Item No.10

The present Authorized Capital of the Bank is ₹ 100 Crore and the Issued and Paid up Capital is ₹ 73.45 crore divided into 73,45,00,818 fully paid equity shares of ₹1/- each. The net worth of the Bank at the end of Financial Year 2018-19 stood at ₹ 4,808 crore.

It is in this context we bring to your notice that the Bank had been seeking shareholders approval with an enabling resolution to go for QIP issue almost every year. As per statutory guidelines, the special resolution has a validity period of 365 days and that if this agenda is approved by the shareholders by way of a special resolution, practically the Bank can raise funds through QIP at shorter notice as a matter of operational convenience.

Though we sought shareholders approval in earlier years, we utilized it only once during July 2014 considering the capital requirements and market trend. Similarly, we would like to seek the shareholders approval for QIP issue upto ₹ 500 Crore (Rupees Five Hundred Crore only) including premium. It will be used judiciously at appropriate time depending upon the need and

opportunity available.

FINANCIAL INCLUSION

Financial Inclusion is defined as "the process of ensuring easy access of financial services to the vulnerable groups such as weaker sections / low income groups in the society at an affordable cost". It is an attempt for achieving inclusive growth of the society by making availability of finance to the deprived sections.

The concept of financial inclusion is being successfully implemented in the Bank by expanding its presence in India, not only through brick and mortar model of branches but also through Business Correspondent (BC) outlets in unbanked rural areas in order to have better outreach to the needy groups. A new scheme, Prime Minister Jandhan Yojana (PMJDY) has been introduced replacing the Basic Savings Deposit Accounts (BSBD). Also insurance linked schemes such as Pradhan Mantri Jeevan Jyothi Bima Yojana (PMJJBY) and Pradhan Mantri Suraksha Bima Yojana (PMSBY) have been successfully implemented by us besides the Atal Pension Yojana (APY) and made available to the rural underprivileged poor, easy access to financial services.

The BC outlets are established with the help of technology "e-lounge", which caters to the need of the rural poor by facilitating easy financial access. The Bank also facilitates Aadhaar Enabled Payment System (AePS) which helps to reach the rural people for easy cash acceptance, transfer

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

Economic Scenario:

Global

During the year 2018-19, global economic activity exhibited increased signs of weakness on rising trade tensions. Among advanced economies (AEs), economic activity in US slowed down in Q4 after a buoyant Q3 and the Euro area growth lost pace in Q3, impacted by weaker trade growth, uncertainty due to brexit concerns and new vehicle emission standards. The Japanese economy also contracted in Q3 on subdued external and domestic demand.

Economic activity also decelerated in major emerging market economies (EMEs) in Q3. In China, growth slowed down on weak domestic demand. The ongoing trade tensions and the possible cooling of the housing market posed major risks to growth in China.

Crude oil prices remained volatile, reflecting evolving demand supply conditions underpinned by the production stance of the OPEC plus, rising shale output, weakening global demand and geo-political concerns. The strengthening of the US dollar had weakened gold price, however prices picked up since the last week of May, 2019 on escalating trade tensions, reviving its demand as safe haven asset. Inflation remains below target in several economies, though it has shown an uptick since March, 2019.

Global financial markets have been driven mainly by rising policy rates in the US, volatile crude oil prices and expectations of a slowdown compared with earlier projections. Among Advanced Economies, equity markets in the US witnessed a selloff on the weakening outlook for corporate earnings caused by rising borrowing costs, while the European stock markets declined on political uncertainties. The Japanese stock market also shed gains on global cues and the gradual strengthening of the yen. The 10-year yield in the US, which surged on robust economic data softened subsequently on the unchanged Fed stance. Among other Advanced Economies, bond yields in the Euro area and Japan softened on weak economic sentiment. In most EMEs, bond softened on falling crude oil prices and steadying currencies.

Indian

The Reserve Bank's Monetary Policy Committee (MPC) lowered the GDP growth projections for FY 2020 to 7.2% from 7.4% in its February policy meet owing to weakening domestic investment activity as reflected in a slowdown in production and imports of capital goods. Besides, it

noted that moderation of growth in the global economy might impact India's exports thus hurting growth prospects. The GDP growth has been projected in the range of 6.8% to 7.10% in the first of FY 2020 and 7.3% to 7.4% in the second half with risks, evenly balanced.

