Chairman's Message

DURING THE YEAR, WE STRENGTHENED OUR POSITION IN EACH SECTOR WHERE WE OPERATE. WE CONTINUED TO LEVERAGE OUR CREATIVE STRENGTHS TO PROVIDE TV CONTENT CATERING TO THE AUDIENCE'S TASTES.

Dear Shareholders,

FY 2015-16 was yet another successful and eventful year for your Company. It was the first full year of operations after the ownership of the company moved to Independent Media Trust (of which Reliance Industries Limited is the sole beneficiary).

There are important lessons to be learned from the internet revolution that is affecting the Media and Entertainment industry. As global viewership continues to grow, we have anticipated future trends and created new entertainment paradigms to stay ahead of the curve. At TV18, we are proud to have foreseen this change and have set in process a new way of doing things. To be successful

now, we believe, requires no less than the creation of enhanced or new business models, new operating models, new ways of interacting with existing consumers and tapping new consumer groups, and most importantly, newer ways of engaging with them. This is categorised by revived business operations, new content strategy, additions to the prevailing category of channels and rebranding of newly acquired ones. We manoeuvre as a vertically integrated studio model which allows us to create and distribute content, not only in ways that are best allied with viewer preferences, but in ways in which we can capture the maximum value stream.

India's media and entertainment sector is evolving like never before, and so is the

viewing preference of audience. The challenge is to feel the pulse of the new-age audience, innovate aggressively and provide engaging experience with a difference. FY 2015-16 saw several new channel launches and also witnessed the industry's adoption of a brand new ratings system – Broadcast Audience Research Council (BARC). The Media and Entertainment industry is set to grow at a CAGR of 14.3% to ₹ 2,260 billion by FY 2020, according to the KPMG-FICCI Media and Entertainment industry report FY 2015-16. The steady increase in disposable income and a mushrooming middle class have helped in the expansion of the Media and Entertainment sector in India. Relaxation of rules to allow foreign brands to

establish themselves in India has further boosted this trend.

Leveraging our creative strengths

During the year, your company strengthened its position in every sector where it operates. We continued to leverage our creative strengths to provide television content catering to the audience's tastes. FY 2015-16 was a milestone year for CNN-IBN as the channel celebrated its 10th anniversary. We took this opportunity to renew our partnership with CNN and rebrand the channel as CNN-News18 with refreshed content strategy.

The Kids genre also recorded high growth on the back of various initiatives to strengthen audience engagement. Nick HD+, the first Kids HD entertainment channel was launched in December 2015. The film business division continued to enthrall audiences in the Hindi and regional categories through its distinctly diverse and award winning story-telling in movies like 'Margarita With A Straw', 'Manjhi – The Mountain Man', 'Drishyam' and 'Pyar Ka PUNCHAMA 2' which received popular and critical praise from audiences and critics alike. The studio also expanded into regional cinema with the production of 'Black' in Bengali and 'Poshter Girl' in Marathi. We seek to take advantage of our brand equity in Hindi films and thereby increase our non-Hindi film business by targeting regional audiences.

We performed positively in FY 2015-16 across multiple operational and financial parameters. Our performance is testimony to our strategy of exploring new markets. The operating revenues on a consolidated basis stood at ₹ 2,569.0 crores, up 11% from ₹ 2,318.4 crores in FY 2014-15.

Exploring new genres

With our expertise in news and entertainment and a proven ability in evaluating the pulse of the masses, we continue to create diverse shows across genres. With 34 television channels across genres and languages, we have our feet firmly planted in various audience segments that are differentiated demographically largely based on age and geography. During the year, we also strengthened our presence in the Indian factual entertainment space through our alliance with A+E Networks in History TV18. In 2015, we rebranded ETV entertainment channels under the common brand of Colors, now operating in Kannada, Bangla, Marathi, Gujarati and Oriya, mirroring the cultural ethos and richness of the respective regions through unique content. Colors Infinity was launched in July 2015 and in a short span of time has redefined English entertainment genre in India by introducing several distinctive feature shows. We also launched Comedy Central - India's 1st 24-hour English comedy channel.

Digital strategy

With the digital revolution gaining momentum, we evolved new strategies during the year to poise ourselves for growth. These strategies were enabled through technology improvements with the twin goals of improving access and mobility. Network18's digital content and commerce segment includes a diversified portfolio of brands catering to a wide range of interests and services. Our general news channels CNN-IBN (now CNN-News18) and IBN7 adapted a fresh and exclusive news format to connect with a growing digital audience that takes to Facebook for news and entertainment.

Moving ahead

Appealing and innovative content, along with cutting-edge technology

and the best of creative talent and knowledge has helped us to promote all-round excellence. We are creating capabilities, infrastructure, content and platforms aligned to emerging consumer preferences and audience behaviour. We are also aligning our strategic priorities and tangible goals that will place us in a different orbit in the coming year.

The assets of sound contemporary content, developed by a competent talent pool, delivered through multiple mediums in a 24x7 manner, supported with a strong physical and digital infrastructure augurs well for us. Also with a strong balance sheet and enviable brand equity and goodwill, we are moving into an exciting digital future with confidence.

Our human assets are critical drivers of our growth. The Company's HR policies identify and reward employees for their extraordinary efforts and provide deserving employees with opportunities for rapid advancement.

I am thankful to all members of the TV18 team whose relentless service has strengthened the promise of our brand in the industry. And I am grateful to our shareholders for maintaining trust in us that motivates us to create greater value for all stakeholders.

Regards,

Adil Zainulbhai
Chairman

New Content. New Quality.

Over the years with changing technology and trends, the Media and Entertainment space has experienced a sea change in the way people are entertained and receive information. From around 25 channels in 1995 to over 800+ channels today, everything from viewing experience, operating models to nature of programmes has changed considerably. However, with each new channel or platform, the emphasis on quality and differentiation is only increasing. The form is dynamic and will always be. But the substance inhabiting the form needs to be rich and relevant. At TV18 we are firmly focused on getting our product right with enriched content and innovative programming led differentiation.

