## **RESEARCH & DEVELOPMENT & NEW PRODUCTS**

NBIL continues to provide substantial financial allocations to further strengthen its R&D programs. The competitive environment in the area of hybrid seeds is rapidly growing worldwide, so also in our country as well. It is no longer good enough to offer high yielding hybrid varieties to the Indian Farmers. It is now becoming a mandatory requirement that such hybrids carry

additional built-in value through seed embedded technologies/genes providing durable protection against specific diseases, pests and vagaries of nature (floods/drought/heat stress etc).

Seeds endowed with multiple value additions, in addition to high yield potential, are much in demand and eagerly sought after by the modern Indian Farmers. At NBIL, our Company has undertaken specific initiatives of reaching out even to the rain-fed and largely un-reached farmers. This is in congruence with our national priorities and commitments, as also in harmony with finding newer areas of opportunities for business. NBIL is pursuing both Genetic Engineering Technologies as well as Molecular-Aided Selection systems to enrich our crop breeding and product development programs.

NBIL is perhaps the only company of its kind in the country that offers a choice of Bt-Cotton technologies. Besides, we offer also a wide range of Bt-Cotton hybrids that suit the need of farmers from Punjab to Karnataka, primarily incorporating the exclusive Fusion-Bt technology of the Chinese Academy of Sciences (used predominantly all over China and exclusively licensed to Nath). However, beginning 2012, we also offer the BG-II version (from Monsanto) of certain elite cotton hybrids for those who may have preference for the American Technology.

Technological up-gradation remains a continual process at the NBIL. In cotton, for example, in addition to stacking GM traits for bollworm protection, we are on the constant lookout for novel germplasm resources for imparting/enhancing resistance/ tolerance against some of the notorious sucking pests, as also dehydration-stress (drought). Big Boll size (for reduced labor and ease in picking) and excellent re-flushing abilities are the additional novelties our new Bt-Cotton products (for Central and South Zone) are almost invariably carrying. Jagannath-2 (mainly for Irrigated high-management areas) as well as Arjun-21 (mainly recommended for the Rain-fed cotton ecosystems), the two frontline NBIL products, have proved themselves to be second to none. Besides, all our pipeline products, whether NBC-51 for the North, or NBC-4, NBC-10 and NBC-11 for the Central and South Zone, all have been found to be significantly superior in the respective State Agricultural University trials, in the states of Punjab, Haryana, Rajasthan, MP, Gujarat, Maharashtra, AP and Karnataka.

Similarly in Maize, NBIL's Singhum (NMH-02) was launched in 2011, after comprehensive trials and testing. True to its name, performance in the Full Season segment, Bihar in particular, has been outstanding. In Maize, our major focus continues to be in the Full Season maturity segment hybrids (Single Cross/Modified Single Cross), which are responsive to high input management, tolerance to major foliar diseases and have wider adaptability. Such hybrids would show superior performance across the states of Karnataka, AP, MH and Bihar. Similarly, we are also developing very competitive hybrids for the Medium Maturity as well as Early Duration hybrids.

Our recent R&D Bajra products, appropriately named Big-B (NBC-1188) has been ranked among the top-selling Bajra products sold in Rajasthan, the hot-bed of Bajra competitors. In fact, Big-B has become a house-hold name among the Bajra dealers, distributors and farmers of Rajasthan. It has acquired the status of 'One of the Top Five' bajra hybrids in the state of Rajasthan, the largest bajra growing state in the country. Another Bajra hybrid (NBH-1717) is gathering momentum and speed in the state of Maharashtra.

Rice remains our major crop and obviously involves very intensive R&D activities. In addition to a very large (12 acres) Research Farm at Medchal (near Hyderabad), we have two other Rice

Exclusive R&D Centres, located at Faizabad (UP) and Purnia (Bihar). In both these states, we have two additional sub-centres located at Hazaribagh (Bihar) and Aligarh (UP).

