The nature of business in which our Company is involved requires large amount of Working Capital. Our Company has sourced working capital facilities from various banks. Any change in the interest rates could significantly affect our financial condition and results of operations. If the interest rates for our existing or future borrowings increase significantly, our cost of servicing such debt will increase. Any down grading in India's debt rating by the International agencies may adversely affect our ability to raise requisite finances at reasonable costs. This may adversely impact our results of operations, planned capital expenditures and cash flows.

2. Risks Due To Company dependence on the Information Technology Industry and any radical change or downturn may have an impact on our business.

Our revenue is predominantly derived from the sale of IT hardware products as well as telecom products. The industry is highly fragmented in nature and competitive. In case of any downturn in this industry, or if the demand does not keep in pace with the supply

build-up in the industry, our business operations may be adversely affected. Further, if we are unable to maintain an upgraded supply of new technological developments in our industry, it may adversely affect our sales revenue and impact our business.

Supply Chain Management plays a very vital role in our business. A strong supply chain system is essential to ensure availability of stock at the branch. Ensuring shelf availability for our products warrants quick turnaround time and high level of coordination with suppliers. We rely on our supply chain and adopt operational processes to optimize our inventory position and reduce cost. We strive to keep optimum inventory at our branches and distribution centres to control our working capital requirements. We have set up distribution centres for efficient storage and timely delivery of material to our channel partners. This helps us to minimize lead time and better utilization of working capital. An inefficient supply chain management could adversely affect the results from operations.

4. A slowdown in economic growth in India could cause our business to suffer.

Our performance and growth are dependent on the health of the Indian economy. The economy could be adversely affected by various factors such as political or regulatory action, including adverse changes in liberalization policies, social disturbances, terrorist attacks and other acts of violence or war, natural calamities, interest rates, commodity and energy prices and various other factors. Any slowdown in the Indian economy may adversely impact our business and financial performance.

1. Significant Accounting Policies:

a. Basis of Preparation:

The financial statements of the company have been prepared in accordance with generally accepted accounting principles in India (Indian GAAP). The company has prepared these financial statements to comply in all material respects with the accounting standards notified under the Companies (Accounting Standards) Rules, 2006, (as amended) and the relevant provisions of the Companies Act, 1956. The financial statements have been prepared on an accrual basis and under the historical cost convention.

The accounting policies adopted in the preparation of financial statements are consistent with those of previous year except for depreciation, which has now been provided in accordance with Schedule II of the Companies Act, 2013. Previous year figures have been regrouped wherever necessary.

b. Use of Estimates:

The preparation of financial statements in conformity with the Indian GAAP requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. Although these estimates are based on management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring adjustment to the carrying amounts of assets or liabilities in future periods.

c. Tangible Fixed Assets:

Fixed Assets are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. The cost comprises of purchase price, borrowing costs if capitalization criteria are met and directly attributable cost of bringing the asset to its working condition for the intended use. Any trade discounts and rebates are deducted in arriving at the purchase price.

Subsequent expenditures related to an item of fixed asset is added to its book value only if it increases the future benefits from the existing asset beyond its previously assessed standard of performance. All other expenses on existing fixed assets, including day-to-day repair and maintenance expenditure and cost of replacing parts, are charged to the statement of profit and loss for the period during which such expenses are incurred.

d. Depreciation on tangible fixed assets:

Depreciation on Tangible assets is provided on the straight-line method over the useful lives of assets as prescribed under Part C of Schedule II of the Companies Act, 2013. Depreciation for assets purchased / sold during a period is proportionately charged. The useful lives for the fixed assets prescribed under Part C of Schedule II of the Companies Act, 2013 are as follows:

Assets	Useful Life
Office Premises	60 years
Information Technology Equipment	3 years
Servers & Networks	6 years
Vehicles	8 years
Office Equipment	5 years
Furniture and Fixture	10 years

During the year, the Company has revised depreciation rates on fixed assets according to the useful life as prescribed under Part C of Schedule II of the Companies Act, 2013. Had there not been a change in the method of providing depreciation, the depreciation for the year would have been lower by Rs. 102.74 lakhs. Depreciation on assets whose useful life is already exhausted before 1.4.2014 amounts to Rs. 66.62 lakhs and the same has been adjusted against General Reserve.

e. Lease:

Where the company is Lessee

Finance Leases, which effectively transfer to the company substantially all the risks and benefits incidental to ownership of the leased item, are capitalized at the inception of the lease term at the lower of the fair value of the leased property and present value of minimum lease payments. Lease payments are apportioned between the finance charges and reduction of lease liability, so as to achieve constant rate of interest of the remaining balance of the liability. Finance charges are recognized as finance cost in the statement of profit and loss. Lease management fees , legal charges, and other initial direct costs of lease are capitalized.

A leased asset is depreciated on a straight line basis over the useful life of the asset as prescribed under Part C of Schedule II of the Companies Act, 2013.

