MANAGEMENT DISCUSSION AND ANALYSIS REPORT

1) Industry structure and developments

Healthcare in India has evolved rapidly from being a product centric industry to a service driven sector, with delivery and medical insurance segments gaining prominence.

India's pharmaceutical industry has been ranked 3rd in terms of volume and 14th in terms of value, globally. The Government of India unveiled 'Pharma Vision 2020' aimed at making India a global leader in end-to-end drug manufacturing.

It is estimated that Indian pharmaceutical sector will touch US\$ 55 billion in sales by 2020. India is now among the top five emerging pharmaceutical markets and is expected to grow at a Compounded Annual Growth Rate (CAGR) of 15%.

Driven by increasing sales of generic medicines, continued growth in chronic therapies and greater penetration in rural markets, the domestic formulation market in India is expected to register a growth of about 11% to 12% next year. In FY 17 it achieved a growth rate of 11%.

In FY 17, several medicines prices were brought down or come under price control including stents. New Drug Approval Committee's (NDAC) stringent control on combination drugs, delays in clinical trial approvals, uncertainties over the Foreign Direct Investment FDI policy, the new notification by the Medical Council Of India to doctors to prescribe generic name of medicines, a Uniform Code of Pharmaceutical Medical Practices (UCPMP) for sales and marketing practices and compulsory licensing for the domestic pharmaceutical market are some of the challenges which face the Indian Formulation business.

It is estimated that local industry consolidation could gather pace over next few years. Consolidation will be hastened by a combination of factors, including the recent ban on Fixed Dose Combinations (FDCs), competitive pressure, imposition of tighter quality standards and the expansion of price controls.

2) Opportunities and Threats

Indian pharmaceutical industry has seen gradual increase in government healthcare spending & expansion of the private hospital sector. Government initiatives such as allowing 100% (FDI) in health and medical services will benefit the industry. The Government of India has recently announced the National Health Policy 2017 where the goal is to attain highest level of health and well being for all ages by improving access, improving quality and making cost of healthcare delivery affordable. Indian government plans to increase health expenditure to 2.25% of gross domestic product by 2025 from the current spending of 1.15 % .This will give boost to the sector.

Several socio-economic factors, including increasing sales of generic medicines, continued growth in chronic therapies and a greater penetration in rural markets will contribute majorly to the growth of the Indian pharmaceutical market.

Other contributing factors for growth are heightened health awareness, increasing affluence, changing lifestyles resulting in higher incidence of lifestyle diseases and a nascent, yet fast growing health insurance industry. In addition, low cost of production and R&D boosts the efficiency of Indian pharmaceutical companies.

National List of Essential Medicines (NLEM) revision in 2015, resulted in 376 medicines coming under the price control which has resulted in slowing down growth in revenues. The essentiality of a medicine has been considered in terms of its dosage form and strength. The NLEM, 2015 has been prepared adhering to the basic principles of Efficacy, Safety, Cost- Effectiveness and considering of diseases as public health problems in India.

NLEM medicines are subject to price control and this reduced average price realisations for major pharma players who were commanding a huge premium otherwise. At present, about 18% of the Indian market is under price control.

The industry growth is largely driven by chronic disease segments viz. cardiovascular, diabetes, cancer and is largely influenced by changing lifestyles. Intense price pressure in semi-regulated markets, emergence of new local players affecting the branded generic prices, delay in approval of manufacturing facilities by regulated authorities and increased regulatory intervention in price fixation for domestic formulations are threats facing the players in the industry.

3) Segment wise performance

The Company is exclusively engaged in pharmaceutical business and operates across segments including Domestic Formulations, International Formulations and Active Pharmaceutical Ingredients (API).

Domestic Formulations division business catering to Domestic market achieved sales of ₹ 183 crore, registering a growth of 9% year on year. In the Domestic market, the Company has strengthened its presence in the market by leveraging the existing brands and introduced newer products. The Company also continued a host of other initiatives such as increasing the in-clinic effectiveness of the field force through extensive scientific training, emphasis on focus brands and innovative promotional strategies. The company during the year acquired seven pharma brands which have been integrated into the existing product portfolio of the company. The company during the year also forayed into new therapies of urology and cosmetic dermatology.

