STRIVE - To be different with value

Amidst market volatility and economic upheavals, technology continues to progress at a steady pace. The Information Technology (IT) sector has surpassed its traditional role as a service provider and is now set to offer customers a complete package of end-to-end solutions, products and platforms. This changing dynamic demands a turnaround in corporate strategy. Such an evolution cannot be achieved without a sense of purpose, unerring focus and conviction to strive for the best.

For TAKE Solutions, this year has embodied that very thought, as we set about launching ground breaking initiatives, building for the future, and creating an organizational structure concentrated on becoming a 360 degree solution provider to the Life Sciences industry and to be a niche player in the Supply Chain Management domain. Through the year, we have strived to capitalize on every opportunity in delivering transformational services to our clients, thereby surpassing expected standards and setting new ones. Innovation is the key to our competitive differentiation and value proposition. Our commitment to be the best-in-class in the Life Sciences domain has been reaffirmed by the delivery excellence of our offerings in terms of functionality, scalability, performance, flexibility, and operational efficiency. Our efforts to differentiate ourselves by providing exceptional value has been recognized and acknowledged by the industry as well as by other esteemed evaluators.

We have crossed significant strategic and operational milestones this year and are excited by the endless possibilities of growth ahead. This well defined strategy together with our belief in what we stand for inspires us with confidence; confidence in our values that have guided us for 14 years, confidence in the talent and passion of our team, confidence in our innate ability to grow despite all odds and confidence in the future.

Letter to Shareholders

Dear Shareholders,

When business contexts change, it becomes imperative for the organization to adapt and capitalize on new opportunities. The theme for the Annual Report 2013-14, 'Strive – to be Different with Value' reflects your Company's journey towards affirming its position as a domain expert and preferred solutions provider in the niches in which it operates.

The current challenging economic environment has impacted business across sectors, testing business environments and changing market trends. In light of the situation, your Company has looked towards preparing for the future by diverting its energies from less profitable domains to investing further in potential growth avenues.

In FY 2013-14, your Company took encouraging strides in developing a sustainable path for continued progress. We outlined a strategy to discontinue certain businesses from the Supply Chain domain, which the company felt will not add long-term value to the enterprise. As a result, for the year ended March 31st, 2014, the consolidated operating revenue of the Company was INR 8,155 million, a decline of 2.0% over FY13. Net profit for the year was INR 580 million, a 27.0% decline over FY13.

Another key element of the strategy was to further build our expertise and focus our energies on the domain of Life Sciences which has proven to be high-growth and rewarding. This was reflected in the Life Sciences Revenue for FY 2013-14 which grew by 4.0%. We believe this rapidly evolving industry will continue to offer opportunities in the coming years. To strengthen our position in this robust market, an exhaustive rebranding exercise is being carried out to consolidate the Life Sciences business of your Company.

Go-to Market Offerings

Our solutions continue to satisfy existing and emergent unmet needs that capitalize on our repeatedly proven capabilities. This provides us with a differentiating factor against our competition. Your Company has expanded its offerings in Life Sciences to provide complete coverage of the Pharma / Biotech R&D market, specifically in the clinical, regulatory, content management and safety areas. We will continue to invest in these processes in the coming years. We will also continue investing in our niche Supply Chain Management solutions like RoutePro for SAP and tablet devices, the next generation application Gemini NxG and OneSCM on SaaS platforms.

A continuous evaluation of our operating model ensures delivery excellence. This practice provides us an impetus to focus on high growth areas and creates a promising road ahead.

People Focus

Your Company's sustained efforts towards strengthening leadership across all domains and geographies of our operations were recognized and commended in the form of several prestigious awards conferred by:

- World HRD Congress
- Best Employer Brand Awards
- Asian HR Leadership Awards

We will continue to make substantial investments in our Talent Management practices that maintain motivated teams and a positive work environment.

