# \* Emphasis of Matter as per Independent Auditors' Report dated 19.08.2015

We draw attention to:-

- a) Note no 29, the State Governments of Uttar Pradesh and Uttarakhand has announced subsidy for Sugar Industry for season 2014-2015 which is linked to average selling price of Sugar and By Products during the period 01.10.2014 to 31.5.2015. Such subsidy as reduced from the cane cost by the Company is Rs.6703.96 lacs upto 30.06.2015.
- b) Note no 45, the company has recognized Deferred tax Assets (DTA) of Rs. 2469 lacs for the year ended 30.6.2015 and Rs. 14103.80 lacs up to **TRUE300PY**015 on unabsorbed business laces and

**CERTIFIED** TRUE300PY015 on unabsorbed business losses and unabsorbed depreciation.

Continuous losses in the last few years indicate the uncertainty as regards realization of such deferred tax assets. The Company's Management is of the view that it expects turnaround of sugar sector by view of expected assistance from Government and by way of Cane Development Activities carried out by the company as supported by report issued by Sugar Technical Expert, it has become reasonable that sufficient taxable income will be available against which such deferred tax assets can be realized.

c) Note no 47, regarding preparation of account on going concern basis despite substantial erosion of net worth of the company and significant losses leading to material uncertainty about the company's ability to continue as going concern and based on mitigating factors as fully described therein.

Our Opinion is not qualified in respect of above matters.

Following are the season wise data of cane crushed and sugar produced:

| Crushing Season | Cane crushed<br>(In Lakhs qtls) | Sugar produced<br>(In Lakhs qtls) | Recovery % |
|-----------------|---------------------------------|-----------------------------------|------------|
| 2014-2015       | 234.33                          | 22.81                             | 9.73       |
| 2013-2014       | 193.94                          | 17.40                             | 8.97       |

The Company registered a gross turnover of Sugar of Rs.65090 lacs for the 12 months ended 30<sup>th</sup> June, 2015 against Rs. 76109 lacs for the 15 months ended 30<sup>th</sup> June, 2014 (Gross Turnover of Sugar of Rs 59459 lacs for the 12 months ended 30<sup>th</sup> June, 2014), an increase of gross turnover of 9.47 % on Pro rata Basis. The sales realization at Rs.3179 per qtls was lower as compared to Rs.3183 per qtls for the previous year 15 months ended 30<sup>th</sup> June, 2014.

During the current season, Company commenced its crushing season on 1<sup>st</sup> December 2014. The results were better as compared to previous season both in terms of Recovery and Crushing mainly due to the following reasons:

- (i) Improved productivity, yield and sugar recovery, company's continuous effort in Cane Development activities like varietal replacement with proven high sugared varieties, Change in Pattern of Sowing, Ratoon Management, Encouraging use of Bio Fertilizers and Bio Pesticides etc.
- (ii) Recovery was higher on account of optimum mix of better Cane Varieties.

<u>Sugar</u>: The Company's aggregate sugar cane crushing was higher at 234.33 lakhs qtls during the season 2014-15 as against 193.94 lakhs qtls in 2013-14 season due to higher cane availability. The Company had a higher recovery of 9.73% as against 8.97% in previous season. The higher recovery was mainly due to Cane Development Activities. The Company continued to focus on cane development activities, comprising of varietal replacement and modern agricultural practices due to which the recovery and crushing will improve in the coming season.

The Uttar Pradesh Government announced a State Advised Price (SAP) for sugarcane at Rs.280 per quintal for season 2014-15, which was the same as in the previous season. SAP price of Rs.280 per quintal was unreasonable, unaffordable and irrational; most UP-based sugar companies were compelled to suspend crushing for season 2014-15 and commenced after extensive deliberations between millers and the State Government the following consensus was arrived at:

- i. The cane price of Rs.280 per quintal would be paid to farmers in two installments. The first installment of Rs.240 per quintal would be paid as per normal practice and the remaining Rs.40 per quintal would be paid within three months after the end of the crushing season.
- ii. State Govt. of U.P. / Uttrakhand had announced financial assistance of Rs. 28.60 per quintal of cane for the sugar season 2014-15 linked to average selling price of sugar and its by-products during the specified period from 1st October, 2014 to 31st May, 2015. However, this is subject to recommendation by the Committee constituted by the Government of Uttar Pradesh / Uttarkhand. The same has already been approved by the committee and payment of the same has already been made to the farmers directly by the government and adjusted in our cane dues in case of Uttar Pradesh. In case of Uttarkhand, partpayment has already made by the Government and remaining part is likely to be made in the month of November 2015.