FY 2015-16 was especially significant in ensuring a reset in the way content curation and its marketing was approached. The year was marked by (i) Rollout of Broadcast Audience Research Council (BARC) in April 2015, and (ii) The Socio Economic Classification (SEC) in India changed to a New Consumer Classification System (NCCS). With this came better visibility on consumer preferences in rural areas, a largely ignored segment simply because until now the entire industry was unaware of the likes and dislikes of audiences in this segment. Television Audience Measurement (TAM) India which was replaced by BARC only included ratings by urban audiences. So far there was a 'one size fits all' strategy that was in use but now factors such as the introduction of BARC and 4G, change in consumer categorisation parameters - from SEC to NCCS, the progress made on digitisation of cable and the advent of digitisation have become disruptors of this established system which is in dire need of a revamp.

We at TV18 are positive about the future of news in India and want to maximize its reach through noteworthy investments in resources and technology. The cost of news gathering is significant and is always on the rise. We are at an advantage because we benefit from the synergies of our network.

WE AT TV18 ARE POSITIVE ABOUT THE FUTURE OF NEWS IN INDIA AND WANT TO MAXIMISE ITS REACH THROUGH NOTEWORTHY INVESTMENTS IN RESOURCES AND TECHNOLOGY.

A new way of Defining Audiences

WITH 34 TELEVISION CHANNELS ACROSS GENRES AND LANGUAGES, WE HAVE OUR FEET FIRMLY PLANTED IN VARIOUS AUDIENCE SEGMENTS THAT ARE DIFFERENTIATED DEMOGRAPHICALLY, LARGELY BASED ON AGE AND GEOGRAPHY.

TV viewing trends

A Sunday, three decades back – The entire family would gather in front of the only TV in the house to watch a popular mythological series in the morning and the weekly movie in the evening, shown on national television.

A Sunday in 2016 – Children are watching a television series based on their favourite cartoon characters, their mother is learning fun ways of cooking healthy meals and her husband is catching up on his favourite reality show.

This, however, is generalisation given the pace at which digitisation is moving and changing the face of the medium through which content reaches consumers.

Privatisation of entertainment and news channels has brought in its wake the ability to cater to multiple audiences with content especially curated for each segment. At TV18, sharper segmentation has always been a constant and crucial consideration in all our programming strategies.

With 34 television channels across genres and languages, we have our feet firmly planted in various audience segments that are differentiated demographically, largely based on age and geography. The appended segregation is indicative of the segmentation in our programming.

With BARC figures adequately representing urban and rural audiences, regional languages will get their rightful importance moving forward.

A new People Energy

The Media and Entertainment space is people-centric to its very core. Our product is essentially content communicated to the audiences through some very talented people.

At TV18 we have had an amazing journey so far with the help of the brilliance and perseverance of our people, both behind the scenes and in front. Through our programmes, actors and artists have become synonymous with their on-screen characters and anchors have become favourites based on their spontaneity, ability to engage and in case of news, their proficiency of reportage. Audiences view the content through these human channels, making it imperative for them to establish a significant connection with the consumers and keep them coming back for more.

The diversity of our content, channels and our target audiences across the news (TV18) and entertainment network

(Viacom18) need an equally versatile and skilled group of people on and off screen.

News Business

As the leading news network, we want true ethos of journalism to be reflected through our channels and through our programmes. In order to do this, we need to invest in resources that will showcase, support and sustain our product and ensure longevity even beyond the anchor presenting it. Thus, to make the process a lot more immersive, we are looking at investing in research teams that are backed by a database of facts and not opinions to become our bench strength. We are also focusing on putting enough foot soldiers on the ground where incidents demand serious news coverage and reporting, which is what journalism is all about.

Entertainment Business

With the entry of professional companies in the Media and Entertainment space, the process of talent scouting and finding new and promising faces with a unique skill set has become an organised and efficient process. Through various talent and reality shows hosted on our channels like 'India's Got Talent', 'Khatron Ke Khiladi', 'Jhalak Dikhhla Jaa', 'MTV Roadies', 'Splitsvilla' to name a few, we are able to find talent across the globe. These gifted individuals are given various opportunities across the board to work within our network of channels and films. We are firm believers in democratisation of opportunity and in keeping with that belief they are free to opt for work even outside of our company. Our journey in finding and nurturing talent from across the country has just begun and we want to make this effort an equal opportunity provider through our future projects and vision for this space.

Across the board we are an open company with a corporate culture that believes in listening to every voice within the organisation. We give much impetus to performance and meritocracy and focus intently on the final output.

We have further strengthened our human capital by hiring experienced professionals in the digital media and new-age content

segment. With our innovative and dynamic team of people, we are working towards maintaining our leadership position across businesses by perpetually adapting and evolving with changing times.

During the last year, our focus has been on strengthening key people processes and instilling leading systems to ensure that we bring in greater transparency, predictability and standardisation in the ways of working within the organization. Our endeavour has been towards nurturing, developing and growing talent by leveraging technology. We have already taken the first steps towards achieving our goal by rolling out refurbished key people processes and systems. With the backbone in place, we will continue our journey to realise our vision of becoming a talent hub in the Media and Entertainment space and beyond in the coming years.

A new Screen.

A new Experience.

India crossed the monumental mark of 1 billion mobile phone users in FY 2015-16. Of this number 18% to 20% are smartphone users. This landmark has placed increased focus on the top of the pyramid where audiences are consuming and interacting with content simultaneously on diverse screens, especially the TV and the mobile phone. The mobile and tablet have been around for many years, however, with increasing Internet penetration and higher data speed, the second screen has gained immense popularity within the Media and Entertainment space. This phenomenon has evolved since then, with the effective integration of social media platforms and content on television. The growing popularity and power of social media has led to increased discussions and engagement among people on their phone while the show is on-air.

