Performance

The Company's sales have shown an increase of 14.80% as compared to the previous year. This is mainly on account of the growth in sales of the Company's products in the European market. This trend will continue as long as the European Union remains in recession. The prolonged recession is forcing car dealerships and car manufacturers to cut costs wherever possible. That is leading to an increased demand for the company's Virtual Showroom product all across Europe.

The other income has shown a sharp fall primarily on account of the INR remaining quite stable against the US Dollar.

Analysis of Expenses

The direct cost of operations in FY 14-15 are slightly higher than that incurred in FY 13-14. This is inspite of higher revenues from this Division in FY 14-15 as compared to FY 13-14. This is primarily on account of better price realization for Enterprise Connectivity products.

The company has increased its employee headcount substantially in FY 14-15 as compared to the previous year. This has resulted in the sharply higher employee costs for the company. The company has added headcount as it is developing new products, which would be launched in India, US and Europe simultaneously in the current year. The new products are expected to contribute substantially to the company's topline and bottomline in the next few years.

Financial costs have increased slightly as compared to the previous year. However, this should reduce substantially in the current year.

Other expenses have shown a slight decrease over the previous year. The company's constant endeavor is to keep the costs at a bare minimum.

Directors' Report

Depreciation has seen a slight increase due to higher capital expenditure incurred during the year. The company has upgraded its production and Server infrastructure to ensure higher productivity.

Profitability

The overall profitability of the company is more or less similar to that of the previous year. The company has been able to maintain its profitability despite a substantial increase in its headcount.

The company expects the profitability to further improve in the current year as a result of higher sales in the United States, Mexico, India and Europe.

Business Overview

Taking Wings – from Niche Marketing to the Global Marketplace

After a decade of successfully marketing izmo web technology to the automotive vertical worldwide, the company has now decided to step into the mainstream global market place, with ready-to-go websites for any business, complete with business-ready content and elegant, attention-grabbing graphics.

“Meri Website, Meri Pehchan”

The new avatar of izmoWeb – “Meri Website, Meri Pehchan”, or “My Website, My Identity” globally, is targeted at professionals and businesses.

izmoWeb- a revolutionary web marketing concept all set to change retail marketing

Directors' Report

Research shows that almost anyone – from professionals like doctors, chartered accountants and lawyers to local businesses like restaurants, play schools, gyms, bars, beauty parlors and even hair stylists can derive enormous business advantage from an effective, well promoted website.

Your company is now stepping into this new business territory with a new, business friendly concept, going miles ahead of the competition to make the web journey easy and convenient for our customers.

izmoWeb - a true “one-stop” solution

Earlier, businesses had to figure out from whom to buy a domain name, who will design the website, who will write the content for it, who will do the hosting, who will provide search engine optimization (SEO) and online marketing, who will create business email ids, and so on. A hundred hurdles needed to be crossed before they can have an effective, performing website bringing in new clients every day.

Even businesses who can afford the large budget did not have the expertise to tie all of these together into a viable project and take the website live. As a result, most businesses were stuck with basic, “business card” websites. Many of them lost faith in web marketing altogether, continuing with expensive newspaper advertising for the lack of a better web alternative.

Your company is about to change all of that, with izmoWeb.

First in the World

To begin with, izmoWeb is built for customers. All that customers need to do is fill in their business name, address, location, and pricing, and upload their logo if available. Everything else– from buying the domain to taking the website live, creating business email ids and creating and plugging in social ids - is done with no customer effort required.

This is a revolutionary step, since no other provider in the world is now offering fully configured go-to-market websites complete with business content written by experts, to multiple business verticals as diverse as health care, accounting, hospitality, education, and more.

Responsive Web Technology – Built for the New web

izmoWeb is built for the new web -a web that is viewed on multiple devices, from a PC at the office to a laptop at home, a tablet device on the go, or increasingly, on cellphones. Your company uses the latest in “responsive web” technology to dynamically re-orient the website to make it work best on any device. izmoWeb responsive websites not only make it easy for the customers of our clients to access their services, but also ranks higher up in Google, out of the box, since the search engine now prefers responsive websites over older adoptive websites with separate mobile sites.

Easy to Manage

The new izmoWeb websites are quite easy to manage, even for people with little or no knowledge of websites. With the world's most sophisticated web platform under the hood, website content and marketing campaigns can be created on the fly. New customer testimonials can be added as soon as the business receives them. Website analytics is easily available with a few clicks.