### Uttam Sugar Mills Limited

The global sugar market continues to reel under price volatility. The ISA daily price (monthly average) fell from 16.19 cents/lb in November 2014 to 15.33 cents/lb in December 2014 and reached 15.34 cents/lb in January 2015. White Sugar price have also reached the lowest level in 6 years (17.50 cents/lb). The main reasons for the decrease in world sugar prices are:

- The fall of the Brazilian real;
- The high carry forward of sugar;
- Increase of net short position of hedge funds since the end of January 2015.

The rising level of incorporation of ethanol in gasoline in Brazil from 25 % to 27 % didn't change the global downward trend of sugar prices.

According to the ISO, the world production is almost equivalent to the consumption which would not reduce the pressure from global stocks accumulated over the last four seasons. However, short fall expected in 2015-16

### **INDIAN PERSPECTIVE OF SUGAR INDUSTRY**

As compared to about 241 lakh tons of sugar produced in the last 2013-14 sugar season, the Indian sugar industry has produced a record 280 lakh tons of sugar in the current 2014-15 sugar season .

The sugar mills in Maharashtra have produced 105 lakh tons of sugar, followed by the sugar mills in Uttar Pradesh who have produced about 71 lakh tons and then mills in Karnataka who have produced 49 lakh tons.

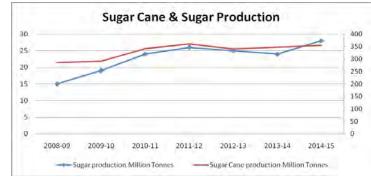

As compared to the previous sugar season, the sugar mills in Maharashtra, Uttar Pradesh and Karnataka have produced about 28 lac tons, 6 lac tons and 8 lac tons respectively, more than what they produced in 2013-14 SS.

In case of the fourth largest sugar producing State viz. Tamil Nadu, the production is significantly lower than last year when they had produced almost 12 lakh tons, but have produced 10 lakh tons in this sugar season.

Taking into consideration the estimated domestic consumption of 248 lac tons and estimated exports of 11 to 12 lac tons, the country would end the season with massive sugar stocks of 103 Lac tons on 30th September, 2015. This is 43 Lac tons more than the normative requirement of the Government for meeting the initial months' domestic requirement in the new sugar season.

In 2006-07 sugar season when the country produced 284 lac tons of sugar and was ending the season with 110 lac tons of sugar stocks, the Government, in order to help the sugar industry to dispose of the surplus stock and also to improve domestic sugar prices, took various measures which included:-

- i. Creation of buffer stock of 50 lac tons (in two tranches) for a period of 2 yrs.
- ii. Incentives on export of sugar for 60 lac tons and
- iii. Gave interest free loans for 4 years amounting to Rs. 3800 cr in 07-08 SS.
- As compared to the sugar season of 2006-07, the current sugar season is worse because of following reasons:
  - i. As cane price arrears of farmers are still pending at around Rs. 15,000 crore.
  - ii. This is the 5th year of surplus sugar production.
  - iii. There are no signs of farmers reducing their cane area, and
  - iv. Sugar prices both in domestic and global market have fallen to the lowest levels in the last 6 to 7 years
- The Following chart depicts cane production & sugar production data:

### Prices:

Domestic sugar prices have been on a downward trend on account of excess supply in the domestic market in the SS 2014-15 coupled with no exports (due to relatively lower international prices). Prices of sugar for the period from Oct 2014 to Aug 2015 are as under:

### Trade:

With the recent softening of international sugar prices and India's rising domestic cost of production, Indian sugar exporters will face lower export price realization, especially in mills in northern India which face higher transport costs. However, mills in western and southern India will continue to benefit from their proximity to ports, relatively lower production costs and Export Benefits from the Central Government including of Export Incentive @ Rs. 4000/- MT.

varieties and improved production technologies to growers in its endeavour to raise cane yields and sugar recovery rates. Following Cane Development activities which improve the productivity, yield & Sugar Recovery Percentage of Sugarcane, are undertaken:

- a. Varietal Replacement with proven high recovery varieties.
- b. Ratoon management.
- c. Development of Agri Research Centres.
- d. Integrated Pest Management Programme.
- e. Soil testing facilities.
- f. Encouraging use of Bio Fertiliser & Bio pesticides.
- g. Training facilities to the Farmers.

