RESULTS OF OPERATIONS

Your Company has achieved a record turnover of Rs.45,857.98 lacs during the year under review, thus representing a remarkable growth of 38.04% over Rs.33,220.61 lacs in the previous year 2009-10. The total production for the year under review stood at 2,86,180 MT including conversion of 1,85,969 MT) against 2,57,210 MT (including conversion of 1,69,912 MT) in the previous year. The increased deliveries from structurals, bright bars and other hot-rolled bars at Visakhapatnam and Chengalpet (Tamilnadu) units aggregating to 1,11,312 MT coupled with better realisations and accelerated conversion volumes for TATA Steel Ltd. paved the ways for Profit before Interest, Depreciation and Taxes growth of 43.10% which reached Rs.4,996.71 lacs as compared to Rs.3,491.78 lacs during the previous year. The additional working capital requirements of the Company in the financial year 2010-11 were met by availing short term working capital loans from the existing bankers pending the delayed

ANNUAL REPORT 2010-2011

sanction and disbursement of regular working capital limits. The year witnessed a steep rise in the interest rates by the Bankers on the backdrop of continuous Repo and Reverse-Repo rate escalations by the RBI to control the inflationary pressure. The cost of borrowed funds of the Company rose to Rs.1,445.81 lacs i.e. an increase 28.64% over the previous year level of Rs.1,123.93 lacs. However, with increased generation of internal accruals and ongoing cost control measures, the Company has prudently managed and met up the growing interest burden. The Company's TMT expansion unit at Jamshedpur with installed capacity of 1,00,000 MTPA has been successfully completed in September, 2010 with a capital outlay of Rs.2,300 lacs (out of which Rs.900.00 lacs was met up by availing Term Loan from Allahabad Bank) and the unit has started commercial operations since then, thus, catering to enhanced conversion orders from TATA Steel Ltd.. Considering the increased conversions of around 60% at the Jamshedpur in the year 2011-12 and increase in the production volumes of structurals and special steels, bright bars at Vizag Units and other rolled sections at Chengalpeta (Tamilnadu) Unit, your Company expects to achieve around 15% growth in the overall turnover and a healthy rise in the bottom-line performance during the financial year 2011-12.

BONUS SHARES

Apart from the normal policy of rewarding the members of the Company by way of Dividend on a consistent basis, during the year under review, your Company has additionally rewarded the existing Equity Shareholders by allotting 1,42,26,710 fully paid up Equity Shares of Rs.10/- each as Bonus shares to them in the ratio of 5:1 by utilising its Reserves & Surplus. The Bonus shares have been listed with both at Calcutta & U.P Stock Exchanges.

DIVIDEND

Your Directors have recommended a dividend of Re.0.50 (Fifty paise) per equity share (previous year Rs.1.00) on post bonus equity share capital for the financial year ended on 31st March, 2011. The dividend pay-out for the year under review has been formulated as per the corporate policy to extend the sustainable corporate benefits to shareholders, based on the long term performance of the Company, while assigning due weight-age to the needs of internal accruals for its long term growth plans. The total outgo on account of dividend (including dividend distribution tax) would be Rs.99.54 lacs.

REDEMPTION OF PREFERENCE SHARES

During the year under review, as per terms of Issue, your Company has redeemed balance portion of 1,20,000 number of 15% Non-Cumulative Redeemable Preference Shares of Rs.100/- each and the nominal value of Preference Shares redeemed Rs.120.00 lacs was transferred to 'Capital Redemption Reserve Account' in the books of the Company.

DIRECTORS

In accordance with the provisions of the Companies Act, 1956 and the Company's Articles of Association, Mr. Bhal Chand Khaitan, Mr. Aditya Kumar Sikdar and Mr. Manav Bansal retire by rotation in the forthcoming Annual General Meeting and being eligible, offer themselves for re-appointment.

The terms of appointment of Mr. Mukesh Chand Bansal, Jt. Mg. Director would expire on 31st December, 2011 and the Board, subject to your approval, has re-appointed him for a further period of 5 years w.e.f. 1st January, 2011 on the terms and conditions enumerated in the notice of the Annual General Meeting.

