ONE OF INDIA'S LEADING REAR AXLE SHAFTS MANUFACTURER

Established in 1993, we are one of India's leading rear axle shafts manufacturer. Our products find applications across on-highway vehicles (LCV, MCV, HCV and buses, among others) and off-highway vehicles (agricultural tractors and machinery, forestry, construction equipment, defence and mining, among others). We also manufacture solid and hollow spindles used in assembling the axle for various vehicles and equipment.

Our products are widely consumed world over by the leading OEM manufacturers across USA, Sweden, Turkey, Brazil, Italy, Germany, Spain, Mexico, Japan, UK, France, China and Australia, among others. Besides, we are also tier 1 suppliers to several Indian OEMs.

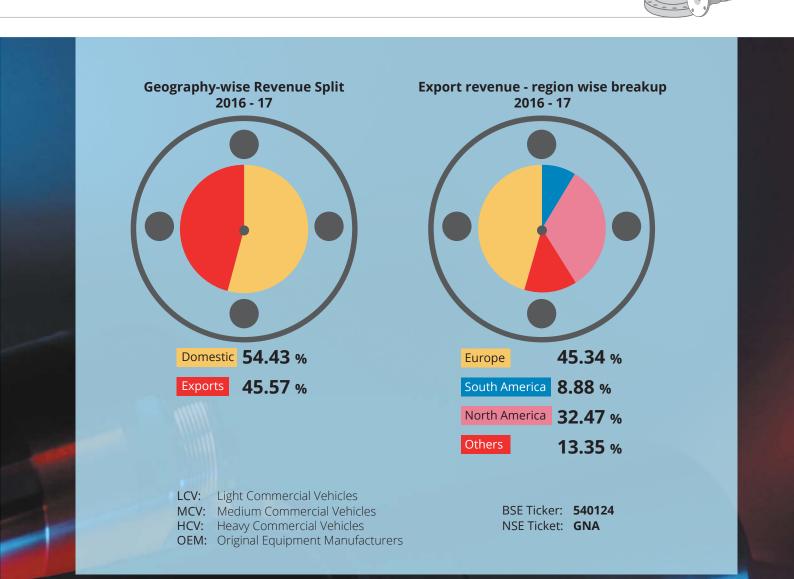

Our two state-of-the-art manufacturing facilities are located in Mehtiana (District Hoshiarpur) and Gulabgarh Jattan (District Kapurthala) in Punjab with a total annual capacity of 2.30 Million rear axle shafts, 0.40 Million other shafts and 0.30 Million spindles. ₹29.60crs PAT for the year ended 31st March, 2017

# OUR BUSINESS AREAS

# REAR AXLE SHAFTS

The Company's primary product is Rear Axle Shafts. We manufacture and supply a diverse range of rear axle shafts for the vehicles under the on-highway and offhighway segment. The product also finds its application with other specialty vehicles used for mining and defence. We possess a capacity to manufacture rear axle shafts of up to 165 kgs input weight.

# Just for your information!

AXLE IS A PART USED FOR TRANSMISSION ASSEMBLY OF AN AUTOMOBILE. THE PRIME PURPOSE OF AXLE IS TO BEAR THE VEHICLE WEIGHT. IT IS ALSO CRUCIAL FOR MAINTAINING THE POSITION OF THE WHEELS RELATIVE TO EACH OTHER AND TO THE VEHICLE BODY. AXLES CAN EITHER BE LIVE-AXLES OR NON-DRIVING AXLES. IN AN AUTOMOBILE, LIVE AXLES HELP IN TRANSMITTING THE POWER FROM ENGINE ONTO THE WHEELS VIA THE DRIVE SHAFT. ON THE OTHER HAND, IN COMMERCIAL VEHICLES AND AGRICULTURAL TRACTORS, THE REAR AXLE ACTS AS THE LIVE-AXLE AND THE FRONT AXLE ACTS AS THE NON-DRIVE AXLE. REAR AXLE SHAFT IS A PART OF THE REAR AXLE ASSEMBLY AND HELPS IN TRANSMITTING THE DRIVING TORQUE TO THE WHEELS.

# SPINDLES

The Company manufactures spindles for both onhighway and off-highway vehicular segments, largely catering to HCVs and Speciality Vehicles. Spindle is a part of axle housing assembly of an automobile. The main purpose of the spindle is to transmit torque.

# **13.69 %** Contribution to Total Revenues in 2016-17

# OTHER SHAFTS

The Company manufactures other shafts including drive shafts, power take-off shafts, hydraulic lift shafts and transmission shafts. These shafts are a part of transmission assembly of an automobile.