The Indian Council of Agricultural Research (ICAR) conducts sugarcane research and development at the national level. State agricultural universities, regional research institutions, and state agricultural extension agencies support these efforts at the regional and state levels. The central and state governments also support sugarcane growers by ensuring finances and input supplies at affordable prices. To increase the area of cultivation and production in India, a centrally sponsored scheme called the Sustainable Development Fund of Sugarcane Based Cropping System Area under the Macro Management Mode of Agriculture is being implemented in various sugarcane growing states.

The GOI establishes a fair and remunerative price system (FRP) for sugarcane on the basis of recommendations by the Commission for Agricultural Costs and Prices (CACP) and after consulting state governments and associations of the sugar industry and cane growers. The CACP estimates the Sugar Price & based on the estimated Sugar Price the FRP being ascertained. Several state governments further augment the MSP/FRP, typically by 30-40 percent, due to political compulsions rather than market pricing.

Sugar mills are required to pay the "state advised price (SAP)" to sugarcane farmers irrespective of the market price of sugar. Softening sugar prices, coupled with apprehensions of a large cane crop, discouraged the sugar mills to pay higher cane prices.

Given below is a chart depicting the difference in the State Advised Cane Price (SAP) between 2013-14 and 2014-15 in the major sugar producing states:

### Sugar Production and Marketing Policy:

### Sugar Development Fund:

The GOI levies a sugar cess of Rs. 240 per ton of sugar produced by mills for the Sugarcane Development Fund (SDF), which is used to support research, extension, and technological improvement in the sugar sector. The SDF is also often used to support sugar buffer-stocks operations, provide a transport subsidy for sugar exports, and provide subsidised loans for the installation of power generation, ethanol production plants, pollution control equipments, Cane Development activities and interest benefit on the loans given to sugar mills equivalent to excise duty or Soft Loan. In March 2008, the GOI enacted the Sugar Development Fund (Amendment) Bill, 2008, that enables the government to include the use of the fund for debt restructuring and granting soft loans to sugar mills.

### Ethanol Manufacture:

Brazil is one of the major Bio-ethanol (from sugarcane) producers and the exporter. USA is the major producer of ethanol from corn due to abundance production of corn in the country. Ethanol from sugar cane juice is not being produced in USA.

Global ethanol production was dominated by the United States and Brazil, which retained their top spots, other significant producers of ethanol included China and Canada.

In India ethanol is produced mainly from molasses which is a by-product during production of sugar from sugar cane. India is the fourth largest Ethanol producer after Brazil, the U.S & China.

Ethanol is produced by the fermentation of Molasses in India, a by-product of Sugar.

45 kg of Molasses is produced from 1 ton of Cane, from which about 10 litre of Ethanol can be obtained. If the sugarcane is directly & fully used in Ethanol manufacturing, the yield of Ethanol is 70 litres per ton.

### Ethanol Blending Programme (EBP):

The Cabinet Committee on Economic Affairs (CCEA) in its meeting held on 22nd November, 2012 decided that (i) 5% mandatory ethanol blending with petrol as already decided by CCEA in the past, should be implemented across the country; (ii) procurement price of ethanol will be decided henceforth between OMCs (Oil Manufacturing Companies) and suppliers of ethanol; and (iii) the 5% mandatory blending will be reckoned for the country as a whole and it be achieved by 30th June, 2013. Accordingly, a Gazette Notification was issued directing OMCs to sell ethanol blended Petrol with percentage of ethanol upto 10%.

Further, there are few constraints in implementation of EBP, possible solution to which is being provided by the Ministry.

India has an indigenous installed capacity to produce about 600 crore litres of Rectified Spirit/ Alcohol /Ethanol, out of which distilleries having approx 230 crore litre capacity are attached with Sugar Plants & remaining are Standalone Distilleries. The above capacity is sufficient to meet the requirement of 10 % Ethanol blending with petrol.

