**15. MANAGEMENT DISCUSSION AND ANALYSIS**

Dhenu Buildcon Infra Limited is Non-Banking Financial Company (NBFC), primarily engaged in the business of Investment in securities. The Management discussions and analysis is given hereunder:-

**INDUSTRY STRUCTURE AND DEVELOPMENTS****GLOBAL ECONOMY:**

As the global economy navigates through various economic challenges, a prevailing sense of optimism continued to drive progress forward. As per the World Economic Outlook released by International Monetary Fund (IMF) in April 2024, baseline forecasts predict a decline in growth from 3.4% in 2023 to 2.8% in 2024, followed by a recovery to 3.0% in 2025.

Financial year 2024 began on a mixed note. On the positive side, after wreaking havoc for almost two years, the impact of the COVID-19 pandemic on lives and livelihoods started receding. This was aided by a mass immunisation programme and the advent of a less virulent variant called omicron. However, the flip side was the impact of inflationary trends, supply chain disruptions emanating from China, and the start of the Russia-Ukraine conflict impacting commodity prices.

The RBI, like other central banks, raised the monetary policy rates and reduced excess systemic liquidity. Major areas of concern for the economy were elevated commodity prices leading to a depreciation of the Indian rupee, higher retail inflation (both core and food inflation) leading to the RBI raising interest rates and rationalising systemic liquidity, and a rising current account deficit (CAD). However, despite these critical challenges, India emerged as the fastest growing major economy in the world. The second advance estimate of national income released by the central statistics office (CSO) on 28 February 2024 expects real GDP growth in Financial year 2024 to be 7.0%.

### **INDIAN ECONOMY:**

In Financial Year 2024, the Indian economy faced multiple challenges. The country's retail inflation indicator, consumer price inflation inched above the RBI's tolerance range in January 2023.

In the recent past, the NBFC sector has seen remarkable growth and is beating its traditional opponents quite convincingly. According to a report, the year-on-year growth in NBFC assets under management in India from 2009 to 2024 has been 22%. Even when the GDP growth rate is slow, such institutions have been pivotal in driving the Indian economy. As NBFCs have low operating expenses, they can offer competitive interest rates, making them attractive to borrowers. As per statistics, customers are now choosing NBFCs over banks as the credit for the former grew by 24.3% per year against 21.4% for the latter.

The Government of India announced a growth oriented and expansionary budget for the Financial year 2025. It has tried to strike balance between fiscal consolidation and growth by continuing its focus on capital expenditure and creating fiscal space for that by curtailing revenue expenditure. The calendar year 2024 began on a promising note with improved supply conditions, resilient economic activity, and some degree of stability in financial markets. However, the banking and non-banking financial services sector in India remained healthy and evolved in an orderly manner. The general expectation is that India's GDP for Financial Year 2025 would record a growth in excess of 6%.

### **NBFC's PERFORMANCE:**

The year 2024 has been green for the NBFC sector as mostly positive developments including that of Mergers and acquisitions came with a few of controversial ones. NBFCs have become important constituents of India's financial sector and have been recording higher credit growth than scheduled commercial banks (SCBs) over the past few years. NBFCs continue to leverage their superior understanding of regional dynamics and customised products and services to expedite financial inclusion in India. Lower transaction costs, innovative products, quick decision making, customer orientation and prompt service standards have typically differentiated NBFCs from banks. Considering the reach and expanse of NBFCs, these are well-suited to bridge the financing gap in a large country like India. Systemically important NBFCs have demonstrated agility, innovation and frugality to provide formal financial services to millions of Indians. The growing importance of NBFCs is reflected in the consistent rise of their credit as a proportion to GDP as well as in relation to credit extended by SCBs to the NBFC sector.

Given the increasing importance of NBFCs, the RBI, in the last few years, has increased its regulatory oversight over the sector. Multiple guidelines such as (i) vigil over asset-liability management practices, (ii) maintaining liquidity ratios, (iii) increased reporting requirements, and (iv) scale-based regulation, have led to NBFCs adopting practices in line with banks. The regulatory vigil is based on four key cornerstones of: (i) responsible financial innovation, (ii) accountable conduct, (iii) responsible governance, and (iv) centrality of the customer.

NBFCs with superior capital adequacy, better margins, frugal cost management, prudent risk management and those incorporating above four key cornerstones in their business models will continue to deliver sustainable growth in the foreseeable future.

To strengthen supervision over NBFCs, the Reserve Bank of India (RBI) introduced scale-based regulation and revised NPA recognition and upgradation norms. The revised norms included the classification of special mention account (SMA) and NPA on a day-end position basis and upgrade from an NPA to standard category only after clearance of all outstanding overdues.

In terms of funding, NBFCs are seeing improvement in their access to capital. The funding condition of NBFCs is stabilising because banks are lending to them. Mutual funds, that had become very cautious to lend to NBFC's, have now also started lending. NBFCs are also diversifying their funding base by looking at retail borrowing.

The financial system is maturing from a bank-dominated space to a hybrid system wherein non-bank intermediaries are gaining prominence.

