REVIEW OF OPERATIONS

The financial results for the year 2010-11 are for a period of 12 months compared to previous year period of 15 months. During the period under review, your Company crushed 200.22 lacs quintals of sugarcane and produced 20.47 lacs quintals of Sugar (including raw sugar processed) at an average recovery rate of 9.38% as compared to 252.51 lacs quintals of sugarcane crushed and 24.34 lacs quintals of sugar (including raw sugar processed) produced at an average recovery rate of 9.41% in 2009-10. The production of molasses during 2010-11 was 10.42 lacs quintals as compared to 13.01 lacs quintals produced in 2009-10.

Your Company produced 1317.68 lacs KWH units of power as compared to 1246.47 lacs KWH units of power in the year 2009-10. Out of total production, your company exported 519.26 lacs KWH units to UPPCL/UPCL for a total amount of Rs. 2086.68 lacs against 316.79 Lacs KWH for amount of Rs. 1176.94 lacs.

DIVIDEND

In the absence of profits during the current financial year, your Directors are unable to recommend any dividend for the period under review.

SUGAR SCENARIO

During Sugar Season 2010-11, sugarcane supply increased on account of expansion of cane acreage by more than 20% owing to government's favourable pricing policies by way of upward revision in both State Advised Price (SAP) as well as Fair & Remunerative Price (FRP). In Sugar Season 2009-10, on account of short supply of cane, mill owners generally paid premium ranging about Rs. 85-100/quintal over SAP of about Rs. 165/ quintal; however, in Sugar Season 2010-11, on the back of increased sugarcane supply, the mill owners have been paying as per SAP ranging about Rs. 205-210/quintal.

The sugar price recovered during the quarter ending December, 2010 to about Rs. 28- 29/Kg from a low of Rs. 25/Kg in August, 2010 due to the improved demand scenario on account of festive season along-with various government measures

like reinstating levy sugar quota back to the earlier level of 10% (from 20%) and reintroduction of monthly release system from fortnightly system. Despite increase in sugar production, the price is expected to be steady around Rs. 28-29/Kg level in the next two quarters on the back of stable stock position.

On the export front, delay in notification of exports, allowed by the government aggregating 5 lakh tonne, and allowance of further exports may lead to sugar exports becoming an unattractive proposition to the domestic sugar mills fetching them only marginal profits due to softening of global prices on the back of expected arrival of sugar supply from Brazil in the international market.

AUDIT COMMITTEE

The Audit Committee of the Company comprises the following Directors viz. Mr. V. S. Tandon as Chairman, Dr. R. Vasudevan, Mr. G.S. Matta and Mr. Ranjan Adlakha are Members. The Audit Committee satisfy the requirements of Section 292A of the Companies Act, 1956 and Clause 49 of the Listing Agreement with the Stock Exchanges.

ISSUE OF FURTHER CAPITAL

During the period under review, the Company has allotted the following Preference Shares to entities forming part of Promoter group:

- (a) Under Preference Shares (Series-I) – 8,40,000 6.50% Preference Shares of Rs.100/- each at par.
- (b) Under Preference Shares (Series-II) – 18,42,500 10% Preference Shares of Rs.100/- each at a premium of Rs.100/- per share.

Consequent upon the above allotment, the present Preference Share paid up Capital of the Company is Rs. 68,42,50,000/-

RIGHTS ISSUE

SEBI approval for the Rights Issue was received by the Company on 08.12.2010. As per SEBI (Issue of Capital and Disclosure Requirements) Regulations, 2009, the issue should be opened within one year from the date of issuance of SEBI Observation letter (23.12.2009). Accordingly the issue should be opened before 23rd of December, 2010 and atleast 4 weeks time is required to complete the Statutory compliances. Hence, the proposed Rights Issue could not materialize. However, to meet the urgent financial requirements Preference Shares were issued and allotted to the promoter group entities.

DIRECTORS

Mr. Ranjan Adlakha and Mr. Ramaswamy Vasudevan, Directors of the Company are retiring by rotation at this forthcoming Annual General Meeting of the Company and are eligible for re-appointment.

