# CMD'S MESSAGE

Dear shareholders,

It is my pleasure to present to you the 22nd Annual Report of the Company.

Our journey since incorporation has been quite encouraging. And the financial year 2012-13 proved no exception. Despite the sector facing considerable headwinds, our experience and performance during the year provided significant insights. More importantly, it strengthened our belief in the long-term business strategy over short-term benefits. The Company's Total Income increased from ₹ 313.63 Crores in FY 2011-12 to ₹ 315.17 Crores in FY 2012-13. Profit after Tax rose from ₹ 52.14 Crores in FY 2011-12 to ₹ 53.42 Crores in the last financial year. We continue to be in a strong financial position with total dividend payout (including interim dividends and final dividend) of ₹ 17.50 per share in the previous year.

Two qualities that stand out specifically in the context of fashion lifestyle and retailing business are 'Patience' and 'Perseverance'.

The year started with the headwinds of high inflation and elevated interest rates. The economic slowdown has had a limited impact on high price levels of the basic necessities of food and shelter (property) which occupy a significant portion of the consumer spend thus dampening discretionary expenditure. The Company braced itself for the resulting fallout on the

business trends and stayed focused on sustaining its core business. A fine balance had to be achieved between pushing sales and maintaining healthy profitability and cash flows. The efforts paid off as the year progressed. After a challenging start to the year, the Company was able to successfully claw back and exceed its revenues.

At the macro level, India represents a significant opportunity for growth due to huge and increasing population with earning capability, along with a low per capita spend on fashion apparel and

**We, at KKCL, are clearly focused on our growth trajectory and are investing in our core brands, infrastructure, distribution and innovation.**

KKCL believes that Integrity and Financial Prudence are equally important to build a sustainable and successful organisation that values and safeguards the interest of all its stakeholders. KKCL today is a financially strong Company with best-in-class operating parameters like profit margins, working capital cycle and cash flow.

As a proactive measure the Company has established a Business Progressive Fund wherein an amount of ₹ 10 Crores has been apportioned from the profits. This fund will be instrumental in addressing the adverse business impact that is experienced during periods of sluggishness, which are inherent to the industry and also providing enhanced support for superior, long-term growth.

We, at KKCL, are clearly focused on our growth trajectory and are investing in our core brands, infrastructure, distribution and innovation. In the Union Budget for FY 2013-14, the Government took heed to the challenges faced by the industry and rolled back the excise duty that was imposed in FY 2010-11. This move will benefit the branded apparel industry and provide the Company with some headroom to pursue its growth targets in a business scenario that continues to be challenging despite decreasing inflation.

The core philosophy and strategy of KKCL is to build a stable, sustainable and scalable business. I believe, we have established a strong and stable foundation and have demonstrated the ability to sustain the business in periods of volatility. With these building blocks firmly in place, we are now focusing our efforts

accessories as compared to developed markets. However, unlike the pocket-size of international consumers, the Indian environment is highly sensitive to price inflation and economic sentiments. For the Indian consumer, fashion clothing today is no longer an aspiration, but more of a lifestyle necessity.

Even as the consumer aspires for high quality fashion wear, the spending is constrained by core inflation that eats into the wallet share. This underscores the need for 'Patience' to tide over these intermittent periods of volatility and uncertainty and the need for 'Perseverance' to continue investing in the business to deliver high quality and innovative products to the discerning consumer.

KKCL has these qualities ingrained in its DNA. But these alone are not sufficient. Patience and Perseverance require robust financial backup that will enable the Company to sustain such prolonged periods of uncertainty without risking its very survival. The past twelve months witnessed several cases of disruption and decline, especially for companies that were over leveraged, causing suffering to all stakeholders including employees, shareholders, lenders and suppliers.

on business scalability. Needless to say, there are significant opportunities and with our ability to be patient and persevere, we will endeavour to scale up this business to greater heights.

We are privileged to have you, valued shareholders, who share this attitude and I am confident that you will benefit from this association as we continue on our journey of value creation.