Directors' Report

Easy to Scale Up

Once business websites pick up traction and orders begin to pour in, many businesses may need to scale up their web marketing. Your company makes it easy for them to plug in web marketing and social marketing modules at will, by providing an expert team to work for them at competitive prices.

Built to Extend

Unlike other web providers, izmoWeb websites are not stand alone websites fending for themselves, but part of a larger “Mothership” business portal network which acts as a force multiplier and makes the izmoWeb web marketing platform unassailable.

Typically, prospective customers do background research first, mostly on web portals before narrowing down to a buying decision by which time they start visiting business websites. With the Portal-Website duo, izmoWeb helps clients to capture prospective customers early on, when they are still researching on portals.

izmoWeb- More than a Website, a Business Ecosystem

izmoWeb websites also come with an advanced appointment system out of the box, making them a true web marketing solution that can deliver customers to our clients' doorstep. Once the websites and marketing automation gain traction, businesses can opt for a more advanced CRM system that will not only manage customers over long lifecycles, but also automate their customer communication.

With izmoCRM, no customer will remain untouched for any period of time. Since an existing customer is as valuable as twelve or more new customers, the add-on CRM system will make izmoWeb an even more potent, and unbeatable web marketing solution.

Directors' Report

Scope of Business

Worldwide, there are 500 million ineffective websites which can be replaced with izmoWeb.

INDIA

India alone has 1.3 million small and medium enterprises (SMEs), employing a full 40% of India's workforce. 94.9% of these SMEs are micro enterprises who are unlikely to have a dedicated web marketing team.

izmoWeb and “Make in India”

India's SMEs contribute only 17% to the GDP. One of the reasons behind the sluggish performance is a lack of marketing reach. izmoWeb can work wonders in this area, coupled with the “Make in India” campaign, opening up markets worldwide for Indian SMEs.

NORTH AMERICA

USA

There are 28.4 million small businesses in the U.S., and they employ 56.1 million people – about half of the total U.S workforce. In the first quarter of 2014 alone, 382,000 small businesses opened in the U.S. – each one a potential izmoWeb customer.

Your company is initiating a plan to roll out izmoWeb across the U.S., leveraging its strong connections with the business ecosystem to ramp up operations drastically.

MEXICO

izmo has significant presence in Mexico, where it is the largest provider of automotive websites. Mexico has over 4 million SMEs and izmo is hopeful of a successful nationwide rollout of izmoWeb services in the country, building on its spectacular success in automotive retail.

EUROPE

FRANCE

France has an SMB sector in excess of 2.4 million businesses. French SMEs are highly entrepreneurial, and in the midst of a transition from traditional marketing to more cost-effective web-centric marketing.

izmo has a stable client-base and good market reputation in France as the countries' largest web provider in the automotive vertical, and is hopeful of a quick rollout of izmoWeb in the country.

OTHER EU NATIONS

BELGIUM, ITALY, SPAIN, PORTUGAL AND GERMANY

izmo is hopeful of leveraging its existing presence in Belgium, Italy, Spain, Portugal and Germany, to roll out izmoWeb in all of these countries expeditiously.

As explained earlier, izmoWeb is a game-changer in digital marketing, opening up web marketing to businesses and professionals who could not have managed a web marketing presence otherwise due to budget and expertise constraints. Your company expects to generate rapid results in this area.

Directors' Report

AUTOMOTIVE VERTICAL

North America

USA

Ending long years of disappointing sales slumps, U S auto sales retained the headwinds of 2014 in 2015 as well. Sales is expected to touch the Industry's best ever annual record of 17.4 million vehicles, even as vehicle prices remain at a record high.

Riding on this renewed upsurge, the multi-media division of izmo was able to make considerable headway in the market, adding top-tier clients like GM, Microsoft, Toyota Motor Sales (TMS), Mitsubishi, USA123, ADS, AOL, Autonation, Autopoint, Autotrader, Dataone, DEP, DME, Dominion, Evolio, Gomoto, HGM, Jato, JDPA, Jetpack, Kukui, NEWS, SIM, Stickout and Vincentric, even as we retain clients such as Kuhio Auto Group in the website and CRM space.

