Out of this, Rs. 24.58 million is being transferred to the General Reserve and Rs.274.78 million being retained as surplus in the Profit and Loss Account.

3. Management Discussion and Analysis

a) Industry Structure, Developments and Segment-wise Performance

Your Company operates in single segment, viz., components for transportation industry. The growth within automobile industry was as follows:-

Growth in %

Industry Segments	2010 – 11	2009 - 10
Passenger Cars	27	28
Utility Vehicles	17	24
Small Commercial Vehicles (One Ton & below)	36	8
Light Commercial Vehicles	22	77
Medium and Heavy Commercial Vehicles	38	30
Three Wheelers	29	25
Two Wheelers	27	25
Farm Tractors	22	27

Source: Society of Indian Automobile Manufacturers.

Domestic market continued its robust growth across all segments and this required ramping up capacity. The emphasis on capacity increase and improvement of delivery continued throughout the year.

Exports

In the export market, the recovery in volumes from the later part of the year 2009 - 2010, continued in the year 2010 - 2011. The recovery of US Market helped your company to perform well and the increase in volumes complemented the growth in domestic volumes to help achieve higher sales performance.

The United States Dollar, a currency on which your Company's exports are mostly dependent on was relatively stable. The strengthening of the rupee was marginal and such fluctuations were handled through conservative policy of hedging.

OEM & Aftermarket

Your company's performance in the OEM Segment continued to be very high albeit at higher costs in some areas to meet delivery deadlines. The Company's aftermarket volumes, with the introduction of new products and strategic focus on new markets, grew at a healthy rate of 21%.

REPORT OF THE DIRECTORS (cond.)

b) Operational and Financial Performance

The profit before tax for the year under review was Rs.308.37 Million against Rs.200.41 Million in the previous year, a growth of 54 % over last year. The Company extended a voluntary retirement scheme for the employees of one of the plants and the impact of Rs 44.95 Million has been provided for in the above profits. Though the profits of the Company was affected due to higher delivery costs caused by increase in demand before capacity could be increased, the continued focus on costs controls and efficiency of operations at a higher level of volumes helped achieving a healthy profitability.

c) Outlook

The domestic vehicle industry is expected to continue its growth in the coming years in view of steady growth rate of our GDP, rising number of middle class and higher disposable income. With a favourable forecast of the monsoon, Farm Tractors Segment is likely to continue its growth and will be closely monitored by your company for timely ramping up of Capacity.

Prices of commodities like steel, aluminium have already hardened and the cascading effect would impact on all commodity prices. The increase in interest rates could cause an adverse impact on the demand for vehicles.

Focus on capacity utilisation, cost savings, quality and productivity is the key to sustain and improve the higher levels of performance. The Contracts remaining to be executed on Capital account will result in enhancement of our capacity to meet the customer demand.

d) Opportunities & Threats

India's process engineering skills applied to the redesigning of production processes, raw material availability, quality assurance and technically skilled manpower has provided a distinct global advantage of cost and quality. This has helped India becoming a major auto components outsourcing hub for several automobile manufacturers. This has provided your company an opportunity for accelerated growth.

Your company's preparedness in development of new products and meeting capacity requirements in time are key in realising the full benefits of the opportunity. The main threats your Company likely to face are:-

- increasing price pressure from OEMs from whom the major portion of the future growth is likely to come,
- increase in commodity prices arising out of natural calamities in Japan and Australia and political instability in certain parts of the world.
- volume increase that requires ramp up of capacities in a short span of time, affecting profitable growth,
- dumping of Chinese products at a lower price.

e) Internal Control Systems and Risk Management

An independent agency carries out internal audit of all the Company locations across the country. The Audit Committee of the Board approves the audit plan in the beginning of the financial year in consultation with the internal auditors, the statutory auditors and the operating management. The findings of the internal auditors are placed before the Audit Committee for review. The response of the operating management and counter measures proposed are discussed at the Audit Committee meetings. The process not only seeks to ensure the reliability of control systems and compliance with laws and regulations but also covers resources utilization and system efficacy.

Risk Management is an integral part of the business process. The Company has mapped the risks at the business processes and enterprise levels and has evolved a risk management framework. Internal audit focuses on these risks at all subprocess levels. Mitigative measures have been put in place in respect of these risks. These would be periodically reviewed by the Board of Directors.

f) Human Resource Development and Industrial Relations

Your Company gives significant importance to Human Resource Development (HRD) and stable industrial relations. The management is continuously working on the development of human capital which is very vital for achieving the goals and realizing the Vision of the Company in an everchanging and challenging business environment.