Leases, where the lessor effectively retains substantially all the risks and benefits of ownership of the leased item, are classified as operating leases. Operating lease payments are recognized as an expense in the statement of Profit and loss on a straight line basis over the lease term.

f. Borrowing costs:

Borrowing cost includes interest, amortization of ancillary costs incurred in connection with the arrangement of borrowing and exchange differences arising from foreign currency borrowing to the extent they are regarded as an adjustment to the interest cost.

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset. All other borrowing costs are expensed in the period they occur.

g. Revenue Recognition:

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognized.

Sale of Goods:

Revenue from sale of goods is recognized when the significant risk and rewards of ownership of goods have passed to the buyer, usually on delivery of the goods. The company collects sales taxes and value added taxes (VAT) on behalf of the Government and therefore, these are not economic benefits flowing to the company. Hence, they are excluded from revenue.

Income from Service:

Revenues from Product Support Services are recognized once the service is provided and the invoice is raised. The company collects service tax on behalf of the government and, therefore, it is not an economic benefit flowing to the company. Hence, it is excluded from revenue.

All exchange rate differences in respect of foreign currency transactions are dealt with in statement of Profit & Loss. All foreign currency assets and liabilities, if any as at the balance sheet date are restated at the closing rate or the forward contract rate wherever applicable.

The premium or discount arising at the inception of forward exchange contracts not intended for trading or speculation purposes is amortized as expense or income over the life of the contract. Exchange differences on such contracts are recognized in the statement of profit and loss in the year in which the exchange rate changes. Any profit or loss arising on cancellation or renewal of forward exchange contract is recognized as income or as expense for the year.

i. Investments:

Investments which are intended to be held for not more than one year from the reporting date are classified as Current Investments.

Current Investments are carried in the Financials statements at lower of cost or fair value determined on an individual investments basis.

The company has no obligation, other than the contribution payable to the provident fund.

The Gratuity is accounted for on the basis of Actuarial valuation, based on premium calculated by LIC under its Group Gratuity (Cash Accumulation) Scheme.

l. Corporate Social Responsibility (CSR):

As per Section 135 of the Companies Act, 2013, a CSR Committee has been formed by the Company. The areas of CSR activities includes providing safe drinking water in the locality, promoting education, health care, promoting eco friendly products, and providing clothes, shoes and other necessities to the needy people. The funds were spent on these activities which are specified in Schedule VII of the Companies Act, 2013.

m. Income Taxes:

Tax expense comprises of current and deferred tax. Current income-tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961. The tax rates and tax laws used to compute the amounts are those that are enacted or substantively enacted, at the reporting date. Current income tax relating to items recognized directly in equity is recognized in equity and not in the statement of profit and loss.

Deferred income taxes reflect the impact of timing differences between taxable income and accounting income originating during the current year and reversal of timing differences for the earlier years. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted, at the reporting date. Deferred income tax relating to items recognized directly in equity is recognized in equity and not in the statement of profit and loss.

Deferred tax liabilities are recognized for all taxable timing differences. Deferred tax

assets are recognized for deductible timing differences only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. In situations where the company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that they can be realized against future taxable profits.

At each reporting date, the company re-assesses unrecognized deferred tax assets. It recognizes unrecognized deferred tax asset to the extent that it has become reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which such deferred tax assets can be realized.

Carrying amount of deferred tax assets are reviewed at each reporting date. The Company writes down the carrying amount of deferred tax assets to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which such deferred tax assets can be realized. Any such write down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set-off current tax assets against current liabilities and deferred tax assets and deferred taxes relate to the same taxable entity.

Minimum alternate tax (MAT) paid in a year is charged to the statement of profit and loss as current tax. The company recognizes MAT credit available as an asset only to the extent that there is convincing evidence that the company will pay normal income tax during the specified period i.e. the period for the MAT credit is allowed to be carried forward. In the year in which the company recognizes MAT credit as an asset in accordance with the Guidance Note on Accounting for Credit Available in respect of Minimum Alternative Tax under the Income-tax Act, 1961, the said asset is created by way of credit to the statement of profit and loss and shown as "MAT credit entitlement." The company reviews the "MAT credit entitlement" asset at each reporting date and writes down the asset to the extent the company does not have convincing evidence that it will pay normal tax during the specified period.

I. Cash and cash equivalents:

Cash and cash equivalents for the purpose of cash flow statement comprise cash at bank and in hand and short term investments and deposits with an original maturity of three months or less.

n. Impairment:

The carrying amounts of assets are reviewed at each Balance Sheet date if there is any indication of impairment based on internal/external factors. An impairment loss will be recognized wherever the carrying amount of an asset exceeds its estimated recoverable amount. The recoverable amount is greater of the asset's net selling price and value in use. In assessing the value in use, the estimated future cash flows are discounted to the present value at the weighted average cost of capital. Previously recognized impairment

loss if any is further provided or reversed depending on changes in circumstances.

Confirmation from Debtors and Creditors are in the process of being obtained.