Partnership Focus

In FY 2013-14, we have also seen significant progress in terms of the traction witnessed with our partners. Some important developments on this front are as below -

- Partnered with Sparta Systems, Inc., an industry pioneer and global leader in enterprise quality management software (EQMS) solutions. Through this partnership, in the Life Sciences space, your Company will market and provide services for Sparta Systems' TrackWise® EQMS in the Indian and ASEAN markets with a view to expand to the European and U.S. markets as well.

- Strengthened partnership with Oracle Health Sciences, primarily focusing on the Drug Safety/Pharmacovigilance space. This partnership brought in significant Argus Safety implementation projects in India and important wins in other geographies like Korea and U.S.A. Your company is looking to expand the scope of this partnership to other areas like Clinical Trial Management (ClearTrial) and Clinical Data Warehousing (Oracle LSH & CDW).

Roadmap for the Future

Our work towards realigning our businesses and operations will continue with our firmest dedication to the goal of making the company more profitable and value generating for our shareholders. We will continue to focus on Life Sciences for the global market. We will direct our efforts towards being recognized as a 360 degree solution provider to the Life Sciences industry through our offerings across the various processes of drug development.

Similar to the year 2013-14, we will look to further disinvest in certain businesses from the Supply Chain domain and confine Supply Chain Management operations to very profitable niches in the Middle East and the U.S.

As always, we extend our heartfelt gratitude to our shareholders, partners and customers, who have, with their continued faith and good-wishes, shaped our success till date. We also extend our gratitude to our Chairman, Independent Directors, Advisory Board, Banks and Suppliers. We would like to thank our employees across the globe for their loyalty and constant dedication to maintaining the best standards in performance. We remain steadfast in our commitment to providing the highest value to all stakeholders in our endeavors and stay true to our goal of striving to be different with value.

TAKE Solutions has offerings in both Life Sciences (LS) and Supply Chain Management (SCM) domains. We are proud to say that the breadth and depth of TAKE's offerings in both these spaces is comprehensive and enables us to address real issues faced by our customers.

Life Sciences

Global Industry Outlook

In 2013, according to IDC estimates, the worldwide IT outsourcing Life Sciences services market was US\$14 billion with strategic consulting in the R&D space contributing almost US\$1.4 billion to the total market. When combined with BPO and strategic consulting services, IDC Health Insights expects that the total IT services market will continue to grow at double-digit rates over the next five years, with an average annual growth rate of 12%. Strategic consulting services cover the entire Life Sciences R&D value chain with offerings ranging from drug discovery to clinical drug development to drug safety to regulatory compliance and beyond. These services are increasing and expanding in importance as the Life Sciences companies transform themselves in pursuit of long-term sustainability.

Life Sciences innovators are feeling the impact of rising costs and a decline in forecasted sales revenues driven by an age of austerity and the patent expirations of many blockbuster drugs. According to Deloitte, the cost of developing an asset from discovery to commercialization has increased by 18 %, from US\$ 1,094 million in 2010 to US\$ 1,290 million in 2013. Over the same time period, the forecasted peak sales (highest-value sales in a single year) of an asset have declined by over 40 %, down from US\$ 816 million in 2010 to US\$ 466 million in 2013.

Over the near term the use of external services will continue to grow as organizations seek to navigate through increasingly complex global, regulatory and operational ecosystems. The Life Sciences industry's on going pursuit of improved operational effectiveness continues to be supported by advances in the industry's IT and application vendor ecosystem.

MANAGEMENT DISCUSSION & ANALYSIS

This year, we launched CMOnet, a benchmarking forum for leading Chief Medical Officers to address topics within their remit, including the definition of outcomes and real-world data. The insight gained from this and other industry forums give us a unique perspective and ability to guide our clients in their Clinical Data Warehouse integration strategies.

Our focus for FY15 is to setup a Clinical Portal – a collaborative platform for external information exchange between partners and joint ventures. This portal would have real-time data feeding into dashboards for KPIs such as site document compliance and patient enrolment, as well as aggregate data from CTMS, CDMS and third party apps.

The outlook for FY15 is very strong for TrackWise® implementation as well as TAKE's networks and strategic consulting.