With the average age of vehicles rising to an unprecedented 11 years, dealers are increasingly able to derive attractive revenue from sales and service, with the right CRM to automate customer interactions. izmoCRM in its new avatar is expected to make significant headway in the U.S. market.

Mexico

izmo continues to be the largest dealer website service provider in Mexico, and the only retail website provider for Nissan Mexico, the largest Automotive OEM in the country with a 24.8% market share.

izmo dealer websites and portals also drive the sales of Renault, Volkswagen, Chrysler Ram Dodge Jeep, and Suzuki vehicles, as well as used cars. Prominent dealer groups in our portfolio include Autocom, Andanac, Autosur and Ga3.

European Union

Western Europe is now showing signs of a recovery, with sales picking up momentarily across the major markets of UK, Germany, France, Italy and Spain. Half –yearly new car registrations in EU rose 8.2% in the first half, with 7,169,984 vehicles registered, according to European Automobile Manufacturers Association.

The trend was visible in every major market in June, with Portugal (+ 33.9%) Spain (+23.5%), France (+15.0%), Italy (+14.4%), Germany (+12.9%) and U.K. (+ 12.9%) posting double-digit gains. Surprisingly, even Greece posted double digit growth at 13%. As a result, analysts now predict a more confident outlook in new car sales.

Meanwhile, the prolonged decline in revenue that lasted for over 6 years forced dealerships across EU to look for marketing alternatives to the prohibitively expensive print and TV advertising. Across EU, dealerships have increasingly started looking at their websites as the primary marketing driver.

izmo is the only solutions provider in the E.U. offering a “one-stop”, all inclusive web marketing solution required by dealers to drive this online marketing shift.

The izmo solution suite for EU auto dealers include “Virtual Showroom” Websites, Online Marketing and Social Media, Automotive CRM and ILM, Service Management and Dealership Performance Consulting, as well as image processing services.

Market Opportunity and Growth Strategy

With practically every business in the world's biggest markets looking forward to the web as their primary marketing source, the website segment for SMEs represent an opportunity of at least 10 million websites annually. With more than a decade of experience in the automotive sector, a highly competitive segment, the time is now ripe for izmo to enter the global market for websites for businesses and professionals with the launch of izmoWeb.com.

izmo is entering the market with five distinct competitive advantages:

- True one stop-solution, ideal for small businesses. All they have to do is enter their business name, address, preferred domain name and pricing information, and upload an optional logo. Izmo then performs all of the steps required to have a web business set up, including registering their domain name, setting up their website, hosting it, creating email ids, setting up their profile on Google and more.
- Professional content for all major business segments. With any other provider, the client will have to either write the content or hire others.
- Advanced appointments system built in: almost any business requires an appointment system.
- More than a website, a web ecosystem: izmo websites are not merely standalone website offering, but a complete system including a mother ship portal, that tracks and drives customers to the business right from day one.
- No other provider in the world offers all of these at our price. With our India advantage + global market presence, the entry barrier is quite high for others to offer any significant competition.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation of the financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on whether the Company has in place an adequate internal financial controls system over financial reporting and the operating effectiveness of such controls. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Company's Directors, as well as evaluating the overall presentation of the financial statements.

All income and expenditure having a material bearing on the financial statements are recognized on accrual basis.

The preparation of statements in conformity with accounting standards, requires management to make estimates and assumptions that effect the reported amounts of assets and liabilities at the date of financial statements, and the reported amounts of revenues and expenses during the reporting period. Examples of such expenses include provision for doubtful debts, miscellaneous expenditure and useful lives of fixed assets. Actual results could differ from those estimates. Any revision to such accounting estimates is recognized in the accounting period in which such revision takes place.

e. Depreciation

The resulting net gain or loss is recognized in the Profit and Loss Account.

h. Borrowing Cost

Borrowing costs that are attributable to the acquisition/construction of fixed assets are capitalized as part of the cost of the respective assets. Other borrowing costs are recognized as expenses in the year in which they are incurred.

i. Taxation

The deferred tax charge or credit is recognized using current tax rates. Deferred tax assets/liabilities are reviewed as at each Balance sheet date.

In terms of the Guidance note on accounting for credit available in respect of Minimum Alternative Tax (MAT) under the Income Tax Act 1961, issued by the ICAI, the excess of MAT over normal current tax payable has been recognized as an asset by way of credit to the profit & loss account as "MAT credit entitlement"