To summarize, your company is constantly endeavoring to invest time, energy and money in Research and Development efforts to create high yield products to benefit the farming community at large.

## INTERNATIONAL COLLABORATIONS:

Nath Bio-Genes, jointly with its sister concern Global Transgenes Ltd., had signed agreement for R & D collaboration and commercialization thereof, of Fusion-Bt. Cotton technology in Philippines. Due processes of trans-boundary regulations, in accordance to the provisions of the Cartgena Protocol, have been followed strictly for transfer of Fusion-Bt. Embedded cotton seeds.

PhilFIDA (Fibre Crops Development Authority, under Govt of The Philippines) is directly coordinating with NBIL-GTL of India, in view of our track record and scientific competence in pursuing the Fusion-Bt Technology approval process in India.

## MANAGEMENT DISCUSSION & ANALYSIS

A detailed report on the management discussion and analysis is provided as a separate section in this Annual Report.

# MANAGEMENT DISCUSSION AND ANALYSIS

## AGRICULTURE AS AN ENGINE OF GROWTH:

- 1. In the past agriculture has played and will continue to play a dominant role in the growth of Indian economy in the foreseeable future. It represents the largest sector producing around 28 percent of the GDP, is the largest employer providing more than 60 percent of the jobs and is the prime arbiter of living standards for seventy percent of India's population living in the rural areas. These factors together with a strong determination to achieve self-sufficiency in food grains production have ensured a high priority for agriculture sector in the successive development plans of the country.
- 2. An important facet of progress in agriculture is its success in eradication of its critical dependence on imported food grains. Indian agriculture has progressed a long way from an era of frequent droughts and vulnerability to food shortages to becoming a significant exporter of agricultural commodities. This has been possible due to persistent efforts at harnessing the potential of land and water resources for agricultural purposes.
- 3. India's future for sustainable and inclusive growth lies in her farms. Agriculture has the potential to accelerate economic growth and social development in India. We can never overemphasize the importance of agriculture as provider of food, as a provider of jobs, as

a provider of raw material for industry and also as a provider of purchasing power in the hands of millions of people. The benefits are so obvious, extensive and immediate.

- 4. The resurgence of agriculture would require large scale investments in developing basic infrastructure, mainly irrigation, rural roads and post harvest technology. The increase in productivity would depend on our ability to embrace newer technologies and more particularly the seed embedded technologies.
- 5. Our country has the potential to emerge as a major provider of quality seeds in the world. We have abundance of lands, hands, water, sun shine as also agricultural knowhow to produce quality seeds.

## YOUR COMPANY'S STRATEGY FOR GROWTH & RISK MITIGATION:

- 1. Besides cotton, your company's product portfolio includes food crops of national importance namely, Paddy, Wheat, Maize, Bajra and Jowar. Amongst oil crops, we have substantial presence in Mustard seeds.
- 2. Since past few years, your company has increased its focus on vegetable seeds and plant nutrition supplements. Amongst Vegetable crops, our concentration is mainly on Okra, Tomatoes, Chillies, Brinjal and various types of Gourds.
- 3. With increased income levels, the country has to transition from food security to nutrition security. We believe that there shall be exponential growth in demand for vegetables and fruits.
- 4. It has been your company's strategy to have a balanced portfolio of products comprising cotton, food crops, vegetable crops as also plant nutrition supplements so that company is not overly dependent on a single crop. The diversified product portfolio helps in offering a range of products to our channel partners round the year and also helps us in effective utilization of marketing team.
- 5. Your company's research program is essentially farmer-centric. The products are launched only after thorough evaluation in multi-location trials in different regions and different seasons. Your company has thus developed a robust pipeline of research products.
- 6. Your company's strategy is to work intensively in 200 identified territories. Each territory would be treated as a service centre to serve and educate the farming community in agro activities as also to act as a profit centre for sale of company's products.
