- Entered into exclusive arrangement with Inox Solar to provide O&M services to projects where Inox Solar will be supplying modules

- ✗ IGESL provides Long-term O&M services for wind farm projects, wind turbine generators ("WTGs") and the common infrastructure facilities on the wind farm which support the evacuation of power from WTGs.
- The board of IGESL has appointed valuers and consultants to advise on the demerger of common infrastructure from Inox Green and merge the same into Inox Renewable Solutions Ltd.
- Y Post evaluation of reports and subject to board approval, the demerger would lead to the consequential listing of Inox Renewable Solutions Ltd.
- The proposed demerger will result in a cleaner and assetlight balance sheet.

FUTURE GROWTH STRATEGY

IGESL targets to almost double its portfolio to ~ 6 GW by FY26 and ~ 10 GW in the next 3-4 years from ~3.5 GW currently through a mix of organic and inorganic growth

Inorganic growth opportunities

- Portfolio acquisitions: O&M business of inactive/stressed players maintaining ~10GW of capacity provides a significant opportunity for IGESL's inorganic growth. Majority of this fleet is across retail customers. #
- Customer acquisitions: Customers across the board are looking for a switchover to a strong, credible, renowned and Indian O&M service provider. At IGESL, we are well placed to capture this opportunity going forward.

Organic growth opportunities

- Growing the portfolio through new long-term O&M contracts with customers purchasing IWL's WTGs IWL's order book of 3.3 GW provides a very strong visibility.
- Group's foray into solar to add large scale solar project O&M to IGESL's portfolio.
- Y O&M contracts from group IPP platform, which targets 3 GW of installed capacity, to add to the growing portfolio.
- ✗ Revision/Reset of shared services / comprehensive O&M contracts.
- Value added services to contribute meaningfully to the topline.

MACRO ENVIRONMENT ENTAILS SIGNIFICANT RENEWABLE

CAPACITY ADDITION OVER THE NEXT DECADE

14

INDIA RENEWABLES – A MULTI-DECADAL GROWTH STORY

~ 80 GW of wind capacity to be added in the next 8 years as per the National Electricity Plan – provides visibility of > Rs 6 trn for wind OEMs and a large multi-year opportunity for O&M service providers; 250 GW of RE projects to be awarded over FY24-28

India conducted bids for ~ 40 GW of AC capacity in FY25 – a mix of solar, wind, and hybrid. This included ~ 18.6 GW solar, ~ 0.6 GW wind, and ~ 21 GW hybrid

Wind continues to be one of the cheapest sources of power, much lower than APPC; tariffs discovered in the recent auctions ranged at Rs 3.35/unit for hybrid, ~ Rs 3.65/unit for plain vanilla wind and Rs ~ 4.8-4.9/unit for FDRE projects

Hybrid / RTC / FDRE projects are the way forward due to: 1. Higher project PLFs, 2. Increased grid utilization, 3. Round-the-clock generation potentially replacing conventional sources for base power supply, 4. Lower LCoE and better IRRs for project developers

Demand from commercial & industrial (C&I) players for renewable power continues to be strong due to its green credentials and price arbitrage w.r.t. grid based / merchant power.

MNRE's action based upon the suggestions by NITI Aayog in its report on "Domestic Manufacturing Capacity & Potential Cyber Security Challenges in the Wind sector and way forward" may lead to further consolidation of suppliers in the domestic market

India's Green Hydrogen targets of 5 mmtpa may result in incremental ~ 125 GW of RE capacity addition (solar + wind)

INDIA RENEWABLES – FAVORABLE MACRO ENVIRONMENT

All-India RE capacity (ex-large hydro of 48GW) reached ~ 172 GW by Mar'25