The API business achieved sales of ₹ 43 crore with a growth of 20 % in FY 17.

The International Formulations business consolidated the Rest of World (RoW) markets with Global Generics (Regulated Markets) business to give a strong focus on International Formulations business. The Global Generics business achieved sales of ₹ 32.61 crore registering a growth of 21% year on year, while RoW markets contributed sales of ₹ 20.07 crore to the Company registering a growth of 4% year on year.

The Global Generics business is focused on increasing the penetration of the product in multiple countries in EU as well as expanding the product offerings in multiple markets of EU, North America, South America, Australia and Caribbean. This business of the company is also actively scouting for new product partnerships across markets with focus on co-development, manufacturing and supply partnerships.

The Company expects to grow by increasing the product offerings and by geographic expansion routes.

4) Outlook

The growth estimate for the domestic Formulation Industry is pegged between 11-12%. In light of the initiatives detailed above, the outlook of the business looks promising.

The Global Generics business with focus on new products, new partners, new markets and the outlook of this business looks promising.

The Company's Formulation facility (F2) at Ankleshwar plant is having EU GMP and UKMHRA Certification. Such certifications testify a hallmark of quality and shall help the Company to enter in new markets across multiple geographies.

5) Risks and Concerns

Some of the key brands of the Company are under NLEM. The list of NLEM is increasing. Also more and more FDC dose combination are coming under question mark. The regulatory environment across the globe is becoming more and more stringent, and this makes entry into new geographies more challenging. Also the new mandate to doctors by the Medical Council of India to prescribe generic names of drugs would have an impact on the branded

generics.

These business procedures ensure optimum use and protection of the resources and compliance with the policies, procedures and statutes. ANNEXURE A TO INDEPENDENT AUDITORS' REPORT

Referred to in paragraph 10(f) of the Independent Auditors' Report of even date to the members of RPG Life Sciences Limited on the financial statements for the year ended March 31, 2017.

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Act

1. We have audited the internal financial controls over financial reporting of RPG Life Sciences Limited ("the Company") as of March 31, 2017 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

2. The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (ICAI). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditors' Responsibility

3. Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing deemed to be prescribed under section 143(10) of the Act to the extent applicable to an audit of internal financial controls, both applicable to an audit of internal financial controls and both issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.
4. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.
5. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

6. A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

7. Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

8. In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2017, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Deferred tax is recognised, subject to the consideration of prudence in respect of deferred tax assets. Deferred tax assets are recognised and carried forward only to the extent that there is a reasonable certainty that sufficient future taxable income will be available against which such deferred tax asset can be realised. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the Balance Sheet date. In situations, where the Company has an unabsorbed depreciation or carryforward losses under tax laws, all deferred tax assets are recognised only to the extent that there is a virtual certainty supported by convincing evidence that they can be realised against future taxable profits. At each Balance Sheet date, the Company reassesses unrecognised deferred tax assets, if any.

Current tax assets and current tax liabilities are offset when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle the asset and the liability on a net basis. Deferred tax assets and deferred tax liabilities are offset when there is a legally enforceable right to set off assets against liabilities representing current tax and where the deferred tax assets and the deferred tax liabilities relate to taxes on income levied by the same governing taxation laws.

Such asset is reviewed at each Balance Sheet date and the carrying amount of the MAT credit entitlement asset is written down to the extent there is no longer a convincing evidence to the effect that the Company will pay normal income tax during the specified period.

31. 2005 Employee Stock Option Plan (ESOP 2005)

Pursuant to a special resolution passed by the Shareholders at the Annual General Meeting held on 27th August, 2008, the Company adopted the Employee Stock Option Scheme titled '2005 Employee Stock Option Plan' (ESOP 2005) for employees and directors of the Company including those employees and directors who were to be granted options, pursuant to the Scheme of Arrangement sanctioned by the Hon'ble High Court of Judicature at Bombay on 14th December, 2007, in lieu of options that were granted by Brabourne Enterprise Limited (the transferor Company) under its ESOP 2005. The total number of equity shares reserved under the said plan is 250,000 equity shares of ₹ 8 each. The details of such equity shares granted are as follows:

A) The Remuneration/Compensation Committee at its meeting held on 6th August, 2010 -

- (a) Granted and vested 30,119 equity stock options to employees, in lieu of options that were granted to them by Brabourne Enterprise Limited. The employee had an option to apply for one equity share of ₹ 8 each at an exercise price of ₹ 32.06. Of these options, 29,255 equity stock options had been exercised in earlier years and the remaining equity stock options have lapsed.
- (b) Granted 95,000 equity stock options to the eligible director and employees of the Company, with an option for one equity share of ₹ 8 each at an exercise price of ₹ 100 being the price higher than the closing price quoted on the National Stock Exchange prior to the date of meeting of the Remuneration/Compensation Committee. These equity stock options shall vest, in case of employees of General Manager grade and above, equally but conditionally on linear scale based on performance, over five years beginning from one year after the date of grant. Barring certain eventualities, the exercise period to subscribe to the equity shares would be 10 years from the dates of vesting except otherwise mentioned in ESOP 2005.

All equity stock options had lapsed / forfeited in earlier years.

B) The Remuneration/Compensation Committee at its meeting held on 20th October, 2010 -

Granted 15,000 equity stock options to an eligible employee with an option for one equity share of ₹ 8 each at an exercise price of ₹ 104 being the price higher than the closing price quoted on the National Stock Exchange prior to the date of meeting of the Remuneration/Compensation Committee. These equity stock options shall vest, in case of employees of General Manager grade and above, equally but conditionally on linear scale based on performance, over five years beginning from one year after the date of grant. Barring certain eventualities, the exercise period to subscribe to the equity shares would be 10 years from the dates of vesting except otherwise mentioned in ESOP 2005.

Of these options, 2,910 equity stock options were outstanding as of March 31, 2016 which have been exercised during the year. The remaining equity stock options have lapsed/forfeited in earlier years.

The Company has adopted intrinsic value method as permitted by the SEBI Guidelines and the Guidance Note on Accounting for Employee Share Based Payment issued by the Institute of Chartered Accountants of India to account for the cost of stock options to employees and a director of the Company. Intrinsic value is the amount by which the quoted market price of the underlying share exceeds the exercise price of the option. In view of the exercise price being higher than the closing market price on the day prior to the date of grant, the intrinsic value of the option is Nil. Consequently, the accounting value of the option (compensation cost) is also Nil.

Notes forming part of the Financial Statements as at and for the year ended March 31, 2017

Movement in the Options under ESOP 2005:

Particulars	Year ended 31st March, 2017		Year ended 31st March, 2016	
	Number of Options	Weighted Average	Number of Options	Weighted Average
		Exercise Price		Exercise Price
Outstanding at the beginning of the year	2,910	104.00	10,014	104.00
Granted during the year	Nil	Not Applicable	Nil	Not Applicable
Forfeited during the year	Nil	Not Applicable	Nil	Not Applicable
Exercised during the year	2,910	104.00	Nil	Not Applicable
Expired/lapsed during the year	Nil	Not Applicable	7,104	91.73
Outstanding at the end of the year	Nil	Not Applicable	2,910	104.00
Exercisable at the end of the year	Nil	Not Applicable	2,910	104.00

The weighted average fair value of each stock option on the date of its grant is ₹ 41.34, which has been vetted by an independent valuer. This fair value has been calculated using Black-Scholes Option Pricing Model. The inputs used for this calculation are (i) Average Share Price: ₹ 91.33 on the date of grant (ii) Average Exercise Price: ₹ 90.70 (iii) Average Expected Volatility: 47.98% (iv) Average Option Life: 8 years (v) Average Expected Dividend Yield: 3.50%, and (vi) Average Risk Free Interest Rate: 8.08%. The daily volatility of the company's shares on the National Stock Exchange over a period of time prior to the date of grant, corresponding with the expected life of the options, has also been considered for determining the fair value.

Had compensation cost for the stock options granted under ESOP 2005 been determined based on the fair value method, the Company's Profit for the year and Earnings per Share would have been as per the pro forma amounts indicated below:

	Year ended 31st March, 2017	Year ended 31st March, 2016