Retail inflation which was pegged at 2.8% for Q4 FY 2019 in its last policy meet has been revised downwards to 2.4%. The MPC noted that Consumer Price Index (CPI) inflation excluding food and fuel in February was lower than expected which has, imparted some downward bias to headline inflation. Other factors that led to downward revision of the CPI inflation include international crude oil prices, which have increased by around 10% since the last policy and further moderation of inflation expectations of households as well as input and output price expectations of producers as per RBI's poll surveys. For the first half of FY 2020 inflation figure is projected at 2.9% to 3.0% and 3.5% to 3.8% for the second half of the fiscal.

The equity markets started the year on a positive sentiment as the GST council had cut tax rate for major products. The equity markets posted significant gains as the NIFTY crossed 11,500 marks from 10,000 levels at the close of previous year. During the month of September 2018, Global market witnessed a sell off on account of escalating tensions following missile attack on Syria. Consequently, domestic indices saw a sharp correction. Repayment default of a leading financial service corporate intensified liquidity pressure in corporate bond market on account of which, Non-Banking financial companies faced liquidity crisis. Towards the end of the financial year 2018-19, equity markets remained cautious on Geopolitical tensions and uncertainty over outcome of General Elections. However, the strength in rupee against the dollar supported the NIFTY closing at 11,623.

MONETARY POLICY AND INTEREST RATES

The Reserve Bank of India shifted its policy stance to a calibrated tightening in October, 2018 and changed the stance to neutral in February, 2019. During the year, RBI has increased the policy repo rate by 25 bps each in the month of June, 2018 and August, 2018 citing the concerns over inflation. Reserve Bank of India in its Monetary Policy Committee meet in December, 2018 decided to reduce the SLR by 25 basis points every calendar quarter until the SLR reaches 18 percent of Net Demand & Time Liabilities (NDTL). The crude oil prices in the global market eased during the second half of the financial year 2018-19, which reflected in the domestic inflation prints. In the second bi-monthly Monetary Policy statement 2019-20, the Monetary Policy Committee cut the policy

rate by 25bps to 5.75% from 6% in June, 2019. Further, the MPC reiterated its commitment to achieving the medium term target for headline inflation of 4 percent on a durable basis. The MPC also decided to change the stance of Monetary Policy from neutral to accommodative.

DOMESTIC TREASURY

The yield on 10 year benchmark touched a high of 8.20% and closed at 7.35% in March, 2019 amidst surging crude oil prices, CPI being higher than RBI target for several months, rate hike by the Central bank of Advanced economies, protective trade policies by the USA disrupting global trade ties, sanctions by US over Iran, pressure to reduce imports of Iranian Oil, depreciation in rupee to historical low level and projections of Central Bank on inflation targets. However, yield came off its high on Reserve Bank of India's announcement of series of OMO purchases, easing inflation pressure after the sharp fall in global crude oil prices, Optimism over the policy decisions of RBI, sharp fall in US treasury yields and strengthening rupee on strong domestic data. Through the timely sale of securities, the Bank had booked profit to the tune of ₹ 32.56 crore despite unfavourable market conditions as against ₹ 93.83 crore during the previous year.

FOREX TREASURY

During the financial year 2018-19, the movement of rupee was driven by the global events. USD / INR moved from ₹ 65.01 in April, 2018 to ₹ 69.18 in March, 2019. Domestic currency sharply fell to record low level of ₹ 74.48 on the concern of possible spill over of economic crisis in Turkey, Venezuela and Argentina to other emerging markets. Further, uncertainty over Brexit negotiations weighed on global currencies. However, with sustained intervention by RBI and the softening of global crude prices the rupee regained its strength and closed at ₹ 69.18. The profit on exchange stood at ₹ 54.46 crore as against ₹ 74.35 crore during the previous year.

