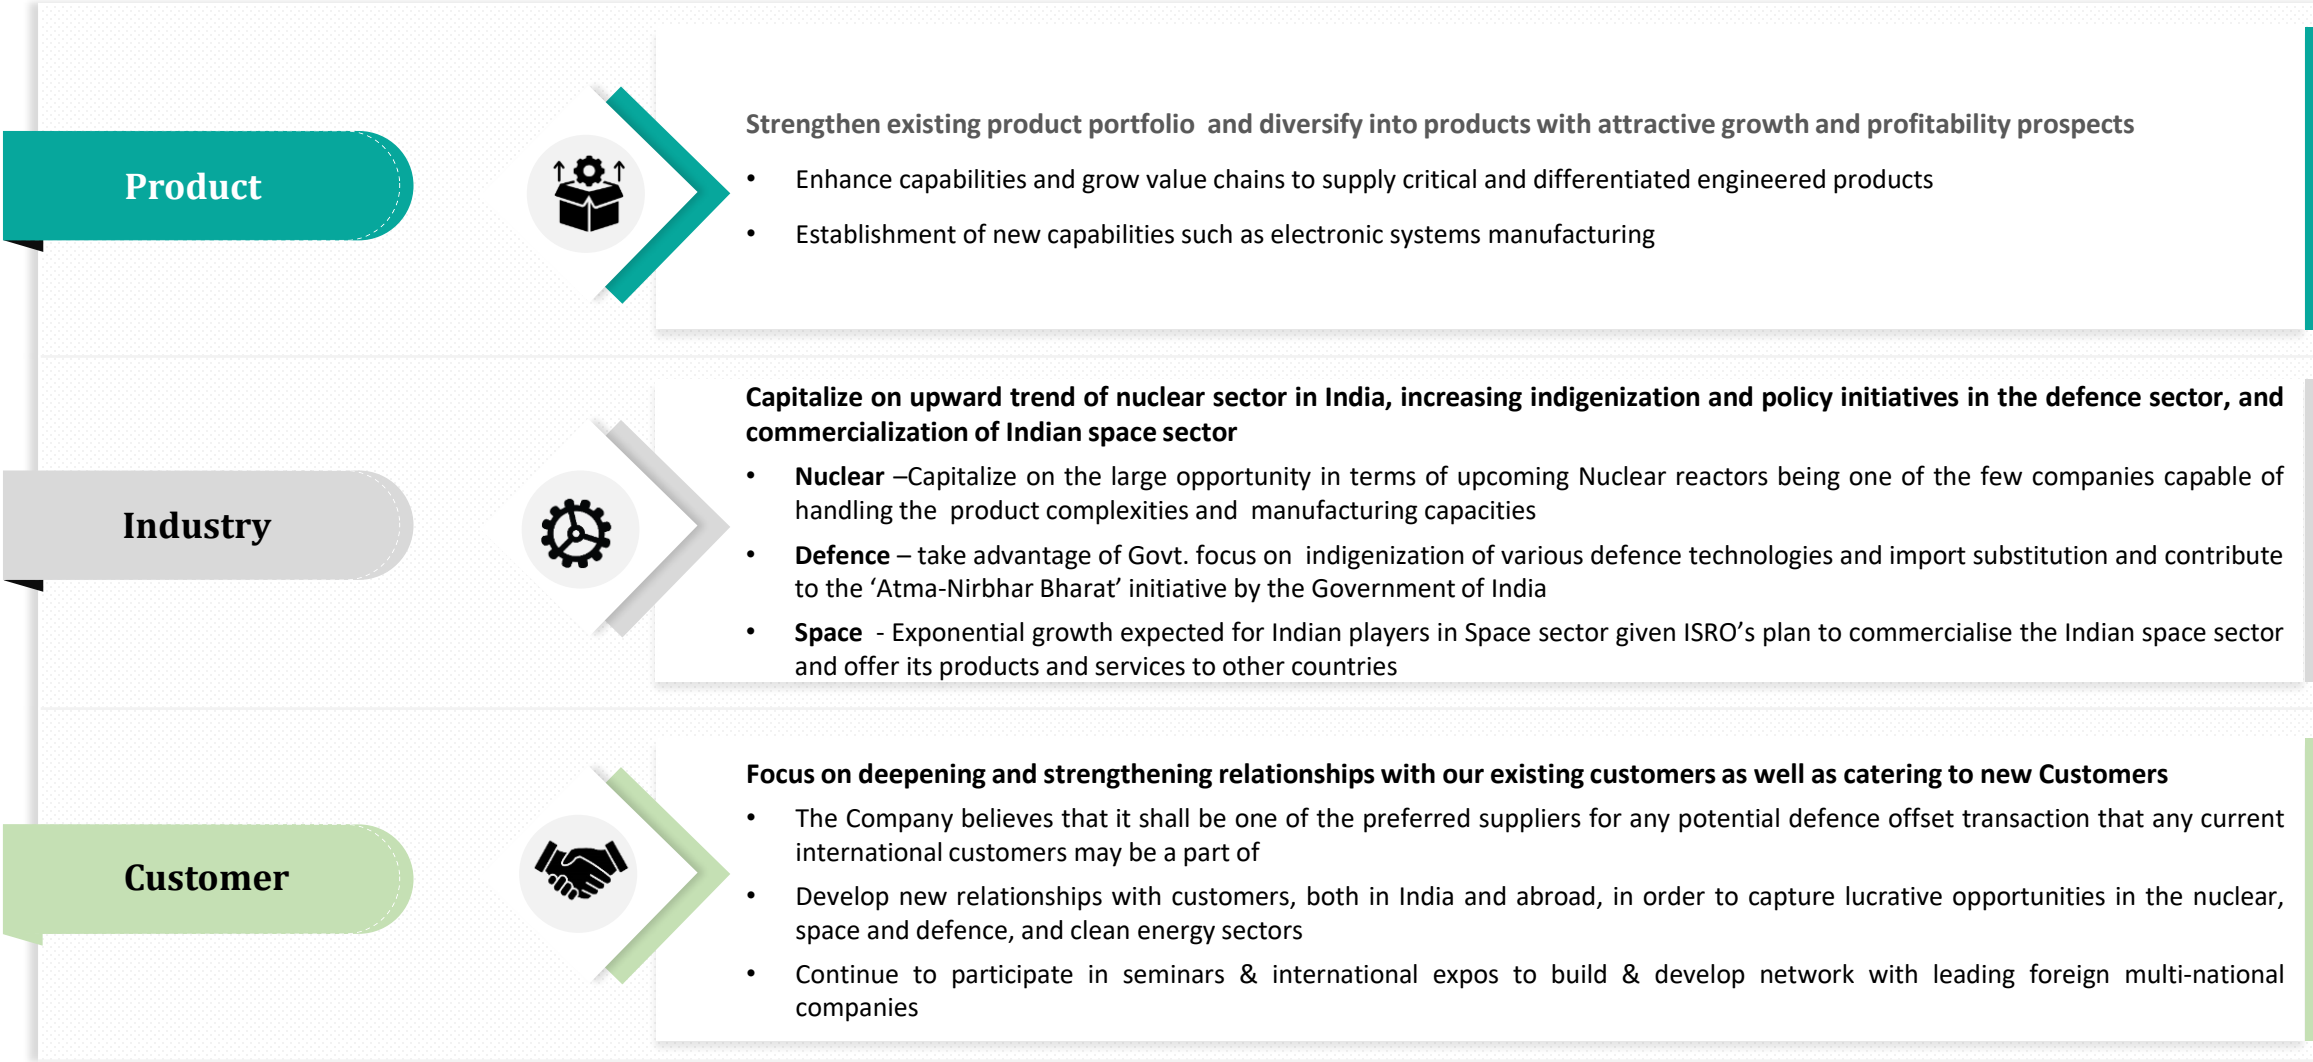

Growing Bloom business augurs well for MTAR

Company (\$ mn)	Product revenue (2019)	Product revenue share	Product Revenue CAGR *
Bloom Energy	557	71%	29%
Ballard Power	50	47%	53%
Fuel Cell Energy	-	1%	99%
Plug Power	150	65%	35%
SFC Energy	65.5	100%	-

