Risk Factors

Following are the top 10 risk factors:

1. One of our equity schemes and eight of our debt schemes have underperformed relative to their respective benchmark indices over a one-year period ended Fiscal 2024. If our investment schemes underperform, our AUM could decrease, negatively impacting our results of operations.
2. Unfavourable market changes and economic downturns may result in customer withdrawals or a decrease in customer transactions, resulting in a decline in our assets under management and management fees, which could significantly and negatively influence our revenue from operations, business prospects, financial conditions, and results of operations.
3. The performance of our equity-oriented schemes has a significant impact on our assets under management and consequently our revenue from operations. As of December 31, 2024, December 31, 2023, March 31, 2024, March 31, 2023 and March 31, 2022, 93.16%, 90.85%, 91.66%, 88.43% and 86.16% of our quarterly average assets under management were from equity-oriented schemes. Underperformance by our equity-oriented schemes may have a disproportionate adverse impact on our business and revenue.
4. We are dependent on several key personnel, including our Key Managerial Personnel and Senior Management Personnel as well as our investment team, and the loss of or our inability to attract or retain such persons could adversely affect our business, financial condition, results of operations and cash flows.
5. We may not be able to sustain our historical growth in AUM or revenue from operations or profitability.
6. Our AUM could be adversely affected by a lack of suitable investment opportunities or our decision to discontinue certain schemes, which could have an adverse impact of our business, revenue from operations and profitability.
7. We generate a portion of our revenue from operations from offshore advisory services. In the event our agreements for providing such advisory services are terminated, our business, revenue from operations and profitability will be affected.
8. As of December 31, 2024, December 31, 2023 and March 31, 2024, March 31, 2023 and March 31, 2022, 75.40%, 76.88%, 76.24%, 78.04% and 79.96% of our monthly average assets under management were generated from third-party distributors. If we are unable to maintain our existing relationship with our third-party distributors or attract new distributors, our business, competitiveness, results of operations and financial condition may be adversely impacted.
9. Our business is subject to extensive regulation, including periodic inspections by the Securities and Exchange Board of India (“SEBI”), and our non-compliance with existing regulations or SEBI’s observations could expose us to penalties and restrictions in the business that we can undertake.
10. As of December 31, 2024 and December 31, 2023 and March 31, 2024, March 31, 2023 and March 31, 2022, 61.41%, 61.86%, 61.77%, 64.64% and 65.37% of our total AUM were generated from customers located in the Indian states/union territory of Maharashtra, Gujarat, Karnataka, Delhi, and Tamil Nadu. A decrease in our AUM from these states/union territory could adversely impact our business and revenue from operations.

Specific attention of the investors is invited to “*Risk Factors*” beginning on page 34 to have an informed view before making an investment decision in the Offer.

Reference in this Draft Red Herring Prospectus to the terms Fiscal or Fiscal Year or Financial Year is to the 12 months ended on March 31 of such year, unless otherwise specified.

The degree to which the financial information included in this Draft Red Herring Prospectus will provide meaningful information is entirely dependent on the reader’s level of familiarity with Indian accounting policies and practices, Ind AS, the Companies Act and SEBI ICDR Regulations. Any reliance by persons not familiar with the aforementioned policies and laws on the financial disclosures presented in this Draft Red Herring Prospectus should be limited. There are significant differences between Ind AS, the Indian GAAP, U.S. GAAP and IFRS. Our Company does not provide a reconciliation of its financial statements with Ind AS, the Indian GAAP, IFRS or U.S. GAAP requirements. Our Company has not attempted to explain those differences or quantify their impact on the financial data included in this Draft Red Herring Prospectus and it is urged that you consult your own advisors regarding such differences and their impact on our financial data.

For further details in connection with risks involving differences between Ind AS and other accounting principles, see “*Risk Factors – Internal Risks - Significant differences exist between Ind AS and other accounting principles*,”

such as U.S. GAAP and IFRS, which investors may be more familiar and may consider them material to their assessment of our financial condition.” on page 68.

Unless the context otherwise requires or indicates, any percentage or amounts (excluding certain operational metrics), with respect to financial information of our Company, as set forth in “*Risk Factors*”, “*Our Business*”, “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” beginning on pages 34, 221 and 379, respectively, and elsewhere in this Draft Red Herring Prospectus have been calculated on the basis of figures derived from the Restated Financial Information.