The meeting held on August 24, 2015 under the Chairpersonship of Secretary (Food & Public Distribution), Ministry of Consumer Affairs, Food & Public Distribution, Government of India to discuss the issues relating to implementation of EBP at the scaled up blending target of 10%. Following issues were discussed:

- 1. Government has decided to scale up Blending target to 10% commencing from next Sugar Season 2015-16 as against the current target of 5%. This would require proper planning of Logistics involved & resolving various transaction barriers of licences & permits.
- 2. Secretary highlighted the increasing of production of Ethanol & also offers opportunities of value addition which will help Industry to cope up with the present liquidity crisis.
- 3. Secretary requested the OMCs to plan for enhancing storage capacities in their depot.
- 4. A presentation was made by the government officials regarding explaining the government strategy which are as under:

To achieve capacities to enable conversion of surplus molasses & sugar into ethanol for achieving 10% blending targets under EBP.

Projected state – wise ethanol demand profile for 2015-16 season at 10 % blending. The total requirement was 268.62 cr litres.

Scope of using B- Hy Molasses to make up the shortfall.

Requested all ethanol suppliers to come on grid, mills to upgrade & access SDF for the purpose, rationalise trade barriers.

A detailed description of the "grid" was given which networked the distilleries to the OMC depots and detailed the quantities to be supplied.

5. The secretary concluded that all distilleries which are presently only capable of producing alcohol, should upgrade their capacities for ethanol & access SDF funds. Secretary also asked to the State Government officials to facilitate creation of ethanol distillation capacities & avail of SDF financing for the purpose.

### New Price mechanism for Ethanol:

The Government on 10 December, 2014 has fixed the delivered price of ethanol in the range of Rs.48.50 per litre to 49.50 per litre, depending upon the distance of distillery from the depot/installation of the OMCs, as per the slab given below:

| Distance of distillery in Km. | Rs. per Litre |
|-------------------------------|---------------|
| 0-100                         | 48.50         |
| 100-300                       | 49.00         |
| > 300                         | 49.50         |

The above rates are inclusive of all central and statutory levies, transportation cost etc, which would be borne by the ethanol suppliers.

#### Key Government initiatives for the Sugar Sector

#### By Central Government/ Other State Governments

- a) Central excise duty on Ethanol has been exempted by Central Government for next crushing season (Season 2015-16).
- b) The Central Government, with a view to facilitate payment of cane dues of the farmers for the current SS 2014-15, notified the scheme for extending soft loan to sugar mills for payment of cane arrears under interest subvention for one year.
- c) Import duty increased from 25% to 40% under OGL, due to which imported sugar prices will increase and to some extent there will be reduction in import. This measure will affect the domestic price of Sugar.
- d) To make the export competitive in the global market and reduction of carried over stocks, export subsidy @ Rs.4000/- qtls announced by the Central Government applicable up to September 30<sup>th</sup> 2015 and Rs.1000/- qtl by Maharashtra government is under planning stage and likely to be announced.
- e) Compulsory export scheme has already been announced by the Central Government to the extent of approx. 15% of the Sugar Production during the next SS 2015-16 which is approx 4 Million Ts.

### By State Government for the season 2014-15 (U.P./Uttrakhand)

- 1. The U.P./ Uttarakhand Government had kept the State advised price (SAP) flat at last year's level of Rs 280 per quintal for 2014-15 and mills have decided to make cane payment of Rs 240 per quintal in the first instalment to farmers and the remaining Rs 40 within 3 months after end of the crushing season.
- 2. State Govt. of U.P. and State Govt. of Uttrakhand had announced financial assistance of Rs. 28.60/- per quintal of cane for the sugar season 2014-15 linked to average selling price of sugar and its by-products during the specified period from 1st October, 2014 to 31st May, 2015 which is to be recommended by the Committee constituted by the Government of Uttar Pradesh / Uttrakhand. The same has already been approved by the committee & payment of the same has already been made to the farmers directly by the government & adjusted in our cane dues in case of Uttar Pradesh. In case of Uttrakhand, partly payment made by the Government and partly is likely to be made in October 2015.
- 3. The UP Government has waived of entry tax liability on sugar and purchase tax on sugarcane for the season 2013-14. Similarly Uttrakhand Government has waived the purchase tax liability.
- 4. For Sugar season 2012-13 Government of Uttar Pradesh has reduced the society sugar commission rate from 3% of Fair Remunerative Price (Rs 5.10/-qtl)of cane to Rs.2/- per quintal on sugar cane.
- 5. For Sugar season 2014-15 Government of Uttar Pradesh has reduced the society sugar commission rate from 3% of Fair Remunerative Price (Rs 6.60/-qtl) of cane to Rs.2/- per quintal on sugar cane and same will be reimbursed by the U.P/ Uttarakhand Government