OUTLOOK

Fiscal year 2018-19 was one of the most challenging years for the Banking sector. The growth remained lopsided as industrial credit growth continued to remain sluggish. Amid slowing economic growth and prolonged crisis in Non-Banking financial firms, the improvement in the financials of the Banks could prove to be a silver lining and propel credit growth. Various analysts have pointed out that the fourth quarter results of most Banks indicate a positive trend, as there has been a significant decline in NPAs (Non Performing assets) and a steady improvement in operating metrics. The operating metrics of most of the Banks remained healthy in the fourth quarter of 2018-19 with a 21% growth in net interest income. Banks seem to be on the path to recovery with decline in NPAs. Corporate loan growth has shown a revival albeit at a slow pace and in the absence of a strong traction in the capex cycle,

corporate loan growth will be muted. However loans to micro, small and medium enterprises and MFI's will continue to dominate. With the beginning of the new fiscal, there has been an apparent reversal in two of the biggest challenges facing the sector i.e., credit off take and asset quality. The onset of the festive season is likely to see a positive momentum in the retail segment, particularly retail loans.

Economic menu for new government: New Industrial Policy, Growth - oriented budget, fast forwarding disinvestment and solving of Banking crisis. As the new government takes oath, it is readying a list of the tasks for various ministries. These are likely to be incorporated into the larger plan for "India in 2022" a milestone in the India's history on the occasion of 75th Independence Day. The crucial, Finance Ministry has already its tasks cut out, which would be a growth oriented budget, aiming at fiscal consolidation. It would also have in its scheme of things the larger plan of merger of PSU Banks and merger of three prime national insurance companies viz, National Insurance Company, Oriental Insurance Company & United India Insurance Company. Further, another option is being considered to merge all the four companies (including New India Assurance Company) instead of the proposed three, to create a LIC type mega insurer in the general insurance space and avoid undercutting each other.

Enhanced spending on infrastructure, speedy implementation of projects and continuation of reforms are expected to provide further impetus to growth. All these factors suggest that India's Banking sector is also poised for robust growth as the rapidly growing business enterprises would turn to Banks for their credit needs. The customer centric Banking through safe and secure technology has become the epicenter of Banking business. In the given scenario, your Bank believes that with the sound risk management and capital adequacy ratio it could achieve a higher share of business and profit, ably supported by sophisticated technology and a highly dedicated and motivated staff force.

Information Other than the Financial Statements and Auditor's Report Thereon

The Bank's Board of Directors is responsible for the other information. The other information comprises the CSR initiatives, Director's Report, Annexures to Director's Report, Shareholders Information, Business Responsibility Report, Corporate Governance Report, Management

Discussions & Analysis Report, List of Branches, Basel III Disclosures, Decade Progress included in the Bank's Annual report, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and the Basel III Disclosures, and accordingly, we will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the auditor otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

The Bank's Board of Directors is responsible for the matters stated in Section 134 (5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance and cash flows of the Bank in accordance with the accounting principles generally accepted in India, including the Accounting Standards specified under Section 133 of the Act, provisions of Section 29 of the Banking Regulation Act, 1949 and the circulars and guidelines issued by Reserve Bank of India ('RBI') from time to time. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safe guarding of the assets of the Bank and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors is responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Bank or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Bank's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Standards, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- 1 Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- 1 Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under Section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Bank has adequate internal financial controls with reference to the financial

statement are in place and the operating effectiveness of such controls.

- 1 Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- 1 Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause a Bank to cease to continue as a going concern.
- 1 Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report

unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

To the Independent Auditor's Report of even date on the Financial Statements of City Union Bank Limited [Refer Para 2(9)] Report on Other Legal and Regulatory requirements in Auditor's Report

Report on the Internal Financial Controls over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013

To the Members of

CITY UNION BANK LIMITED

Opinion

We have audited the Internal Financial Controls over Financial Reporting ("ICFR") of City Union Bank Limited ("the Bank") as of 31st March, 2019 in conjunction with our audit of the financial statements of the Bank for the year ended on that date.