In this Draft Red Herring Prospectus, any discrepancies in any table between the total and the sums of the amounts listed are due to rounding off. Except as otherwise stated, all figures derived from our Restated Financial Information in decimals have been rounded off to the second decimal and all the percentage figures have been rounded off to two decimal place. In certain instances, (i) the sum or percentage change of such numbers may not conform exactly to the total figure given; and (ii) the sum of the numbers in a column or row in certain tables may not conform exactly to the total figure given for that column or row. Further, any figures sourced from third-party industry sources may be rounded off to other than two decimal points to conform to their respective sources.

Non-Generally Accepted Accounting Principles Financial Measures (“Non-GAAP Measures”)

In evaluating our business, we consider and use non-GAAP financial measures and key performance indicators, such as EBITDA, cost to income ratio, return on net worth, return on equity, profit after tax margin and dividend payout ratio which have been included in this Draft Red Herring Prospectus. The presentation of these non-GAAP financial measures and key performance indicators is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with Ind AS. We present these non-GAAP financial measures and key performance indicators because they are used by our management to evaluate our operating performance and formulate business plans.

These non-GAAP financial measures are not defined under Ind AS and are not presented in accordance with Ind AS. The non-GAAP financial measures and key performance indicators have limitations as analytical tools. Further, these non-GAAP financial measures and key performance indicators may differ from the similar information used by other companies, including peer companies, and therefore their comparability may be limited. Therefore, these metrics should not be considered in isolation or construed as an alternative to profit before tax, net earned premiums, gross earned premiums or any other measure of performance or as an indicator of our operating performance, liquidity or profitability or results of operations. In addition, these Non-GAAP Measures are not a standardized term, hence a direct comparison of similarly titled Non-GAAP Measures and other operating matrices between companies may not be possible. Although the Non-GAAP Measures and other operating matrices are not a measure of performance calculated in accordance with applicable accounting standards, our Company’s management believes that it is useful to an investor in evaluating us because it is a widely used measure to evaluate a company’s operating performance. For further details, see “*Risk Factor – Internal Risks - We have in this Draft Red Herring Prospectus included certain non-generally accepted accounting principle financial measures (“Non-GAAP”) and certain other industry measures related to our operations and financial performance. These Non-GAAP measures and industry measures may vary from any standard methodology that is applicable across the industry in which we operate, and therefore may not be comparable with financial or industry related statistical information of similar nomenclature computed and presented by other companies.” on page 67.*

FORWARD-LOOKING STATEMENTS

This Draft Red Herring Prospectus contains certain statements which are not statements of historical fact and may be described as “forward-looking statements”. These forward-looking statements include statements which can generally be identified by words or phrases such as “aim”, “anticipate”, “are likely”, “believe”, “continue”, “can”, “could”, “expect”, “estimate”, “intend”, “may”, “likely”, “objective”, “plan”, “propose”, “will continue”, “seek to”, “will achieve”, “will likely”, “will pursue” or other words or phrases of similar import. Similarly, statements that describe the strategies, objectives, plans or goals of our Company are also forward-looking statements. All statements regarding our expected financial conditions, results of operations, business plans and prospects are forward-looking statements. These forward-looking statements include statements as to our business strategy, plans, revenue and profitability (including, without limitation, any financial or operating projections or forecasts) and other matters discussed in this Draft Red Herring Prospectus that are not historical facts. However, these are not the exclusive means of identifying forward-looking statements.

These forward-looking statements are based on our current plans, estimates and expectations and actual results may differ materially from those suggested by such forward-looking statements. All forward-looking statements are subject to risks, uncertainties, expectations and assumptions about us that could cause actual results to differ materially from those contemplated by the relevant forward-looking statement.

Actual results may differ materially from those suggested by the forward-looking statements due to risks or uncertainties associated with our expectations with respect to, but not limited to, regulatory changes pertaining to the industry in which our Company operates and our ability to respond to them, our ability to successfully implement our strategy, our growth and expansion, technological changes, our exposure to market risks, general economic and political conditions in India and globally which have an impact on our business activities, investments, or the industry in which we operate, the monetary and fiscal policies of India and globally, inflation, deflation, unanticipated turbulence in interest rates, foreign exchange rates, equity prices or other rates or prices, the performance of the financial markets in India and globally, changes in domestic laws, regulations and taxes, changes in competition in the industry in which we operate and incidents of any natural calamities and/or acts of violence.