The second-screen phenomenon with popular platforms - Facebook and Twitter is taking an interesting turn at TV18 and Viacom18. Let us see how –

Our leading news channels CNN-IBN (now CNN-News18) and IBN7 adapted a fresh and exclusive news format to connect with a growing digital audience that looks at Facebook for news and entertainment. In a first-of-its-kind broadcast integration, the IBN Network allowed people to participate in the process of choosing their own 'Indian of the Year' through Facebook. This integration resulted in dedicated segments showcasing insights based on Facebook APIs, videos around the initiative, nominee Q&A sessions and finally the voting to decide the winner. The channel also covers breaking news, special reports, top stories and exclusive interviews from the world of News, Entertainment and Sports in the form of native videocasts. These exclusive videos produced for Facebook in the form of digestible 1–2 minute news segments are mobile friendly and have been well-received by audiences. With content created in the form of videocasts, people are able to watch news and join in the conversation simultaneously.

Viacom18 is approaching the second screen mechanism in two parts. Firstly, the division is creating a community around the programmes through a strong second screen mechanism in order to reach an engaging customer base. This is being done with the launch of various apps on Facebook and Twitter that help gather audiences at one place for a better level of interaction with unique content around the shows. Also the launch of VOOT, Viacom18's OTT platform will give impetus to this objective. Secondly, while second screen is a good opportunity for interaction with the audience while they are watching a show, the users must be rewarded for wanting to interact with the channel during a programme. Viacom18 is attempting to incentivise this engagement for the audience.

Further development of apps for smart TVs may also impact the way the second screen phenomena shapes up.

Trends in second screen content consumption indicate why advertisers too are taking the digital route. According to a global survey by Nielsen (Nielsen Global Digital Landscape Report, 2015).

67%

users switch to another channel during commercial advertisements

48%

engage with social media and 58% browse the Internet while watching live TV shows

As per the KPMG-FICCI Media and Entertainment industry report FY 2015-16, digital advertising is expected to be the fastest growing advertising segment for the media industry in the future. In the UK, digital advertising has already outgrown TV advertising, while in the US it is expected to cross this benchmark in the coming year. Currently, in India, digital advertising constitutes about 12.6% of the total advertising market in 2015 and is expected to grow to 26% of the total advertising market by 2020. An increase in second screen consumption, growing mobile internet (4G) and device penetration backed by technology innovations will drive digital advertising growth over the next five years.

Indian Media & Entertainment Industry Overview

The year 2015 was a seminal year in many ways for the Media and Entertainment (M&E) industry. It was a year that sparked excitement and renewed hope, albeit peppered with a healthy dose of reality. The year saw the launch and expansion of a host of new services, notably OTT (Over The Top), Hindi and regional feeds on social media as well as significant original programming. There is a lot of excitement and activity in the digital space and many business models are being experimented with. As seen before in many industries and parts of the M&E industry as well, India may develop its own unique business models rather than adopt global ones.

The Indian M&E industry is expected to reach ₹ 2,260 billion by 2020. This is due to its large capacity to consume new products and businesses.

THE STEADY INCREASE IN DISPOSABLE INCOMES AND A BURGEONING MIDDLE CLASS HAVE HELPED THE MEDIA AND ENTERTAINMENT SECTOR IN INDIA.

technological growth has benefited internet advertising too by providing an alternate platform to advertisers.

Growth in Regional Markets –

Advertisers and brands are actively looking to cash in on relatively underpenetrated rural markets to establish a strong foothold, especially in television and print media.

Favourable policy initiatives – The Indian government has taken various initiatives for the Media and Entertainment industry. These include:

- Digitising the cable distribution segment that would draw greater institutional funding
- In broadcasting, the FDI limit was increased from 26% to 49% via the Foreign Investment Promotion Board (FIPB) approval route for news and current affairs television channels; the limit for non-news and current affairs television channels remains at 100%, but does not require an approval from the FIPB now
- Increasing FDI limit from 74% to 100% in distribution platforms such as cable and DTH
- Granting industry status to the film industry for easy access to institutional finance

Growth Drivers

Growth in socio-economic sector – The steady increase in disposable incomes and a burgeoning middle class have helped the Media and Entertainment sector in India. Relaxation of rules to allow foreign brands to establish themselves in India have further boosted this trend.

Digitisation – Digitisation has changed the way content is viewed in India today. The reach of digital platforms has led to a paradigm shift

in content consumption, with a large section of the population, hitherto untouched by the digital revolution, experiencing a variety of content on different platforms. Accordingly, content creators will have to up their game in terms of innovation and strategising.

Internet penetration via wireless connections and mobile phones is increasing rapidly. Besides consumers who are enjoying more content, this

- Granting licences to 45 new entertainment and news channels
- An audio-visual co-production deal has been signed between the Indian and Canadian governments to help producers from both countries explore technical, creative, artistic, financial and marketing resources for co-productions

Key highlights / developments: Digitisation: Slower than expected.

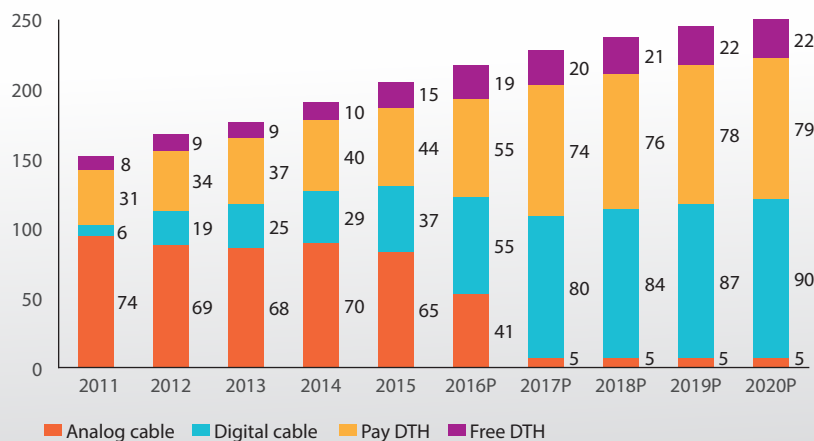

Phase III digitisation failed to meet its deadline with around 76% of boxes seeded by December 2015. While the government has not officially

extended the timelines, the process has slowed down due to multiple court cases challenging the process. Further, benefits of Phase I and II, particularly on ARPU (Average Revenue per User) have failed to materialise due to a number of on ground challenges across the distribution value chain. This resulted in a slowdown in subscription revenue growth in 2015.