In our opinion, the Bank has, in all material respects, an adequate Internal Financial Controls Systems over Financial Reporting and such Internal Financial Controls over Financial Reporting were operating effectively as at 31st March, 2019, based on the internal control over financial reporting criteria established by the Bank considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (the "Guidance Note").

Management's Responsibility for Internal Financial Controls over Financial Reporting

The Bank's Management and Board of Directors are responsible for establishing and maintaining internal financial controls based on Internal Control over Financial Reporting criteria established by the Bank considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting ("Guidance Note") issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its Business, including adherence to the Bank's policies, the safeguarding of its assets, the prevention and detection of

frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Bank's Internal Financial Controls over Financial Reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting and the Standards on Auditing as specified under Section 143(10) of the Companies Act, 2013, to the extent applicable to an Audit of Internal Financial Controls and both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate Internal Financial Controls over Financial Reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the Internal Financial Controls System over Financial Reporting and their operating effectiveness. Our audit of Internal Financial Controls over Financial Reporting included obtaining an understanding of Internal Financial Controls over Financial Reporting, assessing the risk that a material weakness exists and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Banks' Internal Financial Controls System over Financial Reporting.

Meaning of Internal Financial Controls over Financial Reporting

A Bank's Internal Financial Control over Financial Reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A Bank's Internal Financial Control over Financial Reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Bank; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles and that receipts and expenditures

of the Bank are being made only in accordance with authorizations of management and directors of the Bank; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Bank's assets that could have a material effect on the financial statements.

Inherent limitations of Internal Financial Controls over Financial Reporting

Because of inherent limitations of Internal Financial Controls over Financial Reporting, including the possibility of collusion improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the Internal Financial Controls over Financial Reporting to future periods are subject to the risk that the Internal Financial Control over Financial Reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

3.3 Disclosures on risk exposure in Derivatives**3.3.1 Qualitative Disclosure :****A. Structure and Organisation for Management of risk in Derivatives Trading**

Operations in the Treasury are segregated into three functional areas, namely Front office, Mid-office and Back-office, equipped with necessary infrastructure and trained officers, whose responsibilities are well defined. The Bank enters into plain vanilla Forward Contracts only to backup / cover customer transactions as also for proprietary trading purpose.

The Integrated Treasury Policy of the Bank clearly lays down the scope of usages, approval process as also the limits like the Open Position Limits, Deal Size Limits and Stop Loss Limits for trading.

The Mid Office is handled by Risk Management Department. Daily report is generated by Risk Management Department for appraisal of the risk profile to the Senior Management for Asset and Liability Management.

B. Scope and nature of Risk Measurement, Risk Reporting and Risk Monitoring Systems

Outstanding forward contracts are monitored by Risk Management Department against the limits (Counterparty, Stop Loss, Open Position, VaR, Aggregate Gap) fixed by the Board and approved by RBI (wherever applicable) and exceedings, if any, are reported to the Board for ratification.

C. Policies for hedging and / or mitigating and strategies and processes for monitoring the continuing effectiveness of hedges / mitigants

The Bank's policy lays down that the transactions with the corporate clients are to be undertaken only after the inherent credit exposures are quantified and approved for customer appropriateness and suitability and necessary documents like ISDA agreements etc., are duly executed. The Bank adopts Current Exposure Method for monitoring the credit exposures.

While sanctioning the limits, the competent authority stipulates condition of obtaining collaterals / margin as deemed appropriate. The derivative limits are reviewed periodically along with other credit limits.

D. Accounting policy for recording the hedge and non-hedge transactions, recognition of Income premiums and discounts, valuation of outstanding contracts, provisioning, collateral and credit risk mitigation

Valuation of outstanding forward contracts are done as per FEDAI guidelines in force. Marked to Market profit & loss are taken to Profit & Loss account. MTM profit & loss calculated as per Current Exposure method are taken into account while sanctioning forward contract limits to customers and collaterals / cash margins are prescribed for credit and market risks.