In terms of CDR package, PNB had nominated Mr. Krishan Gopal Sharma as Nominee Director w.e.f.15.04.2010. Consequent upon retirement of Mr. K.G. Sharma from Bank services, PNB has nominated Mr. Kamal Prasad (Circle Head, Punjab National Bank, Meerut) in place of Mr. Krishan Gopal Sharma. Mr. Kamal Prasad has been appointed as Nominee cum Additional Director w.e.f. 27.05.2011 on the Board of the Company and will hold office upto the date of ensuing Annual General Meeting. However, the Company has received requisite notices u/s 257 of the Companies Act, 1956 from one Shareholder proposing their candidature for the office of Director.

The Board of Directors have proposed to re-appoint Mr. Pasha Biswas as Whole-Time Director of the Company for a further period of three years w.e.f. 31st October, 2011 subject to necessary approvals. A resolution to this effect is being placed before the members for approval.

During the year under review, Mr. Prabhakaran Singh Lalli, Director of the Company has resigned from Directorship of the Company w.e.f. 18.02.2011. The Board places on record its appreciation for the services rendered and valuable guidance provided by him during his tenure.

DIRECTORS' RESPONSIBILITY STATEMENT AS REQUIRED UNDER SECTION 217(2AA) OF THE COMPANIES ACT, 1956

The Directors confirm that:-

- (i) in the preparation of annual accounts, the applicable accounting standards have been followed;
- (ii) they have, in the selection of the accounting policies consulted the Statutory Auditors and have applied them consistently, and, made judgments and estimates that are reasonable and prudent so as to give a true and fair view of the state of affairs of the Company at the end of the financial year and of the losses of the Company for that period;
- (iii) proper and sufficient care has been taken for the maintenance of adequate accounting records in accordance with

the provisions of the Companies Act, 1956 for safeguarding the assets of the Company, and for preventing and detecting fraud and other irregularities;

(iv) the annual accounts have been prepared on a going concern basis.

CORPORATE GOVERNANCE

As per clause 49 of the Listing Agreement with the Stock Exchanges, a report on Corporate Governance together with Certificate from a Practising Company Secretary forms part of the Annual report.

The Company's shares are listed on National Stock Exchange and Bombay Stock Exchange. The Company has already paid the Listing fees for the Financial Year 2010-11 and 2011-12 to both the Stock Exchanges.

CONSERVATION OF ENERGY, TECHNOLOGY ABSORPTION RESEARCH AND DEVELOPMENT COST AND FOREIGN EXCHANGE EARNINGS AND OUTGO:

Particulars in respect of Conservation of Energy, Technology Absorption, Foreign Exchange Earnings and out-go u/s 217(1)(e) of the Companies Act, 1956 are given in a separate Annexure "A" attached hereto and form a part of this Report.

EMPLOYEES

Particulars of employees as required u/s 217(2A) of the Companies Act, 1956 read with Companies (Particular of Employees) Rules 1975 and Amendment Rules, 2011 may be taken as NIL since no employee of the Company was in receipt of remuneration in terms of limits specified under said Rules.

AUDITORS

M/s B.K. Kapur & Co., Chartered Accountants, Ghaziabad Auditors of the Company will retire at the forthcoming Annual General Meeting and are eligible for re-appointment. The Company has received a certificate from Auditors to the effect that their appointment if made, would be within the prescribed limits under section 224 (1B) of the Companies Act, 1956.

AUDITORS' OBSERVATIONS

Your Directors wish to clarify the various points/observations reported by the Statutory Auditors, as under: -

- a) Observation in Para 9(a) of annexure to report on statutory dues of Income Tax outstanding, it is clarified that the liability arose consequent to retrospective amendment relating to MAT provisions of Income Tax Act, 1961. During the previous financial years viz. 2006-07, 2007-08 and 2009-10, the Company incurred cash losses. Although in the last Financial Year 2010-11 the company has earned cash profit but it was not sufficient to meet out all financial needs of the Company. However, the company will clear this outstanding dues at the earliest.
- b) Observation in para 11 of annexure to the report relating to delays in the repayment of installment/ interest to the Banks, there has been liquidity problems due to losses incurred by the company during the previous financial years as explained under point (a) above, which resulted in the delays. However, the Company has since paid all the Bank dues.
- c) Observation in para 17 of the annexure to the report that short term funds have been used for long term investment viz. capital expenditure and repayment of loans, these are temporary phenomenon due to losses incurred by the company during the previous financial years as explained under point (a) above.

COST AUDIT

Your Board of Directors has appointed M/s M. K. Singhal & Company, Cost Accountants, to audit the cost accounting records relating to Sugar Units for financial year 2011-2012.