Drive shaft is a mechanical component for transmitting torque and rotation. It is usually used to connect other components of a drive train that otherwise cannot be connected directly either due to distance or for the need of allowing relative movement between them.

# INTEGRATED MANUFACTURING FACILITIES WITH DISTINCT ADVANTAGES

BUSINESS GROWS STRONGER WHEN YOU INTEGRATE. IT HELPS BOOST EFFICIENCY WHILE SIMPLIFYING WORKFLOW

AT GNA, OUR INTEGRATED MANUFACTURING FACILITIES AT MEHTIANA AND GULABGARH JATTAN GIVE US A DISTINCTIVE ADVANTAGE IN TERMS OF PRODUCTION FLEXIBILITY AND STRATEGIC LOCATIONAL ADVANTAGES. THESE INCLUDE:

**Economies of scale:** Our facilities provide everything from forging to finished products, all under one roof. This provides greater economies of scale. It also lets us enjoy the flexibility to produce different range of customised products.

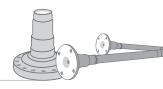

**Timeliness and efficiencies:** Large capacities allow us to cater customer requirements in a timely and efficient manner.

**Full-service capabilities:** Our product manufacturing value chain includes engineering, forging, machining and quality testing. All processes right from materials receipt, forging, heat treatment, machining, induction hardening and packaging are located under one roof, giving us full-service capabilities.

**Manpower:** The location of our facilities allow us to employ people from the nearby rural areas at an economical cost. This way, the manpower is retained in the Company for a longer period, thereby resulting in lower attrition rate. At the same time, the Company contributes to the society welfare, by providing employment to the surrounding communities.

# ISO/TS 16949:2009 Certified

# Proximity to Customers: Our

facilities are located close to the facilities of some of our prominent customers like International Tractors Limited, Mahindra & Mahindra (Swaraj division), Escorts Limited and New Holland Limited. This allows us to benefit from the lower transportation and logistics costs.

**Proximity to Dry Ports:** Nearly 100 % of our exports are routed through dry ports located at Ludhiana, 60 kms from our manufacturing facilities – giving us further cost advantage.

# Solid and Sound ENGINEERING AND TECHNOLOGICAL CAPABILITIES

EVERY BUSINESS IS CAPABLE OF GREATER THINGS THAN IT REALISES. AND WHEN TECHNOLOGY MEETS CAPABILITIES, IT CAN GIVE YOU WINGS, TO FLY FARTHER AND FASTER!

At GNA, new product development and world-class processes are driven by sound engineering and technological capabilities.

Our manufacturing facilities include machinery imported from various countries including Italy, Germany, Japan, China and Taiwan. These find application in various processes such as materials testing, forging, heat treatment, machining, induction hardening and packaging. The automated robots reduce human intervention to the great extent. This results and helps in large-scale perfection.

Our in-house metallurgical and metrological laboratories offer a number of cost-reduction and valueengineering solutions to our customers. Besides, it also focuses on continuous improvements in the manufacturing processes leading to lower input and operational cost.

# MD'S MESSAGE

AT GNA, OUR NEW PRODUCT DEVELOPMENT AND WORLD-CLASS PROCESSES ARE DRIVEN BY SOUND ENGINEERING AND TECHNOLOGICAL CAPABILITIES.

# Dear fellow shareholders,

We are delighted with the kind of high investor interest we received and the outstanding success of our IPO. I would like to warmly thank all the investors who have joined our GNA family.

Solid fundamentals are prerequisite for sound growth. A solid foundation is critical for creating anything of value.

We are driven by sound engineering and technological capabilities for the development of our new products and world-class processes. Our strong foundation is what makes us solid, giving us a sound reason to believe in ourselves and grow at every step. Through this letter I intend to share with you our strategic priorities and our thoughts and beliefs for the future.

We are among the leading manufacturers of axle shafts for commercial vehicles and off-highway vehicles in India. We enjoy a considerable presence in export markets. We have been supplying components to domestic customers since 1995 and to overseas customers since 2002. Our market position and experience enable us to compete globally in measurable quality, cost, delivery and technology. The domestic rear axle shaft market is expected to grow at 13% CAGR over the next five years. WE ARE DRIVEN BY SOUND ENGINEERING AND TECHNOLOGICAL CAPABILITIES FOR THE DEVELOPMENT OF OUR NEW PRODUCTS AND WORLD-CLASS PROCESSES

New opportunities are expected to open up for export-oriented, low cost, countries such as India. Under such circumstances, we believe that our leadership position gives us the platform to benefit from this growth, both domestically and globally.

# Market-responder

We believe we are insulated to a degree against fluctuation in demand for a specific product. This is possible due to the wide range of products that we currently offer. Our ability to develop new products as per our customer's requirement also plays a key role. Our in-house engineering department and the R & D activities undertaken in each of our product divisions enable us to continuously innovate and develop new products and processes.