It is expected that by 2020, the ratio of digital cable subscribers to DTH subscribers would be 53:47 (i.e. 90 million digital cable subscribers and 79 million DTH subscribers).

4G Rollout - The game changer

The most critical game changer is the advent of 4G services in India. 3G and 4G subscribers are likely to constitute 40% of the total wireless internet subscriber base. Content viewing has already moved beyond television to mobile phones and handheld devices. This trend will only accelerate as 4G ramps up. It is likely to be a highly competitive space, resulting in lower data costs and with consumers likely to be the main beneficiaries.

Rollout of BARC

TAM (Television Audience Measurement) India was replaced by BARC (Broadcast Audience Research Council) India in April 2015. BARC India is the only government registered TV ratings agency in India.

BARC has thrown up huge amount of rural viewership data that was not accessible earlier. Channels and content creators are now exposed to previously untapped viewer data,

IT IS EXPECTED THAT BY 2020, THE DIGITAL CABLE SUBSCRIBERS TO DTH SUBSCRIBERS RATIO WOULD BE 53:47 (i.e. 90 MILLION DIGITAL CABLE SUBSCRIBERS AND 79 MILLION DTH SUBSCRIBERS).

which could lead to a paradigm shift in content strategy.

For the first time in India, BARC launched All India (Urban + Rural) TV viewership data that currently covers 153.5 million TV households with 77.5 million urban and 76 million rural households, spanning megacities, 1-7.5 million towns and less than 1 million urban areas and rural areas.

Key Highlights of BARC India

Inclusion of new markets: BARC India data covers several new markets such as rural India, Jammu and Kashmir and North East. Overall, there has been a significant increase in the number of households included.

Impact on content: On the content side, the collective rural and urban ratings will need to be thoroughly analysed before tangible progress is made on the guidance provided by data. Broadcasters are also likely to review their programming to accommodate the content consumption patterns in rural markets as well.

DD FreeDish: Inclusion of rural markets in ratings and Phase III digitisation together has increased the importance of DD FreeDish and more broadcasters will now see merit in joining this platform.

Better Coverage than TAM: Besides covering the urban population, BARC India covers the rural sector as well. Moreover, BARC India uses NCCS (New SEC), where households are classified based on the education of the chief wage earner and ownership of a number of consumer durables from a fixed

list (like electricity connections, cars, 2-wheelers, ACs etc.) to more accurately reflect their purchasing power.

Impact on Advertising: With widespread coverage by BARC, the advertising sector can now plan its strategies in a better way. Although it can get challenging to tailor communication for different segments, it will ensure the right message is directed at the intended audience. Advertisers can now enjoy better reach and visibility.

Hindi Content

Hindi general entertainment channels (GECs) continue to form the major chunk of content watched on television at 29% market share. Hindi GECs remained the clear favourite on the advertising front, witnessing a growth of 15-16% in advertisement revenues in 2015. (Source: KPMG-FICCI Indian Media and Entertainment Industry Report 2016)

Although the introduction of a new TV viewership measurement system by BARC India led to ambiguity in ratings, the top performing shows saw increased advertisement spends based on past performances and internal assessments by advertisers. The inclusion of rural data in the sample size led to a scale up in the rankings of channels. Free-to-air (FTA) channels such as Zee Anmol, Star Utsav and Rishtey started appearing in the top 10 channels list.

The Hindi movies genre is mostly used for frequency building and in the past, the genre has largely grown on the back of increase in advertisement inventory through the addition of channels. It is expected that advertisement budgets from advertisers will continue to increase

in this genre. The past couple of years have seen a rationalisation in prices of Cable & Satellite (C&S) rights of Hindi movies.

English Content

The English entertainment platform has shown healthy growth in advertisement revenues over the past years, growing at 15-20% annually. This genre includes English movie channels and English GECs, where the latter grew at a faster clip. With rising content cost due to the increase in production cost in the global

markets, this genre continues to be burdened. However, large broadcasters continue to invest in their English bouquet in anticipation of it driving growth in subscription revenue because of the premium positioning of the channels.

Regional Content

According to BARC, regional movies and regional music accounted for 38.99% viewership share over the period – Week 41, 2015 to Week 7, 2016. Among regional markets, the Telugu market, with a 24.4% viewership share, was the second largest. Tamil channels had the highest share in terms of viewership with 25.7% share. In regional markets, GECs are the leading segment with 29.6% viewership share followed by regional movies with a 6.6% share in 2015.

Dubbed content in the regional space has increased the cost of content. Thus, regional TV channels are looking at investing in original content.

WITH THE INCREASING USAGE OF INTERNET AND SMARTPHONES, NEWS CHANNELS PRESENT ON DIGITAL PLATFORMS GAINED TRACTION.

News segment

The television news industry witnessed a modest growth of 5-8%, with non-traditional players such as e-commerce and auto being the few drivers. One of the reasons for tepid growth was lesser advertisement spend in 2015. However, Patanjali, a consumer products brand led by Baba Ramdev emerged as one of the biggest spenders, with advertisement spends mainly in the news genre.

From a cost perspective, 2015 was not a good year for the news genre. This is primarily because the businesses could not fully absorb the benefits of digitisation. They also incurred increased expenditure on employee and talent costs. Carriage fees were hiked as well for new deals.

With the increasing usage of Internet and smartphones, news channels present on digital platforms gained traction. News

broadcasters are aiming to utilise social media to increase viewer engagement. They are looking to leverage this trend and earn extra revenues from the digital space going forward.

Kids segment

The Kids genre has been doing well in terms of advertising revenue. In terms of advertising, this genre is largely dominated by advertising targeted at children and non-traditional categories such as e-commerce and autos. The non-kids brands contribute to 45-65% of the inventory because 90% of households own only a single TV and a lot of default viewing therefore occurs. Keeping this in mind, advertisers decide to broadcast non-kids advertisements, especially advertisements focusing on mothers.