The Bank undertakes foreign exchange forward contracts for its customers and hedges them with other Banks. The credit exposure on account of forward contracts is also considered while arriving at the total exposure of each customer / borrower. The Bank also deals with other banks in proprietary trading duly adhering to risk limits permitted by RBI, set in the policy and is monitored by mid office. The Marked to Market values are monitored on monthly basis for foreign exchange forward contracts. The credit equivalent is computed under current exposure method. The operations are conducted in terms of the policy guidelines issued by Reserve Bank of India from time to time and as approved by the Board of the Bank.

11. LIQUIDITY COVERAGE RATIO**11.1 Disclosure Format**

As per Annexure II.

While the BCBS specifies a ratio of minimum 100 % for all Banks, RBI has made a graduated increase from 60 % to attain 100 % by 2019 as given in the schedule below:

Particulars	January 1, 2015	January 1, 2016	January 1, 2017	January 1, 2018	January 1, 2019
Minimum LCR	60%	70%	80%	90%	100%

11.2 Quality disclosure around LCR

Liquidity Coverage Ratio has been prescribed by RBI based on LCR Standards published by BCBS. The LCR promotes short term resilience of Banks to potential liquidity disruptions by ensuring that they have sufficient High Quality Liquid Assets (HQLAs) to survive an acute stress scenario in the immediate 30 days period.

LCR is defined as :

$$\frac{\text{Stock of High Quality Liquid Assets (HQLA)}}{\text{Total net cash outflows over the next 30 calendar days}} \geq 100\%$$

The LCR standard aims to ensure that a Bank maintains an adequate level of unencumbered HQLAs that can be converted into cash to meet its liquidity needs for the next 30 days period under a significantly severe liquidity stress scenario specified by RBI.

The main driver of the LCR is HQLA which consists of Cash in Hand, Excess CRR balance as on that particular day, Government Securities in excess of minimum SLR requirement, Government Securities within the mandatory SLR requirement to the extent allowed by RBI under MSF (Presently to the extent of 2.00% of NDTL as allowed for MSF), Facility to avail liquidity for liquidity coverage ratio at 13.00% of NDTL, Marketable securities representing claims on or claims guaranteed by sovereigns, PSEs or Multilateral Development Banks that are assigned a 20% risk weight under the Basel II Standardized Approach for Credit Risk and provided that they are not issued by a Bank / Financial Institution / NBFC or any of its affiliated entities, Marketable securities representing claims on or claims guaranteed by sovereigns having risk weights higher than 20% but not higher than 50%, Common equity shares not issued by a Bank / Financial Institution / NBFC or any of its affiliated entities and included in NSE CNX Nifty and / or S & P BSE Sensex indices. As the LCR is well within the norms, there is no requirement for Intra period changes as well changes over time.

The Bank has a well-diversified funding portfolio. Retail deposits, considered as stable is the major funding source of the Bank, indicating lower dependence of the Bank on wholesale funds.

The impact of derivative exposures and currency mismatch in the LCR is very minimal. There is no such inflows and outflows in the LCR calculation that are not captured in the LCR common template but which the institution considers to be relevant for its liquidity profile.

The Liquidity risk management in the Bank is guided by the ALM Policy. The Bank's Liquidity management is centralized at Treasury Department as per the directions of ALCO.

Table DF - 2 CAPITAL ADEQUACY

Qualitative Disclosure :

A. A summary discussion of the Bank's approach to assessing the adequacy of its capital to support current and future activities.

In order to strengthen the capital base of Banks in India, the Reserve Bank of India in April, 1992 introduced capital adequacy measures in Banks, based on the Capital Adequacy Framework (Basel I) issued by Basel Committee on Banking Supervision (BCBS). Initially, the framework addressed capital for credit risk, which was subsequently amended to include capital for market risk as well. The Bank has been compliant with regard to maintenance of minimum capital for credit and market risks.

Subsequently, the BCBS has released the "International Convergence of Capital Measurement and Capital Standards: A Revised Framework" (popularly known as Basel II document) on 26th June, 2004. Reserve Bank of India has issued final guidelines on 27th April, 2007 for implementation of the New Capital Adequacy (Basel II) Framework.

