2. DIVIDEND

The Directors recommend a dividend of ₹ 0.80 (10%) per equity share of ₹ 8/- each for the financial year ended March 31, 2015.

3. OPERATIONS

The Company earned a total income of ₹ 243.18 crores for the year as compared to ₹ 237.91 crores during the previous year and a profit before tax of ₹ 1.00 crore as against ₹ 0.83 crore during the previous year. The profitability of the Company remained subdued because of lower orders of Azathioprine in the Generics business, continued competitive price pressure for Biotech, APIs in the domestic market, delay in launches of branded formulations because of increased regulatory requirements, price pressure on the products under price control in domestic formulations market and higher operating & maintenance expenditure to adhere to the stringent quality standards laid down by regulatory authorities.

As reported earlier, subsequent to the pre-approval inspection by the USFDA (US Food and Drug Administration) of the Company's API facility at Navi Mumbai and the formulation facility at Ankleshwar, the Company had received, in the year 2013-14, certain stipulations from the USFDA. The Company has undertaken corrective measures to achieve complete adherence with the stipulations indicated by the USFDA, and it is expected that it would be completed over the next twelve months. As a result of this development, the plans of the Company to enter the US markets have been delayed.

The Company continues to hold EU GMP, WHO GMP and TGA, Australia certifications for the API facility at Navi Mumbai plant and UK MHRA certification for its formulation plant at Ankleshwar.

Formulations Business:

Performance

During the year under review, the Formulations business achieved a sales revenue of ₹ 157.16 crores, with a growth of 6% over the previous year. Prescription focused business grew at 10.40% in line with the industry growth. The productivity of sales force improved by 20% year-on-year.

The Company achieved a growth of 16.10% in the financial year ended March 2015, higher than the industry average of 12.90%. As per the data compiled by Pharmatrac, a market researcher, the Company has improved its rank by three positions in sales value terms over the previous year. The Company's Nephrocare Division continues to feature among the top 5 Indian Companies operating in the renal therapy segment.

The continued thrust on the Focus brand strategy in the Company's core therapies has generated a growth of 20% in this segment over the previous year. Some of the promising brands like Tricaine & Rabee in Gastro-Intestinal therapy, RPO & Alfalog in Dialysis Therapy and Frastim in Oncology have grown by over 15%. Minmin Tonic in the Nutritional Therapy crossed ₹ 4 crores mark in the first 2 years of launch, growing by over 81% in the fiercely competitive tonic market. Dialysis & Transplant Therapies grew by 24% & 13%, respectively. The super specialty Oncology business showed impressive growth as well. The Company's major brands such as Aldactone, Naprosyn, Serenace and Azoran showed healthy growth in the year under review.

In the exports market, the Branded Formulations business registered a positive growth.

Outlook

In the current year, the Company will continue its emphasis on Focus brands and leverage the strength of its key

brands to fuel growth. Dedicated efforts on strengthening Cardiology, Anti-Diabetic, Oncology and Nephrology therapies is expected to boost growth in the Chronic Specialty therapies segment while Gastrointestinal, Pain Management and Nutritionals will drive growth in the acute therapies segment. With focus on Dialysis and Transplant therapies, the Company will strive to consolidate its position in the Nephrocare space both in domestic as well as export markets.

Brand Extensions and new product launches in therapies where the Company's core competencies exist, in line with therapy gaps identified, are growth drivers. In addition, entry into new therapies will provide avenues for further growth. Training of field force will continue to remain the cornerstone for improving productivity by strengthening product knowledge and selling skills.

Global Generics Business:

Performance

The Global Generics business achieved sales revenue of ₹ 16.17 crores. The business witnessed a de-growth by 31% over the previous year owing to a dip in orders from one of its key customers which was carrying excess inventory from the previous year.

Outlook

The dip in the performance of Generics business is likely to be temporary, as it is expected that key customers will resume orders during the current financial year. The Company signed two new contracts for Sertraline and Azathioprine products and has also fared well in tenders in Germany, which are likely to drive growth in the next year. The Company's presence in the German tender market will become stronger as market penetration improves. Addition of new customers and new products will be the key growth drivers in the Generics business.

Active Pharmaceutical Ingredients (API/Bulk Drugs) Business:

Performance

The API business achieved sales revenue of ₹ 36.72 crores, a growth of 3% over the last year. The traditional markets of Latin America & Middle East in which the Company enjoys a fair market share continued to perform well. Products such as Quinamide, Risperidone, Nicorandil & Azathioprine registered good growth.

Outlook

API business has a strategic importance in the overall growth of the Company. The Company has a backward

integration for Di-phenoxyate and Azathioprine (products of the formulation business). One of the key objectives of the Company is to build a strong and sustainable product portfolio. It has a plan to introduce new APIs every year in various key segments. On the basis of EU GMP certification, the Company plans to penetrate EU markets with a new API towards the end of the current financial year. With the emergence of BRIC markets, apart from domestic markets, Brazil & China would be increasingly important markets for some niche APIs that the Company manufactures.