Content Management

Our Content Management practice helps our clients develop their Content Management Strategy, as well as setup and maintain their Content Management Solution. As many of our Life Science customers use EMC's Documentum/CSC's FirsDoc as a content management system, we have partnered with Generis to provide implementation and support services for Generis' CARA product, the market-leading user interface software for Documentum. This strategic partnership will enable us to offer customers a proven, cost-effective and highly flexible user interface option.

For FY15, we are looking expert support to be provided to customers to develop and implement their Content Management Strategies. We are also focused on building a cloud solution for hosting CARA and Documentum. Another exciting area of interest is Structured Content Authoring. We will establish a platform for topic-based authoring which will allow business process analysis of authoring, review and approval for labeling content within the US and EU for SPL, US-PI, CP, MRP and DCP and national labeling.

Business Intelligence & Analytics

Our Analytics and Business Intelligence & Analytics Practice offers our customers Big Data Analytics with SAP-HANA Business Intelligence Consulting, Pharmacovigilance Analytics and Sales Force Analytics.

Thus, our customers are able to reduce time and cost through better trial design and execution, quickly and precisely analyse adverse events and thus improve speed to market and patient safety.

For FY15, the focus will be on SAP-HANA and solutions around this space.

Supply Chain

Global Market Outlook

In 2013, Supply Chain Management (SCM) continued to be a key source of competitive advantage in driving business growth objectives. Supply Chain investments kept their priority status and moved forward even as IT budget decision makers remained cautious. According to Gartner, the worldwide SCM and procurement software market grew 7.3 % to US\$ 8.9 billion in 2013.

Our SCM business is a function of global macro-economic trends, technology spending and supply chain management market growth. Although GDP in United States (US), our largest SCM market, picked up in 2013 it was well below pre-2008 levels. The prevailing uncertainty in the macro environment continues to affect customers' and prospects' decisions regarding timing of strategic capital expenditures. Delays with respect to such decisions are having adverse impact on our business and may further intensify competition in our already highly competitive markets.

This expense group stands at ₹ 4,800 Mn in FY 2014 compared to ₹ 4,895 Mn in the previous year, a 2% drop year-on-year, in proportion to the drop in Operating Revenue.

Total Cost has increased from ₹ 7,313 Mn in FY 2013 to ₹ 7,589 Mn

in FY 2014. This is an increase of 4% over the previous year, but a 6% decrease over the previous year adjusted for currency impact. This increase is mainly on account of increased SG&A expenses in implementing the strategic business initiatives towards setting the tone for the future growth.

	FY 2014		FY 2013	
Particulars	Amount (₹ Mn.)	% of Revenue	Amount (₹ Mn.)	% of Revenue
Employee Costs	2,265	28%	2,250	27%
Other Direct Costs	2,535	30%	2,645	31%

Depreciation	373	5%	222	3%
Finance Expenses	138	2%	144	2%
TOTAL COST	7,589	92%	7,313	88%

Depreciation & Amortization

Depreciation expense has increased by 68% from ₹ 222 Mn to ₹ 373 Mn in FY 2014. This is a result of both, the Company's continuous investment in new tangible and intangible assets to sustain long term growth but also in conservatively phasing out its assets in line with business strategies. Depreciation as a percentage of Revenue is 4.5% in FY 2014 compared to 2.6% in the previous year.

Amortization expense reflects the value of internally developed Products written off during the year on a straight line basis. At ₹ 396 Mn in FY 2014, this expenditure has increased by 64% over the previous year figure of ₹ 241 Mn. As a proportion of product development costs capitalized during the year, amortization stands at 91% of capitalization in the current year.

Finance Cost

Finance Cost reported during the year includes Interest charges on credit facilities availed by the Company as well as impact of forex rate fluctuation pertaining to interest payments in other currencies incurred by subsidiary companies and related expenses like processing charges.

Finance Cost reported, at ₹ 138 Mn is 4% lower than the previous year's ₹ 144 Mn. Adjusting for Rupee depreciation during the year, current year finance cost is 8% lower than the previous year.