Mr. Krishna Chandra Raut & Mr. Srikumar Banerjee were appointed as Independent Directors on the Board w.e.f. 16.08.2011 in the terms of the Articles of Association of the Company. They are proposed to be appointed as Directors of the Company as set out in the notice calling the Annual General Meeting. Notices under section 257 of

BEEKAY STEEL INDUSTRIES LIMITED

the Companies Act, 1956 have been received from shareholders signifying their intention to propose the name of Mr. Krishna Chandra Raut & Mr. Srikumar Banerjee as Directors of the Company.

AUDITORS

M/s. Rustagi & Associates., Chartered Accountants, retire as Auditors of the company at the forthcoming Annual General Meeting. They have expressed their willingness to act as Auditors of the Company, if appointed. They have also confirmed that the said appointment would be in due conformity with the provisions of Section 224(1-B) of the Companies Act, 1956.

DIRECTORS' RESPONSIBILITY STATEMENT

As per the requirements of Section 217(2AA) of the Companies Act, 1956, the Directors of your Company, according to the information and explanations obtained by them and to the best of their knowledge and belief, hereby state and also confirm that:

- iii) proper and sufficient care has been taken for the maintenance of adequate accounting records in accordance with the provisions of the Companies Act, for safeguarding the assets of the Company and for preventing and detecting fraud and other irregularities;
- iv) the annual accounts have been prepared on a going concern basis;

CORPORATE GOVERNANCE

The report on Corporate Governance as per the requirement of Clause 49 of the Listing Agreement with the Stock Exchanges together with a certificate from Mr. S. K. Tibrewalla, Practising Company Secretary regarding compliance of requisite conditions of Corporate Governance, certification by CEO & CFO, Declaration by CEO & CFO for Compliance with the Code of Conduct of the Company as per Clause 49(I)(D)(ii) of Listing Agreement and the Management Discussion & Analysis Report are given as Annexures, forming part of this Report.

STOCK EXCHANGE LISTING

The Equity Shares of your Company are already listed on the Stock Exchanges at Kolkata and Kanpur and the applicable annual listing fees have been paid to both the Stock Exchanges till financial year 2011-12.

COMPLIANCE CERTIFICATE U/S 383A

The Compliance certificate is not required to be obtained in terms of Section 383A of the Companies Act, 1956 since the Company is having full time Company Secretary in its employment.

PARTICULARS OF EMPLOYEES

In view of no employee of the Company having drawn remuneration as prescribed in Section 217 (2A) of the Companies Act, 1956 or in the rules made pursuant to the same, during the Financial Year under review, particulars of the employees pursuant to said provisions are not required to be given.

ANNUAL REPORT 2010-2011

ENERGY, TECHNOLOGY & FOREIGN EXCHANGE

As a measure to economise the fuel cost, the Company installed Producer Gas Plant at Jamshedpur Units in 2009-10, which is a cost effective source of fuel as compared to Furnace Oil for the Furnace. This has helped the Company to check the fuel cost.

The particulars relating to energy, technology and Foreign Exchange earnings/ outgo pursuant to Section 217(1) (e) of the Companies Act, 1956 read with the Companies (Disclosure of particulars in the Report of Board of Directors) Rules 1988, are annexed hereto in Annexure-A and form part of this Report.

ACKNOWLEDGEMENT

Your Directors take this opportunity to convey their deep gratitude to the Central, State & Local Governments, Financial Institutions and Banks for their continued support, co-operation and guidance. They also place on record sincere appreciation for the total commitment, dedication and hard work put in by every member of the Company. The Directors express their gratitude to the esteemed customers of the Company for their continued confidence and faith shown in the products and services of your Company. The Directors are also deeply grateful for the confidence and trust which the Shareholders have placed in them.

ANNUAL REPORT 2010-2011

ANNEXURE TO THE DIRECTORS' REPORT

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

Cautionary Statement

This Management Discussion and Analysis report includes projections, estimates, expectations etc. which are of "forward-looking" nature. It is clarified that actual results could differ from those expressed or implied in this report. Important factors that may have impact on Company's operations include economic conditions affecting demand / supply and price conditions in the domestic and overseas markets, changes in the Government regulations / policies, tax laws and other statutes and other incidental factors. The Company clarifies that it has no responsibility to publicly modify or revise any forward looking statements on the basis of any future events or new information and actual results may differ from those mentioned in the report.

