The forward looking statements we make are not guarantees of future performance and are subject to various assumptions, risks and other factors that could cause actual results to differ materially from those suggested by these forward looking statements. LIFE SCIENCES (LS)

Increasing demand for a niche and competent solutions & business services provider

IT solutions utilized in the value chain of Life Sciences companies help them to operate effectively and efficiently. An increased adoption of IT by pharmaceutical companies would enable them to remain competitive in the market place while complying with the regulatory mandates.

The Life Sciences industry is pressurized by various challenges such as declining Return on Investment (ROI) on R&D investments, entry of generics and heightened regulatory scrutiny. These factors are responsible for the Life Sciences companies to invest in information technology solutions. Pharmaceutical Companies are increasingly adopting e clinical trial solutions in the drug development phase. Cutting down the costs of clinical trials is the driving motivation for the adoption of e clinical trial solutions. According to GBI Research, outsourcing helps a pharmaceutical company to reduce costs by 30-35% and this is one of the main reasons why pharmaceutical companies outsource non core R&D operational work to IT companies. However, when selecting an IT company to outsource, required competencies to tackle client requirements have gained a higher importance than the cost advantage it provides. At the same time, it is important that the vendor partner has sufficient subject matter expertise to ensure that nothing gets lost in translation. In today's environment, life sciences companies are increasingly getting comfortable in working closely with vendors who understand clinical research and the emerging trends and standards in electronic data exchange and IT. It is this combination of domain expertise and knowledge of IT and regulations is what distinguishes the wheat from the chaff.

TAKE Life Sciences a '360-degree' solution & business services provider

Today, TAKE Solutions has an 'industry first,' 360 degree coverage of the life sciences domain. From strategy and expert advice to content, technology, and business services, the TAKE life sciences division is in a 'league of its own', way ahead of the pack of competitors. In FY '11, the domain expertise strengthened tremendously across key functional areas of clinical, regulatory, safety, and commercial and was acknowledged by customers and leading industry analysts alike. During the year, we witnessed annuity order sizes steadily increasing to the \$5 million range per customer with a number of \$1 million customers in the portfolio. The cross selling activities have also peaked and is reflected in a robust pipeline.

As a niche player with deep domain expertise in Life Sciences, TAKE augmented its offerings of products and services for this vertical industry to enable extensive coverage of R&D and commercial areas. Our branding and market positioning efforts along with signing of several strategic partnerships with leading software providers in key areas allowed us to sign multiple Master Service Agreements and long term contracts with existing and new customers. Leveraging our relationships across both the business and IT departments of our customers, we have initiated intense cross selling efforts. Our unique positioning for the life sciences vertical has enabled us to cross sell into the large pharmaceutical customer base that we currently enjoy in the Indian subcontinent. This has further strengthened our brand positioning and increased our mindshare within this industry vertical. Within our existing customer base of large biopharmaceutical companies, TAKE continues to dominate and enjoy the 'specialty provider' status, while delivering value in focused areas where large Systems Integrators could not. Our delivery strength and infrastructure combined with immaculate operations out of our global delivery center in Chennai have allowed us to scale and support our global customers very effectively.

Extended Geographic presence and portfolio with WCI Consulting Acquisition

In Q3 FY '11, TAKE acquired 100% of UK headquartered, WCI Consulting Group through its subsidiary. WCI Consulting is a leading Patient Safety and Compliance advisor to the Life Sciences industry. WCI founded pvnet® and pvconnect®, the industry's primary forums for Patient Safety, which for 10 years have been shaping the industry's approach to pharmacovigilance. With this acquisition, TAKE makes a comprehensive entry into the European Life Sciences market and significantly enhances the Life Sciences domain expertise around pharmacovigilance, risk and compliance.

Our focus on subject matter expertise and thought leadership within Life Sciences only got reinforced with the strategic acquisition of WCI. WCI is acknowledged

Management's Discussion & Analysis

leader in the area of safety, risk, and compliance for bio pharmaceutical companies and medical device companies and are extending their thought leadership in this area to manufacturers of consumer health products and dietary supplement organizations as well. When combined with TAKE's own deep domain expertise, thought leadership, IP based software solutions, best practices and operational technical excellence; the combined customer base can secure the benefits of a much broader and deeper coverage of the LS and SCM industries.

Acquisition of WCI enhanced the list of 'satisfied customers' by a significant number, with many new logos from all across Europe.

Strengthened team and partnerships

We significantly strengthened our North American sales team with the addition of Mike Lewis from IBM Life Sciences as head of sales for Life Sciences at TAKE, along with the addition of several industry sales veterans, clearly shifting the momentum in our favor.