Taxation

Tax expense for the current year FY 2014 has dropped by 94.5% to ₹ 10 Mn, from ₹ 182 Mn for the FY 2013 resulting in the effective rate of taxation dropping from 17% to 2%. This is due to a drop in deferred tax expense for the year. Considering only the current tax component, the year has seen an increase in tax provisioning from 10.9% to 14.1% of the Profit Before Tax. Deferred tax expense is more a function of the difference in carrying amount of assets considered for tax reporting purposes and for GAAP reporting according to laid out Accounting Standards.

Minority Interest

Minority Interest has dropped from ₹ 96 Mn to ₹ 38 Mn during the year, mainly on account of decline in profits posted by two of our subsidiaries in Middle East and US.

Earnings Per Share

The Net Profit for the year ended March 31, 2014 at ₹ 580 Mn, has

MANAGEMENT DISCUSSION & ANALYSIS

dropped by 27% over the ₹ 795 Mn reported for the year ended March 31, 2013.

This has resulted in the EPS(Basic) also dropping correspondingly from ₹ 6.62 per share to ₹ 4.83 for the current year.

Foreign Currency Transactions

The Company has a substantial part of its revenue generated outside India, significantly the USA. The last year has seen substantial fluctuations in exchange rates for Indian Rupee against USD. The accounting treatment for reporting financial performance and position at the end of the year is in consonance with the requirements of the Indian GAAP.

In conformance to this, the Statement of Profit & Loss for the year reflects the 11% increase in average USD exchange rates over the previous year, in both Revenue & Expenses. On account of the significant natural hedge for risks associated with foreign currency fluctuations by virtue of its international operations both in terms of Revenue & Costs, there is no significant impact on the Result of Operations reported.

Similarly, conforming to Indian GAAP in Balance Sheet reporting, requiring reporting at the Closing rate on the last date of year, there would be an impact of about 10% increase in closing rates of the Indian Rupee as at March 31, 2014 and 2013 respectively, resulting

Deferred Tax arises on certain items like Depreciation, Amortization, Employee Benefits etc., on account of timing differences between expense recognition for financial reporting purposes and IncomeTax

in Balance Sheet expansion.

Of the ₹ 496 Mn increase in the Reserves & Surplus during the year, ₹ 199 Mn increase is attributable to profit accretion after relevant appropriations and ₹ 277 Mn increase to movement in Foreign Currency Translation Reserve. The balance is attributable to changes in Capital Reserves, mainly due to change in closing forex rates over the previous year.

During the year, Deferred Tax Asset increased from ₹ 1Mn to ₹ 6 Mn, while Deferred Tax Liability decreased from ₹ 232 Mn to ₹ 167 Mn. This is attributable to the time effect of capitalization of fixed assets during the year on I-GAAP reporting and tax reporting in the relevant tax jurisdiction.

Other Current Liabilities includes Current Maturities of Long Term Debt, Unclaimed dividends, Interest due, Statutory Payables and Deferred Revenue.

Provisions(Long term & Short term) include provision for Employee Benefits & Taxes and Proposed dividend.

1. Significant accounting policies

1.1 Basis of preparation of financial statements

The consolidated financial statements of TAKE Solutions Limited and its subsidiaries (The Group) are prepared and presented in accordance with the Indian Generally Accepted Accounting Principles (GAAP) under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values. GAAP comprises mandatory Accounting Standards as prescribed by the Companies (Accounting Standards) Rules, 2006, the provisions of the Companies Act, 1956 read with General Circular No. 15/2013 dated 13th September 2013, issued by the Ministry of Corporate Affairs, in respect of Section 133 of the Companies Act, 2013 and guidelines issued by the Securities and Exchange Board of India (SEBI). Accounting policies have been consistently applied by the Company and are consistent with those used during the previous year.