According to industry experts, children connect better with local language content. This niche segment has a lot of promise for growth. Sun TV currently

leads this space as they have one channel in each of the four South Indian languages – Tamil, Telugu, Malayalam and Kannada. Disney and Hungama both provide their Kids channels with Tamil and Telugu audio feeds, while Cartoon Network and Pogo are available with Tamil feeds.

Sports segment

Sports has been the best segment among the various genres of television content. The Indian Premier League and Cricket World Cup continued to attract increased sponsorship, translating into higher advertising spends. The biggest positive has been the interest generated in sports other than Cricket. Creation of leagues in sports such as Kabbadi and Football has turned out to be a successful outing for its promoters, especially Kabaddi, which is now likely to be a bi-annual event.

Content is King: Increased relevance of content in the time of digitisation and consumer data boom

The Indian television industry has evolved manifold in the last two decades. From around 25 channels in 1995 to over 800 channels today, everything from viewing experience, operating models to nature of programmes has changed. Importantly though, to survive in this cut throat competitive market, delivering quality content is the key. With each new channel or platform, the emphasis on quality is only increasing.

Innovation: Need of the hour

At the heart of facing competition from digital media, channels are looking at different ways to hook the viewer and encourage appointment viewing. For example, the telecast of back-to-back episodes of a particular programme to induce binge watching or localisation of content leading to niche segmentation or by catering to audience needs with shows such as 'On air with AIB'. As competition is increasing, greater emphasis is being laid on creating content for targeted consumers. Channels today are creatively packaging

their shows and are using innovative marketing techniques to reach the intended consumer. Customer data analytics plays a big role in driving the agenda of innovation as it forms the bedrock of direction that is to be taken in terms of content and overall strategy. Given the fast changing dynamics and the impact of BARC, TV industry looks set for a surge in business. It is a time when content creators and advertisers need to be on their toes and constantly look to innovate. Earlier, the competition was between programmes of similar genre and channels, it has now enhanced to a battle between platforms - television versus online medium. While the online medium fixes the issues and glitches in its efficiency, TV industry can strategise and up its game.

Conclusion / Drivers

Overall, the growth story of the M&E sector continues to be positive with a few challenges, notably the completion of digitisation. Opportunities are going to be plentiful considering the technological boom that we are witnessing, the best of which is yet to come. The largely unpredictable challenges of content strategy and the flux in viewership consumption makes

for uncertain times for the industry. That said, these challenges are cloaked in potential for exponential growth. The key is to tap consumers' mind and leverage any first mover advantage.

Impact of rural ratings on the industry

How will the rural rating inclusion shape the industry dynamics?

The ratings have identified the prime time in rural markets between 5.30 p.m. and 10.30 p.m. This will allow broadcasters to review their programming to accommodate content consumption patterns in rural markets. Currently, the rural market occupies only 7-10% of the total TV news advertising pie, which is expected to grow at a rapid rate. Monetisation of rural markets will be one of the key growth drivers for the TV news industry in the coming years. Advertisers can now have real data to back their media budgets aimed at the rural audience, eventually facilitating crucial decisions. Rural ratings will benefit e-commerce marketers as well since this sector is gradually turning its attention towards capturing under-penetrated rural markets given the saturation in urban markets for specific product categories. With rural ratings available now, it will be easier for content creators to create specific content, keeping in mind preferences of the rural population.

Inclusion of rural markets in ratings and Phase III digitisation together has made DD FreeDish a lot more relevant. More broadcasters will consider becoming available on DD FreeDish platform.

However, the inclusion of the rural ratings is still at a nascent stage and its implications and the overall effect still remains to be fully deciphered. Going forward, advertisement rates and advertisement spend allocation could change significantly if similar trends sustain.

Human Resource Development

In an era of war for talent, the group knows too well the importance of its single largest asset – its human capital. The group is committed to attract, develop and retain top talent across the gamut of editorial, sales, technology and all other enabling functions. Its focus to further strengthen entry level talent has resulted in collaborations with top journalism and general management institutions. Importance is laid on channelising energies of the workforce through focused goal setting across functions. Lakshya, an online Performance Management System provides an objective forum to assess employee performance. Managers are encouraged to have candid feed-forward conversations in a conducive environment and support development of their teams. Employees are provided multiple learning and development opportunities to bridge competency gaps required to perform their roles. An array of Rewards and Recognition initiatives, notably spot awards and long service awards provide a platform to recognise and celebrate employee achievements. The Company understands the need to build a more cohesive work and has an annual calendar of employee engagement initiatives that ranges from celebrating key festivals to a corporate quiz. There is emphasis on e-HR and various online systems have been made available to make the processes more user friendly for employees. In FY17, the Company will focus on formalising its

organisation structure in line with the vision and growth strategy. There shall be further impetus on HR automation through introduction of SAP. Besides furthering employee engagement across the organisation, identification and development of future leaders is also going to be a key focus areas. As on March 31, 2016, TV18 had 1,670 employees on its rolls.

Risk Management

TV18 maintains a robust system of internal controls, commensurate with the size and complexity of its business operations. The system provides, inter alia, a reasonable assurance of protection against any probable loss of the Company's assets as a result of misuse of powers by those who are in a position to influence the working of the business verticals of the organisation. It ensures that the transactions of its business operation are recorded in all respects in a fair and transparent manner. The Company has an external and independent firm of Internal Auditors to scrutinise its financials and other operations. The Internal Auditors report their findings directly to the Audit Committee, which forwards

them to the concerned departments/ business verticals for taking corrective measures. Internal audit also ensures that applicable laws are being complied with in true spirit.

Risk & Mitigation Strategy Digitisation Regime

Timely implementation of the government's phased digitisation regime is critical to the long-term growth of the television industry. With the completion of the process of seeding of set-top boxes for Phases I and II, the challenge now is to boost last mile billing and packaging. This will help multi-system operators (MSOs) increase the average revenue per user (ARPU) and also benefit broadcasters. In this scenario, channels with weak content could stand to lose out on account of poor consumer demand.

