PAT Margin	1.79	7.15	299.14
EPS	0.65	2.95	353.84

Commenting on the performance, Mr. Sachhin Gajjaer, Managing Director, said,

We are proud to have delivered a landmark performance in the First Half this year, characterized by Incremental orders not only from India but also from various geographies across the world and integrated solutions for larger customer need. We continuously focused on higher Margins and our outreach in Global Markets. The performance will improve much more in upcoming time. We, Satrix aims to become a top-notch OEM and renowned service provider Globally. This achievement is a direct result of the long-term vision, strong strategy, excellent team and customer delight by design nature.

Cybersecurity has always been an arms race. Defenders build stronger walls; attackers find taller ladders. But the introduction of generative and agentic AI has fundamentally altered the pace of that race. What once unfolded over weeks or months now happens in hours or even in minutes. GenAI has enabled threat actors to launch more sophisticated cyber-attacks in just no time or make those attacks so complex to catch. Finding such issue among huge data sources would overwhelm the Security Operations; the only way to improve triage efficiency is to use automation and AI as a first line of defense. Cybersecurity stands at a turning point where human intelligence is supported by AI to make decisions faster and smarter. Incremental improvements won't match the speed of AI-driven attackers. The industry must embrace non-linear change: deploy AI not as a helper for humans but as a partner that takes on repetitive work while humans focus on what only humans can do. According to recent global research, the market for AI-based cybersecurity products is projected to reach \$135 billion by 2030.

At Satrix Information Security Limited (SIS), we remain focused on new client acquisitions, client retention, making global strategies aligning with our long-term vision while strengthening our position as a customer-centric mindset, niche player specializing in detect, defense and response solution and service delivery. With over a decade of experience, we have earned the trust of global clients through our consistent track record of delivering excellence and reliability.

Looking ahead, our priorities include expanding into new geographies, investing on leaders, enhancing operational efficiency through technology and process optimization, and embracing the next era of cybersecurity using AI and automation. We are poised to take on technically demanding projects that will challenge boundaries and foster innovation as we continue our mission to deliver excellence and shape the future of information security. Our decision of having an AI driven product – NewEvol, a dynamic threat defense platform; in our portfolio will be the game changer in our growth strategy. The Copy right and two patents has been filed for NewEvol for its technological uniqueness. Followed by continuous compliance management software – 1see. In the current era, how can we forget AI, our research in Agentic AI for

faster and informed decision in the entire ecosystem of threat monitoring, response and compliance analysis; is going to be our giant leap in the Cybersecurity and AI domain. Our DNA of being 'a technology' company always remains the same to embrace our future roadmap.

About Sattrix Information Security Limited:

Sattrix Information Security Limited, founded in 2013, is a globally trusted cybersecurity solutions provider offering end-to-end, customer-centric services across India, the USA, the Middle East, and Malaysia. With over a decade of experience, Sattrix delivers agile, cloud-based and on-premise solutions that help enterprises protect digital assets, ensure compliance, and maintain business continuity. Rooted in the mission "Removing the Risk from the Universe," the name Sattrix—derived from Sat (Universe), Ri (Risk), and X (Extenuation)—reflects our commitment to eliminating cybersecurity threats. Combining cutting-edge technology with deep expertise, we stand as a future-ready partner in today's evolving digital landscape. For more information, please visit: <https://www.sattrix.com/>.