### **OUR BUSINESS OPERATIONS:**

Dhenu Buildcon is a small size NBFC engaged in the sole business segment of investment services. Due to losses in the previous years pursuant to massive pressure of COVID-19 pandemic, the Company is still striving to recover the losses and is exploring the other prospective growth avenues so as to restore the Company's financial position.

During the year, the Company recorded a loss of Rs. (39,54,934)/- which has increased as compared to the previous year loss of Rs. (4,42,400.16)/-. The Assets base has improved with nominal growth as compared to the last year. On the other hand, the liabilities base is reduced as compared to last year which gives the prospects of revival of Company's business in the years to come.

A rapid fluctuation in market activities due to ongoing amendments and norms made by RBI in NBFC sector are the challenges which Company is facing and striving to find new ways to come back on the profit track.

### **OPPORTUNITIES:**

One of the biggest opportunities for NBFCs are the new to credit customers. These are the people who belong to the rural sector and have never borrowed from any financial institution in the past. Rural sector has limited ground presence of banks and other credit financial services and whatever banks are present in these sectors as regulated by legislation, have to rely on banking and credit history while assessing the loan and cannot provide loans or financial services to the people who do not qualify for the bank loan. For such people, NBFCs are a boon. They have emerged as a lucrative segment as far as NBFC is concerned. NBFCs have implemented their machinery in a unique way which assesses the creditworthiness of these people and grant them loans with less paperwork.

Keeping in regard the financial needs of people and structure of banks, government has exempted NBFC from the hard rules and regulations levied on bank. NBFC enjoys the flexibility in rules regarding paperwork and other restrictions making it suitable for entrepreneurs to put their interest in NBFC. Government itself has provided with the opportunities to the NBFC to establish their place in the Indian market. There are continuing benefits for the NBFC as the government is implementing rules to help in growth of NBFC.

NBFCs are in the business of profit and their contribution in the growth of Indian GDP displays the perfect picture of how well NBFCs have been working these past years.

### **THREATS:**

#### **Refinancing / NBFC Funding:**

Refinancing is a challenge NBFCs face in its smooth working. A major source of refinancing for NBFCs are the banks, capital markets or maybe its competitors. There is no other option for NBFC for the purpose of refinancing and in the course of business, refinancing is an important element for the efficient working as well as the sustainability of the growth. The present situation considering the refinancing options is not favorable to the sustainability of growth. Banks and housing financing companies have many options for the purpose of refinancing such as RBI, NABARD, EXIM bank and SIDBI for banks and National Housing Bank as the regulator of housing financing companies.

#### **NBFC License:**

Another challenge posed to the NBFC is procuring a license for NBFC. This process for procuring a license is not easy and requires approval and complicated requisite documents. The process for obtaining a license requires a lot of compliance. Moreover RBI has put various restrictions before obtaining a license. Apart from proper documentation, experienced Board of directors, it also requires details related to the quality and quantity of capital.

#### **Non-flexibility in the classification of loans NPA:**

Considering the large corporate, flexibility and classification under NPA is an essential element and shall be scheduled for efficient performance. Non-performing assets norms are relevant considering the efficient working

of a larger corporate as irregular cash flow poses a threat in regards of delay in payments. NPA shall be classified on the basis of assets financed and a uniform system of classification of assets must be present.

**Independent Auditor's Report on Audited Quarterly Financial Results and Year to Date Financial Results of "DHENU BUILDCON INFRA LIMITED" Pursuant to the Regulation 33 of the SEBI (Listing Obligations & Disclosure Requirements) Regulations, 2015**

To,  
The Board of Director of

**DHENU BUILDCON INFRA LIMITED**

We have audited the accompanying quarterly financial results of **DHENU BUILDCON INFRA LIMITED** ("the Company") for the quarter ended on March 31, 2025 and year to date financial results for the period from 1<sup>st</sup> April 2024 to 31<sup>st</sup> March, 2025 attached herewith, being submitted by the company pursuant to the requirement of the Regulations 33 of the SEBI (Listing Obligation and Disclosure Requirements) Regulations, 2015, as amended ("the Listing Regulations").

In our opinion and to the best of our information and according to the explanations given to us these quarterly Financial Results as well as the year to date results:

- i. are presented in accordance with the requirements of Regulation 33 of the SEBI (Listing obligation and disclosure Requirements) Regulations, 2015, as amended in this regards; and
- ii. gives a true and fair view in conformity with the aforesaid Accounting Standards and other accounting principles generally accepted in India of the net loss, and other comprehensive income and other financial information of the Company for the quarter ended on March 31, 2025 as well as the year-to-date results for the period 1<sup>st</sup> April 2024 to 31<sup>st</sup> March, 2025.

**Basis for Opinion**

We conducted our audit in accordance with the Standards on Auditing specified under Section 143(10) of the Companies Act, 2013 (the Act).

Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Results section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India ('ICAI') together with the ethical requirements that are relevant to our audit of the financial Results under the provisions of the Act and the rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

**Management's Responsibility for the Ind AS Financial Results**

This Statement, which is the responsibility of the Company's Management and approved by the Board of Directors, has been prepared on the basis of interim financial statements. The Company's Board of Director are responsible for the preparation and presentation of these financial results that give a true and fair view of the net loss and other comprehensive income and other financial information of the company in accordance with the recognition

and measurement principles laid down in Indian Accounting Standard 34, 'Interim Financial Reporting' prescribed under section 133 of the Act read with relevant rules issued thereunder and other accounting principles generally accepted in India and in compliance with Regulation 33 of the Listing Regulations.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgement and estimates that are reasonable and prudent; design, implementation and maintenance of adequate internal financial control, that are operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial results Ind AS that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial results, the Board of Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

#### **Auditor's Responsibility for the Audit of the Financial Results**

Our objectives are to obtain reasonable assurance about whether the financial results as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial results.

As part of an audit in accordance with Standards on Auditing, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Board of Directors.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the financial results that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial results may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work: and (i) to evaluate the effect of any identified misstatements in the financial results.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

#### **Other Matters**

The Statements includes the results for the quarter ended March 31, 2025 being the balancing figure between the audited figures in respect of the full financial year and the published unaudited year to date figures up to the third quarter of the current financial year which were subject to limited review by us.

24	Segment Reporting					
	Operating segments are defined as components of an enterprise for which discrete financial information is available that is evaluated regularly by the Chief Operating Decision Maker, in deciding how to allocate resources and assessing performance. Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. Based on the management approach as defined in Ind AS 108, the Chief Operating Decision Maker evaluates the Company's performance based on only one segment i.e. Trading of shares and Securities.

26.2	The management assessed that the fair values of cash and cash equivalents, trade receivables, trade payables, current borrowings, current loans and other financial assets & liabilities approximates their carrying amounts largely due to the short-term maturities of these instruments.					
26.3	The management considers that the carrying amounts of Financial assets and Financial liabilities recognized at nominal cost/amortised cost in the Financial statements approximate their fair values.					
26.4	Non current borrowings has been contracted at floating rates of interest, which are reset at short intervals. Fair value of floating interest rate borrowings approximates their carrying value subject to adjustments made for transaction cost.					

<b>27 Financial Risk Management</b>				
Financial management of the Company has been receiving attention of the top management of the Company. The management considers finance as the lifeline of the business and therefore, financial management is carried out meticulously on the basis of detailed management information systems and reports at periodical intervals extending from daily reports to long-term plans. Importance is laid on liquidity and working capital management with a view to reduce over-dependence on borrowings and reduction in interest cost. Various kinds of financial risks and their mitigation plans are as follows:				
<b>27.1 Credit Risk</b>				
The credit risk is the risk of financial loss arising from counter party failing to discharge an obligation. The credit risk is controlled by analysing credit limits and credit duration for customers on continuous basis. Further, in order to manage the credit risk, the security deposits are obtained from customers where ever considered necessary.				
On account of adoption of Ind AS 109, the Company uses an expected credit loss model to assess the impairment loss. The Company uses a provision matrix to compute the expected credit loss allowance for trade receivables.				
<b>27.2 Liquidity Risk</b>				
The Company determines its liquidity requirement in the short, medium and long term. This is done by drawing up cash forecast for short term and long term needs.				
The Company manage its liquidity risk in a manner so as to meet its normal financial obligations without any significant delay or stress. Such risk is managed through ensuring operational cash flow while at the same time maintaining adequate cash and cash equivalent position. The management has arranged for funding from banks and inter corporate and adopted a policy of managing assets with liquidity monitoring future cash flow and liquidity on a regular basis. Surplus funds not immediately required are invested in certain fixed deposits which provides flexibility to liquidate.

<b>Note:</b> The amounts are gross and undiscounted, and include contractual interest payments and exclude the impact of netting agreements (if any). The interest payments on variable interest rate loans in the tables above reflect market forward interest rates at the respective reporting dates and these amounts may change as market interest rates change. Except for these financial liabilities, it is not expected that cash flows included in the maturity analysis could occur significantly earlier, or at significantly different amounts. When the amount payable is not fixed, the amount disclosed has been determined with reference to conditions existing at the reporting date.				

<b>27.3 Market Risk</b>				
Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises of Foreign Exchange Risk and Interest Rate Risk.				
<b>Foreign Exchange Risk</b>				
Foreign Exchange Risk is the exposure of the Company to the potential impact of the movement in foreign exchange rate. The Company does not have any material foreign currency exposure at the balance sheet date.				
<b>Interest Rate Risk</b>				
Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market rates. The company's exposure to the risk of changes in market interest rate relates primarily to company's borrowing with floating interest rates. The Company do not have any significant interest rate risk on its current borrowing due to their short tenure.				
The Company is also exposed to interest rate risk on surplus funds parked in loans. To manage such risks, such loans are granted for short durations with fixed interest rate in line with the expected business requirements for such funds.

<b>28 Capital Management</b>				
The Company objective to manage its capital is to ensure continuity of business while at the same time provide reasonable returns to its various stakeholders but keep associated costs under control. In order to achieve this, requirement of capital is reviewed periodically with reference to operating and business plans that take into account capital expenditure and strategic investments. Sourcing of capital is done through judicious combination of equity/internal accruals and borrowings, both short term and long term. Net debt (total borrowings less cash and cash equivalents) to equity ratio is used to monitor capital.