Regulatory Environment

The Indian broadcast industry is heavily regulated across a multitude of areas including distribution, taxation, etc. Any policy changes can have a material impact on the economic and strategic direction of the industry and may restrict TV18's ability to do business.

Competitive Forces

The emergence of digital media, along with growth of mobile and radio, is causing a shift in part of the advertising revenue away from television. With their greater local connect and more measurable reach index, such media are drawing in considerable advertising from sectors such as FMCG and BFSI.

Advertising Revenue

Advertising being a major source of revenue generation, any decline in advertising revenues could adversely impact TV18's revenue and operating results. TV18's primary revenue generation is linked with the sale of advertisements through television channels, which is dependent on the overall macroeconomic and industry conditions, market trends, public policy and government regulation, viewership, budgets of advertisers, among other factors. TV advertisement sales are also threatened by abrupt termination of contracts by advertisers, limits on advertising time, advertising shift to new media formats such as digital, etc.

Third-Party Relations/JV/ Partnerships

TV18 has relationships and JVs with external partners whose long-term continuation it cannot assure. Sudden termination or deterioration of these relationships may materially and adversely affect TV18's operations and financial condition. The success of any future JVs and strategic relationships with third parties is also not assured, as every relationship comes with its own set of risks, including failure to recover the investment made in such initiatives.

Brand Recognition and Popularity

TV18's brand strength is one of its biggest assets and its success depends upon the popularity and recognition of its brands, as well as its ability to deliver original and compelling content

and services that attract and retain viewers. Failure to sustain the brands, or excessive expenditure incurred in doing so, could seriously impact TV18's business and financial operations.

Mitigation Strategy

TV18 has an exciting portfolio of quality content and is continuously working on strengthening its content bouquet to reap the benefits of digitisation. It has also put in place deals for rolling out in Phase III areas once digitisation in that phase takes place.

Cognisant of the importance to remain abreast of changes in the regulatory environment, TV18 is constantly evolving its operational strategy to align it with the transforming dynamics of the industry in the context of policy changes. Strong risk mechanisms are

in place to ensure continued high levels of operational efficiencies and effectiveness in the changed environment.

TV18 is also expanding its portfolio and focusing on other forms of revenue by expanding in the digital space. It is also strengthening its processes and systems to ensure cost effectiveness.

TV18 is further keeping a sharp control on costs. It is also continuously expanding its content basket to capture advertising interest and revenue.

TV18 has in place a strong risk management system and stringent organisation policies that its employees are required to adhere to at all times. This ensures that its reputation remains protected and maintained.

Internal Control Systems and Their Adequacy

TV18 has exhaustive internal control systems that are aligned to its business requirements. TV18 regularly monitors the risks and has in place focused risk mitigation strategies. Internal and external audit teams continuously monitor the adequacy and effectiveness of the internal control environment across TV18 and the status of compliance with operating systems, internal policies and regulatory requirements. The Audit Committee meets periodically to review the adequacy and efficacy of the internal control systems.

ANNEXURE “A”

To the Independent Auditor’s Report

(Referred to in paragraph 1(f) under ‘Report on Other Legal and Regulatory Requirements’ of our report of even date)

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

We have audited the internal financial controls over financial reporting of **TV18 BROADCAST LIMITED** (“the Company”) as of March 31, 2016 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management’s Responsibility for Internal Financial Controls

The Company’s management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor’s Responsibility

Our responsibility is to express an opinion on the Company’s internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting were established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company’s internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over

financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2016, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

C. Depreciation and amortisation

Cost of leasehold improvements is being amortised over the remaining period of lease of the premises.

Intangible assets are amortised over their estimated useful life as follows:

Computer software is being depreciated over a period of 5 years. News archives are depreciated on straight line basis over the period of 21 years as the contents of the same are continuously used in day to day programming and hence the economic benefits from the same arise for a period longer than 20 years. E. Fixed assets

Tangible assets

Tangible assets are stated at cost net of recoverable taxes, trade discounts and rebates, less accumulated depreciation and impairment loss, if any. The cost comprises purchase price, borrowing costs, and any cost directly attributable to bringing the assets to its intended use.

Subsequent expenditures related to an item of tangible asset are added to its book value only if they increase the future benefits from the existing asset beyond its previously assessed standard of performance.

Capital work-in-progress: Projects under which assets are not ready for their intended use and other capital work-in-progress are carried at cost, comprising direct cost, related incidental expenses and attributable interest.

Intangible assets

Intangible assets are stated at cost of acquisition net of recoverable taxes less accumulated amortization/depletion and impairment loss, if any. The cost comprises purchase price, borrowing costs, and any cost directly attributable to bringing the assets to its working condition.

F. Foreign currency transactions

- i. Transactions denominated in foreign currencies are recorded at the exchange rate prevailing on the date of the transaction or that approximates the actual rate at the date of the transaction.
- ii. Monetary items denominated in foreign currencies at the year-end are restated at year end rates.
- iii. Non-monetary foreign currency items are carried at cost.
- iv. Any income or expense on account of exchange difference either on settlement or on translation is recognized in the Statement of Profit and Loss, except in case of long term liabilities, where they relate to acquisition of fixed assets, in which case they are adjusted to the carrying cost of such assets.

G. Investments

Current investments are carried at lower of cost and quoted / fair value. Long term investments are stated at

cost. Provision for diminution in the value of long term investments is made only if such a decline is other than temporary.

H. Employee benefits

Employee benefits include provident fund, employee state insurance scheme, gratuity fund and compensated absences.

- i. Defined contribution plans: The Company's contribution to provident fund and employee state insurance scheme are considered as defined contribution plans and are charged as an expense based on the amount of contribution required to be made and when services are rendered by the employees.
- ii. Defined benefits plans: For defined benefit plans in the form of gratuity fund the cost of providing benefits is determined using the Projected Unit Credit method, with actuarial valuations being carried out at each balance sheet date. Actuarial gains and losses are recognised in the Statement of Profit and Loss in the period in which they occur. Past service cost is recognised immediately to the extent that the benefits are already vested and otherwise is amortised on a straight-line basis over the average period until the benefits become vested. The retirement benefit obligation recognised in the Balance Sheet represents the present value of the defined benefit obligation as adjusted for unrecognised past service cost, as reduced by the fair value of scheme assets. Any asset resulting from this calculation is limited to past service cost, plus the present value of available refunds and reductions in future contributions to the schemes.