### Future Expectations/ Announcements

- 1. The state of Maharashtra and Karnataka producing above 50% of country sugar production, have already implemented the Rangrajan Committee formula. In U.P., industry have also requested to State Government for fixing of cane price based on the sharing of realisation from sugar and by-products. The State Government has already constituted a committee under the chairmanship of Chief Secretary of the state to submit its recommendations. We expect positive outcomes on the same and the effects of the same will come in next crushing seasons.
- 2. Central Government is considering increasing the blending % of Ethanol in Petrol from 5% to 10%. This will improve the demand of Ethanol and price of Ethanol will improve from these.
- 3. Industry through association is also approaching to the government regarding restructuring the accounts of the sugar companies by converting Working Capital into term loan with 2 year moratorium. This will enable the factories to clear old outstanding & farmers will get their cane dues in time.
- 4. It is expected that subsidy on export of sugar will further be extended

### B. OPPORTUNITIES & THREATS

### **Opportunities:**

- Utilization of downstream by-products.
- Huge potential for increasing the High yielding cane crop to increase the cane crushing & sugar recovery rate.
- Potential for new and upgrading Technology for improved utility consumption factors and utilization of by-products.
- Potential for added incentive for REC (Renewal Energy Certificate) mechanism to addressing mismatch between availability of renewable sources in state and to meet the obligation.
- Potential for downstream production of Ethanol.
- Utilisation of waste of the distilleries in a productive manner.

### Threats:

- Vulnerability of sugar sector to inflation & unfavourable regulatory policies relating to fixation of higher cane prices.
- Weather conditions affecting yield and recovery.
- Deteriorating quality of soil due to overuse of fertilizer and pesticides.
- Fluctuations in selling price of finished product in domestic and global markets.

### C. RISKS AND CONCERNS

Sugar industry being agro based is vulnerable to commodity cycles and is hence, fraught with several risks. Given below is a discussion on the risks as perceived by the Management. The list is not exhaustive and meant for information purpose only for Investors who are requested to rely on their own judgement while assessing the risks associated with the Sugar Industry and your Company.

- a) <u>Raw material risk</u> Sugarcane is the principal raw material used for sugar production. Its availability, quality, growth and cost are affecting factors. These are in turn impacted by uncontrollable factors such as:-
  - the area under sugarcane cultivation;
  - availability of water;
  - Adverse weather conditions and crop disease;
  - Availability of better and higher yielding seeds;
  - Shifting of farmers' preference to other crops;
  - Diversion of sugarcane to other industries like Gur, khandsari etc.;
  - Adequacy of harvesting and seasonal unskilled labour;
  - Un-remunerative cane procurement price;
  - High Local and State level taxes;
  - Short crop cycle;

- Fragmented land holding low yields at farm level;
- Mounting cane arrears;

### Risk mitigation

This risk can be mitigated by steps taken by the company through its Cane Development Programme which has yielded results in terms of high yields and recoveries. Government programme of Improved Infrastructure for roads and communication; Provision of better quality and higher yielding seeds as well as fertilizers and pesticides; Prompt clearance of the cane dues of farmers and steps to improve their goodwill by adoption of social development measures such as establishing schools and dispensaries in the command areas etc.; Diversifying into multiple locations etc.

### b) Regulatory Risks -

### i. Environmental Risks

The Industry & Company is subject to environmental regulations and may be exposed to liability as a result of our handling of hazardous materials and potential costs for environmental compliance.

### ii. Government policy related Risks

The Industry is regulated and your Company operates in a regulated environment. Central and State Government policies and factors such as:-

- State Advised Price (SAP) and Fair and Remunerative Price (FRP) for sugarcane;
- Control on sale of Molasses;

affect the agricultural sector and related industries and in turn our operations and profitability.