# Leveraging long-term customer relationships

Our long-term relationships with our key customers allow us to understand and cater their diverse requirements, including new product development. Further, we get the opportunity to cross sell our products in other vehicle and equipment segments, enabling diversification.

# **Exploring export potential**

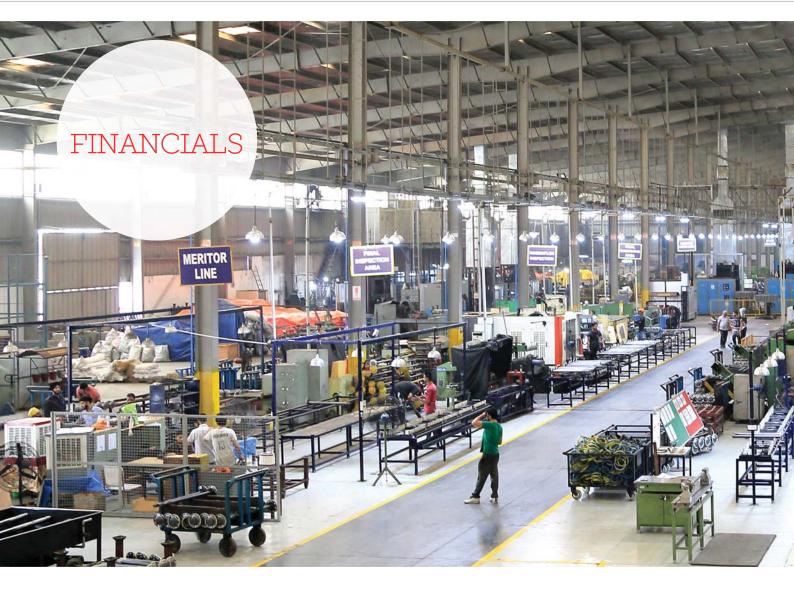

With the continuing trend of globalisation and reduction in trading barriers in various markets across the world, an export-oriented strategy will continue offering us business advantages. We aim to capitalise on the Government's available tax incentives. To enhance our customer base and develop relationships, we expect to work closely with the global sourcing offices of our overseas customers. We are positive about benefitting from our existing relationships with overseas customers for expanding into other product segments.

# Enhanced focus on automation and technology

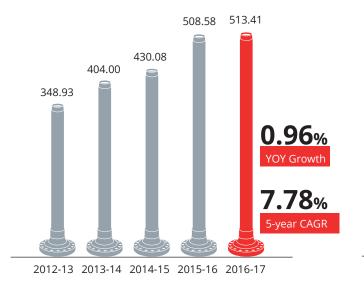

We have taken steps towards better resource utilisation and efficiency maximisation by increased automation in the forging and machining processes. Our Company uses IT-enabled business processes, such as advanced computer aided design and analysis capabilities, to accommodate a range of customer specifications. Our forging facilities, such as screw press with direct drive and extrusion press, are supported by robots. We intend to further invest in achieving greater levels of automation. This can be done by acquiring automatic line for the sawing of round and square bars, fully-automatic grinder and polisher and industrial robots such as IRB 7600/500 kg. We intend to invest in automation for most stages of our production process. This is to ensure optimal use of resources, reduction of industrial risk to human workers, economies of scale and significantly higher precision in the overall manufacturing and design of products.

At GNA, we do not simply attempt to push the boundaries of our success – instead we seek to harness daily improvements to expand our business boundaries. I would like to thank you for considering an ownership in GNA. My colleagues and I would like to assure you that we are committed to serving the GNA ecosystem for the benefit of our stakeholders.

Best Wishes, **Gursaran Singh**

# MANAGEMENT DISCUSSION AND ANALYSIS

### **ECONOMIC OVERVIEW**

## **Global Economy**

During 2016-17, the global economy was faced by a series of uncertainties. US elections, referendums in Britain and Italy, rise of populism across Europe and India's currency reforms – these were the primary reasons behind the decline in global trade activities. The Brexit vote further weakened global sentiments. However, a mild recovery was witnessed in the latter half of the year, particularly in the advanced economies. While employment and confidence-level improved in US, UK witnessed a rise in domestic demand following Brexit. Additionally, there was a momentum in the Eurozone economy as robust domestic demand led recovery in the second half of 2016.

This contradicted the earlier expectations of a slowdown due to geopolitical uncertainties.