The Company is listed on the BSEI (Bombay Stock Exchange of India Ltd.) The company is engaged in the business of investment, financing, trading in shares and securities activities. We believe that we are well placed to leverage on the growth opportunities in the economy.

## 2. BASIS OF ACCOUNTING

### 2.1. Statement of Compliance

These financial statements have been prepared in accordance with the Indian Accounting Standards ("Ind AS") as prescribed by Ministry of Corporate Affairs pursuant to Section 133 of the Companies Act, 2013 ("the Act"), read with the Companies (Indian Accounting Standards) Rules, 2015 (as amended), other relevant provisions of the Act and other accounting principles generally accepted in India including the guidelines issued by the Reserve Bank of India (RBI) as applicable to a Non – Banking Finance Company ('NBFC').

### 2.2. Basis of Measurement

The Company maintains accounts on accrual basis following the historical cost convention, except for followings:

2.2.1. All assets falling under Property Plant and Equipment (PPE) have been valued at Cost Less Depreciation.

2.2.2. Certain Financial Assets and Liabilities is measured at Fair value/ Amortized cost (refer accounting policy regarding financial instruments);

2.2.3. Defined Benefit Plans – Plan assets measured at fair value wherever applicable

### 2.3. Functional and Presentation Currency

The Financial Statements are presented in Indian Rupee (₹), which is the functional currency of the Company and the currency of the primary economic environment in which the Company operates. All amounts disclosed in financial statements and notes have been rounded off to the nearest Lacs (with two places of decimal) as per the requirements of Schedule III, unless otherwise stated.

### 2.4. Use of Estimates and Judgements

The preparation of financial statements in conformity with Ind AS requires judgments, estimates and assumptions to be made that affect the reported amount of assets and liabilities, disclosure of contingent liabilities on the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Difference between the actual results and estimates are recognized in the period in which the results are known/ materialized.

## 2.5. Presentation of Financial Statements

The Balance Sheet and the Statement of Profit and Loss are prepared and presented in the format prescribed in the Schedule III to the Companies Act, 2013 ("the Act"). The Statement of Cash Flows has been prepared and presented as per the requirements of Ind AS 7 "Statement of Cash flows". The disclosure requirements with respect to items in the Balance Sheet and Statement of Profit and Loss, as prescribed in the Schedule III to the Act, are presented by way of notes forming part of the financial statements along with the other notes required to be disclosed under the notified Indian Accounting Standards.

## 2.6. Operating Cycle for current and non-current classification

All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013 and Ind AS 1. The Company has ascertained its operating cycle as twelve months for the purpose of current and non-current classification of assets and liabilities.

### 2.6.1. An asset is classified as current when it is:

- 2.6.1.1. Expected to be realized or intended to sold or consumed in normal operating cycle;
- 2.6.1.2. Held primarily for the purpose of trading;
- 2.6.1.3. Expected to be realized within twelve months after the reporting period; or
- 2.6.1.4. Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All the other assets are classified as non-current.

### 2.6.2. A liability is current when:

- 2.6.2.1. It is expected to be settled in normal operating cycle;
- 2.6.2.2. It is held primarily for the purpose of trading;
- 2.6.2.3. It is due to be settled within twelve months after the reporting period; or
- 2.6.2.4. There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All the other liabilities are classified as non-current.

### 2.6.3. Deferred Tax Assets and Liabilities are classified as non-current assets and liabilities respectively.

## 2.7. Measurement of Fair Values

A number of the Company's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.

### 2.7.1. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an

orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- 2.7.1.1. In the principal market for the asset or liability, or
- 2.7.1.2. In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

2.7.2. The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

2.7.3. All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the input that is significant to the fair value measurement as a whole:

Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities

Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable and

Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

### 3. ACCOUNTING POLICIES

A summary of the significant accounting policies applied in the preparation of the financial statements are as given below. These accounting policies have been applied consistently to all the periods presented in the financial statements.

#### 3.1. Property, Plant and Equipment

##### 3.1.1. Recognition and Measurement:

Property (Land and Building), plant and equipment held for use in the production or/and supply of goods or services, or for administrative purposes is stated in the balance sheet at Fair Market Value less any accumulated depreciation and accumulated impairment losses (if any). Cost of an item of property, plant and equipment acquired comprises its purchase price, including import duties and non-refundable purchase taxes, after deducting any trade discounts and rebates, any directly attributable costs of bringing the assets to its working condition and location for its intended use and present value of any estimated cost of dismantling and removing the item and restoring the site on which it is located.

If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted for as separate items (major components) of property, plant and equipment.

Profit or loss arising on the disposal of property, plant and equipment are recognized in the Statement of Profit and Loss.

### 3.1.2. Subsequent Measurement:

Subsequent costs are included in the asset's carrying amount, only when it is probable that future economic benefits associated with the cost incurred will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced.

Major Inspection/ Repairs/ Overhauling expenses are recognized in the carrying amount of the item of property, plant and equipment as a replacement if the recognition criteria are satisfied. Any Unamortized part of the previously recognized expenses of similar nature is derecognized.