INDUSTRIAL RELATIONS

Industrial relations continued to remain cordial throughout the period under review.

PUBLIC DEPOSITS

The Company has not accepted any public deposits during the period under review.

ACKNOWLEDGEMENT

Your Directors wish to place on record their appreciation for the support received from the Shareholders, Government Authorities, IDBI Bank Ltd., Indian Overseas Bank, Punjab National Bank, State Bank of India, Oriental Bank of Commerce, customers, vendors and cane growers for their support and co-operation. Finally, your Directors acknowledge the dedicated services rendered by all the employees of the Company.

MANAGEMENT DISCUSSION AND ANALYSIS

Your Directors are pleased to present its Management Discussion and Analysis Report as per Clause 49 IV (F) of the Disclosure guidelines for Corporate Governance.

1. INDUSTRY STRUCTURE & DEVELOPMENTS

Global Sugar Industry Scenario

As per Quarterly Market Outlook of International Sugar Organization (ISO) released in May 2011, the statistical surplus is put at 0.779 mln tonnes, compared to 196 thousand tonnes only expected in February. The increase in the world surplus can be mainly attributed to the recent crop developments in one country only – a striking improvement in sugar output in Thailand which is now estimated well in excess of 9.5 mln tonnes. Without the gigantic and unforeseen increase in sugar availability in Thailand, the 2010/11 world balance would show a deficit of more than 1 mln tonnes. The third revision of the world sugar balance puts **world production** at a record 166.958 mln tonnes, raw value, up 8.964 mln tonnes or 5.67% from the last season. **World consumption** is now put at 166.179 mln tonnes, raw value, up 3.560 mln tonnes or 2.19% from the previous season. Consumption is still expected to grow at a slower rate than the 10-year average of 2.49%. No stocks rebuilding is foreseen for the current season. After two seasons of large deficits, the stocks/consumption ratio has reduced to the lowest level for more than 20 years – since 1989/90. The ratio is expected to decrease further to 33.79% in 2010/11 from 34.56% in the deficit season of 2009/10. However, the trade balance does not indicate any longer a tightness in sugar availability in 2010/11. Indeed, **world export availability** (51.287 mln tonnes) is expected to exceed **import demand** (50.422 mln tonnes) by 865 thousand tonnes as against less than 200 thousand tonnes projected in February.

A summary of the fourth assessment of the world sugar balance in 2010/11 is given in the table below.

World Sugar Balance

	2010/11	2009/10	Change	
	<i>(million tonnes, raw value)</i>		in Million tonnes	in %
Production	166.958	157.994	8.964	5.67
Consumption	166.179	162.619	3.560	2.19
Surplus / Deficit	0.779	-4.625		
Import demand	50.422	53.776	-3.354	-6.24
Export availability	51.287	54.236	-2.949	-5.44
End Stocks	56.159	56.199	-0.040	-0.07
Stocks/Consumption ratio in%	33.79	34.56		

Source: ISO Quarterly Market Outlook, May 2011

ISO expects that the coming crop cycle may bring a significantly higher statistical surplus exceeding 3 mln tonnes putting further bearish pressure on world market prices. It is also important to note that stocks are still low and any currently unforeseen weather induced production shortfall or logistical bottlenecks in key exporters (similar to those witnessed in the middle of 2010 in Brazil) may, at least temporarily, result in the return of extreme volatility.

The US Dollar weakened relative to the currencies of most importers and exporters over the past 6 months. This ensured that the fall of world sugar prices when expressed in the currencies of both sugar exporters and importers was even greater than the collapse of prices in USD. Significant currency appreciation occurred for the Brazilian Real and the Australian Dollar, with the latter reaching an almost 30-year high against the USD in April. Domestic sugar prices reached fresh records in China but have fallen in Brazil and in Russia and to a lesser extent in India. In the US and Mexico, domestic prices have remained flat.

INDIAN PERSPECTIVE OF SUGAR INDUSTRY

(as per USDA Sugar Annual Report)

Sugar production in India is cyclical. After 2 years of low production in 2008/09 and 2009/10, production recovered in 2010/11 and is expected to continue recovery in 2011/12. Despite weak sugar prices during 2010/11, cane area is expected to expand to 5.1 million hectares in 2011/12. With normal monsoon conditions, yields should improve over those in 2010/11. Total centrifugal sugar production, which includes khandsari sugar, is forecast at 28.3 million MTRV in 2011/12. This forecast represents a 1.65 million MTRV increase, or 6.2 percent over estimated sugar production in 2010/11.