Source – Crisil Report  
 \* Pertains to CAGR of 2017 - 2019

# Strategic Roadmap for Sustained Growth (1/2)

# Strategic Roadmap for Sustained Growth (2/2)

## Exports

### Expand international presence including through increase in exports

- Continue to expand international operations to enhance global presence in the sectors we currently cater
- Growth in support for Hydrogen based clean energy solution along with expansion plans of Bloom Energy outside of US in South Korea, provides a significant opportunity
- Looking to enter into defence offset partnership with certain global OEMs and have incorporated a Subsidiary, Magnatar Aero Systems Private Limited in this regard
- Acquire more international customers in Clean Energy segment

## Engineering Capabilities

### Grow our manufacturing capacity and increase market share through organic and inorganic routes

- Upgrade existing facilities by implementing new technology and releasing release bottlenecks in production capacity
- Selectively look at inorganic opportunities to enhance engineering competence, increase market share, achieve operating leverage in key markets and strengthen cost competitiveness in the market

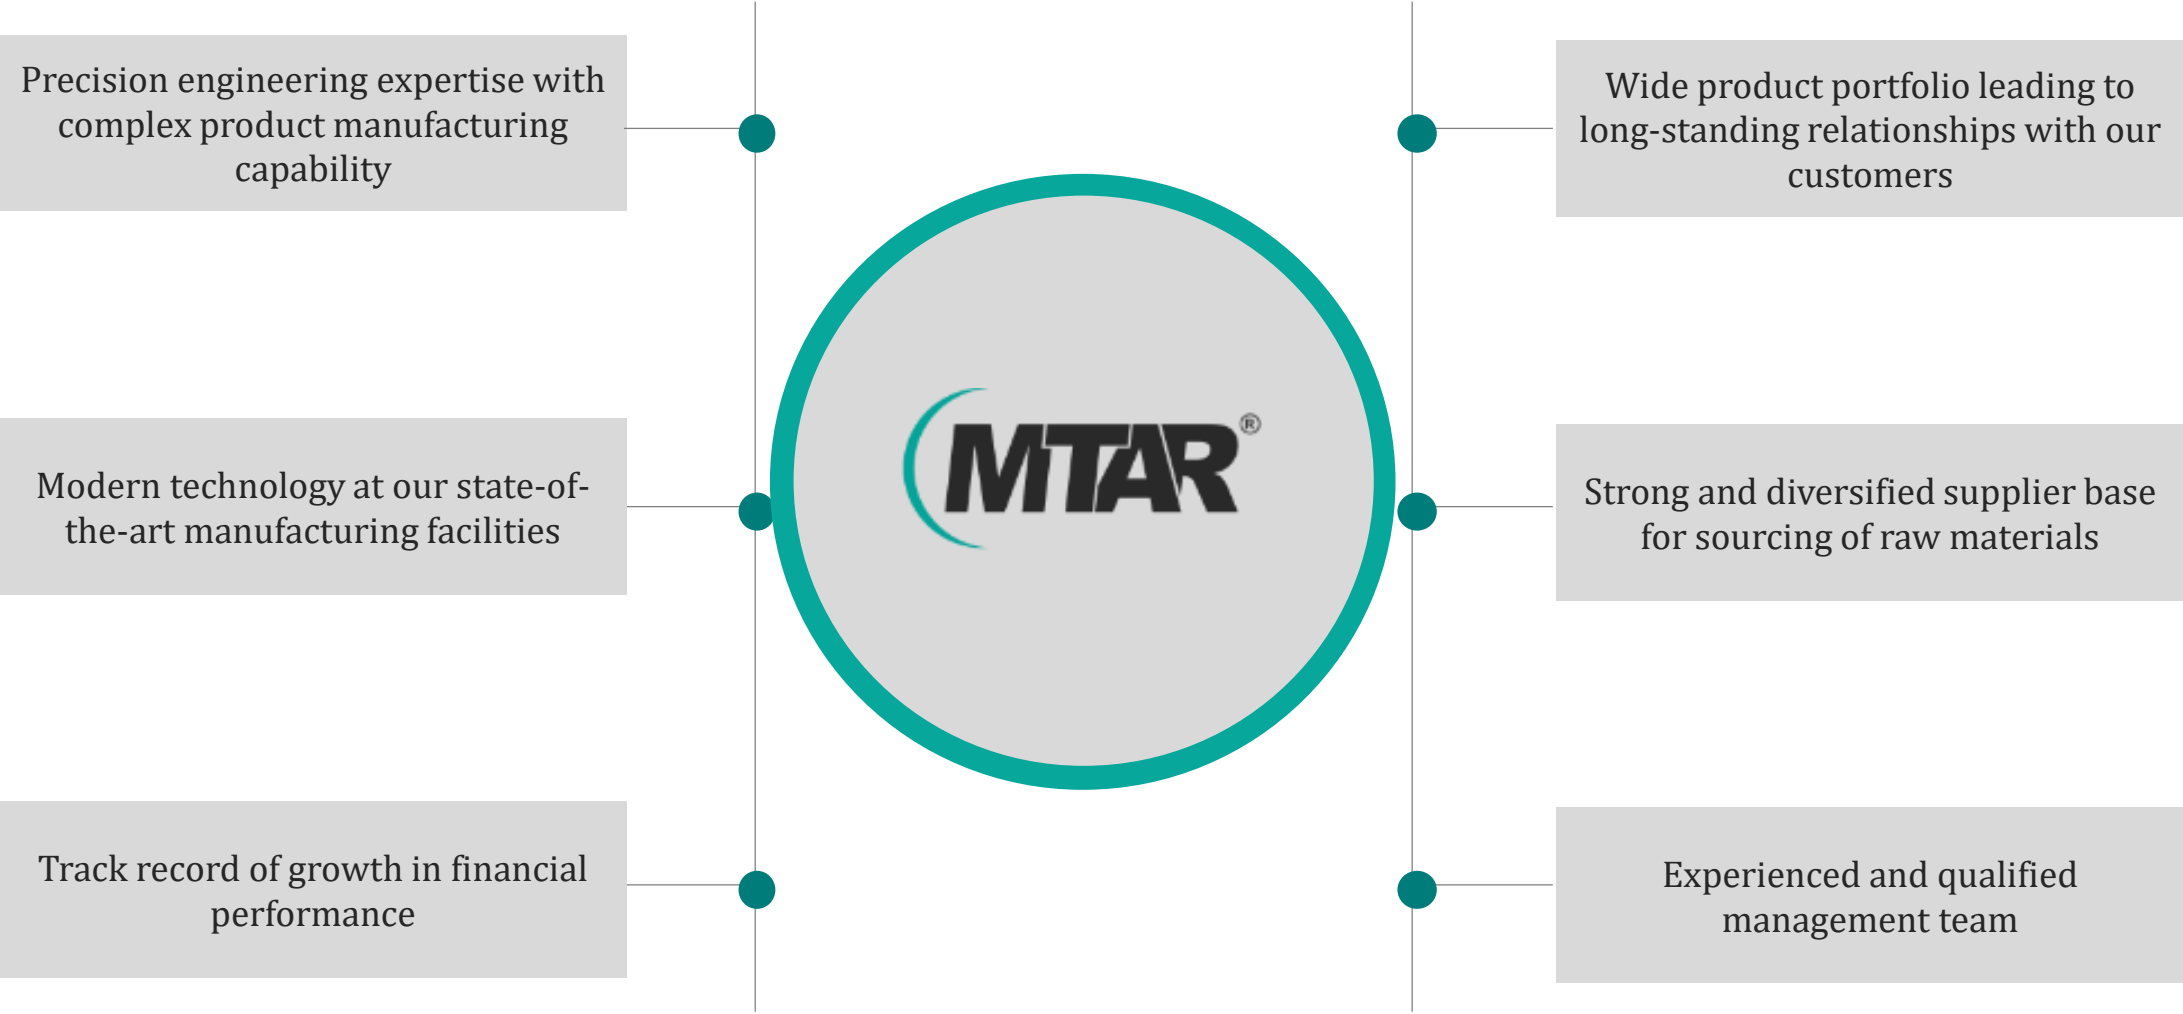

## Operational Efficiencies

### Continue to strive for operational efficiencies, supply chain rationalization and effective planning

- Continue to maintain or improve upon benchmarks for cost structure through economies of scale, employment of earnings acquired in manufacturing end components, and a robust supply chain for sourcing of raw materials
- Cycle time reduction by adopting advanced technologies, thereby increasing capacity to undertake more number of projects
- Leverage technology for effective utilization of machinery through digital solutions

# Key Meeting Takeaways

Thank You