### 3.1.3. Depreciation and Amortization:

Depreciation on Property, Plant & Equipment is provided on Straight Line Method in terms of life span of assets prescribed in Schedule II of the Companies Act, 2013 or as reassessed by the Company based on the technical evaluation.

In case the cost of part of tangible asset is significant to the total cost of the assets and useful life of that part is different from the remaining useful life of the asset, depreciation has been provided on straight line method based on internal assessment and independent technical evaluation carried out by external valuers, which the management believes that the useful lives of the component best represent the period over which it expects to use those components.

Category	Useful life (Years)
Non-Factory Building (RCC Frame Structure)	30/60
Factory Building	30
Plant and machinery	
Other than Continuous Process Plant	8/10/15/40
Computer equipment	3/5
Servers and networks	5
Furniture and Fixtures	5/10
Office equipment	5
Vehicles, Motor cycles, scooters	8
Others	8

Depreciation on additions (disposals) during the year is provided on a pro-rata basis i.e., from (up to) the date on which asset is ready for use (disposed of).

Depreciation method, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate.

### 3.1.4. Disposal of Assets

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between net disposal proceeds and the carrying amount of the asset and is recognized in the statement of profit and loss.

### 3.1.5. Capital Work in Progress

Capital work-in-progress is stated at cost which includes expenses incurred during construction period, interest on amount borrowed for acquisition of qualifying assets and other expenses incurred in connection with project implementation in so far as such expenses relate to the period prior to the commencement of commercial production.

## 3.2. Leases

### 3.2.1. Determining whether an arrangement contains a lease

The determination of whether an arrangement is (or contains) a lease is based on the substance of the arrangement at the inception of the lease. The arrangement is, or contains, a lease if fulfillment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right-of-use (ROU) for the asset or assets, even if that right is not explicitly specified in an arrangement.

Ind AS 116 sets out the principles for the recognition, measurement, presentation and disclosures of leases for both lessees and lessors. It introduced a single, on-balance sheet accounting model for lessees.

The Company is lessee mainly in Land & Building (Factory and Offices). It recognised all such arrangements as right-of-use (ROU) asset and lessee as liability. The ROU is considered when company has all the right to drive economic benefits from the use of underlying asset. The right-of-use (ROU) asset is measured by discounting future lease payments to net present value (NPV). All lease payments during reporting period are recognised either as operational lease or financial lease as per Ind AS 116. However low value leases and leases below 12 months are treated as operating lease only.

### 3.2.2. Company as lessor

#### Finance Lease

Leases which effectively transfer to the lessee substantially all the risks and benefits incidental to ownership of the leased item are classified and accounted for as finance lease. Lease rental receipts are apportioned between the finance income and capital repayment based on the implicit rate of return. Contingent rents are recognized as revenue in the period in which they are earned.

### Operating Lease

Leases in which the Company does not transfer substantially all the risks and rewards of ownership of an asset are classified as operating leases. Rental income from operating leases is recognized on a straight-line basis over the term of the relevant lease except where scheduled increase in rent compensates the Company with expected inflationary costs.

#### 3.2.3. Company as lessee

### Finance Lease

Finance Leases, which effectively transfer to the lessee substantially all the risks and benefits incidental to ownership of the leased item, are capitalized at the lower of the fair value and present value of the minimum lease payments at the inception of the lease term and disclosed as leased assets. Lease Payments under such leases are apportioned between the finance charges and reduction of the lease liability based on the implicit rate of return. Finance charges are charged directly to the statement of profit and loss. Lease management fees, legal charges and other initial direct costs are capitalized. If there is no reasonable certainty that the Company will obtain the ownership by the end of lease term, capitalized leased assets are depreciated over the shorter of the estimated useful life of the asset or the lease term.

### Operating Lease

Assets acquired on leases where a significant portion of risk and reward is retained by the lessor are classified as operating leases. Lease rental are charged to statement of profit and loss on a straight-line basis over the lease term, except where scheduled increase in rent compensates the Company with expected inflationary costs.

#### 3.3. Inventories

Inventories are valued at the lower of cost and net realizable value (NRV). Cost is measured by including, unless specifically mentioned below, cost of purchase and other costs incurred in bringing the inventories to their present location and condition. NRV is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale. Cost is ascertained on weighted average basis for all inventories except for by products and scrap materials which are valued at net realizable value.

#### 3.4. Cash and Cash Equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of change in value.

For the purpose of the statement of cash flows, cash and cash equivalents includes cash on hand, term

deposits and other short-term highly liquid investments, net of bank overdrafts as they are considered an integral part of the Company's cash management. Bank overdrafts are shown within short-term borrowings in the balance sheet.

### 3.5. Income Tax

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate adjusted by changes in deferred tax assets and liabilities attributable to temporary differences, unused tax losses etc. Current and deferred tax is recognized in the statement of profit & loss, except to the extent that it relates to items recognized in other comprehensive income or directly in equity. In this case, the tax is also recognized in other comprehensive income or directly in equity, respectively.