The emerging markets and developing economies (EMDEs) experienced a subdued growth. While China continued growing moderately with persistent support from the authorities, a major slowdown in some Latin American countries (Argentina, Brazil and Colombia) was also seen. Going ahead, the global GDP is expected to grow around 3.5% in 2017. A close watch would be there on the geo-political tensions in the Middle East and North Africa region, faster than expected Fed rate hike and increase in protectionism policies by the advanced economies.

#### **Indian Economy**

According to the World Bank, India witnessed 6.8% growth in 2016-17. This made the country one of the fastest growing economies among the G20 nations. Together, sustained low inflation, falling fiscal deficit, low current account deficit and a stable currency, created a positive environment for economic growth. However, the country witnessed a temporary slowdown in the last quarter owing to demonisation. By the end of the fiscal, a positive improvement in some of the largely observed data, such as automobile sales, cement consumption, personal loan growth and exports growth, indicated economic recovery post demonetisation. The implementation GST, in July 2017, combined with Government's thrust on infrastructure and affordable housing, will see India grow steadily in the near term.

# **INDUSTRY OVERVIEW**

## **Commercial Vehicles**

### Global

The global market for heavy commercial vehicles expanded again in 2016. A total of 2.9 Million trucks were sold worldwide a 6% rise as compared with 2015. The most successful markets were China and Western Europe, both with double-digit growth rates. On the contrary, business in the US and Brazil contracted significantly. This was owing to the slow pace of economic growth.

Roughly one-third of all new heavy commercial vehicles around the world are sold in China. The market almost reached the 1 Million mark in 2016, with sales climbing by 28 percent to 962,000 units. However, anticipatory buying had considerable impact on the figures. In China, the new National V standard for exhaust emissions is currently being introduced. It largely corresponds to the European Euro V standard. (Source: www.vda.de)

The Western European market for heavy commercial vehicles over 6 tonnes increased by 11 percent to 287,300 vehicles in 2016-17. This was the highest level since 2008. Recovery continued most strongly in the Southern European markets. The growth in sales was greatest in Italy (+51 percent). Double-digit increases also occurred in new registrations in France (+13 %) and Spain (+10 %). Despite the Brexit vote, registrations in the UK also rose by 6% to 46,800 units. However, the UK is expected to record lower sales in 2017. The growth expected in the rest of Western Europe will probably more or less compensate for this decrease.

As expected, the US truck market went sharply into reverse in 2016 after six years of growth. Sales were 11 percent down from the previous year's volume, with 4,00,400 units sold. Over the current year, the market may well record another loss, although less marked than that in 2016.

#### Indian

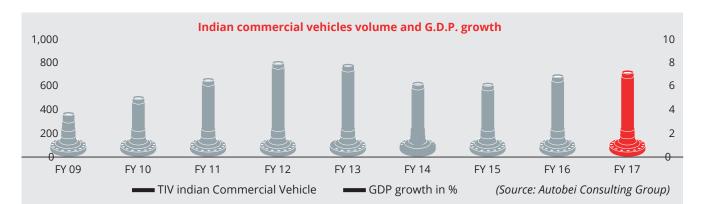

A Commercial Vehicle ("CV") finds its use in transporting goods or passengers. In India, 85-88 percent of vehicles produced are used to transport goods. Further, most vehicles produced in India are sold in the domestic market, while only around 11 % is exported across South Asian Countries, Middle East, South East Asia and Africa.

Based on their vehicle load capacity, Commercial Vehicles can be classified into three categories:

- 1. Small Commercial Vehicles (SCV)
- 2. Light and Medium Duty Trucks (LMDT) and
- 3. Heavy Duty Trucks (HDT)

The Indian commercial vehicle (CV) industry registered volume growth of 4.16 % in the financial year 2017 against 2016. Medium and Heavy Commercial Vehicles (M&HCV) grew by 0.04% and Light Commercial Vehicles grew by 7.41%. The CV industry growth was urged by positive economic condition and business sentiments. In FY 2017, the Commercial Vehicle volume reached 727 thousand units as compared to 383 thousand units in 2009. The CV market is largely dependent on economy, availability of load, low cost finance, freight rate and diesel price equilibrium. Currently, fuel prices are low, freight rates are at comfortable levels and customers are seeing profits. This leads to an improvement of the general economy, consequently leading to the betterment of the industry. Increased road construction and mining activities have also contributed to the economy development. In the next five years, CV sales are expected to grow due to improvement in industrial activity, steady agricultural output and strong focus on infrastructure project execution along with continued capacity constraints in the railways.