NOTES ON ACCOUNTS

1 Significant Accounting Policies

1.1 Basis of preparation of Financial Statements

The Financial Statements are prepared under historical cost convention in accordance with the generally accepted accounting principles in India and comply in all material respects with the applicable accounting standards notified under Section 211 (3C) of the Companies Act, 1956 (the 'Act'), Accounting Standard 30 on 'Financial Instruments: Recognition and Measurement' as set out in Note 1.12 below and with the relevant provisions of the Act.

1.2 Use of Estimates

The preparation of the financial statements in conformity with accounting principles generally accepted in India requires the management to make estimates and assumptions that affect the reported amount of assets and liabilities as of the Balance Sheet date, reported amount of revenues and expenses for the year and disclosure of contingent liabilities as of the Balance Sheet date. The estimates and assumptions used in these financial statements are based upon management's evaluation of the relevant facts and circumstances as of the date of the financial statements. Actual results could differ from these estimates.

1.3 Fixed Assets

Fixed Assets are stated at cost of acquisition/construction less accumulated depreciation/amortization, impairment loss, if any, and inclusive of borrowing cost, where applicable, and adjustments for exchange difference referred to in Note 1.8 below. Capital work-in-progress includes cost of assets not ready for their intended use and includes advances paid towards acquiring/constructing fixed assets.

1.4 Depreciation

Depreciation on fixed assets is calculated on straight line method at the rates specified in Schedule XIV to the Companies Act, 1956 except for the following assets which are depreciated over their following estimated useful lives.

Assets	Useful life (years)
Vehicles	5
Furniture and Fittings	5
Office Equipments (other than computers)	3
Computers	4

Schedules forming part of the Accounts NOTES ON ACCOUNTS (Contd.)

amount of fixed assets of the Company (being a single cash generating unit) exceeds the recoverable amount (ie. higher of net selling price and value in use). In assessing value in use, the estimated future cash flows are discounted to their present value at the weighted average cost of capital. After impairment, depreciation is provided on the revised carrying amount of the assets over their remaining useful lives.

1.6 Borrowing Costs

The borrowing costs that are attributable to the acquisition/construction/production of qualifying assets (assets which require substantial period of time to get ready for its intended use) are capitalized as part of the cost of that asset. All other borrowing costs are charged to revenue.

1.7 Inventories

Inventories are stated at lower of cost and net realizable value. Cost is determined on moving weighted average basis and includes expenditure incurred in the normal course of business in bringing inventories to its location and condition, labour and overhead, where applicable. Inventories are written down for obsolete/slow moving/non-moving items wherever necessary. Cost of loose tools is amortized over a period of three years.

1.8 Foreign Currency Transactions as applicable under Accounting Standard 11 on 'The effects of changes in Foreign Exchange Rates'

Foreign currency transactions are recorded at the exchange rate prevailing on the date of transaction.

At the year end all monetary assets and liabilities denominated in foreign currency are restated at year end exchange rates. The resultant exchange differences arising from settlement of foreign currency transaction and from year end restatement are recognized in Profit and Loss Account except those arising on reporting of long term foreign currency loan relating to acquisition of depreciable fixed assets with effect from April 1, 2007 which is adjusted to the carrying amount of such assets and depreciated over the remaining useful life of such fixed assets.

Profit or loss on cancellation of forward contracts are recognized as income/expense in the Profit and Loss Account of the year in which they are cancelled. Difference between the forward exchange rate and the exchange rate at the date of transaction is accounted for as income/expense over the life of the contract.

1.9 Research and Development

1.12 Derivatives [other than forward exchange contracts covered under AS 11 (refer Note 1.8 above)]

The Company uses derivative financial instruments such as foreign exchange forward contract, option contract, currency and interest rate swaps to hedge its exposure in movements in foreign exchange rates and interest rates relating to underlying transaction. These forward, option, currency and interest rate swap contracts are not used for trading/speculation purposes.

The Company adopted in an earlier year Accounting Standard 30, "Financial Instruments: Recognition and Measurement" issued by The Institute of Chartered Accountants of India to the extent the adoption does not contradict with existing mandatory applicable Accounting Standards and other relevant regulatory requirements.

For forward and option contracts that are designated as effective cash flow hedges, the gain or loss from the effective portion of the hedge is recorded and reported directly in reserves (under the "Hedging Reserve Account") and are reclassified into the Profit and Loss Account upon the occurrence of the hedged transactions. However, the ineffective portion of the cash flow hedges, are recognized in the Profit and Loss Account as it arises.