Warm regards,

**KEWALCHAND P. JAIN**

Chairman and Managing Director

Notwithstanding the macro trends, the Company has been able to maintain its sales and profitability and recorded a life time high in its total income and profit after tax.

## RESULTS OF OPERATIONS

### Sales

The Company achieved total sales of ₹ 303 Crores, marginally higher than the previous year. The decline in apparel sales volume by 4.5% to 35.8 lakh units was offset by a 7.8% increase in the sales realisation per unit to ₹ 806 per unit. The strength of the core brands enabled the Company to implement price increases despite a highly price-sensitive operating environment. While the year started on a challenging note, the Company was able to enhance the growth momentum in the second half. The full year's performance provides a better perspective of the business as seasonal fluctuations due to festival periods can distort the quarterly trends, which may not be strictly comparable.

### Cost of Goods Sold

The cost of goods sold declined by 3.5% over the previous year to ₹ 126.29 Crores despite an increase in sales. This was driven by a slight correction in

cotton and fabric prices, which stayed range bound during the first half of the financial year. Further, there was a reduction of 44% in purchase of traded goods, which primarily relates to the accessories business.

### Other Costs

Considering the sluggish growth environment, the Company maintained a tight leash on operating expenditure. Manufacturing and operating expenses were restricted to below 8% of operational income and were almost flat at ₹ 23.83 Crores. With inflationary trends continuing, employee cost increased by 16.5% to ₹ 34.07 Crores representing 11.2% of operational income underlining the Company's focus on retaining and strengthening its human talent. Selling and distribution expenses were incurred judiciously and maintained close to previous year levels at ₹ 28.39 Crores representing 9.4% of operational income. Administrative and Other Expenses increased by 7.7% to 16.75 Crores.

### Profitability

The Company achieved an EBITDA of ₹ 73.66 Crores representing an EBITDA margin of 24.3% comparable to the levels achieved in the previous year. The Company was able to sustain the profitability of the business despite cost pressures and subdued sales volume, due to its ability to implement an increase in sales realisation per unit.

The Company registered a record Profit after Tax of ₹ 53.42 Crores as compared to ₹ 52.14 Crores in the previous year, an increase of 2.5%. PAT margin also increased from 17.3% to 17.6%. The EPS of the Company increased from ₹ 42.30 per share to ₹ 43.34 per share.

### Financial Position

The financial position of the Company has been strong and continues to be reinforced with the focused efforts on maintaining high profitability and robust cash flows through efficient working capital management. KKCL has established clear benchmarks for conducting its business and there is zero tolerance for compromises.

The Company held ₹ 60.77 Crores in cash and bank balances and ₹ 118.13 Crores in current investments, aggregating ₹ 178.90 in liquidity as compared to ₹ 129.39 Crores last year.

### Business Progressive Fund

The Company has undertaken an initiative to build a dedicated reserve that is specifically targeted towards creating a support mechanism for sustaining growth. As compared to other industries, the fashion apparel business has unique business dynamics, which require continuous investment into strengthening brands and expanding distribution, irrespective of intermittent periods of slowdown.

The Company has created 'Business Progressive Fund' by appropriating a sum of ₹ 10 Crores out of its profits during the year to maintain normal growth in sluggish market conditions and support superior growth for the long term. The said fund shall be for the purpose of launching and promoting new products, advertisement campaigns, promotional schemes and initial support to master stockiest and franchisees for development of retail business, reinforce existing channels of sales and so on. The amount of fund is specifically earmarked and invested in liquid mutual funds or any other safe and highly liquid investments. The Company has made adequate provisions in accordance with Accounting Standard (AS)-29 in normal course of business. AS-29 does not permit providing for expenses where present obligation does not exist or there is no fixed commitment.

Accordingly the Company has opted to create Business Progressive Fund. Further addition to the aforesaid fund shall be reviewed from time to time and considering business environment and conditions and the income accrued from the fund, however any accretion to the investment shall be credited to Statement of Profit and Loss.