Biotech Business:

Performance

The Biotech business achieved sales of ₹ 23.14 crores, registering a growth of 8% over the previous year. The Company has managed to register reasonable growth in this division despite increasing competitive and pricing pressures in the domestic market. Growth was driven by strengthening existing client relationships and addition of new clients in Russia, Mexico and China. The Company received approvals for Doxorubicin and Epirubicin in Russia and Korea, respectively.

The Company continued to make several improvements and upgrades in its Biotech facility, to meet the requirements of various markets in emerging geographies. In line with its strategy to take products to regulated markets, the Company has received COS (Certificate of Suitability) for Doxorubicin from EDQM (European Directive Quality Medicines) in France and also plans to file for COS for Epirubicin in the current financial year.

Outlook

Doxorubicin and Epirubicin, used in treatment of cancer, which the Company manufactures, compete with the best in class in the category. These products will remain key for growth in this business segment for the Company. The Company is planning to get certain additional regulatory approvals for its plant to enter the regulated markets like Europe. COS for Doxorubicin and Epirubicin and plant approvals from regulatory authorities would not only help in expanding geographies but also margins as the price realizations are higher in exports markets as compared to the domestic market.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

1) Industry structure and developments

The Indian healthcare industry has evolved rapidly from being a product centric industry to a service driven sector, with delivery and medical insurance segments gaining prominence. India's pharmaceutical industry has been ranked 3rd in terms of volume and 10th in terms of value, globally.

Optimistic estimates predict India's pharmaceutical sector to touch US\$ 55 billion in sales by 2020. The Indian pharmaceutical market is expected to grow at a Compounded Annual Growth Rate (CAGR) of 14%. India is now among the top five emerging pharmaceutical markets.

Driven by increasing sales of generic medicines, continued growth in chronic therapies and a greater penetration in rural markets, the domestic formulation market in India is expected to register a growth of about 10% to 11% next year. In FY 15, it clocked a growth of 12.90%.

In FY 15, 108 Cardiovascular & Anti-Diabetic Formulations were brought under Price Control in addition to the 652 formulations brought earlier in the year. New Drug Approval Committee's (NDAC) stringent control on combination drugs, delays in clinical trial approvals, uncertainties over the FDI policy, the new pharmaceutical pricing policy, a uniform code for sales and marketing practices, compulsory licensing for the domestic pharmaceutical market, regulatory challenges, etc. are some of the challenges which the Indian Formulation business is grappling with.

2) Opportunities and Threats

Indian pharmaceutical industry has seen gradual increase in government healthcare expenditure & expansion of the private hospital sector. Government initiatives such as allowing 100% foreign direct investment in health and medical services will benefit the industry. Indian government plans to increase health expenditure to 2.50% of gross domestic product by the end of the 12th Five-Year Plan (2012-17), which will give the sector a further boost.

Several socio-economic factors, including increasing sales of generic medicines, continued growth in chronic therapies and a greater penetration in rural markets will contribute majorly to the growth of the Indian pharmaceutical market. Other contributing factors for growth are heightened health awareness, increasing affluence, changing lifestyles resulting in higher incidence of lifestyle diseases and a nascent, yet

fast growing health insurance industry. In addition, low cost of production and R&D boosts the efficiency of Indian pharmaceutical companies.

NLEM (National List of Essential Medicines) announced in 2014, resulted in 108 Cardiovascular System (CVS) & Anti-Diabetic Formulations coming under price control, while in 2013, 652 Formulations came under price control, thus slowing down growth in revenues. The NLEM medicines are subject to price control and this reduced average price realisations for major pharma players who were commanding a huge premium otherwise. At present, about 7% of the Indian market is under price control. Some well-established combinations which have been in the market for some time, got phased out due to NDAC's notification declaring some Food, Drug & Cosmetic (FDCs) as irrational combinations. Also, gestation period for new product launch have become longer due to increasingly stringent norms by regulators in the conduct of clinical trials and the data thereof.

The industry growth is largely driven by chronic disease segments viz. cardiovascular, diabetes, cancer and is largely influenced by changing lifestyles. Intense price pressure in semi-regulated markets, emergence of new local players affecting the branded generic prices, delay in approval of manufacturing facilities by regulated authorities and increased regulatory intervention in price fixation for domestic formulations are threats which the Company faces.

3) Segment wise performance

The Company is exclusively engaged in pharmaceutical business and operates across segments ranging from Global Formulations and Active Pharmaceutical Ingredients (API) to Global Generics and Biotech.

Global Formulation division business catering to domestic market and rest of the world (RoW) market achieved sales of ₹ 157.16 crores registering a growth of 6% year-on-year. The Company has strengthened its presence in the market by leveraging the existing brands to get newer products launched. The Company also took a host of other initiatives such as increasing the in-clinic effectiveness of the field force through extensive scientific training, emphasis on focus brands and innovative promotional strategies. These initiatives are expected to reap benefits in the current year too. In the RoW market, the revenues grew by 8%, where the emphasis has been export of immunosuppressant

products to African, Myanmar and SAARC markets. Focus in the current year will be to enter new geographies and strengthening the immunosuppressant basket of products.