In line with the RBI guidelines, the Bank has successfully migrated to the revised framework (Basel-II) from 31st March, 2009. The Bank has continued the Parallel run of Basel II framework continuously tracking the exposures and studied the impact on Bank's Capital to Risk Weighted Assets Ratio (CRAR) on a quarterly basis.

Reserve Bank of India has issued guidelines based on the Basel III reforms on capital regulation during May, 2012, to the extent applicable to Banks operating in India. The Basel III capital regulation has been implemented from 1st April, 2013 in India in phases and it was decided originally to implement fully as on 31st March, 2018. RBI issued detailed Guidelines on Composition of Capital Disclosure Requirements on 28th May, 2013. Another circular on "Implementation of Basel III Capital Regulations in India - Capital Planning" has been issued by RBI on 27th March, 2014, in which, the transitional period for full implementation of Basel III Capital Regulations in India is extended upto 31st March, 2019, instead of 31st March, 2018.

Further, on 10th January, 2019, RBI has issued a circular, in which, the transitional period for full

implementation of Basel III Capital Regulations in India is extended upto 31st March, 2020, instead of 31st March, 2019. Accordingly, 'Capital Conservation Buffer Framework' as applicable from 31st March, 2018 (i.e. CCB at 1.875%) will also apply from 31st March, 2019 till the CCB attains the level of 2.5% on 31st March, 2020.

RBI has issued circular on "Prudential Guidelines on Capital Adequacy and Liquidity Standards - Amendments" on 31st March, 2015. The Basel III Capital Regulations have been consolidated in Master Circular - Basel III Capital Regulations vide circular No. DBOD.No. BP.BC.1 / 21.06.201 / 2015-16 dated 1st July, 2015.

Under the Basel II framework, the total regulatory capital comprises of Tier I (core capital) and Tier 2 capital (supplementary capital). In order to improve the quality of regulatory capital, the capital will predominantly consist of Common Equity Tier1 (CET1) under Basel III. Non-Equity Tier 1 and Tier 2 capital would continue to form part of regulatory capital subject to eligibility criteria as laid down in Basel III. The Basel III capital regulations continue to be based on three-mutually reinforcing Pillars, viz. Minimum Capital Requirements (Pillar 1), Supervisory Review of Capital Adequacy (Pillar 2) and Market Discipline (Pillar 3) of the Basel II Capital Adequacy framework.

The Basel-III norms mainly seek to:

- ▮ Raise the quality of capital to ensure that the Banks are capable to absorb losses on both as going concern and as gone concern basis
- ▮ Increase the risk coverage of the capital framework
- ▮ Introduce leverage ratio to serve as a backstop to the risk-based capital measure
- ▮ Raise the standards for the supervisory review process and public disclosures etc.

The macro prudential aspects of Basel III are largely enshrined in the capital buffers. Both the buffers i.e. the capital conservation buffer and the countercyclical buffer are intended to protect the Banking Sector from stressed situations and business cycles.

Minimum capital requirements under Basel-III

Under the Basel III Capital Regulations, Banks are required to maintain a minimum Pillar 1 Capital (Tier-I + Tier-II) to Risk-weighted Assets Ratio (CRAR) of 9% on an on-going basis. Besides these minimum capital requirements, Basel III also provides for creation of Capital Conservation Buffer (CCB) and countercyclical Capital Buffer (CCCB).

As per the circular on “Implementation of Basel III Capital Regulations in India – Capital Planning” issued by RBI

dated 27th March, 2014, the transitional period for full implementation of Basel III Capital Regulations in India is extended upto 31st March, 2019.

Further, on 10th January, 2019, RBI has issued a circular, in which, the transitional period for full implementation of Basel III Capital Regulations in India is extended upto 31st March, 2020, instead of 31st March, 2019. Accordingly, 'Capital Conservation Buffer Framework' as applicable from 31st March, 2018 (i.e. CCB at 1.875%) will also apply from 31st March, 2019 till the CCB attains the level of 2.5% on 31st March, 2020.