Gratuity for employees of a division of the Company is administered through a trust. The Company contributes to the trust, which has taken group policies with the Life Insurance Corporation of India to cover its liabilities towards employee's gratuity of those divisions.

- iii. Short-term employee benefits: The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees are recognised during the year when the employees render the service.

Notes

Forming part of the financial statements

- iv. Long-term employee benefits: Compensated absences which are not expected to occur within twelve months after the end of the period in which the employee renders the related service are recognised as a liability at the present value of the defined benefit obligation as at the Balance Sheet date on the basis of actuarial valuation.

I. Borrowing Cost

Borrowing costs that are attributable to the acquisition or construction of qualifying assets are capitalised as part of the cost of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for its intended use. All other borrowing costs are charged to the Statement of Profit and Loss in the period in which they are incurred.

J. Leases

i. Operating lease

Lease arrangements where the risks and rewards incidental to ownership of an asset substantially vest with the lessor are recognised as operating leases. Lease rentals under operating leases are recognised in the Statement of Profit and Loss on a straight-line basis over the lease term.

ii. Finance lease

- Where the Company as a lessor leases assets under finance leases, such amounts are recognised as receivables at an amount equal to the net investment in the lease and the finance income is recognised based on a constant rate of return on the outstanding net investment.
- Assets leased by the Company in its capacity as a lessee, where substantially all the risks and rewards of ownership vest in the Company are classified as finance leases. Such leases are capitalised at the inception of the lease at the lower of the fair value and the present value of the minimum lease payments and a liability is created for an equivalent amount. Each lease rental paid is allocated between the liability and the interest cost so as to obtain a constant periodic rate of interest on the outstanding liability for each year.

K. Taxes on income

Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the provisions of the Income Tax Act, 1961.

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax. Accordingly, MAT is recognised as an asset in the Balance Sheet when it is probable that future economic benefit associated with it will flow to the Company.

Deferred tax is recognised on timing differences, being the differences between the taxable income and the accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax is measured using the tax rates and the tax laws enacted or substantially enacted as at the reporting date. Deferred tax liabilities are recognised for all timing differences. Deferred tax assets in respect of unabsorbed depreciation and carry forward of losses are recognised only if there is virtual certainty that there will be sufficient future taxable income available to realise such assets. Deferred tax assets are recognised for timing differences of other items only to the extent that reasonable certainty exists that sufficient future taxable income will be available against which these can be realised. Deferred tax assets and liabilities are offset, if such items relate to taxes on income levied by the same governing tax laws and the Company has a legally enforceable right for such set off. Deferred tax assets are reviewed at each Balance Sheet date for their realisability.

L. Impairment

An asset is treated as impaired when the carrying cost of asset exceeds its recoverable value. An impairment loss is charged to the Statement of Profit and Loss in the year in which an asset is identified as impaired. The impairment loss recognized in prior accounting period is reversed if there has been a change in the estimate of recoverable amount.

M. Provisions, contingent liabilities and contingent assets

Provision recognized in the accounts when there is a present obligation as a result of past event(s) and it is probable that an outflow of resources will be required to settle the obligation and a reliable estimate can be made. Provisions are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the reporting date. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates.

Contingent liabilities are disclosed unless the possibility of outflow of resources is remote.

Contingent assets are neither recognised nor disclosed in the financial statements.

A Company’s internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company’s assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The accounting policies adopted in the preparation of the consolidated financial statements are consistent with those followed in the previous year except to the extent as disclosed.

b. Principles of consolidation

The consolidated financial statements relate to TV18 Broadcast Limited (‘the Company’) and its subsidiary companies, associates and joint ventures. The consolidated financial statements have been prepared on the following basis:

Notes

Forming part of the Consolidated Financial Statements

- i. The financial statements of the Company and its subsidiary companies are combined on a line-by-line basis by adding together the book values of like items of assets, liabilities, income and expenses, after fully eliminating intra-group balances and intra-group transactions in accordance with Accounting Standard (AS) 21 - "Consolidated Financial Statements".
 - ii. Interests in Joint Ventures have been accounted by using the proportionate consolidation method as per Accounting Standard (AS) 27 - "Financial Reporting of Interest in Joint Ventures".
 - iii. In case of foreign subsidiaries, being non-integral foreign operations, revenue items are consolidated at the average rate prevailing during the year. All assets and liabilities are converted at rates prevailing at the end of the year. Any exchange difference arising on consolidation is recognised in the exchange fluctuation reserve.
 - iv. The difference between the cost of investment in the subsidiaries, over the net assets at the time of acquisition of shares in the subsidiaries is recognised in the financial statements as Goodwill or Capital Reserve, as the case may be.
 - v. The difference between the proceeds from disposal of investment in subsidiaries and the carrying amount of its assets less liabilities as of the date of disposal is recognised in the consolidated Statement of Profit and Loss being the profit or loss on disposal of investment in subsidiary.
 - vi. Minority Interest's share of net profit of consolidated subsidiaries for the year is identified and adjusted against the income of the group in order to arrive at the net income attributable to shareholders of the Company.
 - vii. Minority Interest's share of net assets of consolidated subsidiaries is identified and presented in the consolidated balance sheet separate from liabilities and the equity of the Company's shareholders.
 - viii. Investment in Associate Companies has been accounted under the equity method as per Accounting Standard (AS) 23 - "Accounting for Investments in Associates in Consolidated Financial Statements".
 - ix. The Company accounts for its share in change in net assets of the associates, post-acquisition, after eliminating unrealised profits and losses resulting from transactions between the Company and its associates to the extent of its share, through its Statement of Profit and Loss to the extent such change is attributable to the associates' Profit or Loss through its reserves for the balance, based on available information.
 - x. The difference between the cost of investment in the associates and the share of net assets at the time of acquisition of shares in the associates is identified in the financial statements as Goodwill or Capital Reserve as the case may be.
 - xi. As far as possible, the consolidated financial statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances and are presented in the same manner as the Company's separate financial statements.
- c. Goodwill**
- The group account for goodwill arising on consolidation at cost and recognises any impairment where applicable. Goodwill is tested for impairment by comparing the carrying value of goodwill with the consolidated discounted future cash flows from the cash generating unit to which the goodwill pertains.
- d. Use of estimates**
- The preparation of consolidated financial statements in conformity with Indian GAAP requires judgements, estimates and assumptions to be made that effect the reported amount of assets and liabilities, disclosure of contingent liabilities and the reported amount of income and expenses during the year. Notes