Domestic sugar consumption is expected to be high in 2011/12 due to strong growth of the Indian economy and a population growing at a rate of 1.8 percent each year. With the prospect of improved domestic sugar supply, wholesale sugar prices are expected to decline from 2010/11 levels of \$690 to \$700 per tonne. Lower sugar prices will likely limit consumption shifts to gur.

During 2010/11, the Indian Government relaxed many import restrictions due to concerns over food price inflation. Imported sugar was made exempt from levy sugar obligations and market quota release requirements. Duty-free imports of sugar were extended to the end of March 2011. As of April 1, 2011, the normal 60-percent import duty was reimposed. Imports for 2011/12 are expected to be only 100,000 MTRV of raw sugar, down from 1.2 million MTRV of total sugar estimated for 2010/11 (1.0 million MTRV of raw sugar and 200,000 of refined sugar). Ending-year stocks for 2011/12 are forecast at 7.94 million MTRV. This amount is slightly over 25 percent of expected consumption—the level considered to be an optimal stockholding percentage in India at the end of the marketing year. Given expected sugar supply conditions, exports as high as 1.8 million MTRV are forecast in 2011/12.

India has produced a bumper sugar crop of 25.7mn tonnes for the 2010/11 season on the back of good rains and a larger area planted. Main sugar-producing states of Uttar Pradesh and Maharashtra have led the way in the growth of sugar output, marking production growth of 19.7% and 31.5% respectively according to data from the US Department of Agriculture (USDA).

In SS 09-10 performance of the sugar companies was adversely impacted by shortage of sugarcane resulting in very high raw material cost. Besides, increase in government control by hiking levy sugar quota by additional 10% and introduction of fortnightly release mechanism, instead of monthly release, led to a steep fall in sugar price after January 2010.

During SS10-11, sugarcane supply increased on account of expansion of cane acreage by more than 20% owing to government's favourable pricing policies by way of upward revision in both State Advised Price (SAP) as well as Fair & Remunerative Price (FRP). In SS 09-10, on account of short supply of cane, mill owners generally paid premium ranging about Rs. 85-100/quintal over SAP of about Rs. 165/ quintal; however, in SS 10-11, on the back of increased sugarcane supply, the mill owners have been paying as per SAP ranging about Rs. 205-210/quintal.

The sugar price recovered during the quarter ending December, 2010 to about Rs. 28- 29/Kg from a low of Rs. 25/Kg in August, 2010 due to the improved demand scenario on account of festive season along-with various government measures like reinstating levy sugar quota back to the earlier level of 10% (from 20%) and reintroduction of monthly release system from fortnightly system. Despite increase in sugar production, the price is expected to be steady around Rs. 28-29/Kg level in the next two quarters on the back of stable stock position.

On the export front, delay in notification of exports, allowed by the government aggregating 5 lakh tonne, and allowance of further exports may lead to sugar exports becoming an unattractive proposition to the domestic sugar mills fetching them only marginal profits due to softening of global prices on the back of expected arrival of sugar supply from Brazil in the international market.

However, with the upward revision of ethanol price by 26% from Rs. 21.5/litre to Rs. 27.0/litre in September 2010, improvement in levy sugar price and various incentives for cogeneration by the government, CARE expects the overall realisation of the sugar companies to increase further.

Sugarcane Production and Pricing Policy

The GOI establishes a minimum support price (MSP) for sugarcane on the basis of recommendations by the Commission for Agricultural Costs and Prices (CACP) and after consulting State Governments and associations of the sugar industry and cane growers. Last year the GOI announced a new system of fair and remunerative Price (FRP) that

would link the cane prices with sugar price realization by the sugar mills. Several state governments further augment the MSP/FRP, typically by 20-25 percent, due to political compulsions rather than market pricing.

Sugar mills are required to pay the “state advised price (SAP)” to sugarcane farmers irrespective of the market price of sugar which were Rs. 205 per Qtls for the state of Uttar Pradesh and Rs. 210 per Qtls for the State of Uttarakhand.

Current Trends & Developments

As per news reports, with production surging, fortunes of the sugar industry have changed dramatically. Sugar prices appear to have corrected both globally as well as in the domestic market. According to the ISO, the world sugar market could see surplus stocks and the deficit phase is expected to end.