## OUTLOOK

Last year we had stated about the macro headwinds, which tend to have a dampening impact on consumer discretionary spend. The Company was able to weather the slowdown and maintain its sales and profitability. While many of the factors continue to persist, there are initial trends of softening of inflation and expectations of lowering interest rates, which can provide a cushion to the burdened consumer. The removal of excise duty in the recent budget has provided some relief to the industry. FY 2013 was a period of consolidation and the Company is optimistic about the future and believes that it is well positioned to deliver superior performance driven by its strong brands, robust financial position and a highly motivated and focused team.

## OPPORTUNITIES AND THREATS

The Indian consumption theme is now firmly established and the size of the consumer sector has attracted several players targeting various verticals in the industry. The modern retail industry is an integral part of the consumption revolution witnessed over the past decade and continues to grow. Within the branded fashion apparel space, there are no doubts about the long-term potential, which attracted several global

brands, especially those in luxury and premium product categories. Reforms in the retail sector with easing of FDI have started attracting more players.

The entry and expansion of global brands provide the consumer with a wide choice, thus increasing competition. But these brands also condition the consumer with newer and higher price points that fashion can command for a high-quality product. What is perceived as a potential threat also provides an opportunity for the Company with its well established brands to deliver world class products to its consumers with a compelling proposition.

There is a strong relationship between the economic scenario and the growth prospects of the industry and the Company. The sluggishness in the economy may persist; however, these factors do not overwhelm the Company as its vision and commitment are driven by a super long-term focus, which it pursues with relentless passion and efficient execution.

The Indian retail market provides a big growth opportunity but also poses challenges for chasing growth profitably. Your company will continue to follow prudent financial policies while seeking growth opportunities.

While the market offers growth opportunities it remains susceptible to various factors like rising inflation, volatile financial markets, uncertainty over monsoons and other uncertain events. With more and more top of the line international brands entering Indian market the competition in the branded apparel industry continues to be getting fierce by the day.

While your company has an established presence in Metros and Tier - I cities your company is also penetrating into Tier - II and Tier - III cities. Your company would continue its thrust on product and design innovation. The apparel accessories business looks promising and would fuel your company's growth trajectory. ### 1.2. Presentation and Disclosure of Financial Statements:

All assets and liabilities have been classified as current & non-current as per Company's normal operating cycle and other criteria set out in the Revised Schedule VI to the Companies Act, 1956.

Management believes that the estimates and assumptions used in the preparation of financial statements are prudent and reasonable. Actual results could differ from those estimates. The Company had invested in aggregate ₹ 34,550,000 (P.Y. ₹ 34,550,000) in Joint Venture "White Knitwear Private Limited" (WKPL). The WKPL had acquired land in Surat Special Economic Zone (SEZ) and constructed factory building for setting up of manufacturing unit for production of knitwear apparels for exports. However due to slowdown in International market, SEZ could not take off and most of the members of SEZ shelved their projects and approached to Gujarat Industrial Development Corporation (GIDC) and state and central government for de-notification of SEZ.

Gujarat Industrial Development Corporation vide its circular No. GIDC/CIR/Distribution/Policy /13/05 dated 14.03.2013 has de-notified the SEZ and conceded the members to convert and use the erstwhile land in SEZ as Domestic Tariff Area (DTA) subject to fulfillment of conditions stated therein. WKPL vide its letter dated 04.04.13 has consented for de-notification of its plot of Land and undertaken to complete the formal procedure for the same.

Post de-notification joint venture partners shall dispose of the Company/land and building and realise the proceeds to return it to joint venture partners.

No provision for diminution in the value of investment is considered necessary for the year ended March 2013 in view of the value of underlying assets base of joint venture. However, the Company had made a provision for its share of loss in joint venture of ₹ 4,900,000 (P.Y. ₹ 4,900,000) and provision is grouped under 'Other long term provisions'. (Refer Note 2.4).