# Key drivers for commercial vehicles

- Improved industrial activity
- Increased agricultural output
- Private final consumption expenditure
- Uptick in Export Import transportation
- Road construction and mining segment growth to drive tipper demand

#### Challenges

- Better infrastructure is required with lots of tweaking and improvements
- Emission standard: Euro 4's implementation needs to be changed to Euro 6 to get a better performance
- Sulphur concentration The present concentration of Sulphur in fuels is alarming. Euro – 6 will bring a change to this too
- CV industry capacity utilisation is greater than 50–55% as a lot of new capacity has been introduced in the past years. Due to this, many new companies have not been able to reach their projected figures
- Other challenges include discount, product mix, cost and competition, among others

## The Commercial Vehicle Industry outlook

The Commercial Vehicle market is expected to grow by 5-6% in 2017-18 due to normal Monsoon and implementation of GST. The sales growth should be visible after July 2017 after implementation of GST. It would further accelerate the evolution of the hub-and-spoke model for transportation in the country, where small CVs are used for last mile or spoke distribution, and HCVs for hub-to-hub transportation. This will give a boost to the growth in CV Industry in the coming years. (Source: Autobei Consulting Group)

## Tractors

The tractor is a multi-utility vehicle. It is used to pull a variety of farm implements. These implements are used for ploughing, planting, cultivating, fertilising and harvesting crops. Most tractors find usage on farms. However, they are also used at the construction sites and at airports to transport material and goods. Based on their engine Horse Power (HP), tractors, in India, are divided into three categories:

- Small tractors (<30 HP)
- Medium-sized tractors (30-40 HP)
- Large tractors (> 40 HP)

## GLOBAL

#### North America and Europe

In terms of value, North America is one of the largest market in agricultural equipment. Over the past decade, a strong growth in demand of such equipment too has been witnessed. High crop prices led to this robust growth, hence converting higher returns to the farmer. This also resulted in an increased demand for farm tractors in North America and Europe. Factors like favorable government policies encouraging the usage as well as purchase of agro machinery and various farming equipment support the market.

By 2024, a sales volume of 582.2 thousand units is expected to be recorded in the North America and Europe farm tractor market. In terms of revenue, an expansion from USD13.6 Billion in 2015 to USD17.23 Billion by 2024 has been projected for the market. Going by the projections, the North America farm tractors market is expected to register a modest 3.0% CAGR by value during the forecast period. On the other hand, Europe is expected to demonstrate a 5.4% CAGR from 2016 to 2024.

## **Growth Drivers**

There has been a growing trend of farm mechanisation across North America and Europe. This can be accredited to the numerous benefits offered:

- Considerable savings in terms of time and resources
- Improved efficiency
- Increased production.

Factors behind an increase in usage of mechanized farming techniques and equipment

- Shortage of farm laborers in these regions
- Growing demand for agricultural products due to rising population
- Government offering subsidies and easy access as an effort to encourage use of mechanized farming techniques

## Challenges

A lot of challenges have been posed due to the implementation of strict emission norms in most developed countries

 Stringent regulations, with regards to the usage of diesel engines, particularly in off-road vehicles, posed by regulatory bodies such as the U.S. Environment Protection Agency (EPA) and the Economic Commission for Europe (ECE). This makes it mandatory for the Tractor manufacturers to bear additional costs to adhere to these norms, hence restricting the uptake of farm tractors.

## Indian

At the end of 2016-17, the Indian tractor industry showed an 18% growth wherein tractor makers sold 5,82,000 units. This growth can be rightly accredited to good monsoons. Moving ahead, Maharashtra, Madhya Pradesh and Uttar Pradesh are predicted to drive demand. A normal monsoon and consistent pace of rural development activities are said to help the peninsular region also perform well. Factors like Government's Pro-farmer policies and economy's growing pace are also expected to boost India's tractor industry and help it reach record sales in the coming years. These elements are projected to alleviate concerns of demand shrinkage due to insufficient monsoon rains. A double-digit growth in 2017-18 will also help the industry reach the record set four years ago.

### **Growth drivers**

- Various Government initiatives like doubling farmer income in next five years and writing off farmers loan is encouraging people to invest in tractors
- Favorable budget announcements like record farm credit disbursal of ₹10 Lacs crs and other rural development initiatives will benefit tractor sales
- Other factors, like higher allocation of credit to farmers in the Budget, higher demand by non-agri sector and positive forecast by the Indian metrological department, are said to reflect a growth in tractor demand by 12-15 % in 2017-18

2012-13 2013-14 2014-15 2015-16 2016-17 2016-17 (Source: Economic Times)

# **Challenges:**

- Monsoons largely influence tractor sales. Anything below normal impacts and affects the buying pattern.
- Higher interest rates charged by lending bodies directly affect a farmer's financial condition, hence restricting their tractor-purchasing ability.
- Other factors impacting the earning and buying pattern of farmers' include:
  - Improper ground implementation of policies like Fasal Bima Yojna and
  - Farmers' inability to realise benefits of higher minimum supporting price (MSP)