Combining our deep domain expertise and product engineering skills, we initiated product co development efforts with our strategic partners. In the R&D application software area, we are partnering with Oracle and in the Sales & Marketing area, we are partnering with Cegedim Relationship Management.

SUPPLY CHAIN MANAGEMENT (SCM)

TAKE Supply Chain continued with its growth in FY11 on account of new order wins from the existing clients and also due to healthy growth from the Middle East Asia market.

This was result of heightened focus on customer relationships, which yielded a steady increase in license sales while boosting revenues from AMC renewals and the renewal rates have been their best ever. The market for supply chain applications was more resilient than most in 2009 and rebounded well in 2010. Supply Chain Management solutions have become increasingly important in an ever expanding global economy.

As we come out of recession we are seeing clear patterns that are emerging as challenges faced by the organizations:

- Firstly, supply chain is becoming increasingly more volatile, complex and structurally different than in past years, and
- Constant pressure for supply chain management and operations to create enterprise value by protecting margin and decreasing working capital

As enterprises are working towards simplifying the supply chain and respond to the market volatility, collaboration and integration between supply chain partners is the means by which customers are restoring stability to the operations. The drive is for simple, smart and robust supply chains.

An enhanced portfolio of life sciences customers in varied geographies has given rise to several cross selling opportunities now in the pipeline for tackling supply chain opportunities for life sciences customers.

Our SaaS based offering, OneSCM, is also witnessing strong traction and we expect the demand SaaS based offering to increase in next few quarters since the clients are shifting from capital expenditure to operational mode.

The operating team has been strengthened significantly with the addition of Matt Walker as the P&L head, reporting to the President & Chief Operating Officer.

According to Gartner, in 2010 North America and Western Europe were the prime users of SCM in terms of spending, as the areas combined for nearly 79 percent of revenue. Our strong presence in the US and our recent entry in Europe through the acquisition WCI Consulting, places TAKE in a strong position to take advantage of these large markets.

New Products

During FY11, TAKE enhanced its existing products and solutions and also introduced new solutions. TAKE launched an advanced version of its OneSCM online supplier management platform that features a multi tier, multi tenant, software as a service (SaaS) architecture designed for mid to large sized manufacturers and distributors. Developed in conjunction with customer input, the upgraded platform features significant user interface enhancements for ease of use and navigation, buyer/supplier synchronization, on boarding functionality improvements to facilitate faster supplier adoption, and advanced search features.

Partnerships

TAKE and DataMAX Software Group, Inc. (DataMAX), partnered to provide integrated data collection and an expanded line of supply chain solutions to JD Edwards customers. DataMAX's RfGen Software, a JD Edwards Certified Integration data collection product, enables customers to extend their ERP investment while leveraging the benefits of a best of breed mobile data collection solution. The partnership also provides JD Edwards customers access to TAKE's natively integrated, robust supply chain technologies, including supplier collaboration, returns management, asset tracking and maintenance and global trade management.

RESULTS OF OPERATIONS (CONSOLIDATED)

After having a muted FY 2010, TAKE rebounded strongly in FY 2011 with the Company's revenues crossing USD 100 mn for the first time in company's 10 years history. Our focus on customer requirements and acting as a "strategic partner" rather than a vendor has helped us create niche for our self in the industry. We ended FY 2011 with a total revenue of INR 5,061 mn, up 38% compared to FY 2010. We attained this growth without compromising on our profitability, resulting in better margins in FY 2011. Although the contribution from SCM decreased in FY 2011 compared to FY 2010, the segment witnessed 26% growth year on year. However as regards operational income and expenses, the Company has a significant natural hedge for risks associated with foreign currency fluctuations by virtue of the international nature of its operations including its cost base.

SCHEDULE 11 :

1. STATEMENT ON SIGNIFICANT ACCOUNTING POLICIES

The consolidated financial statements of TAKE Solutions Limited and its subsidiaries (The Group) are prepared in accordance with the Indian Generally Accepted Accounting Principles (GAAP) under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values. GAAP comprises mandatory Accounting Standards as prescribed by the Companies (Accounting Standards) Rules, 2006, the provisions of the Companies Act, 1956 and guidelines issued by the Securities and Exchange Board of India (SEBI). Accounting policies have been consistently applied by the Company and are consistent with those used during the previous year.

The significant accounting policies adopted by the Group are detailed below:

1.1. Principles of Consolidation

The financial statements of the subsidiary companies used for consolidation are drawn up to the same reporting date as of the company.