Ethanol Manufacture

India is the fourth largest ethanol producer after Brazil, the United States and China. Ethanol is produced by the fermentation of molasses in India, a by-product of sugar. 88 lbs of molasses is produced from one ton of cane, from which about 10 litres of ethanol can be obtained. If the sugarcane is directly and fully used in ethanol manufacturing, the yield of ethanol is 70 litres/ton.

The government launched a program to mandate the blending of 5% ethanol in gasoline in 9 states and 4 union territories. In the second stage, it aimed to supply ethanol-blended gasoline across the country and in the third stage, to increase the ethanol-blending ratio from 5% to 10%. The government has also increased the ethanol price by 26% from Rs. 21.5/litre to Rs. 27.0/litre in September 2010. However, with the increase in crude oil prices, the Government is expected to further encourage the ethanol-blending. Your Company has completed existing ethanol distillery project and make it operational soon.

Co-generation

As per informed sources, a target for addition of 1,700 MW capacity, consisting of 500 MW of biomass power projects and 1,200 MW of bagasse cogeneration projects has been proposed during the country’s XIth plan period (2007-2012). A cumulative biomass power potential of about 18,000 MWs from the surplus agro residues have been estimated in the country. Sugar mills with a crushing capacity of 2,500 tons per day in Maharashtra, Uttar Pradesh, Tamil Nadu, Karnataka, Andhra Pradesh, Bihar, Gujarat, Punjab and Haryana have an estimated potential of about 5,000 MW surplus power generation through optimum bagasse-based co-generation.

Your Company has the Power Co-generation at all of its four units.

2. OPPORTUNITIES & THREATS

Opportunities:

- Utilization of downstream by-products.
- Huge potential for increasing the High yielding cane crop to increase sugar recovery rate.
- Potential for new and upgrading Technology for improved utility consumption factors and utilization of by-products.
- Potential for added incentive for Certified Emission Reduction (CER) under Clean Development Mechanism (CDM) of the United Nations Framework Convention on Climate Change (UNFCCC).
- Potential for downstream production of Ethanol.

Threats

- Vulnerability of sugar sector to inflation & unfavourable regulatory policies.
- Excessive Government Controls on Prices of Sugar Cane and the distribution of Sugar.
- Deteriorating quality of soil due to overuse of fertilizer and pesticides.
- Unhealthy competition between mills relating to cane acquisition.

3. RISKS AND CONCERNS

Sugar industry being agro based is vulnerable to commodity cycles and excessive Government Controls is hence, fraught with several risks. Given below is a discussion on the risks as perceived by the Management. The list is not exhaustive and meant for information purpose only for Investors who are requested to rely on their own judgement while assessing the risks associated with the Sugar Industry and your Company.

- a) **Raw material risk** - Sugarcane is the principal raw material used for sugar production. Its availability, quality, growth and cost are affecting factors. These are in turn impacted by uncontrollable factors such as:-
- the area under sugarcane cultivation;
 - availability of water;
 - Adverse weather conditions, crop disease and pest control;
 - Availability of better and higher yielding seeds;
 - Shifting of farmers' preference to other crops;
 - Diversion of sugarcane to other industries like Gur, khandsari etc.;
 - Adequacy of harvesting and seasonal unskilled labour;
 - Government Controlled Un-remunerative cane procurement price;
 - High Local and State level taxes

Risk mitigation

This risk can be mitigated by steps such as Government encouragement for the Promotion of various irrigation schemes such as Lift Irrigation, Drip Irrigation, improved canal system etc.; Cane Development schemes through SDF and Bank Loans; Improved Infrastructure for roads and communication; Provision of better quality and higher yielding seeds as well as fertilizers and pesticides; Prompt clearance of the cane dues of farmers and steps to improve their goodwill by adoption of social development measures such as establishing schools and dispensaries in the command areas etc.; Permitting mills to import Raw sugar to alleviate the cane shortage; Diversifying into multiple locations etc.

b) Regulatory Risks –

i. Environmental Risks

The Industry & Company is subject to environmental regulations and may be exposed to liability as a result of our handling of hazardous materials and potential costs for environmental compliance.

ii. Government policy related Risks

The Industry is regulated and your Company operates in a regulated environment. Central and State Government policies and factors such as:-

- State Advised Price (SAP) and Statutory Minimum Price (SMP) for sugarcane;
- Control on sale of Molasses;
- Imposition of Levy Obligation (presently 10%) at very low price which is not subsidized by the Union Government;
- Monthly release mechanism of Central Government which has an adverse impact on the free sugar trade; affect the agricultural sector and related industries and in turn our operations and profitability.

