The most apt definition of **Corporate Social Responsibility (CSR)** has been put forward by the "United Nations Industrial Development Organization (UNIDO)" and it is as follows.

“ Corporate Social Responsibility is a management concept whereby companies integrate social and environmental concerns in their business operations and interactions with their stakeholders. CSR is generally understood as being the way through which a company achieves a balance of economic, environmental and social imperatives. ”

*“CUB CSR -
A Continuing Social
Journey aiming at
Sustainability”*

Our ancestors laid down as a dictum that one should not live in a place where there are no temples (கோவில் இல்லா ஊரில் குடி இருக்க வேண்டாம்). It is fortunate that CUB operates in a town which is popularly called the "Temple City of Tamil Nadu" surrounded by good number of ancient temples. Further, the famous holy event 'MAHAMAHAM' is celebrated once in 12 years here, the last being held during the year 2016. The town is located in the district of Thanjavur which is known as "Granary of

Tamil Nadu". Taking all these into account CUB dedicated itself to several measures for the improvement of Agriculture viz. water conservation, de-silting activities etc. Further, your Bank being a century old Bank understands and respects the cultures, values and a tradition inherited from previous generations and is keen on the protection of heritage structures of archaeological importance. Your Bank keenly supports and contributes towards the Swatch Bharath Mission promoted by the Govt. of India.

CUB's Environment Care Initiatives

WATER CONSERVATION & MANAGEMENT

There was a time Kumbakonam and all its surroundings were replete with water resources but over a period they have become dry and today the ground water level is on a declining trend and farmers have to depend on borewells for their irrigation needs. The year 2016 was a significant year for Kumbakonam town on account of "Mahamaham" - The Kumbh Mela of South India. As a key community member, the Bank as part of promotion of top objectives of Niti Aayog of the Govt. of India, took the initiative to conserve soil and water in and around Kumbakonam region to have a greater positive impact on the lives of people.

In order to conserve water resources, the Bank has implemented important projects for cleaning, desilting and deepening of various lakes such as Watesamangalam, Valampiran, Semmangulam, Kizhapattu, Edannavalas and Paruthikottai in association with the Cauvery Delta Farmers Association and also in the presence of well known waterman Shri Rajendra Singh of Rajasthan, thereby facilitating the free flow of surplus water into the Bamini River Bed in Mannargudi District.

These initiatives bore rich fruits even before its full completion and with the advent of bountiful rains it not only helped in retaining water and filling up the lakes but also assisted in draining the surplus water into the Bamini River, thereby preventing floods and enabling the

celebration of water festival in Tamilnadu i.e., "ஆடிப்பெருக்கு" in the year 2017 in those areas after many years. The Bank also undertook desilting of water tanks near Kumbakonam so as to get the benefit of improved water level in and around nearby areas.

The Bank recharged / cleansed various ponds and tanks in Kumbakonam viz., Seikulam, Banadurai, Cauvery Baghwat padithurai (footsteps), Pidarikulam, Pachayappa tank, Biragithoppu tank etc., in order to conserve the water level and soil quality. In addition, the Bank has constructed and renovated water tanks in various temples and residential areas around Kumbakonam for the welfare of the society.

The positive effect of the CSR initiative was felt by the public after the rain during Nov-Dec 2017 thereby increasing the level of water in such canals / water bodies. The Bank received warm appreciation from various stakeholders.

Your Bank has also contributed towards creation of percolation ponds, repair of check dams, bunds formation and cleaning up of the supply channels at Kumaran Kuttai, located in Karadimadai Mathampatti Village - Coimbatore, in association with the Rotary Club of Coimbatore, Metropolis Trust and "Siruthuli" an NGO

involved in public service. This has helped to restore 35 lakhs cubic feet of water which has proved to be immensely useful to the farmers for increasing their agricultural output and recharge of groundwater levels. This project titled as "Kumaran Kuttai" which commenced in June 2017, paved the way for implementation of watershed concepts including agro-forestry. The existing seven check dams were repaired wherever necessary and further strengthened. The check dams are used as surplus weirs for each percolation ponds. Existing supply channels were cleaned and run-off water was diverted from elephant proof trenches (EPT) to the supply channel.