Operations of the Company

The Company has been able to sustain the impressive growth in operating margins despite the higher interest cost on existing working capital borrowings. By successfully adopting enrichment of the products mix, continuous innovation and improved technology at multi-located units (Jamshedpur, Visakhapatnam and Chennai), the Company has been enjoying widely spread and established market for its products. The Company is mainly manufacturing Hot Rolled Steel Sections, Bright Bars and Structurals. The customer base of the company's products includes Automotive Component Manufacturers, Forging Industries, Infrastructure Companies, Machinery Manufacturers, Agricultural Implement Manufacturers and various other Engineering Industries. The consistent strong experience of the Company's management in steel manufacturing has resulted in quality oriented and trusted multi-profile rolled products, which provide an edge in realising enhanced profitability.

The present operational capacity of the Company (5,10,000 MTPA) is being utilized for the manufacturing of Hot Rolled Bars (Heavy Structurals and other Sections like Rounds, Squares, Flats etc) at Chennai, and Visakhapatnam. At Jamshedpur, the manufacturing facilities are dedicated to TMT manufacturing for TATA Steel Ltd., while Cold Drawn Bright Bars are also being manufactured at Chennai and Visakhapatnam.

The year under review has witnessed healthy rise in the existing capacity utilisation as well as turnover. The operational performance of the Company's different units are being discussed hereunder:

Jamshedpur Unit

The Jamshedpur unit with installed capacity of 3,00,000 MTPA (including new unit with 1,00,000 MTPA) is dedicated to executing Conversion orders from TATA Steel Ltd., Jamshedpur, and during the year under review, the TMT output of the unit touched 1,81,149 MT under the existing conversion orders. In order to cope with enhanced conversions orders from TATA Steel Ltd., the Company has successfully completed the capacity addition of 1,00,000 MTPA for TMT manufacturing at Jamshedpur Unit and the production has commenced from September, 2010. This new unit's capex of Rs.2,300.00 lacs has been funded by suitable mix of internal accruals and Term Loan (Rs.900.00 lacs) from Allahabad Bank. With this additional production capacity being operational, the Conversion turnover is expected witness volume growth of around 50% in volume and the same is expected to be around 2,70,000 MTPA in the year 2011-12.

BEEKAY STEEL INDUSTRIES LIMITED

Visakhapatnam Units

- a. **Beekay Structural Steels:** The production of heavy structural steels (i.e. angles, beams and channels) from the unit (with installed capacity of 60,000 MTPA) stood at 42,354 MT as compared to 31,339 MT in 2009-10. With the rising orders from existing customers the capacity utilization of the unit has witnessed remarkable improvement and in the year 2011-12 also the existing production is expected to be maintained.
- b. **Beekay Special Steels:** The unit has installed capacity of 30,000 MTPA and it produced 17,100 MT of specially tailored Sections in the year 2010-11 against 13,640 MT in 2009-10. The commercial production of the unit commenced in 2008-09 and its capacity utilisation presently stands around 60%. Considering the existing established demands from automobile and engineering sectors, annual volume growth of 15 to 20% is expected in the next year.
- c. **Radice Ispat India, Vizag:** The unit with annual production capacity of 30,000 MT has produced 10,756 MT of hot-rolled products in 2010-11 as compared to 11,631 MT in the year 2009-10. Annual production growth of around 15% is expected in the ensuing year.
- d. **Venkatesh Steel & Alloys:** The actual capacity utilisation at this Bright Bar manufacturing unit of the Company with comparatively lower installed capacity for producing 10,000 MTPA, stood at 5,275 MT during the year under review as compared to 5,108 in 2009-10. With the spurt in demand from automotive industries, production rise of of nearly 10% is estimated during 2011-12.

Chengalpet (Tamilnadu) Unit

The unit having twin manufacturing facilities -Hot-rolled as well as Bright Bars has installed annual capacity of 80,000 MT. During 2010-11 the unit produced 29,546 MT of combined Hot-rolled and Bright bars as against 26,706 MT during the year 2009-10. With rising demand for rolled sections coming in from southern parts of the Country, the capacity utilization of the unit is expected to attain a 15% growth in the year 2011-12.