#### 3.5.1. Current Tax: -

Current tax liabilities (or assets) for the current and prior periods are measured at the amount expected to be paid to (recovered from) the taxation authorities using the tax rates (and tax laws) that have been enacted or substantively enacted, at the end of the reporting period.

#### 3.5.2. Minimum Alternate Tax (MAT) credit:-

MAT Credit is recognized as an asset only when and to the extent there is convincing evidence that the company will pay normal income tax during the specified period. In the year in which the Minimum Alternative tax (MAT) credit becomes eligible to be recognized as an asset in accordance with the recommendations contained in guidance note issued by the Institute of Chartered Accountants of India, the said asset is created by way of a credit to the Statement of profit and loss and shown as MAT Credit Entitlement. The Company reviews the same at each balance sheet date and writes down the carrying amount of MAT Credit Entitlement to the extent there is no longer convincing evidence to the effect that Company will pay normal Income Tax during the specified period.

#### 3.5.3. Deferred Tax: -

Deferred Tax assets and liabilities is measured at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the corresponding amounts used for taxation purposes (i.e., tax base). Deferred tax is also recognized for carry forward of unused tax losses and unused tax credits.

Deferred tax assets are recognized to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax

losses can be utilized.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period. The Company reduces the carrying amount of a deferred tax asset to the extent that it is no longer probable that sufficient taxable profit will be available to allow the benefit of part or that entire deferred tax asset to be utilized. Any such reduction is reversed to the extent that it becomes probable that sufficient taxable profit will be available.

Deferred tax relating to items recognized outside the Statement of Profit and Loss is recognized either in other comprehensive income or in equity. Deferred tax items are recognized in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

### 3.6. Revenue Recognition

Revenue is recognized based to the extent it is probable that the economic benefit will flow to the company and revenue can be reliably measured regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment, and excludes taxes & duties collected on behalf of the Government and is reduced for estimated customer returns, rebates and other similar allowances.

#### 3.6.1. Sale of Products:

The Company recognizes revenue when the amount of revenue can be reliably measured, it is probable that future economic benefits will flow to the Company and significant risk and reward incidental to sale of products is transferred to the buyer, usually on delivery of the goods. Accruals for sales return, chargeback and other allowances are provided at the point of sale based on the past experience.

#### 3.6.2. Revenue from rendering of services:

Revenue from rendering of services is recognized on pro-rata basis over the period of contract and when the performance of agreed contractual task has been completed.

#### 3.6.3. Other Income:

3.6.3.1. Interest Income: For all debt instruments measured either at amortized cost or at fair value through other comprehensive income (FVTOCI), interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash receipts over the expected life of the financial instrument or a shorter period, where

appropriate, to the gross carrying amount of the financial asset.

3.6.3.2. Other Income: Other items of income are accounted as and when the right to receive such income arises and it is probable that the economic benefits will flow to the company and the amount of income can be measured reliably.

### 3.7. Employee Benefits

#### 3.7.1. Short Term Benefits

Short term employee benefit obligations are measured on an undiscounted basis and are expensed as the related services are provided. Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within twelve months after the end of the period in which the employees render the related service are recognized in respect of employees' services up to the end of the reporting period.

#### 3.7.2. Other Long-Term Employee Benefits

The liabilities for earned/privilege leave that are not expected to be settled wholly within twelve months are measured as the present value of the expected future payments to be made in respect of services provided by employees up to the end of the reporting period using the projected unit credit method. The benefits are discounted using the government securities (G-Sec) at the end of the reporting period that have terms approximating to the terms of related obligation. Remeasurement as the result of experience adjustment and changes in actuarial assumptions are recognized in statement of profit and loss.

#### 3.7.3. Post-Employment Benefits

The Company operates the following post-employment schemes:

#### 3.7.4. Defined Contribution Plan

Defined contribution plans such as Provident Fund, Employee State Insurance etc. are charged to the statement of profit and loss as and when incurred and paid to Authority.

#### 3.7.5. Defined Benefit Plans

3.7.5.1. The liability or asset recognized in the Balance Sheet in respect of defined benefit plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The Company's net obligation in respect of defined benefit plans is calculated separately for each plan by estimating the amount of future benefit that employees have earned in the current and prior periods. The defined benefit obligation is calculated annually by Actuaries using the

projected unit credit method.

3.7.5.2. The liability recognized for defined benefit plans is the present value of the defined benefit obligation at the reporting date less the fair value of plan assets, together with adjustments for unrecognized actuarial gains or losses and past service costs. The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. The benefits are discounted using the government securities (G-Sec) at the end of the reporting period that have terms approximating to the terms of related obligation.

3.7.5.3. Remeasurement of the net defined benefit obligation, which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling, are recognized in other comprehensive income. Remeasurement recognized in other comprehensive income is reflected immediately in retained earnings and will not be reclassified to the statement of profit and loss.

### 3.8. Foreign Currency Transactions

3.8.1. Foreign currency (other than the functional currency) transactions are translated into the functional currency using the spot rates of exchanges at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rate of exchanges at the reporting date.