The consolidated financial statements have been prepared on the following basis:

- a) The financial statements of the company and its subsidiary companies have been combined on a line by line basis by adding together like items of assets, liabilities, income and expenses. All material inter company transactions, balances and unrealized surpluses and deficits on transactions between group companies are eliminated. Consistency in adoption of accounting policies among all group companies is ensured to the extent practicable. Separate disclosure is made for minority interests.
- b) The excess of cost to the company of its investments in subsidiary companies over its share of equity of the subsidiary companies at the dates on which the investments in subsidiary companies are made, is recognized as 'Goodwill' being an asset in the consolidated financial statements. Alternatively, where the share of equity in the subsidiary companies as on the date of investment, is in excess of the cost of investment of the company, it is recognized as 'Capital Reserve' in the consolidated financial statements.
- c) Minority interest in the net assets of consolidated subsidiaries consist of the amount of equity attributable to the minority shareholders at the dates on which investments are made by the company in the subsidiary

companies and further movements in their share in the equity, subsequent to the dates of investment.

- d) Exchange difference resulting from the difference due to translation of foreign currency assets and liabilities in subsidiaries is disclosed as foreign currency translation reserve.

1.2. Use of Estimates

The presentation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Although these estimates are based on management's best knowledge of current events and actions that the Company may undertake in future, actual results ultimately may differ from the estimates. Any revision to accounting estimates is recognised prospectively in future periods.

1.3. Significant Accounting Policies

The significant accounting policies pertaining to the principal business segments of the company are set out below and the other policies have been detailed in the standalone financial statements.

1.4. Revenue Recognition

a) Software & Consultancy Revenue

The Contracts between the Company and its customers are either time and material contracts or fixed price contracts.

- (i) Revenue from fixed price contracts is recognised according to the milestones achieved as specified in the contracts on the Proportionate Completion Method based on the work completed. Any anticipated losses expected upon the contract completion are recognized immediately. Changes in job performance, conditions and estimated profitability may result in revisions and corresponding revenues and costs are recognized in the year in which such changes are identified.
- (ii) In respect of time and material contract, revenue is recognized in the year in which the services are provided. Unbilled revenue represents cost and earnings in excess of billings while deferred revenue represents the billing in excess of cost and earnings.
- (iii) Revenue from product sale and licensing arrangements are recognized on delivery and installation.

These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates.

Notes to Consolidated Accounts for the year ended 31st March, 2011

Contingent Liabilities:

- a) Bank Guarantees given by the related party as at 31.03.2011 (Rs. In 000's) Rs.403/ (Rs.14,668/)
- b) On May 23, 2008 the company has received an order for the assessment year 2003-04 from Income Tax Appellate Tribunal (ITAT) disallowing the software product expenses claimed by the company as revenue expenditure and instead allowing the same as a capital expenditure with consequential depreciation and thereby reducing the benefit of carrying forward of losses by Rs. 159.14 lacs to the subsequent assessment years. However, no demand has been raised for the said assessment year. The company has filed an appeal with the Honorable High Court of Tamil Nadu against the order of ITAT. The management believes that the ultimate outcome of the proceeding will not have a material adverse effect on the company's financial position and results of operation and hence, no adjustment has been made to the financial statements for the year ended March 31, 2011.
- c) Demand from Income tax authorities for payment of additional tax of Rs. 99.58 lacs (net of amount paid to statutory authorities to the extent of Rs. 80.81 lacs) has been received upon completion of their tax review for the assessment year 2006-07. Similarly, demand for payment of additional tax of Rs. 186.67 lacs have been received upon completion of their tax review for the assessment year 2008-2009. The tax demand is mainly on account of disallowance of software product development expenses claimed by the company as revenue expenditure and instead allowing the same as a capital expenditure with consequential depreciation. The matter is pending before the Commissioner of Income tax (Appeals), Chennai. The company is contesting the demand and the management including its tax advisors believe that its position is likely to be upheld in the appellate process. No tax expense has been accrued in the financial statements for the tax demand raised. The management believes that the ultimate outcome of the proceeding will not have a material adverse effect on the company's financial position and results of operation.
- d) One of the subsidiaries, APA Engineering Private Limited, has received a demand from Income Tax authorities for payment of Tax to the extent of Rs. 9.32 (net of amount paid to statutory authorities to the extent of Rs. 24.18 lacs) for the Assessment Year 2006-07. The demand is on account of disallowance of claim under section 10A of the Income Tax Act, 1961. The said company filed an appeal with the Appellate Authorities and is hopeful of succeeding the same.

2.5 Financial Instruments: Recognition and Measurement

The Company uses foreign currency forward contracts to hedge its risks associated with foreign currency fluctuations relating to certain firm commitments and forecasted transactions. The company designates this hedging instrument as

"cash flow hedge" applying the recognition and measurement principles set out in Accounting Standard 30.