Projects Under Implementation

TLT (Transmission Line Tower) Manufacturing at Pydibhimawaram, (Andhra Pradesh)

Your Company has now entered the arena of forward integration for setting up a 24,000 MTPA Transmission Line Tower manufacturing unit at Pydibhimavaram in Visakhapatnam, after successfully catering to Automobile, Heavy Engineering, Railways, Agricultural Implements and Infrastructure sectors. The unit will be producing TLTs to meet the upcoming demands from Power & Telecom sectors. The construction of factory sheds and other civil structures have been completed and the galvanising plant has been installed by incurring Rs.1125.00 lacs from internal accruals. The deliveries of other equipments have also commenced at the site. The total project cost is envisaged at Rs.2,600.00 lacs for which Term Loan assistance of Rs.13,00.00 lacs has been sanctioned by State Bank of India. The raw material (Heavy Structural) for TLT manufacturing will be supplied by the Company's heavy Structural Unit at Visakhapatnam. The commercial production under the proposed expansion is expected to commence in the last quarter of the year 2011-12.

TMT Rolling Mill Project at Parwada (Andhra Pradesh)

The promoters of the Company are further expanding the rolling operations by setting up a new TMT Rolling Mill with installed capacity of 2,00,000 MTPA at Parwada, Andhra Pradesh. This unit will be dedicated to production of TMT under the Company's own Brand. The estimated capex of Rs.5,630.90 for the project is

ANNUAL REPORT 2010-2011

proposed to be funded with composition of Debt (Term Loan of Rs. 3,400.00 lacs) and Promoters Contribution (Rs. 2,230.90 lacs). The requisite land development for the proposed project has been completed and the construction of factory sheds, civil structures and other amenities is underway. The capex of Rs. 1127.00 lacs till date has been incurred by deploying internal accruals of the Company and the commercial production is expected to commence in September, 2012.

Future Project

Backward Integration Project at Bobbili (Andhra Pradesh)

The Company's foray into the proposed backward integration by setting up Integrated Steel Plant at Bobbili (Vizianagaram), Andhra Pradesh, is intended to mitigate recurring dependence on outside suppliers for raw materials. The 1st phase of project will encompass setting up of steel making facilities of 3,00,000 MTPA through Electric Arc Furnace route along with Ferro Alloys Plant and Captive Power Plant. The Company has already acquired 250 Acres of land from APIIC Ltd. at a total cost of Rs. 7.42 crores. Preliminary master planning and TER have been completed and requisite approvals for power, incentive from the A.P. State Government and environmental clearance have already been obtained for the said project. The estimated capex for the 1st phase will be around Rs. 250.00 crores which will be funded by mix of promoter's contribution of Rs. 100.00 crores and the bank funding of Rs. 150.00 crores.

Economy & Steel Scenario

The Indian economy during the year under review has been characterized by robust economic growth and steady fiscal consolidation. Inflation continues to be high even though it has come down markedly from where it was at the inception of the year. There are structural challenges concerning economic governance, efficiency in delivery of subsidies and building up infrastructure. Despite these, the economy has emerged with remarkable rapidity from the slowdown caused by the global crisis, with growth of 8.6% in 2010-11.

Indian steel producers have had smooth sailing during the last decade, with demand growth far exceeding supply growth. This was due to easy availability of raw materials like coal and iron ore. As a result, the steel producers enjoyed fat margins. The dynamics of the business are now changing. Falling global demand and rising raw material shortages are posing a threat to the industry. Coal and iron ore are the two main raw materials used for manufacturing steel. Coal India has reduced linkages to the steel industry in the last few years due to sharply rising demand from priority sectors like power. The situation is likely to get worse as large scale power capacities are expected to get commissioned in the coming years, Coal India's production is unlikely to keep pace with demand. Iron ore production is also on a decline. This is due to export ban in Karnataka and increased focus of government agencies in enforcing mining and transportation regulations to curb illegal mining. Production at a number of mines has declined, as they are awaiting renewal of their mining licences. Exports are also on a decline due to increase in export duty. Also high inflation coupled with high interest rate is proving to be extra burden under the prevailing situation. With global crude prices crossing the \$100 mark, the domestic inflationary pressure is bound to aggravate. The Reserve Bank of India (RBI) has begun withdrawing the accommodating policy announced during the economic crisis as the shadows of the recession quickly became a thing of the past. India's financial market has remained steady and continues to strengthen the economy. In sharp contrast, advanced economies are still grappling with uncertainty on account of deficit, high public debt and unemployment. India's GDP growth in 2011-12 is expected to be around 7.50% to 8.00% due to ongoing high inflation and rising rates. Besides, high oil and commodity prices, strife in the Middle East, Sovereign debt problems in the Euro Zone and Fiscal-cum-debt problems of the U.S.A. are adding enhanced