3.8.2. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities are generally recognized in profit or loss in the year in which they arise except for exchange differences on foreign currency borrowings relating to assets under construction for future productive use, which are included in the cost of those qualifying assets. When they are regarded as an adjustment to interest costs on those foreign currency borrowings, the balance is presented in the Statement of Profit and Loss within finance costs.

### 3.9. Borrowing Costs

3.9.1. Borrowing Costs consists of interest and other costs that an entity incurs in connection with the borrowings of funds. Borrowing costs also includes foreign exchange difference to the extent regarded as an adjustment to the borrowing costs.

3.9.2. Borrowing costs directly attributable to the acquisition or construction of a qualifying asset are capitalized as a part of the cost of that asset that necessarily takes a substantial period of time to complete and prepare the asset for its intended use or sale.

3.9.3. Transaction costs in respect of long-term borrowing are amortized over the tenure of respective loans using Effective Interest Rate (EIR) method. All other borrowing costs are recognized in the statement of profit and loss in the period in which they are incurred.

### 3.10. Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

### 3.11. Financial Assets

#### 3.11.1. Recognition and Initial Measurement:

3.11.1.1. All financial assets are initially recognized when the company becomes a party to the contractual provisions of the instruments. A financial asset is initially measured at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset.

3.11.2. Classification and Subsequent Measurement: For purposes of subsequent measurement, financial assets are classified in four categories:

1. Measured at Amortized Cost;
2. Measured at Fair Value through Other Comprehensive Income (FVTOCI);
3. Measured at Fair Value through Profit or Loss (FVTPL); and
4. Equity Instruments designated at Fair Value through Other Comprehensive Income (FVTOCI).

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the Company changes its business model for managing financial assets.

3.12. Measured at Amortized Cost: A debt instrument is measured at the amortized cost if both the following conditions are met:

1. The asset is held within a business model whose objective is achieved by both collecting contractual cash flows; and
2. The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortized cost using the effective interest rate (EIR) method. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included in finance income in the statement of profit or loss. The losses arising from impairment are recognized in the profit or loss. This category generally applies to trade receivables, cash and bank balances, loans and other financial assets of the company.

3.13. Measured at FVTOCI: A debt instrument is measured at the FVTOCI if both the following conditions are met:

3.13.1. The objective of the business model is achieved by both collecting contractual cash flows and selling the financial assets; and

3.13.2. The asset's contractual cash flows represent SPPI.

3.14. Debt instruments meeting these criteria are measured initially at fair value plus transaction costs. They are subsequently measured at fair value with any gains or losses arising on remeasurement recognized in other comprehensive income, except for impairment gains or losses and foreign exchange gains or losses. Interest calculated using the effective interest method is recognized in the statement of profit and loss in investment income.

3.15. Measured at FVTPL: FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as FVTPL. In addition, the company may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the statement of profit and loss. Equity instruments which are, held for trading are classified as at FVTPL.

3.16. Equity Instruments designated at FVTOCI: For equity instruments, which has not been classified as FVTPL as above, the company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The company makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable. In case the company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to P&L, even on sale of investment.

3.17. Derecognition:

The Company derecognizes a financial asset on trade date only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity.

3.18. Impairment of Financial Assets:

The Company assesses at each date of balance sheet whether a financial asset or a group of financial assets is impaired. Ind AS – 109 requires expected credit losses to be measured through a loss allowance. The company recognizes impairment loss for trade receivables that do not constitute a financing transaction using expected credit loss model, which involves use of a provision matrix constructed on the basis of historical credit loss experience. For all other financial assets, expected credit losses are measured at an amount equal to the 12 month expected credit losses or at an amount equal to the life time expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition.

3.19. Financial Liabilities

3.19.1. Recognition and Initial Measurement:

Financial liabilities are classified, at initial recognition, as at fair value through profit or loss, loans and borrowings, payables or as derivatives, as appropriate. All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

### 3.19.2. Subsequent Measurement:

Financial liabilities are measured subsequently at amortized cost or FVTPL. A financial liability is classified as FVTPL if it is classified as held-for-trading, or it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognized in profit or loss. Other financial liabilities are subsequently measured at amortized cost using the effective interest rate method. Interest expense and foreign exchange gains and losses are recognized in profit or loss. Any gain or loss on de-recognition is also recognized in profit or loss.

### 3.19.3. Financial Guarantee Contracts:

Financial guarantee contracts issued by the company are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognized initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the amount of loss allowance determined as per impairment requirement of Ind AS 109 and the amount recognized less cumulative amortization.

### 3.19.4. Derecognition:

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires.

### 3.19.5. Offsetting financial instruments

Financial assets and liabilities are offset and the net amount is reported in the balance sheet when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the counterparty.

## 3.20. Earnings Per Share

Basic Earnings per share (EPS) amounts are calculated by dividing the profit for the year attributable to equity holders by the weighted average number of equities shares outstanding during the year. Diluted EPS amounts are calculated by dividing the profit attributable to equity holders adjusted for the effects of potential equity shares by the weighted average number of equity shares outstanding during the year plus the weighted average number of equity shares that would be issued on conversion of all the dilutive potential equity shares into equity shares.