Forming part of the Consolidated Financial Statements

e. Inventories

Inventories are valued at lower of cost on FIFO basis and net realisable value after providing for obsolescence, if any. Cost includes all charges in bringing the goods to their respective present location and condition.

Viacom18 and Equator evaluates the realisable value and / or revenue potential of inventory based on the type of programming assets.

The program costs are expensed over the license period or as determined in this policy as mentioned hereunder, whichever is earlier:

- i. Cost of serials, programmes and shows produced are amortised at 90% in the first year of telecast and balance is amortised evenly in the subsequent financial year. However, short format shows are expensed in the year of production and telecast.
- ii. Acquired rights of shows are amortised evenly over the license period.
- iii. In-house produced animated shows/movies are amortised evenly over four years and live action shows are amortised equally over the period of two years.
- iv. In case of events where the rights are for more than one year, 60% of the cost is amortised in the year of telecast and the balance is amortised in subsequent one-two years. In case the right is for a single year, the entire amount is expensed in the year of telecast.
- v. Cost of cable and satellite movie rights acquired are amortised on the exploitation of such rights based on the management estimates of future revenue potential. In case of equator the prime time movies are amortised at 30% in first airing and balance over licence period.
- vi. In case of film production and distribution, Viacom18 amortises film cost using the individual-film-forecast method. Under this method, such costs are amortised for each film in the

ratio that current period revenue for such films bears to management's estimate of remaining unrecognised ultimate revenue as at the beginning of the current fiscal year. Management regularly reviews and revises, where necessary, its total estimates on a film-by-film basis, which may result in a change in the rate of amortisation and/ or a write down of the inventory to the recoverable amount.

- vii. Viacom18 and Equator evaluates the realisable value and /or revenue potential of inventory on an ongoing basis and appropriate write down is made in cases where accelerated write down is warranted.
- viii. Serials and programs purchased or produced in-house which are yet to telecast are carried at cost by Equator. Cost includes amount paid/payable to the producers for serials and programs purchased. Cost of programs produced in-house includes remuneration to artists, directors and technicians, location expenses and other production costs. Provision for impairment is made for episodes of serials and programs not telecast for more than a year. Serials and programs purchased and the costs of serials and programs produced in-house are expensed off based on number of episodes telecast during the period. Cost of news/current affairs/one-time events are fully expensed off on first telecast.

Such leases are capitalised at the inception of the lease at the lower of the fair value and the present value of the minimum lease payments and a liability is created for an equivalent amount. n. Taxes on income

Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the provisions of the Income Tax Act, 1961.

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax. Accordingly, MAT is recognised as an asset in the Balance Sheet when it is probable that future economic benefits associated with it will flow to the Company.

Deferred tax is recognised on timing differences, being the differences between the taxable income and the

accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax is measured using the tax rates and the tax laws enacted or substantially enacted as at the reporting date. Deferred tax liabilities are recognised for all timing differences. Deferred tax assets in respect of unabsorbed depreciation and carry forward of losses are recognised only if there is virtual certainty that there will be sufficient future taxable income available to realised such assets. Deferred tax assets are recognised for timing differences of other items only to the extent that reasonable certainty exists that sufficient future taxable income will be available against which these can be realised. Deferred tax assets and liabilities are offset, if such items relate to taxes on income levied by the same governing tax laws and the Company has a legally enforceable right for such set off. Deferred tax assets are reviewed at each Balance Sheet date for their realisability.

o. Impairment

An asset is treated as impaired when the carrying cost of asset exceeds its recoverable value. An impairment loss is charged to the Statement of Profit and Loss in the year in which an asset is identified as impaired. The impairment loss recognized in prior accounting period is reversed if there has been a change in the estimate of recoverable amount.

p. Provisions, contingent liabilities and contingent assets

Provision recognized in the accounts when there is a present obligation as a result of past event(s) and it is probable that an outflow of resources will be required to settle the obligation and a reliable estimate can be made. Provisions are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the reporting date. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates.

Contingent liabilities are disclosed unless the possibility of outflow of resources is remote.

Contingent assets are neither recognised nor disclosed in the financial statements.

q. Cash and Cash Equivalents

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term balances, highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

r. Earnings Per Share

Basic earnings per share is calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Earnings considered in ascertaining the Group's earnings per share is the net profit for the year. The weighted

average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as bonus shares, other than the conversion of potential equity shares, that have changed the number of equity shares outstanding, without a corresponding change in resources. For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period is adjusted for the effects of all dilutive potential equity shares.

29 Segmental information

The Group has identified business segments as its primary segment and geographical segments as its secondary segment. Business segments are primarily broadcasting & content segment and film production & distribution segment. Broadcasting and content segment consists of television content and airtime sales. Revenues and expenses directly attributable to segments are reported under each reportable segment. Expenses which are not directly identifiable to each reportable segment have been allocated on the basis of associated revenues of the segment and manpower efforts. All other expenses which are not attributable or allocable to segments have been disclosed as unallocable expenses. Assets and liabilities that are directly attributable or allocable to segments are disclosed under each reportable segment. All other assets and liabilities are disclosed as unallocable. Fixed assets that are used interchangeably amongst segments are not allocated to primary and secondary segments. Geographical revenues are allocated based on the location of the customer. Geographical segment is considered based on sales within India and outside India.