BEEKAY STEEL INDUSTRIES LIMITED

pressure on the slowdown of the economy. In order to ensure the pace of overall economic growth and instill the confidence among the industrial sectors, the prudent fiscal and other reforms like moderate interest rates, rapid clearance of large projects, increased inclusion of rural sector in realising greater savings and investments, strengthening of infrastructure, adoption of cost reduction technologies have to be aggressively followed in the times to come

Going forward, the slowdown in demand and rising costs may decrease profitability of steel producers. Smaller steelmakers may have to resort to production cuts. The bigger steelmakers like SAIL, JSW Steel, and TATA Steel will probably slow down capacity additions which were expected to come on stream this year. There is no possibility of price cuts to improve demand as carbon steel is already being produced at cost levels. But steel companies believe that the slowdown in demand is temporary and demand will bounce back in the coming months.

Opportunities & Threats

Steel sector stands as the essential foundation, which supports the modern economies and its consumption generates a sustainable index to measuring the economic growth. The consumption of steel is pivotal for the the economy to attain a more sustainable future. The importance of steel has risen in the manufacture of lighter and more efficient transport vehicles, renewable energy generation, highly efficient power stations, construction of smart electrical grids, transport infrastructure development or high-energy efficient residential housing and commercial buildings. India stood as the world's fifth largest steel producer in 2010, compared to the eighth position in 2003, and is expected to become the second largest producer of crude steel by 2015 globally. The steel prices started rising steadily after June-July 2010 but increased sharply from January 2011 onwards on account of rising raw material costs and strengthening international demand. Prices of HR coil, HR plates, TMT and Billets, in particular, have increased sharply. International steel prices are expected to rise further in the financial year 2011-12 and are expected to drive domestic steel prices by 5-6%. Growth in the Indian steel sector will continue to be driven by construction, oil & gas, transportation, refining, telecom, ship building, power, automobiles, capital goods, consumer durables and infrastructure sector. Infrastructure sector is a priority sector for the Government and plan funds are sufficiently made available for its growth. The steel industry faces major hurdles relating to project implementation and raw material security. The capacity expansion plans of major steel players (domestic and international) are facing issues related to land acquisition, raw material linkages and environmental clearances resulting in inordinate delay in project implementation, cost overruns and low investor confidence. The industry is facing shortage of coking coal and is largely dependent upon its import.

In your Company, the attainment of optimum productivity accompanied by product enrichment and cost controls encompass the areas where special emphasis is assigned to tread the path of consistent growth. The Company has established itself as the producer and supplier of well-trusted, quality and specialized products range of of Hot-rolled steel sections and Bright bars indigenously. The Company is also harnessing the possibilities of exporting its products where the future scope of demand is immense, The concentration of majority of units in the southern parts of the Country results in the costlier despatches to other states due to increased freight costs which also affects the profitability. The maintenance of high inventory is essential in view of multiple profile rolled products being manufactured in order to cater to diverse customer demands. The Company's main raw material (billet) supplier has been RINL. The end products manufactured by the Company out of these billets inherently carry the high credibility in respects of quality and edge to the Company over its peers. However, such dependence has the potential risk of affecting its bottom-line performance in case of unforeseen and upward price revision of raw materials.

ANNUAL REPORT 2010-2011

Segment-wise Or Product-wise Performance

The Company's operations consist of manufacturing hot rolled sections and bright bars of different sizes, shapes, compositions and also conversions on behalf of other steel players. The production during the year under review has stood at 2,86,180 MT including conversion of 1,85,969 MT) against 2,57,210 MT (including conversion of 1,69,912 MT) in the previous year. The Company's deliveries of own manufactured steel products in quantity terms accelerated to 1,11,312 MT in 2010-11 as compared to 82,539 MT in the previous year which showed an YOY growth of 34.85%, while conversion deliveries escalated to 1,85,969 MT as against 1,69,912 MT in the previous year marking annualised quantity growth of almost 10%. The increased levels of operations at both manufacturing and conversions fronts and better price realisations have helped the Company to attain a remarkable rise in the overall turnover which stood to the tune of Rs. 45,857.99 lacs in 2010-11 as compared to Rs. 33,220.61 lacs in 2009-10. The higher operation levels have also resulted in raising the bottom-line performance of the Company, despite increased power costs for both Furnace Oil and Electricity. With sustained productions and further quantum additions to conversion operations, the Company is confident of maintaining the requisite growth in profitability.