The Bulk Drug business achieved net sales of ₹ 36.72 crores with a growth of 3% year-on-year. This growth was primarily driven by the Company entering new geographies. The Biotech business grew by 8% to reach a turnover of ₹ 23.14 crores in FY 15, while the Global Generics business achieved net sales of ₹ 16.17 crores by strengthening relationships with key clients. Your Company expects to increase the footprint of its flagship product Azathioprine Tablets in all strengths by launching in European countries.

4) Outlook

The growth estimate for the domestic Formulation Industry is pegged at 10%. In comparison to the Industry growth prediction, the Company has taken a growth target of 11% for products promoted through trade channels. In light of the initiatives detailed above, the outlook of the business looks positive.

5) Risks and Concerns

Some of the key brands of your Company are under DPCO. The regulatory environment across the globe is becoming more and more stringent, and this makes entry into new geographies more challenging.

6) Internal Control Systems and their adequacy

The Company has set up internal control procedures commensurate with its size and nature of the business. These business procedures ensure optimum use and protection of the resources and compliance with the policies, procedures and statutes. The internal control systems provide for well-defined policies, guidelines and authorizations and approval procedures. The prime objective of such audits is to test the adequacy and effectiveness of the internal controls laid down by management and to suggest improvements.

7) Financial performance with respect to operational performance

The total income during the year stood at ₹ 243.18 crores, while Profit After Tax (PAT) stood at ₹ 1 crore.

8) Material developments in human resources/ industrial front

Your Company has won the prestigious Indian Drugs Manufacturers Association (IDMA) "Quality Excellence" award 2014 in the Gold Category for its API Plant at Navi Mumbai. Your Company has received Korean FDA certification for Epirubicin. The Biotech plant of Ankleshwar has received WHO certification.

Notes forming part of the Financial Statements as at and for the year ended 31st March, 2015

deferred tax assets can be realised. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the Balance Sheet date. At each Balance Sheet date, the Company reassesses unrecognised deferred tax assets, if any.

Current tax assets and current tax liabilities are offset when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle the asset and the liability on a net basis. Deferred tax assets and deferred tax liabilities are offset when there is a legally enforceable right to set off assets against liabilities representing current tax and where the deferred tax assets and the deferred tax liabilities relate to taxes on income levied by the same governing taxation laws.

Minimum Alternative Tax (MAT) credit is recognised as an asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period. Such asset is reviewed at each Balance Sheet date and the carrying amount of the MAT credit entitlement asset is written down to the extent there is no longer a convincing evidence to the effect that the Company will pay normal income tax during the specified period.

The total number of equity shares reserved under the said plan is 250,000 equity shares of ₹ 8 each. The details of such equity shares granted are as follows:

(A) The Remuneration/Compensation Committee at its meeting held on 6th August, 2010 -

- (a) Granted and vested 30,119 equity stock options to employees, in lieu of options that were granted to them by Brabourne Enterprise Limited. The employee had an option to apply for one equity share of ₹ 8 each at an exercise price of ₹ 32.06.

Of these options, 29,255 equity stock options have been exercised as on 31st March, 2015 and 864 options remain outstanding as on 31st March, 2015.

Notes forming part of the Financial Statements as at and for the year ended 31st March, 2015

- (b) Granted 95,000 equity stock options to the eligible Director and employees of the Company, with an option for one equity share of ₹ 8 each at an exercise price of ₹ 100 being the price higher than the closing price quoted on the National Stock Exchange prior to the date of meeting of the Remuneration/Compensation Committee. These equity stock options shall vest, in case of employees of General Manager grade and above, equally but conditionally on linear scale based on performance, over five years beginning from one year after the date of grant. Barring certain eventualities, the exercise period to subscribe to the equity shares would be 10 years from the dates of vesting except otherwise mentioned in ESOP 2005.

Of these options, 6,240 equity stock options remain outstanding as on 31st March, 2015 and the remaining equity stock options have lapsed / forfeited.

- (B) The Remuneration/Compensation Committee at its meeting held on 20th October, 2010 -

Granted 15,000 equity stock options to an eligible employee with an option for one equity share of ₹ 8 each at an exercise price of ₹ 104 being the price higher than the closing price quoted on the National Stock Exchange prior to the date of meeting of the Remuneration/Compensation Committee. These equity stock options shall vest, in case of employees of General Manager grade and above, equally but conditionally on linear scale based on performance, over five years beginning from one year after the date of grant. Barring certain eventualities, the exercise period to subscribe to the equity shares would be 10 years from the dates of vesting except otherwise mentioned in ESOP 2005.

Of these options, 2,910 equity stock options remain outstanding as on 31st March, 2015 and the remaining equity stock options have lapsed / forfeited.

The Company has adopted intrinsic value method as permitted by the SEBI Guidelines and the Guidance Note on Accounting for Employee Share Based Payment issued by the Institute of Chartered Accountants of India to account for the cost of stock options to employees and a Director of the Company. Intrinsic value is the amount by which the quoted market price of the underlying share exceeds the exercise price of the option. In view of the exercise price being higher than the closing market price on the day prior to the date of grant, the intrinsic value of the option is Nil. Consequently, the accounting value of the option (compensation cost) is also Nil.