Risk mitigation

The regulatory risks listed above are Government policy driven and beyond Company's control and cannot be alleviated unless the industry is completely decontrolled. Every effort is made to conform to regulatory requirements while judicial recourse is made when warranted.

- c) **Sugar Price risk** - Sugar prices in the Domestic and International markets depend primarily on the supply and demand situation. Global prices influence and affect the domestic prices directly even though Levy Sugar Price is regulated and sale of Molasses controlled by the respective States. Fluctuations in demand and supply arise on account of the changes in the availability and price of sugarcane, variances in the production capacities of our competitors, availability of substitutes for the sugar products and international demand and supply position.

Risk mitigation

Your Company is unable to mitigate this risk since one does not have any control on the market forces and the regulatory prices. The wholesale price of sugar has a significant impact on our profits. Like other agricultural commodities, sugar is subject to price fluctuations resulting from weather, natural disasters, domestic and foreign trade policies, shifts in supply and demand and other factors beyond our control. Additionally, 15% to 30% of the total Global sugar production is traded on commodity exchanges which are speculative in nature and can adversely affect the global sugar prices and in turn the operations of your Company.

However, your Company is trying to reduce the impact of this risk by foraying into newer markets, entering the export market, more value addition by concentrating on downstream projects, increasing the quality and volume etc. The company is also mitigating risk by value addition of by-products and has power co-generation at all its four plant and has also set up the Distillery.

- d) **Cyclical Risk** – The industry is dependent on monsoons for both production and price realisation. Moreover, switching to other crops by cane growers on account of better returns affect the Industry.

Risk mitigation

Your Company is unable to mitigate this risk since one does not have any control on the cyclical nature of the industry. However, Governmental initiatives to improve the irrigation by introducing various schemes as well as improvement in the distribution system by augmentation of the Canal Irrigation and tapping of the available surpluses of water are expected to mitigate this risk significantly.

- e) **Finance Risk** – The Industry is dependent on the availability of timely working capital at competitive interest rates and Long Term Finance for capacity enhancements / economic size of mills as well as for the manufacture of by-products.

Risk mitigation

Your Company enjoys a good and sound reputation with the Banks and Financial Institutions since it has always been prompt and regular in the settlement of its dues. Nevertheless, due to unfavourable market situation which has been outside the control of the Company, the Management has decided to request its Bankers for rescheduling its obligations and funding the applied and applicable interest. Through these measures, your Company is hopeful of meeting its commitments to all the concerned sections – investors, debtors as well as farmers and suppliers. Your Company moreover, is constantly keeping its options open for lowering the cost of its debt.

4. INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY

Broadly, the areas of operation have been classified as Procurement, Manufacture, Marketing and Finance, in the functioning of which, various checks and control systems have been incorporated as Standard Operating Procedures. Even though they are considered adequate to reasonable safeguard its interests, a continuous review is undertaken for further improvement since the management gives lot of emphasis on continuous up gradation of business processes and adherence to the designed system and processes.

Moreover, there is an adequate and effective internal audit system in place in your Company that employs periodic checks on the various systems and on-going process. The Audit Committee of the Board of Directors of your Company comprising of reputed professionals, regularly reviews the effectiveness of internal control system and suggests changes wherever necessary, to ensure due and proper compliance with applicable laws, accounting standards and regulatory guidelines presently in vogue.

5. DISCUSSION ON FINANCIAL PERFORMANCE WITH RESPECT TO OPERATIONAL PERFORMANCE (OPERATIONS)

6. MATERIAL DEVELOPMENTS IN HUMAN RESOURCES/INDUSTRIAL RELATIONS FRONT

Industrial relations in your Company have remained cordial throughout the year under review. With the global recessionary trends, sugar mills have deferred capacity expansion as well as new sugar projects and have initiated cost reduction measures. All this has led to the rise of new roadblocks which have severely challenged human resources development.

Your company has countered all this by continuously upgrading the process and the systems that help harmonize cultures of the varied manpower arising out of diverse sources and backgrounds. The Organization has steadfastly stuck to its vision to enhance knowledge, skills and competencies of the human resources pool – helping them develop individually while simultaneously improving and upgrading productivity and increasing quality ratios. To achieve this, your company is providing compensation by way of salary and wages to its employees at a rate which is at par with the prevailing standards in the Industry as well as regular training for up-gradation of skills at various levels.