#### Outlook

A descent growth pace has been projected for the domestic demand till Fiscal 2020. An increase by 8-9% CAGR from 2015 to 2020 is expected in tractor demand as against an estimated CAGR of 16% from 2009 to 2014. This growth will mainly be driven by

- An increase in farm profitability due to healthy growth in MSP and crop yields
- Farm labour shortage because of migration to urban areas and rural entrepreneurship
- Government's increased focus on agriculture through agricultural credit
- Increase in rural development
- Increased finance availability via:
  - Non-mortgage schemes with private financiers as against mortgage of land earlier
  - Expansion of private financiers (East) and finance for used tractors leading to shortening of replacement cycles (North).

Looking at the long term, the tractor sales are expected to grow by 8-9% CAGR. This will be possible with falling replacement cycles stable farm incomes and the Government's increased focus on agricultural and rural development.

### **Auto Component Industry**

The fiercely competitive global automotive industry depends on a lot of factors. These include:

- Technological advancement
- Difficulty in product manufacturing
- Costs adjustments
- Demand volume

In the coming two years, some regulatory tightening is expected. The prices in established markets are also likely to be flat except in US. This is due to the changes in the auto component industry, yet to be adjudged with NAFTA and CAFÉ. More platform sharing and modular systems are also expected. In North America, vehicle segmentation will see a shift to higher value segments. Developed markets are predicted to increase by 20% by 2020 while emerging markets are expected to increase by 65%. This will relatively affect the auto parts and manufacturing industry mainly because the demand in the emerging markets will increase in relative growth to the automotive industry.

The industry of auto components constitutes 3.6% of total production of the global manufacturing industry. The global auto parts production, during 2014, touched about USD1.4 Trillion. Here, Asia Pacific enjoyed the largest share with 55.5%, followed by North America (24%) and Europe (14%). The auto component production in North America is around USD 335 Billion in size whereas that in Europe is around USD193 billion. In both these markets, a 70-75% of production is for OEMs.

## **Growth Drivers**

- With a shift in the industry trend towards fuel-efficient cars, hybrid and electric cars demand is expected to boost the industry.
- An increase in demand for fuel-efficient components due to increased oil prices and changes in CAFÉ mandates, presents a growth opportunity
- An increase in consumers' disposable income in North America will also prove to be a positive for auto sales.
- The new Government's stricter emissions regulations would also prove beneficial for manufacturers of turbochargers and emissions systems as it will drive demand for fuel efficient auto parts
- The industry's foothold and revenue contribution is also expected to increase with new technological advancements in driverless cars and boost in E-commerce

#### Challenges

- Interest Rates: If Federal Reserve Bank increases the interest rates, it will negatively affect the demand of automobiles in the market
- Exposure to European markets subject to numerous political and economic risks - will affect the major players negatively
- The revenues and margins of major global players in industry will be adversely affected by the proposed changes in NAFTA and localization call by the Trump government in US

#### Indian auto component industry

The Indian automotive component industry witnessed a robust growth in the last decade. The main drivers behind this were increased investments by automotive OEMs in India. This helped to lift the demand for technologically advanced components. The growing scale allowed manufacturers to keep costs low. This further made sourcing automotive parts from India more lucrative. The Indian auto component industry witnessed a healthier growth in 2016-17. This was a welcome change after the sluggish trend recorded in the last few years.

The Indian auto-components industry has been forecasted to register a turnover of USD 100 Billion by 2020. This is said to be backed by strong exports ranging between

USD 80-100 Billion by 2026, from the current USD11.2 Billion.

The Indian Automotive sector is expected to be among the world's top 3 in the next few decades. It is likely to contribute more than 12% to the country's GDP and comprise more than 40% of the manufacturing sector. Auto Components Exports are projected to touch 4.36 – 4.63 Lac Crs by 2025-2026 whereas the Domestic sales of the auto components are expected to touch around 4.45 – 5.49 Lac Crs.

(Source: The Automotive Component Manufacturers Association of India (ACMA)).

The government's Automotive Mission Plan 2016-26 is one of the major growth drivers behind this. It will drive the 'Make in India' campaign. The campaign's focus will mainly be on exports of small cars, multi-utility vehicles (MUVs), two and three wheelers and automotive components.

GST's implementation will be a remarkable development. It is expected to influence the economy favorably, especially the demand for automobiles. This is likely to further add to the growth momentum in the sector in the medium to long run.