Major Impact:

- Stagnation and Percolation of Rain Water in addition to preventing soil erosion.
- Recharge of Ground water table.
- Waterhole for domestic and wild animals.

Public Health projects in and around the town. Your Bank financially aided a "Solid Waste Recycling" project at Karikulam, Thanjavur Dist., where solid wastes had been dumped for over 23 years covering 12 acres of land.

“From Solid Waste to Renewable Energy”

Solid Waste Management System was almost absent around the town which resulted in landfills and heaps of unattended waste. There arose an emergent need to prevent hazardous issues confronting the public and the environment as a whole. The process of solid waste management involves the conversion of the waste into bio-gas which helps in generation of power.

ADVANCES

(₹ in Cr)

Asset Quality

During the year the Banking industry witnessed turmoil on asset quality and NPAs were on the rise. However, your Bank resorted to constant monitoring of advances to reduce slippages and speeded up its recovery process to reduce the NPA level. The Bank continued to concentrate on lending to MSMEs especially of small ticket loans.

The Bank has fourteen Credit Processing Centers covering almost all branches. A thorough credit appraisal is done at these centers before final clearance is issued by the Administrative office. Thus the marketing approach, rigor in credit evaluation and the managers' intimate knowledge of customers - all help in keeping your Bank's level of NPA moderate.

The year 2017-18 witnessed tremendous changes in bond yields. As the effects of demonization began to fade away during the last quarter of previous year, yield on benchmark security stabilized at 6.80% levels. During the first half of financial year 2017-18, implementation of GST and rate cut by RBI resulted in a market rally with the benchmark yield settling at 6.50%. However, during the second half of the financial year, bond yield turned bearish following few significant national and international events. Global cues were also weak on account of geopolitical tensions in Korean peninsula and increasing crude prices. The benchmark yield closed at 7.41% as markets cooled down after the Government announced lower borrowing in first half of next financial year.

It is noteworthy to mention that during the times of hardening of the bond yield the Bank had earned ₹ 94 crore by timely booking of profit in Government securities as compared to ₹ 108 crore in last year. The average yield on investments decreased to 6.95% in the current financial year from 7.23% in the previous year.

Forex Treasury

Indian Rupee witnessed a volatile movement during the financial year 2017-18. USD-INR opened at 64.80 and closed at 65.17 after touching a high of 65.90 and low of 63.24 during the period. Indian Rupee strengthened in the middle against USD on account of weak economic and political indications in both USA and Europe. However, towards the end of the financial year, Rupee lost most of its gains as the result of bearish trend in Domestic Markets and tensions over trade war between USA and China. By judiciously dealing with volatility, the bank earned a profit of ₹ 9.17 crore out of the total exchange profit of ₹ 64.95 crore.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

Economic Scenario:

Global

During the FY 2017-18 the Global economic scenario witnessed improvements in economic growth across emerging and developed markets besides wide support from the US, Europe and Asian economy. Economic activity in major market economies continued to show improvement.

World's largest economy, the US entered ninth straight year of growth during 2017 (2.3% compared to 1.6% in 2016). The IMF as per World Economic Outlook - April 2018, cited expectations on annual growth in global GDP to have expanded by 3.8% in 2017, which is a significant progress from 3.2% in 2016.

In US, tightening labour market improved wage gains and sales growth. Further, domestic consumption facilitated recovery of US economy during second half of the fiscal 2018. In Japan, while depressed wages & inflation resulted in sluggish domestic demand, the weakening Yen and strong exports supported by foreign consumption helped the country to achieve a robust growth during FY 2018. The Chinese economy accelerated in the fourth quarter (October to December) of 2017 at 6.18% aided by exports.