### Risk mitigation

The regulatory risks listed above are Government policy driven and beyond Company's control and cannot be alleviated unless the industry is completely decontrolled. Every effort is made to conform to regulatory requirements while judicial recourse is made when warranted. Various representations through the body of the industry like ISMA, UPSMA, and UPDA submitted to the government to come out with the solutions regarding above risks.

c) Sugar Price Risk - Sugar prices in the Domestic and International markets depend primarily on the supply and demand situation. Global prices influence and affect the domestic prices directly and sale of Molasses controlled by the respective States. Fluctuations in demand and supply arise on account of the changes in the availability and price of sugarcane, variances in the production capacities of our competitors, availability of substitutes for the sugar products and international demand and supply position.

### Risk mitigation

Your Company is unable to mitigate this risk since one does not have any control on the market forces and the regulatory prices. The wholesale price of sugar has a significant impact on our profits. Like other agricultural commodities, sugar is subject to price fluctuations resulting from weather, natural disasters, domestic and foreign trade policies, shifts in supply and demand and other factors beyond our control. Additionally, 15% to 30% of the total Global sugar production is traded on commodity exchanges which are speculative in nature and can adversely affect the global sugar prices and in turn the operations of your Company.

However, your Company is trying to reduce the impact of this risk by foraying into newer markets, entering the export market, more value addition by concentrating on downstream projects, increasing the quality and volume etc.

d) <u>Cyclical Risk</u> – The industry is dependent on monsoons for both production and price realisation. Moreover, switching to other crops by cane growers on account of better returns affect the Industry.
Diale activity for a statement of the statement

### Risk mitigation

Your Company is unable to mitigate this risk since one does not have any control on the cyclical nature of the industry. However, Governmental initiatives to improve the irrigation by introducing various schemes as well as improvement in the distribution system by augmentation of the Canal Irrigation and tapping of the available surpluses of water are expected to mitigate this risk significantly.

e) <u>Finance Risk</u> – The Industry is dependent on the availability of timely working capital at competitive interest rates and Long Term Finance for capacity enhancements / economic size of mills as well as for the manufacture of by-products.

### Risk mitigation

Your Company is facing severe financial constraints. However, it is approaching Banks for funding/ finance

### D. INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY

Broadly, the areas of operation have been classified as Procurement, Manufacture, Marketing and Finance, in the functioning of which, various checks and control systems have been incorporated as Standard Operating Procedures. The organization values human development as one of the cardinal principle in the growth of the Company. The organization has steadfastly stuck to its vision to enhance knowledge, skills and competencies of the human resources pool- helping them develop individually and collectively thereby improving productivity. The Company is also in the midst of providing regular training to the employees for up-gradation of skills at various levels.

With these progressive steps, your Company has been able to maintain cordial relations with its employees even in this crucial time.

Our responsibility is to express an opinion on these financial statements based on our audit.

We have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder.

### Opinion

In our opinion and to the best of our information and according to the explanations given to us, the financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India:

- a) In the case of the Balance Sheet, of the state of affairs of the Company as at June 30, 2015;
- b) In the case of the Profit and Loss Statement, of the Loss for the year ended on that date; and
- c) In the case of the Cash Flow Statement, of the cash flows for the year ended on that date.

### Emphasis of Matter

We draw attention to:-

- Note no 29, the State Governments of Uttar Pradesh and Uttarakhand has announced subsidy for Sugar Industry for season 2014-2015 which is linked to average selling price of Sugar and By Products during the period 01.10.2014 to 31.5.2015. Such subsidy as reduced from the cane cost by the Company is Rs. 6703.96 lacs up to 30.06.2015.
- Note no 45, the company has recognized Deferred tax Assets (DTA) of Rs. 2469 lacs for the year ended

30.6.2015 and Rs. 14103.80 lacs up to 30.6.2015 on unabsorbed business losses and unabsorbed depreciation. Continuous losses in the last few years indicate the uncertainty as regards realization of such deferred tax assets. The Company's Management is of the view that it expects turnaround of sugar sector by view of expected assistance from Government and by way of Cane Development Activities carried out by the company as supported by report issued by Sugar Technical Expert, it has become reasonable that sufficient taxable income will be available against which such deferred tax assets can be realized.

 Note no 47, regarding preparation of account on going concern basis despite substantial erosion of net worth of the company and significant losses leading to material uncertainty about the company's ability to continue as going concern and based on mitigating factors as fully described therein.

Our opinion is not qualified in respect of above matters.