## Outlook

The global economy, showing a rapid increase, is likely to throw new opportunities for the transportation industry and this will result in newer verticals and opportunities for autocomponent manufacturers in the decade to come. The autocomponent manufacturers would then be required to adapt to the change via systematic research and development. By the year 2025, the Indian auto-components industry is all geared up to become the world's third largest. The Indian auto-component makers are aptly positioned to enjoy the advantage from globalization. This is possible because exports potential is expected to show an increase by up to four times to USD 40 Billion by 2020 from the current USD 11.2 Billion.

## **REAR AXLE MARKET**

#### Global

By the year 2024, the global rear axle market is forecasted to reach USD 57.77 Billion. An increase in the concern over safety and security is estimated to drive demand over the projected period.

The increasing urbanization is leading consumers in developed countries to look for alternatives to car ownership. Today, the integrated mobility business and car-sharing have fast become the ongoing trend in the developed nations. To enjoy a wider presence in all the diversified segments, the original equipment manufacturers are anticipated to diversify the product portfolio for offering services including car-sharing.

With an increasing demand and approach towards value for money (VFM) - including high mileage and fuel-efficient products – the vehicle industry is anticipated to be propelled. Developed markets, such as Europe and the U.S., represent the dominant share in the industry. A shift in the markets

from developed to emerging has been observed. Intense competition is what led this shift in the focus. Other factors that led the emerging countries, such as India and China, to display market growth include:

- Lifestyle change
- Rise in disposable income
- Stabilization of economic conditions

During 2015, the drive axles segment accounted for over 40% of the overall revenue. For an increased efficiency, a number of interconnecting systems were incorporated with the drive shaft. These systems also helped control the movement and power. Now that the engine power helps turn the axle for creating movement, drive shafts are being used in a wide variety of vehicles. The economy vehicles segment is anticipated to experience an enormous growth. It is estimated to reach over USD 22.0 Billion by 2024 (Source: Businesswire). The demand is aptly reflected in the shorter lead times in development, higher fuel economy, lower vehicle noise and higher engine power. Rear axles used in these vehicles offer better fuel consumption and lower noise levels. The Asia Pacific rear axle market is expected to grow at a CAGR of 4.9% from 2016 to 2024 (Source: Businesswire). The overall industry demand is expected to experience a boost by emerging countries like South Africa and India. SA displayed a significant growth under the motor industry development program. Economy vehicles are expected to dominate the overall market in context with the rear axle application.

## Indian Rear Axle and spindle Market

The current market size for rear drive axle shaft used in CV and tractors manufactured in India is around ₹ 5.2 Billion. A greater number of CV production in Fiscal 2012, led the axle shaft market at a peak. Thereafter, it declined due to weak economic activity.

Amongst the four segments, the tractor contributes the highest in terms of volume. The current market size for Indian spindles used in CVs is around ₹ 1.7 Billion. In 2012, the spindle market showcased a good performance. This was mainly due to higher CV production. In 2014 and 2015, low CV production, due to below average demand and high financing cost, muted the market.

When it comes to spindle market, SCV contributes the highest volume as compared with any other commercial vehicle segment.

## Rear axle shaft and spindle outlook

Rear axle shaft and spindle volume is estimated to grow at a CAGR of 10-11% and 11-12%, respectively, from 2015 to 2020 due to LCV. Demand is expected to increase by 12-13% CAGR from 2015 to 2020 due to:

- Improved private financial consumption expenditure (PFCE)
- Growing hub and spoke network
- Replacement of 3-wheelers
- Ease in CV financing

Between the period 2015 and 2020, MHCV sales are expected to grow by 10-12% CAGR. This growth can be accredited to:

- The expected improvement in industrial activity
- Steady agricultural output
- Strong focus on infrastructure project execution
- Along with continued capacity constraints in the Railways

## Quality, Efficiency and Delivery

During the year, we undertook various measures to reflect our strong endeavour towards quality commitment, efficiency and deliveries.

- Focus on quality: ISO/TS-16949:2009 certifications obtained for both manufacturing units. Applicable to organisation sites manufacturing customer specified parts
- In-house execution of manufacturing processes to monitor product quality, control production costs and maintain delivery schedules
- Trained and certified several employees with Six Sigma Certified Black Belts (Level I)
- Improving forging efficiency to increase capacity utilisation
- Better relations with vendors for achieving quality, costs and delivery objectives with the help of regular vendor audits
- Centralised approach towards sourcing and vendor management ensuring economies of scale in raw material procurement, especially steel
- Special focus on products packaging to meet customers' requirements. Due consideration given to the mode of transportation and destination, ensuring timely deliveries.