The outlook for advanced economies, notably for the Euro area is improved, but in many countries inflation remained weak. The commodity prices continued to strengthen and the increase was due to hike in crude oil and fuel prices. The price of crude oil touched at USD \$ 64.94 per barrel as on 29th March, 2018 from USD \$50.69, prevailing a year ago on 1st April, 2017. The price further increased to USD \$ 72.83 per barrel on 22nd May, 2018 due to increase in demand from China when OPEC countries cut production.

Financial markets have been mainly driven by monetary policy expectations and geo-political developments. Equity markets performance varied across regions with modest gains in Asian economies. The stocks of major emerging markets faced sell offs on account of rising dollar and expectations of further rate hikes by the Fed. In

the currency markets, the USD touched its highest level USD\$ 68.46 as on 23rd May, 2018 since December 2017. The euro uplifted significantly against the dollar. Emerging Market Economy currencies have by and large depreciated against USD.

The price of gold and copper rose by 6% and 14% respectively during FY 2018. The base metal prices especially aluminum rose on account of US sanctions on Russia. Gold has witnessed selling pressure on a stronger dollar, but the metal gained during mid June 2018 on political uncertainty in the Euro area. While the price of oil started going up, the overall global economic performance showed signs of improvement in 2017-18.

Domestic

Indian economy during FY 2017-18 saw a moderate growth of 6.7%, a notch above the government's estimate of 6.6% but lower than 7.1% of 2016-17. One could see acceleration in the growth as the year progressed, with the Indian economy registering a growth rate of 7.7% for Q4 2018. Construction, manufacturing and agriculture sectors were the main contributors to growth in the fourth quarter. The GDP growth averaged 7.3% for the period from 2014-15 to 2017-18, the highest among the major economies and achieved through lower inflation, improved current account balance and reduction in fiscal deficit to GDP.

The year under review was marked by various structural reforms by the Government and after remaining in negative territory for a couple of years, export growth rebounded during 2016-17 and strengthened in 2017-18. The increasing trend of quarterly GDP numbers indicates that the structural reforms undertaken by the government have begun paying dividends.

During Q4 2017-18, the agricultural growth increased sharply on a quarterly basis. The estimates of agriculture and allied activities have been revised upwards supported by an all time high production of foodgrains and horticulture during the year. The Indian Meteorological department reaffirmed normal south west monsoon indicating a positive trend for the agricultural sector. Food inflation moderated for fourth successive month, pulled

down by vegetables due to lower than the unusual seasonal increase in their prices, and pulses and sugar which continued to experience deflation. However, within the food group, inflation increased in respect of cereals, fruits etc.

India's exports grew in April 2018 after a marginal dip in the preceding month, supported mainly by non-oil exports, particularly engineering goods and chemicals. Import growth decelerated sequentially in April 2018, a significant decline in imports of gold as well as pearl and precious stones more than offset the impact of rising crude oil prices. The trade deficit expanded in March and April from its level a year ago. External financing remained comfortable in 2017-18.

The industrial growth strengthened reflecting robust performance in manufacturing sector for the three consecutive quarters Q2 - Q4 2018 showing greater capacity utilization. The growth in services sector witnessed a decline on account of lower growth in some constituents' viz., trade, hotels, transport & communication and financial services. However sales of tractors and two-wheelers are improving, suggesting better rural demand. The output of eight core industries accelerated in April 2018 on account of a sharp expansion in coal production, which reached a 42 month peak. Retail inflation measured by the year-on-year change in the CPI rose sharply to 4.6% in April, driven by a significant increase in inflation excluding food and fuel

While the net foreign direct investment in 2017-18 was broadly comparable with the previous year, the net foreign portfolio flows were stronger due to a sharp turnaround in inflows. India's foreign exchange reserves were at US\$ 412 billion on 1st June, 2018.

The Second Bi-monthly policy statement by the Monetary Policy Committee (MPC) of RBI during 2018-19, increased the policy repo rate under the liquidity adjustment facility (LAF) by 25 basis points to 6.25% and consequently the reverse repo rate under the LAF stands adjusted to 6.0% and the marginal standing facility (MSF) Rate and the Bank rate to 6.5%. The MPC expressed that the economic activity of the country has shown revival signs in recent quarter. The investment activity in particular is recovering well with the advent of Insolvency

Bankruptcy Code which is a state of the art legislation. The code has replaced for the first time "Debtors in possession" system with "Creditors in possession" and provides a resolution framework that will help corporates clean up their Balance Sheets and reduce debts, ultimately reducing the stress among the Banking Sector.