Transitional Arrangements as per the RBI norms :-

B. The Bank's approach in assessment of Capital Adequacy

The Bank is following Standardized Approach, Standardized Duration approach and Basic Indicator approach for measurement of capital charge in respect of credit risk, market risk and operational risk respectively. Besides computing CRAR under the Pillar I requirement, the Bank also undertakes stress testing periodically in various risk areas to assess the

impact of stressed scenario or plausible events on asset quality, liquidity, profitability and capital adequacy. The Bank conducts Internal Capital Adequacy Assessment Process (ICAAP) on an annual basis to assess the sufficiency of its capital funds to cover the risks specified under Pillar – I and Pillar- II of Basel guidelines. The adequacy of Bank's capital funds to meet the future business growth is being assessed in the ICAAP document.

CREDIT RISK: GENERAL DISCLOSURES

Credit Risk

Credit Risk is a possibility of losses associated with diminution in the credit quality of borrowers or counterparties. In a Bank's portfolio, Credit Risk arises mostly from lending activities of the Bank, when a borrower is unable to meet its financial obligations emanating from potential changes in the credit quality / worthiness of the borrowers or counterparties.

Credit Risk Management encompasses a host of management techniques, which help the Banks in mitigating the adverse impacts of credit risk. The objective of the Credit Risk Management is to identify, measure, monitor and control credit risk by adopting suitable methodology.

The Bank has formulated Loan Policy which stipulates various prudential norms, bench marks, guidelines for sanctioning of credits and recovery of the same. The Bank has also formulated a separate Credit Risk Management Policy, besides a Policy on Credit Risk Mitigation and Collateral Management.

Credit Risk is assessed by a robust internal credit risk rating system. Credit Risk Rating is the process wherein the merits and demerits of a borrower are captured and assigned with scorings, which enables the Bank to take a view on the acceptability or otherwise of any credit proposal.

Credit Risk Management Policy

The Bank has put in place a well-structured Credit Risk Management Policy duly approved by the Board. The Policy document defines organization structure, roles and responsibilities and the processes whereby the Credit Risks carried by the Bank can be identified, quantified and managed. Credit Risk is monitored on a Bank wide basis and the compliance with regard to the risk limits approved by the Credit Risk Management Committee (CRMC) / Board is ensured.

The Bank adopts the definition of 'past due' and 'impaired credits' (for reporting purposes) as defined by Reserve Bank of India under Income Recognition, Asset Classification and provisioning (IRAC) norms (vide RBI Master Circular dated 1st July, 2015).

TABLE DF - 8**OPERATIONAL RISK****Qualitative Disclosures :**

Operational Risk is the risk of loss resulting from inadequate or failed processes, people and systems or from external events. Operational risk includes legal risk but excludes strategic and reputation risks.

The Bank has put in place Operational Risk Management Policy duly approved by the Board. This policy outlines the Organisation Structure and covers the process of identification, assessment / measurement and control of various operational risks.

The other policies adopted by the Bank which deal with the management of operational risks are Inspection Policy, Information Security Audit Policy and Policy on Modified code of conduct for Know-Your Customer & Anti-Money Laundering Standards.

Operational Risks in the Bank are managed through comprehensive and well-articulated internal control

framework. Operational Risk is mitigated by effecting suitable insurance coverage wherever necessary. The Bank has also put in place a compliance cell to supervise KYC & AML guidelines and off site monitoring of high value transactions. For accounting operations in the computerized environment, suitable internal control system is maintained and a separate policy on I.T. Security is in place specifying the internal guidelines on access, control, communications, operations, personal security, business continuity management etc.

Quantitative Disclosures:

Capital charge for Operational Risk is computed as per the Basic Indicator Approach based on the average of the gross income for the previous three years i.e. 2015-16, 2016-17 and 2017-18 as defined in the Master Circular – Basel III Capital Regulations & New Capital Adequacy Framework guidelines. The required capital is ₹ 242.98 crore.

TABLE DF - 9**INTEREST RATE RISK IN THE BANKING BOOK (IRRBB)****Qualitative Disclosures :**

Interest rate risk is the risk where changes in the market interest rates might affect a Bank's financial condition. Changes in interest rates affect both the current earnings (earnings perspective) as also the net-worth of the Bank (economic value perspective). The risk from earnings perspective can be measured as impact in the Net Interest Income (NII) or Net Interest Margin (NIM). Similarly, the risk from economic value perspective can be measured as drop in the Economic value of Equity (EVE).