#### **Technology and Automation**

The Company took active steps towards better utilisation of resources and maximising efficiency. This was done

by increasing automation in the forging and machining processes. We use IT-enabled business processes such as advanced computer aided design and analysis capabilities. These help us provide a variety of customer specifications. The forging facilities are supported by robots. We intend to invest in automation for most stages of production process. This will help ensure optimal use of resources, reduction of industrial risk to human workers, economies of scale and significantly higher accuracy in the overall manufacturing and design of products.

#### **Human Resource**

The Company believes in crafting a workspace where people from diverse background can thrive and come together to contribute. The ever-changing customer needs is one of the key factors that dictates the direction of the People framework. The Company constantly works towards providing the best suited framework in partnership with business leadership. We have utilised the insights from the current, past and potential employees. These have helped us craft the employee value proposition for the organisation. The Company is committed towards it's people's development. We have now institutionalized the people review process across the organisation. It encourages, promotes and supports developmental conversations across all levels.

Within the overall people framework, we have placed priorities while creating a strategic workforce planning. This has helped us create a long-term roadmap for gaining and managing future capabilities in the most optimum manner.

# **INDEPENDENT AUDITOR'S REPORT**

To the Members of

### **GNA AXLES LIMITED**

### **Report on the Financial Statements**

We have audited the accompanying Standalone financial statements of **GNA AXLES LIMITED ("The Company")** which comprise the Balance Sheet as at 31st March, 2017 the Statement of Profit and Loss, Cash Flow Statement for the year then ended, and a summary of significant accounting policies and other explanatory information.

### Management's Responsibility for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these Standalone financial statements that give a true and fair view of the financial position, financial performance and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

### Auditor's Responsibility

Our responsibility is to express an opinion on these Standalone financial statements based on our audit.

We have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder.

We conducted our audit in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation of the financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on whether the Company has in place an adequate internal financial controls system over financial reporting and the operating effectiveness of such controls. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Company's Directors, as well as evaluating the overall presentation of the financial statements.

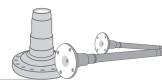

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Standalone financial statements

### Opinion

# "ANNEXURE B" TO THE INDEPENDENT AUDITOR'S REPORT

of even date on the Standalone Financial Statements of GNA Axles Limited Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of GNA Axles Limited ("the Company") as of March 31, 2017 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

# Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

### **Auditors' Responsibility**

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

# Meaning of Internal Financial Controls Over Financial Reporting

A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A Company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

### Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

### Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2017, based on the Internal Control over financial reporting criteria established by the company considering the essential components of the Internal Control stated in the Guidance Note on audit of Internal financial controls over financial reporting issued by the Institute of Chartered Accountants of India..

### **INDEPENDENT AUDITOR'S REPORT**

To the Members of GNA Axles Limited

### **Report on the Consolidated Financial Statements**

We have audited the accompanying consolidated financial statements of GNA Axles Limited ("the Holding Company") and its subsidiaries (collectively referred to as "the Group"), comprising of the consolidated balance sheet as at 31st March, 2017, the consolidated statement of profit and loss and the consolidated cash flow statement for the year then ended, and a summary of the significant accounting policies and other explanatory information (hereinafter referred to as "the consolidated financial statements").

### Management's Responsibility for the Consolidated Financial Statements

The Holding Company's Board of Directors is responsible for the preparation of these consolidated financial statements in terms of the requirements of the Companies Act, 2013 ("the Act") that give a true and fair view of the consolidated financial position, consolidated financial performance and consolidated cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Accounting Standards specified under Section 133 of the Companies Act, 2013 (hereinafter referred to as "the Act") read with Rule 7 of the Companies (Accounts) Rules, 2014. The respective Board of Directors of the Companies included in the group are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Group and for preventing and detecting frauds and other irregularities; the selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the consolidated financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated financial statements by the Directors of the Holding Company, as aforesaid.

### **Auditors' Responsibility**

Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

While conducting the audit, we have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder.

We conducted our audit in accordance with the Standards on Auditing specified under section 143(10) of the Act. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the

consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Holding Company's preparation of the consolidated financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Holding Company's Board of Directors, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our audit opinion on the consolidated financial statements.

### Opinion

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid consolidated financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the consolidated state of affairs of the Group, as at 31st March, 2017, and their consolidated profit and their consolidated cash flows for the year ended on that date.

### **Other Matters**

### Management's Responsibility for Internal Financial Controls

The respective Board of Directors of the Holding Company and its subsidiary companies, which are companies incorporated outside India, are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

### **Auditors' Responsibility**

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") issued by the ICAI and the Standards on Auditing, issued by ICAI and deemed to be prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

### Meaning of Internal Financial Controls over Financial Reporting

A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A Company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorisations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

### Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

### Opinion

In our opinion, the Holding Company and its subsidiary companies, which are companies incorporated outside India, have, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31st March, 2017 based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.