Industry Structure and Developments

Private Sector Banks fared well during FY 2018 when compared to Public Sector Banks, which have been reeling under asset-quality woes over the last couple of years. As per the data released by RBI, as of March-end 2018 Private Sector Banks (PvSBs) recorded robust annual average growth in deposit and credit to record 17.4% and 20.9% respectively and all Scheduled Commercial Banks (SCBs) clocked annual average deposit and credit growth of 6.8% and 9.5% respectively. In sharp contrast, Public Sector Banks (PSBs) recorded muted annual average deposit and credit growth of 3.1% and 4.7% respectively. Aggregate deposits recorded broad-based growth (year-on-year) across all population groups (rural/semi-urban/urban/metropolitan) after moderating for two quarters, Private Banks continued to maintain double-digit growth in deposits. The Private Sector Banks recorded highest credit growth both on sequential as well as on annual basis, where it remained low for Public Sector Banks. As per the report of the rating agency "Fitch", the losses by state-run Banks have almost entirely wiped out the \$13 billion capital infusion by the Government and the situation is unlikely to improve in the current fiscal year.

OUTLOOK

The Global Banking Sector is considerably healthier now than it was 10 years ago, at the start of the global financial crisis. The largest Banks in the world have significantly improved their capital position in the years since the crisis. In recent years, the ability of Banks to maximize financial performance through growth and optimization has been hampered by regulatory change programs and compliance demands. However, the Global Banking Outlook reveals a remarkable shift in terms of evolving cyber risks. Cyber security has become the top priority for Banks in the coming year posing an array of new problems viz., finding right talents with cyber skills, integration of cyber experts into the organizations, System Audits etc.

As per RBI, India's Banking sector is sufficiently capitalized and well-regulated. The financial and economic conditions in the country are far superior to any other country in the world. Risk management studies suggest that Indian Banks are generally resilient and have withstood the global downturn well. On the technological front, the digital payments system in India has evolved as the most Fastest Payments mode as per Faster Payments Innovation Index (FPPII). However, during the FY 2018, the sector has witnessed major cyber security attacks and frauds hampering the growth of the sector and investor confidence.

Enhanced spending on infrastructure, speedy implementation of projects and continuation of reforms are expected to provide further impetus to growth. All these factors suggest that India's Banking sector is also poised for robust growth as the rapidly growing business enterprises would turn to Banks for their credit needs. The customer centric Banking through safe and secure technology has become the epicentre of Banking business. In the given scenario, your Bank believes that with the sound risk management and capital adequacy ratio it could achieve a higher share of business and profit, ably supported by sophisticated technology and motivated staff force.

3. Our responsibility is to express an opinion on the Bank's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting and the Standards on Auditing as specified under

Section 143(10) of the Companies Act, 2013, to the extent applicable to an Audit of Internal Financial Controls and both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

4. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.
5. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Banks' Internal Financial Controls System over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

6. A Bank's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A Bank's internal financial control over financial reporting includes

those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Bank; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Bank are being made only in accordance with authorizations of management and directors of the Bank; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Bank's assets that could have a material effect on the financial statements.

Inherent limitations of internal financial controls over financial Reporting

7. Because of inherent limitations of internal financial controls over financial reporting, including the possibility of collusion improper management override of controls, material misstatements due to

error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

8. In our opinion, the Bank has, in all material respects, an adequate internal financial controls systems over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31st March, 2018, based on the internal control over financial reporting criteria established by the Bank considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

3.3 Disclosures on risk exposure in derivatives**3.3.1 Qualitative Disclosure :****A. Structure and Organisation for Management of risk in derivatives trading**

Operations in the Treasury are segregated into three functional areas, namely Front office, Mid-office and Back-office, equipped with necessary infrastructure and trained officers, whose responsibilities are well defined. The Bank enters into plain vanilla Forward Contracts only to backup / cover customer transactions as also for proprietary trading purpose.