Outlook

India's steel industry plays a significant role in the country's economic growth and enjoys a stronghold in the traditional sectors, such as infrastructure & construction, automobile, transportation, industrial applications, among others. With economic expansion, application of diverse steel grades and varieties will grow. The country's steel sector has acquired considerable prestige on the global steel map with its giant steel mills, acquisition of global scale capacities, continuous modernisation and upgradation of old plants, improving energy efficiency and backward integration into global raw material sources.

The steel consumption in India is expected to grow significantly in the coming years as per capita finished steel consumption is far less than its regional counterparts. Demand for steel in India is expected to grow at a CAGR of 10-12% in the financial year 2011-12 to financial year 2014-15. However, since the inception of financial year 2011-12, the Indian economy has been witnessing high inflation, uneven industrial growth, falling investments and rising interest rates. RBI's continued efforts by way of aggressive monetary measures to control inflation have their own risk of tipping the economy into decelerating mode. Piercing interest rate and prevailing low industrial sentiment are resulting in falling investments thus obstructing the pace of growth in power, telecom, roads, iron and steel, cement and similar core industries.

Your Company has already undertaken enhanced conversions for TATA Steel Ltd. at Jamshedpur while increasing levels of own manufacturing at Visakhapatnam and Chengalpeta (Tamilnadu). It is also entering into forward integration to manufacture TLTs at Pydivimavaram, Visakhapatnam. Besides, the upcoming TMT manufacturing at Parwada (Visakhapatnam) will result in increased demand for the Company's various sections of products.

Internal Control Systems And Their Adequacy

In your Company the generation and flow of Information, reports, records, documents, transaction statements etc. is a continuous process as an integral part of the organisation to serve as a strong foundation for accelerated decision-making. Reliability is placed on such inputs which represent the foundation for effective decisions. The Company has efficient team of professionally qualified Finance personnel to manage, execute and oversee the propriety of accounting and accuracy in the financial information to the upper layer of the Management. The Company has brought most of its units under ERP ensuring instant and timely availability of most of the operational and financial information while greatly reducing the time and efforts in the consolidation, assimilation of data for requisite purposes.

Financial Performance

During the year under review, you Company has attained a turnover of Rs. 45,857.99 lacs and profit of Rs. 2,799.77 lacs before taxation. In spite of high finance costs and administrative costs, the profitability has improved due to increased levels of conversions and improved capacity utilisation at the existing units. The Company is confident to achieve the growth in supplies to automobile sector, infrastructure and Railways, which will further improve both the top-line performance as well as profitability of the Company.

Human Resource Management & Industrial Relations

The Company continuously recognises the significance and role of HR in attaining the pre-set organisational goals of the organisations and therefore, the Management works closely with the in-house man power to create a high performance pan-organisational work culture. For sustaining the Company's growth trajectory, HR focuses on the attracting, acquiring, developing and nurturing high potential talent at different levels of the organisation. The selection and induction process of professionals from financial and technical backgrounds is carefully filtered considering the suitability and efficiency of the employees. Due emphasis on leadership capability development is laid by encouraging the employees to attain the managerial goals and properly incentivising them for the results shown and efforts put in. In order to maintain a competitive market positioning on reward management to retain best talent in the Company, the rotational distribution of works has been very meticulously adhered to. Further, necessary compatibility in pay out has also been ensured. Close interaction with leadership team and employees at all levels has been a continuous process in the Company. The pay-outs in the form of education, medical and other allowances are properly given by the Company and conducive people policies have been continuously improved to match people's aspirations. The industrial relationships during the year under review have been healthy and cordial. The total number of employees in the Company on 31st March, 2011 was 1173.

Corporate Social Responsibility