The impact on income (earning perspective) is measured through use of Gap Analysis by applying notional rate shock up to 200 bps as prescribed.

For the calculation of impact on earnings, the Traditional Gap is taken from the Rate Sensitivity statement and based on the remaining period from the mid point of a

particular bucket, the impact for change in interest rates up to 200 bps is arrived at for one year time horizon.

The Bank has adopted Duration Gap Analysis for assessing the impact (as a percentage) on the Economic Value of Equity (Economic Value Perspective) by applying a notional interest rate shock of 200 bps. RBI has issued draft guidelines vide DBOD.No. BP.7/21.04.098/2005-06 dated 17th April, 2006 on improvements to Banks' Asset Liability Management Framework, covering interest rate risk and liquidity risk measurement / reporting frameworks and prudential limits. Subsequently, on 4th November, 2010, RBI issued a circular on Interest Rate Risk using Duration Gap Analysis and these guidelines have been taken into account while calculating IRRBB. The Bank calculates Modified Duration Gap on Assets & Liabilities and arrive at the impact on Economic Value of Equity. The Bank is calculating IRRBB on a monthly basis.

Quantitative Disclosures :

- a) The impact of change in Interest Rate i.e. Earnings at Risk for 200 bps interest rate shock as on 31st March, 2019 is ₹ 68.50 crore.
- b) The impact of change in market value of Equity for an interest rate shock of 200 bps as on 31st March, 2019 is 6.12%.

TABLE DF - 10**GENERAL DISCLOSURES FOR EXPOSURES RELATED TO COUNTERPARTY CREDIT RISK**

Counterparty Credit Risk (CCR) is the risk that a counterparty to a transaction could default before the final settlement of the transaction cash flows. Unlike a firm's exposure to credit risk through a loan, where the exposure to credit risk is unilateral and only the lending bank faces the risk of loss, CCR creates a bilateral risk of loss to either parties.

Counterparty credit risk in case of derivative contracts arises from the forward contracts. The subsequent credit risk exposures depend on the value of underlying market factors (e.g., interest rates and foreign exchange rates),

which can be volatile and uncertain in nature. The Bank does not enter into derivative transactions other than forward contracts.

Credit exposures on forward contracts

The Bank enters into the forward contracts in the normal course of business for proprietary trading and arbitrage purposes, as well as for our own risk management needs, including mitigation of interest rate and foreign currency risk. Derivative exposures are calculated according to the current exposures method.

Counterparty Credit exposure as on 31st March, 2019

(₹ in crore)

Nature	Notional Amount	Potential Exposure @2%/10%	Current Exposure	Total credit Exposure
Forward contracts	3020.73	74.63	61.60	136.23

The capital requirement for Bank's exposure to Qualified Central Counter Party (QCCP) has been computed for the exposure to Clearing Corporation of India (CCIL) as on 31st March, 2019 amounting to ₹ 92.09 crore with risk weighted assets of ₹ 18.42 crore, which is forming part of credit risk total. In terms of RBI circular dated

28th March, 2013, the Credit Valuation Adjustment (CVA) risk capital charge has been computed, which amounted to ₹ 0.11 crore (the corresponding risk weighted value of ₹ 1.36 crore has also been added to credit risk weighted assets).

There are no equity investments as on 31st March, 2019 under Banking Book (HTM).

LEVERAGE RATIO

Leverage Ratio is a non-risk based measure of all exposures for the Tier-I Capital. The Leverage Ratio is calibrated to act as a credible supplementary measure to the risk based capital requirements. The Basel III Leverage Ratio is defined as the capital measure (the numerator)

divided by the exposure measure (the denominator), with this ratio expressed as a percentage. Presently the indicative benchmark Leverage Ratio prescribed is 4.50% (minimum).

$$\text{Leverage Ratio} = \frac{\text{Capital Measure (Tier I Capital)}}{\text{Exposure Measure}}$$