The Integrated Treasury Policy of the Bank clearly lays down the scope of usages, approval process as also the limits like the Open Position Limits, Deal Size Limits and Stop Loss Limits for trading.

The Mid Office is handled by Risk Management Department. Daily report is generated by Risk Management Department for appraisal of the risk profile to the Senior Management for Asset and Liability Management.

B. Scope and nature of Risk Measurement, Risk Reporting and Risk Monitoring Systems

Outstanding forward contracts are monitored by Risk Management Department against the limits (Counterparty, Stop Loss, Open Position, VaR, Aggregate Gap) fixed by the Board

and approved by RBI (wherever applicable) and exceedings, if any, are reported to the Board for ratification.

C. Policies for hedging and / or mitigating and strategies and processes for monitoring the continuing effectiveness of hedges / mitigants

The Bank's policy lays down that the transactions with the corporate clients are to be undertaken only after the inherent credit exposures are quantified and approved for customer appropriateness and suitability and necessary documents like ISDA agreements etc., are duly executed. The Bank adopts Current Exposure Method for monitoring the credit exposures.

While sanctioning the limits, the competent authority stipulates condition of obtaining collaterals / margin as deemed appropriate. The derivative limits are reviewed periodically along with other credit limits.

D. Accounting policy for recording the hedge and non-hedge transactions, recognition of Income premiums and discounts, valuation of outstanding contracts, provisioning, collateral and credit risk mitigation

Valuation of outstanding Forward Contracts are done as per FEDAI guidelines in force. Mark to Market profit & loss are taken to Profit & Loss account. MTM profit & loss calculated as per Current Exposure Method are taken into account while sanctioning forward contract limits to customers and collaterals / cash margins are prescribed for credit and market risks. The Bank undertakes foreign exchange forward contracts for its customers and hedges them with other Banks. The credit exposure on account of forward contracts is also considered while arriving at the total exposure of each customer / borrower.

The Bank also deals with other Banks in proprietary trading duly adhering to risk limits permitted by RBI, set in the policy and is monitored by mid office. The Mark to Market values are monitored on monthly basis for foreign exchange forward

contracts. The credit equivalent is computed under Current Exposure Method. The operations are conducted in terms of the policy guidelines issued by Reserve Bank of India from time to time and as approved by the Board of the Bank.

11. LIQUIDITY COVERAGE RATIO**11.1 Disclosure Format**

As per Annexure II.

11.2 Quality Disclosure around LCR

Liquidity Coverage Ratio has been prescribed by RBI based on LCR Standards published by BCBS. The LCR promotes short term resilience of Banks to potential liquidity disruptions by ensuring that they have sufficient High Quality Liquid Assets (HQLAs) to survive an acute stress scenario in the immediate 30 days period.

LCR is defined as :

$$\frac{\text{Stock of High Quality Liquid Assets (HQLA)}}{\text{Total net cash outflows over the next 30 calendar days}} \geq 100\%$$

The LCR standard aims to ensure that a Bank maintains an adequate level of unencumbered HQLAs that can be converted into cash to meet its liquidity needs for the next 30 days period under a significantly severe liquidity stress scenario specified by RBI.

While the BCBS specifies a ratio of minimum 100% for all Banks, RBI has made a graduated increase from 60% to attain 100% by 2019 as given in the schedule below:

Particulars	January 1, 2015	January 1, 2016	January 1, 2017	January 1, 2018	January 1, 2019
Minimum LCR	60%	70%	80%	90%	100%