## 3.21. Impairment of Non-Financial Assets

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. An asset is treated as impaired when the carrying cost of the asset exceeds its recoverable value being higher of value in use and net selling price. Value in use is computed at net present value of cash flow expected over

the balance useful lives of the assets. For the purpose of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or group of assets (Cash Generating Units – CGU).

An impairment loss is recognized as an expense in the Statement of Profit and Loss in the year in which an asset is identified as impaired. The impairment loss recognized in earlier accounting period is reversed if there has been an improvement in recoverable amount.

### 3.22. Provisions, Contingent Liabilities and Contingent Assets

#### 3.22.1. Provisions

Provisions are recognized when there is a present obligation (legal or constructive) as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Provisions are determined by discounting the expected future cash flows (representing the best estimate of the expenditure required to settle the present obligation at the balance sheet date) at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognized as finance cost.

#### 3.22.2. Contingent Liabilities

Contingent liability is a possible obligation arising from past events and the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past

events but is not recognized because it is not possible that an outflow of resources embodying economic benefit will be required to settle the obligations or reliable estimate of the amount of the obligations cannot be made. The Company discloses the existence of contingent liabilities in Other Notes to Financial Statements.

#### 3.22.3. Contingent Assets

Contingent assets usually arise from unplanned or other unexpected events that give rise to the possibility of an inflow of economic benefits. Contingent Assets are not recognized though are disclosed, where an inflow of economic benefits is probable.

#### 3.22.4. Intangible Assets

##### 3.22.4.1. Recognition and Measurement

Intangible assets are stated at cost on initial recognition and subsequently measured at cost less accumulated amortization and accumulated impairment loss, if any.

### 3.23. Amortization

#### 3.23.1. Software's are amortized over a period of three years.

3.23.2. The amortization period and the amortization method are reviewed at least at the end of each financial year. If the expected useful life of the assets is significantly different from previous estimates, the amortization period is changed accordingly.

### 3.24. Operating Segment

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. The chief operating decision maker of the Company is responsible for allocating resources and assessing performance of the operating segments and accordingly is identified as the chief operating decision maker. The Company has identified one reportable segment only based on the information reviewed by the CODM.

## 4. SIGNIFICANT JUDGEMENTS AND KEY SOURCES OF ESTIMATION IN APPLYING ACCOUNTING POLICIES

- 4.1. Estimates and judgments are continually evaluated. They are based on historical experience and other factors, including expectations of future events that may have a financial impact on the Company and that are believed to be reasonable under the circumstances. Information about Significant judgments and Key sources of estimation made in applying accounting policies that have the most significant effects on the amounts recognized in the financial statements is included in the following notes:
- 4.2. Recognition of Deferred Tax Assets: The extent to which deferred tax assets can be recognized is based on an assessment of the probability of the Company's future taxable income against which the deferred tax assets can be utilized. In addition, significant judgment is required in assessing the impact of any legal or economic limits.
- 4.3. Classification of Leases: The Company enters into leasing arrangements for various assets. The classification of the leasing arrangement as a finance lease or operating lease is based on an assessment of several factors, including, but not limited to, transfer of ownership of leased asset at end of lease term, lessee's option to purchase and estimated certainty of exercise of such option, proportion of lease term to the asset's economic life, proportion of present value of minimum lease payments to fair value of leased asset and extent of specialized nature of the leased asset.
- 4.4. Where the rate implicit in the lease is not readily available, an incremental borrowing rate is applied. This incremental borrowing rate reflects the rate of interest that the lessee would have to pay to borrow over a similar term, with a similar security, the funds necessary to obtain an asset of a similar nature and value to the right of-use asset in a similar economic environment. Determination of the incremental borrowing rate requires estimation.
- 4.5. Defined Benefit Obligation (DBO): Employee benefit obligations are measured on the basis of actuarial assumptions which include mortality and withdrawal rates as well as assumptions concerning future developments in discount rates, medical cost trends, anticipation of future salary increases and the inflation rate. The Company considers that the assumptions used to measure its obligations are appropriate. However, any changes in these assumptions may have a material impact on the resulting calculations.

- 4.6. Provisions and Contingencies: The assessments undertaken in recognising provisions and contingencies have been made in accordance with Indian Accounting Standards (Ind AS) 37, 'Provisions, Contingent Liabilities and Contingent Assets'. The evaluation of the likelihood of the contingent events is applied best judgment by management regarding the probability of exposure to potential loss.
- 4.7. Impairment of Financial Assets: The Company reviews its carrying value of investments carried at amortized cost annually, or more frequently when there is indication of impairment. If recoverable amount is less than its carrying amount, the impairment loss is accounted for.
- 4.8. Allowances for Doubtful Debts: The Company makes allowances for doubtful debts through appropriate estimations of irrecoverable amount. The identification of doubtful debts requires use of judgment and estimates. Where the expectation is different from the original estimate, such difference will impact the carrying value of the trade and other receivables and doubtful debts expenses in the period in which such estimate has been changed.
- 4.9. Fair value measurement of financial Instruments: When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the Discounted Cash Flow model. The input to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility.