With these progressive steps, your Company has been able to maintain cordial relations with its staff members.

SCHEDULE - '19' SIGNIFICANT ACCOUNTING POLICIES AND NOTES FORMING PART OF ACCOUNTS FOR THE YEAR ENDED 31st MARCH 2011

A. SIGNIFICANT ACCOUNTING POLICIES:

i. Basis of Accounting:

The Company follows the Mercantile System of Accounting and recognizes Income and Expenditure on Accrual Basis. The financial statements are prepared under the historical cost convention and are in accordance with the requirements of Companies Act, 1956, applicable Accounting Standards and accepted accounting principles.

ii. Fixed Assets and Capital Work in Progress:

Fixed Assets are stated at cost less accumulated Depreciation. Cost of acquisition or construction is inclusive of freight, duties, taxes and incidental expenses incurred during construction period.

Capital Work-in-Progress comprises cost of fixed assets that are not ready for its intended use at the reporting date. Expenditure during construction period that are directly attributable to the cost of bringing the assets to its working conditions and all common costs allocated on rational basis are treated as 'Pre-Operative Expenses' pending allocation and are shown under 'Capital Work-in Progress' and the same are allocated on pro-rata basis to the assets capitalized on commencement of commercial operations.

Items of expenditure that meet the recognition criteria as mentioned in Accounting Standard are classified as intangible Assets.

iii. Depreciation/Amortization :

Depreciation on fixed assets have been provided on Straight Line Method at the rates in the manner specified in Schedule XIV to the Companies Act, 1956. Low value items costing individually Rs. 5,000/- or less are fully depreciated in the year of purchase. Depreciation is charged on pro-rata basis in respect of assets acquired/sold during the year.

Post impairment, depreciation is provided on the revised carrying value of the asset over its remaining useful life.

Leasehold Developments are amortized at lower of period of lease or ten years.

Intangible Assets are amortised over a period of economic benefits not exceeding ten years.

iv. Leases :

Assets acquired under finance lease are recognized at the lower of the fair value of leased assets at inception and the present value of minimum lease payments, lease payments are apportioned between the finance charges and the reduction of the outstanding liability. The finance charges are allocated to the period during the lease term at a constant periodic rate of interest on the remaining balance of the liability.

In respect of fixed assets taken on finance lease, when there is reasonable certainty that the Company will obtain ownership by the end of the lease term, depreciation is provided in accordance with the policy followed by the Company for owned assets.

v. Inventories:

Inventories (other than By-products) are valued at lower of cost or net realizable value.

Cost of inventories is determined on weighted average. Cost of finished goods and Work in Progress has been worked out on absorption cost basis.

By- products and residuals are valued at net realizable value.

vi. Taxes on Income:

a) Current tax is determined on the amount of tax payable in respect of taxable income for the year. Fringe Benefit Tax is determined at current applicable rates on expenses falling within the ambit of fringe benefits as defined under the Income Tax Act, 1961.

b) Deferred tax assets/liabilities are provided on significant timing differences arising from the different treatments in accounting and taxation of relevant items. Deferred tax assets/liabilities shall be reviewed as at each Balance Sheet date, based on development during the year, to reassess realization/liabilities.

c) Deferred Tax Assets in respect of Accumulated Loss and Unabsorbed Depreciation are recognized and carried forward only if there is virtual certainty of its realization.

d) Deferred Tax resulting from timing difference which originate during the tax holiday period but are expected to reverse after tax holiday period is recognized in the year in which the timing differences originate using the tax rates and laws enacted or substantively enacted by the balance sheet date.

- After considering sufficient availability of raw materials and the sugar inventory available with the company for disposal as well as capacity of power, resulting into de-risking of the business operations, the management is confident that there is virtual certainty that sufficient future taxable income will be available against which deferred tax asset on account of unabsorbed business loss amounting to Rs. 4765.11 lacs will be realized in the normal course of business. However, the management, out of abundant caution, has decided to restrict recognition of deferred tax assets on account of unabsorbed business loss during the Year.
- The figures for the current year comprises twelve months whereas the corresponding previous period figures are for a period of fifteen months from 1st January 2009 to 31st March 2010, as such not comparable. The previous period figures have been re-arranged, regrouped and reclassified wherever necessary.