Hedging instrument is initially measured at fair value and is re-measured at subsequent reporting dates. Changes in the fair value of this derivative that is designated as an effective hedge of future cash flows is recognized directly in shareholders' funds as Hedging Reserve and reclassified into Profit & Loss Account upon the occurrence of hedged transactions. The ineffective portion is recognized immediately in profit and loss account as and when they arise.

Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated, or exercised, or no longer qualifies for hedge accounting. If a hedged transaction is no longer expected to occur, the net cumulative gain or loss recognized in shareholders' funds is transferred to profit and loss account for the period. The Loss transferred to Profit and Loss Account for the year ended March 31, 2011 is Rs.18,530/ (Rs. 26,254/) (Rs. in '000s)

- 2.6. Amount payable to the erstwhile Share Holders of the acquired subsidiaries to the tune of Rs. 1,63,074/ (Rs. 64,514/) (Rs. in '000s) is shown under Unsecured Loans.
- 2.7 During the FY 2009-10, the Company has raised External Commercial Borrowings from Citi Bank N.A to the extent of US \$ 2,583,631 and DBS Bank Limited to the extent of US \$ 2,400,000 primarily secured against present and future movable fixed assets of the Company and book debts of the Company and also against investments held by the company in its subsidiary, TAKE Solutions Inc., to the extent of 9,575,000 equity shares. Corporate Guarantee has been given by subsidiary company TAKE Solutions Inc as a collateral security.
- 2.8 The Current year figures are inclusive of operations of new subsidiaries acquired during the year and subsidiaries that were divested during the year. Therefore, the Current year figures are not comparable with Previous year figures.
- 2.9 Corresponding figures for Previous year presented have been regrouped, where necessary, to conform to the Current year's classification.

Notes to the Abridged Financial Statements for the year ended March 31, 2011

1. Notes on accounts

Amounts in the abridged financial statements are presented in Rupees in thousands except as otherwise stated. The previous year figures have been regrouped/reclassified, wherever necessary, to conform to the current presentation.

The financial statements are prepared in accordance with Indian Generally Accepted Accounting Principles (GAAP) under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values. GAAP comprises mandatory accounting standards as prescribed by the Companies (Accounting Standards) Rules, 2006, the provisions of the Companies Act, 1956 and guidelines issued by the Securities and Exchange Board of India (SEBI). Accounting policies have been consistently applied by the Company and are consistent with those used during the previous year.

(Refer to Schedule 12, 1 & 2 (j) in the Significant Accounting Policies and Notes to Accounts of the annual standalone financial statements).

2. Contingent liabilities

Amount in Rs. '000s

Particulars	Year ended 31-03-2011	Year ended 31-03-2010
Corporate guarantee given by the Company to its direct and indirect subsidiaries		
a) APA Engineering Private Limited	20,000	20,000
b) TAKE Global Ltd, UK	976,057	NIL
Corporate guarantee given by the Company to its Limited Liability Partnership		
TAKE Solutions Global LLP	215,000	NIL
Claims against the Company, not acknowledged as debts [Net of amount paid to statutory authorities Rs.8,081]	46,543	27,876
Outstanding Bank Guarantee	NIL	14,000

Claims against the Company not acknowledged as debts is in respect to demand from Indian Income tax authorities for payment of additional tax of Rs. 465.43 lakhs (Rs. 278.76 Lakhs) upon completion of their tax review for the assessment years 2006 07, 2007 08 and 2008 09. The tax demand is mainly on account of disallowance of software product development expenses claimed by the company as revenue expenditure and instead allowing the same as a capital expenditure with consequential depreciation. The matter is pending before the Commissioner of Income tax (Appeals), Chennai.

On May 23, 2008 the company has received an order for the Assessment Year 2003 04 from Income Tax Appellate Tribunal (ITAT) disallowing the software product expenses claimed by the company as revenue expenditure and instead allowing the same as a capital expenditure with consequential depreciation and thereby reducing the benefit of carrying forward of losses by Rs. 159.14 lacs to the subsequent assessment years. However, no demand has been raised for the said assessment year. The company has filed an appeal with the Honorable High Court of Tamil Nadu against the order of ITAT. The management believes that the ultimate outcome of the proceeding will not have a material adverse effect on the company's financial position and results of operation and hence, no adjustment has been made to the financial statements for the year ended March 31, 2011.

The Company is contesting the demands and the Management, including its tax advisors, believes that its position will likely be upheld in the appellate process. No tax expense has been accrued in the financial statements for the tax demand raised. The Management believes that the ultimate outcome of this proceeding will not have a material adverse effect on the Company's financial position and results of its operations.

(Refer to Schedule 12, 1, AS 29 (a), (b), (c), (d) & (e) in the Significant Accounting Policies and Notes to Accounts of the annual standalone Financial Statements).
