Outlook and summary

- Due to second wave of Covid-19, the industry outlook is volatile. Impact will depend on magnitude and duration of lockdowns, including any partial or full trade restrictions. Challenges faced during first wave include finite beer shelf life & costs for liquidation/expired product, as well as operational challenges like lower returns of used bottles.
- Health and safety of employees and stakeholders remains paramount, while operations are fully in compliance with regulations as they are introduced from time to time.
- UBL has and will continue to manage all elements of costs and capital investments with agility in light of the uncertain demand given the situation of second Covid-19 wave across the country.
- The Company has observed recovery of underlying consumer demand post the first Covid-19 wave and continues to be optimistic about the long term growth drivers of the industry.
- UBL is well positioned to navigate the current circumstances with a leading market position, strong brand portfolio and robust balance sheet.