The significant accounting policies adopted by the Group are detailed below:

1.2 Principles of Consolidation

The financial statements of the subsidiary companies used for consolidation are drawn up to the same reporting date as of the Company. The consolidated financial statements have been prepared on the following basis:

- The financial statements of the Company and its subsidiary companies have been combined on a line-by-line basis by adding together like items of assets, liabilities, income and expenses. All material intercompany transactions, balances and unrealized surpluses and deficits on transactions between group companies are eliminated. Consistency in adoption of accounting policies among all group companies is ensured to the extent practicable. Separate disclosure is made for minority interests.
- The excess of cost to the Company of its investments in subsidiary companies over its share of equity of the subsidiary companies at the dates on which the investments in subsidiary companies are made, is recognized as 'Goodwill' being an asset in the consolidated financial statements. Alternatively, where the share of equity in the subsidiary companies as on the date of investment, is in excess of cost of investment of the Company, it is recognized as 'Capital Reserve' in the consolidated financial statements.
- Minority interest in the net assets of consolidated subsidiaries consist of the amount of equity attributable to the minority shareholders at the dates on which investments are made by the Company in the subsidiary companies and further movements in their share in the equity, subsequent to the dates of investment.
- Exchange difference resulting from the difference due to translation of foreign currency assets and liabilities in subsidiaries is disclosed as foreign currency translation reserve.

1.3 Use of Estimates

The preparation of the financial statements in conformity with Generally Accepted Accounting Principles ("GAAP") requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Although these estimates are based on management's best knowledge of current events and actions that the Company may undertake in future, actual results ultimately may differ from those estimates. Any revision to accounting estimates is recognised prospectively in future periods.

1.12 Subsidiary Company Particulars

Name of the Direct Subsidiary	Country of Incorporation	Proportion of ownership interest as at March 31, 2014	Proportion of ownership interest as at March 31, 2013

1.13 Impairment of Assets

At each Balance Sheet date, the Management reviews the carrying amounts of its assets included in each of the cash generating units to determine whether there is any indication that those assets may be impaired. If such an indication exists, the company estimates the recoverable amount of the asset. For an asset that does not generate independent cash flows, the recoverable amount is determined for the cash-generating unit to which the asset belongs. If such recoverable amount of the asset or the recoverable amount of the cash-generating unit to which the asset belongs is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognized in the Statement of Profit and Loss. If at the Balance Sheet date there is an indication that if a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the recoverable amount. An impairment loss is reversed only to the extent that the carrying amount of the asset does not exceed the net book value that would have been determined if no impairment had been recognized. A sum of ₹ Nil (₹ 2. 11 Mn) has been recognized as Impairment loss for the financial year ended March 31, 2014.

1.14 Provisions, Contingent Liabilities & Contingent Assets

A provision is recognized when an enterprise has a present obligation as a result of past event; it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions are not discounted to its present value and are determined based on best estimate required to settle the obligation at the Balance Sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates. Contingent Liabilities are not recognized in the financial statements. A Contingent Asset is neither recognized nor disclosed in the financial statements.

1.15 Financial Instruments: Recognition and Measurement

The Company uses foreign currency forward contracts to hedge its risks associated with foreign currency fluctuations relating to certain firm commitments and forecasted transactions. The Company designates this hedging instrument as “cash flow hedge” applying the recognition and measurement principles set out in Accounting Standard 30.

Hedging instrument is initially measured at fair value and is re-measured at subsequent reporting dates. Changes in the fair value of this derivative that is designated as an effective hedge of future cash flows is recognized directly in shareholders' funds as Hedging Reserve and reclassified into Statement of Profit and Loss upon the occurrence of hedged transactions. The ineffective portion is recognized immediately in Statement of Profit and Loss as and when they arise.

Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated, or exercised, or no longer qualifies for hedge accounting. If a hedged transaction is no longer expected to occur, the net cumulative gain or loss recognized in shareholders' funds is transferred to Statement of Profit and Loss for the year. The Loss transferred to Statement of Profit and Loss for the year ended March 31, 2014 is ₹ Nil (₹ 28.99Mn).