The main driver of the LCR is HQLA which consists of Cash in hand, Excess CRR balance as on that particular day, Government Securities in excess of minimum SLR requirement, Government Securities within the mandatory SLR requirement to the extent allowed by RBI under MSF (Presently to the extent of 2% of NDTL as allowed for MSF), Facility to avail liquidity for liquidity coverage ratio at 9% of NDTL, Marketable securities representing claims on or claims guaranteed by sovereigns, PSEs or multilateral development banks that are assigned a 20% risk weight under the Basel II standardized approach for credit risk and provided that they are not issued by a Bank / Financial Institution / NBFC or any of its affiliated entities, Marketable securities representing claims on or claims guaranteed by sovereigns having risk weights higher than 20% but not higher than 50%, Common equity shares not issued by a Bank / Financial Institution / NBFC or any of its affiliated entities and included in NSE CNX Nifty and / or S & P BSE Sensex indices. As the LCR is well within the norms, there is no requirement for intra period changes as well as changes over time.

The Bank has a well-diversified funding portfolio. Retail deposits, considered as stable is the major funding source of the Bank, indicating lower dependence of the Bank on wholesale funds.

The impact of derivative exposures and currency mismatch in the LCR is very minimal. There is no such inflows and outflows in the LCR calculation that are not captured in the LCR common template but which the institution considers to be relevant for its liquidity profile.

The Liquidity Risk Management in the Bank is guided by the ALM Policy. The Bank's Liquidity management is centralized at Treasury department as per the directions of ALCO.

CAPITAL ADEQUACY

Qualitative Disclosure :

A. A summary discussion of the Bank's approach to assessing the adequacy of its capital to support current and future activities.

In order to strengthen the capital base of Banks in India, the Reserve Bank of India in April, 1992 introduced capital adequacy measures in Banks, based on the capital adequacy framework (Basel I) issued by Basel Committee on Banking Supervision (BCBS). Initially, the framework addressed capital for credit risk, which was subsequently amended to include capital for market risk as well. The Bank has been compliant with regard to maintenance of minimum capital for credit and market risks.

Subsequently, the BCBS has released the "International Convergence of Capital Measurement and Capital Standards: A Revised Framework" (popularly known as Basel II document) on 26th June, 2004. Reserve Bank of India has issued final guidelines on 27th April, 2007 for implementation of the New Capital Adequacy (Basel II) Framework.

In line with the RBI guidelines, the Bank has successfully migrated to the revised framework (Basel-II) from 31st March, 2009. The Bank has continued the Parallel run of Basel II framework continuously tracking the exposures and studied the impact on Bank's Capital to Risk Weighted Assets Ratio (CRAR) on a quarterly basis.

Reserve Bank of India issued guidelines based on the Basel III reforms on capital regulation during May 2012, to the extent applicable to Banks operating in India. The Basel III capital regulation has been

implemented from 1st April, 2013 in India in phases and it was decided originally to implement fully as on 31st March, 2018. RBI issued detailed Guidelines on Composition of Capital Disclosure Requirements on 28th May, 2013. Another circular on "Implementation of Basel III Capital Regulations in India - Capital Planning" has been issued by RBI on 27th March, 2014, in which, the transitional period for full implementation of Basel III Capital Regulations in India is extended upto 31st March, 2019, instead of 31st March, 2018. RBI has issued circular on "Prudential Guidelines on Capital Adequacy and Liquidity Standards - Amendments" on 31st March, 2015. The Basel III Capital Regulations have been consolidated in Master Circular - Basel III Capital Regulations vide circular No. DBOD.No. BP.BC.1 / 21.06.201 / 2015-16 dated 1st July, 2015.

Under the Basel II framework, the total regulatory capital comprises of Tier I (core capital) and Tier 2 capital (supplementary capital). In order to improve the quality of regulatory capital, the capital will predominantly consist of Common Equity Tier1 (CET1) under Basel III. Non-equity Tier 1 and Tier 2 capital would continue to form part of regulatory capital subject to eligibility criteria as laid down in Basel III. The Basel III capital regulations continue to be based on three-mutually reinforcing Pillars, viz. Minimum Capital Requirements (Pillar 1), Supervisory Review of Capital Adequacy (Pillar 2) and Market Discipline (Pillar 3) of the Basel II Capital Adequacy framework.

The Basel-III norms mainly seek to:

- Raise the quality of capital to ensure that the Banks are capable to absorb losses on both as going concern and as gone concern basis
- Increase the risk coverage of the capital framework
- Introduce leverage ratio to serve as a backstop to the risk-based capital measure
- Raise the standards for the supervisory review process and public disclosures etc.

The macro prudential aspects of Basel III are largely enshrined in the capital buffers. Both the buffers i.e. the capital conservation buffer and the countercyclical buffer are intended to protect the Banking sector from stressed situations and business cycles.

Minimum capital requirements under Basel-III

Under the Basel III Capital Regulations, Banks are required to maintain a minimum Pillar 1 Capital (Tier-I + Tier-II) to Risk-weighted Assets Ratio (CRAR) of 9% on an on-going basis. Besides these minimum capital requirements, Basel III also provides for creation of capital conservation buffer (CCB) and countercyclical capital buffer (CCCB). At present, RBI mandates for CCB @ 2.5% of Risk Weighted Assets to be maintained at 0.625% every year starting March, 2016. Accordingly, the total regulatory capital funds under Basel-III norms will consist of the sum of the following categories and Banks are required to maintain 11.5% of Risk Weighted Assets (9% + 2.5%) by March, 2019.

Transitional Arrangements as per the RBI norms :-

CREDIT RISK: GENERAL DISCLOSURES

Credit Risk

Credit Risk is a possibility of losses associated with diminution in the credit quality of borrowers or counterparties. In a Bank's portfolio, Credit Risk arises mostly from lending activities of the Bank, when a borrower is unable to meet its financial obligations emanating from potential changes in the credit quality / worthiness of the borrowers or counterparties.

Credit Risk Management encompasses a host of management techniques, which help the Banks in mitigating the adverse impacts of credit risk. The objective of the Credit Risk Management is to identify, measure, monitor and control credit risk by adopting suitable methodology.

The Bank has formulated Loan Policy which stipulates various prudential norms, bench marks, guidelines for sanctioning of credits and recovery of the same. The Bank has also formulated a separate Credit Risk Management Policy, besides a Policy on Credit Risk Mitigation and Collateral Management.

Credit Risk is assessed by a robust internal credit risk rating system. Credit Risk Rating is the process wherein the merits and demerits of a borrower are captured and assigned with scorings, which enables the Bank to take a view on the acceptability or otherwise of any credit proposal.

Credit Risk Management Policy

The Bank has put in place a well-structured Credit Risk Management Policy duly approved by the Board. The Policy document defines organization structure, roles and responsibilities and the processes whereby the Credit Risks carried by the Bank can be identified, quantified and managed. Credit Risk is monitored on a Bank wide basis and the compliance with regard to the risk limits approved by the Credit Risk Management Committee (CRMC) / Board is ensured.

The Bank adopts the definition of 'past due' and 'impaired credits' (for reporting purposes) as defined by Reserve Bank of India under Income Recognition, Asset Classification and provisioning (IRAC) norms (vide RBI Master Circular dated 1st July, 2015).

TABLE DF - 8**OPERATIONAL RISK****Qualitative Disclosures :**

Operational Risk is the risk of loss resulting from inadequate or failed processes, people and systems or from external events. Operational Risk includes legal risk but excludes strategic and reputation risks.

The Bank has put in place Operational Risk Management Policy duly approved by the Board. This policy outlines the Organisation Structure and covers the process of identification, assessment / measurement and control of various operational risks.

For accounting operations in the computerized environment, suitable internal control system is maintained and a separate policy on I.T Security is in place specifying the internal guidelines on access, control, communications, operations, personal security, business continuity management etc.

Quantitative Disclosures :

The required capital is ₹208.04 crore.

TABLE DF - 9**INTEREST RATE RISK IN THE BANKING BOOK (IRRBB)****Qualitative Disclosures :**

Interest rate risk is the risk where changes in the market interest rates might affect a Bank's financial condition. Changes in interest rates affect both the current earnings (earnings perspective) as also the net-worth of the Bank (economic value perspective). The risk from earnings perspective can be measured as impact in the Net Interest Income (NII) or Net Interest Margin (NIM). Similarly, the risk from economic value perspective can be measured as drop in the Economic value of Equity (EVE).

The impact on income (earning perspective) is measured through use of Gap Analysis by applying notional rate shock up to 200 bps as prescribed.

For the calculation of impact on earnings, the Traditional Gap is taken from the Rate Sensitivity statement and based on the remaining period from the mid point of a

particular bucket, the impact for change in interest rates up to 200 bps is arrived at for one year time horizon.

The Bank has adopted Duration Gap Analysis for assessing the impact (as a percentage) on the Economic Value of Equity (Economic Value Perspective) by applying a notional interest rate shock of 200 bps. RBI has issued draft guidelines vide DBOD.No. BP. 7 / 21.04.098 / 2005-06 dated 17th April, 2006 on improvements to Banks' Asset Liability Management framework, covering interest rate risk and liquidity risk measurement / reporting frameworks and prudential limits. Subsequently, on 4th November, 2010, RBI issued a circular on Interest Rate Risk using Duration Gap Analysis and these guidelines have been taken into account while calculating IRRBB. The Bank calculates Modified Duration Gap on Assets & Liabilities and arrive at the impact on Economic Value of Equity. The Bank is calculating IRRBB on a monthly basis.

Quantitative Disclosures :

- a) The impact of change in Interest Rate i.e. Earnings at Risk for 200 bps interest rate shock as on 31st March, 2018 is ₹117.61 crore.
- b) The impact of change in market value of Equity for an interest rate shock of 200 bps as on 31st March, 2018 is 11.10%.

TABLE DF - 10**GENERAL DISCLOSURES FOR EXPOSURES RELATED TO COUNTERPARTY CREDIT RISK**

Counterparty Credit Risk (CCR) is the risk that a counter party to a transaction could default before the final settlement of the transaction cash flows. Unlike a firm's exposure to credit risk through a loan, where the exposure to credit risk is unilateral and only the lending bank faces the risk of loss, CCR creates a bilateral risk of loss to either parties.

Counterparty credit risk in case of derivative contracts arises from the forward contracts. The subsequent credit risk exposures depend on the value of underlying market factors (e.g., interest rates and foreign exchange rates),

which can be volatile and uncertain in nature. The Bank does not enter into derivative transactions other than forward contracts.

Credit exposures on forward contracts

The Bank enters into the forward contracts in the normal course of business for proprietary trading and arbitrage purposes, as well as for our own risk management needs, including mitigation of interest rate and foreign currency risk. Derivative exposures are calculated according to the current exposures method.

Counterparty Credit exposure as on 31st March, 2018

(₹ in crore)

Nature	Notional Amount	Potential Future Exposure	Current exposure	Total credit exposure
Forward contracts	3768.01	72.85	50.39	123.24

The capital requirement for Bank's exposure to Qualified Central Counter Party (QCCP) has been computed for the exposure to Clearing Corporation of India (CCIL) as on 31st March, 2018 amounting to ₹ 53.80 crore with risk weighted assets of ₹ 10.76 crore, which is forming part of

total credit risk. In terms of RBI circular dated 28th March, 2013, the Credit Valuation Adjustment (CVA) risk capital charge has been computed, which amounted to ₹ 0.69 crore (the corresponding risk weighted value of ₹ 8.64 crore has also been added to credit risk weighted assets).

LEVERAGE RATIO

Leverage Ratio is a non-risk based measure of all exposures for the Tier-I Capital. The Leverage Ratio is calibrated to act as a credible supplementary measure to the risk based capital requirements. The Basel III Leverage Ratio is defined as the capital measure (the numerator)

divided by the exposure measure (the denominator), with this ratio expressed as a percentage. Presently the indicative benchmark Leverage Ratio prescribed is 4.50% (minimum).

$$\text{Leverage Ratio} = \frac{\text{Capital Measure (Tier I Capital)}}{\text{Exposure Measure}}$$