Certain important factors that could cause actual results to differ materially from our Company’s expectations include, but are not limited to, the following:

1. One of our equity schemes and eight of our debt schemes have underperformed relative to their respective benchmark indices over a one-year period ended Fiscal 2024. If our investment schemes underperform, our AUM could decrease, negatively impacting our results of operations.
2. Unfavourable market changes and economic downturns may result in customer withdrawals or a decrease in customer transactions, resulting in a decline in our AUM and management fees, which could significantly and negatively influence our revenue from operations, business prospects, financial conditions, and results of operations.
3. The performance of our equity-oriented schemes has a significant impact on our assets under management and consequently our revenue from operations. As of December 31, 2024, December 31, 2023, March 31, 2024, March 31, 2023 and March 31, 2022, 93.16%, 90.85%, 91.66%, 88.43% and 86.16% of our quarterly average assets under management were from equity-oriented schemes. Underperformance by our equity-oriented schemes may have a disproportionate adverse impact on our business and revenue.
4. We are dependent on several key personnel, including our Key Managerial Personnel and Senior Management Personnel as well as our investment team, and the loss of or our inability to attract or retain such persons could adversely affect our business, financial condition, results of operations and cash flows.
5. We may not be able to sustain our historical growth in AUM or revenue from operations or profitability.
6. Our AUM could be adversely affected by a lack of suitable investment opportunities or our decision to discontinue certain schemes, which could have an adverse impact of our business, revenue from operations and profitability.
7. We generate a portion of our revenue from operations from offshore advisory services. In the event our agreements for providing such advisory services are terminated, our business, revenue from operations and

profitability will be affected.

8. As of December 31, 2024, December 31, 2023 and March 31, 2024, March 31, 2023 and March 31, 2022, 75.40%, 76.88%, 76.24%, 78.04% and 79.96% of our monthly average assets under management were generated from third-party distributors. If we are unable to maintain our existing relationship with our third-party distributors or attract new distributors, our business, competitiveness, results of operations and financial condition may be adversely impacted.
9. Our business is subject to extensive regulation, including periodic inspections by the Securities and Exchange Board of India (“SEBI”), and our non-compliance with existing regulations or SEBI’s observations could expose us to penalties and restrictions in the business that we can undertake.
10. As of December 31, 2024 and December 31, 2023 and March 31, 2024, March 31, 2023 and March 31, 2022, 61.41%, 61.86%, 61.77%, 64.64% and 65.37% of our total AUM were generated from customers located in the Indian states/union territory of Maharashtra, Gujarat, Karnataka, Delhi, and Tamil Nadu. A decrease in our AUM from these states/union territory could adversely impact our business and revenue from operations.

For further discussion of factors that could cause our actual results to differ from our estimates and expectations, see “Risk Factors”, “Our Business” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on pages 34, 221 and 379, respectively. By their nature, certain market risk disclosures are only estimates and could be materially different from what actually occurs in the future. As a result, actual gains or losses could materially differ from those that have been estimated.

We cannot assure investors that the expectations reflected in these forward-looking statements will prove to be correct. Given these uncertainties, investors are cautioned not to place undue reliance on such forward-looking statements and not to regard such statements as a guarantee of our future performance.

Forward-looking statements reflect the current views of our Company as of the date of this Draft Red Herring Prospectus and are not a guarantee of future performance. These statements are based on our management’s beliefs, assumptions, current plans, estimates and expectations, which in turn are based on currently available information. Although we believe the assumptions upon which these forward-looking statements are based are reasonable, any of these assumptions could prove to be inaccurate, and the forward-looking statements based on these assumptions could be incorrect.

Neither our Company, our Directors, our Promoters, the Book Running Lead Managers, the Syndicate Members nor any of their respective affiliates or advisors have any obligation to update or otherwise revise any statements reflecting circumstances arising after the date hereof or to reflect the occurrence of underlying events, even if the underlying assumptions do not come to fruition. In accordance with the SEBI ICDR Regulations, our Company will ensure that investors in India are informed of material developments pertaining to our Company and the Equity Share forming part of the Offer from the date of this Draft Red Herring Prospectus until the time of the grant of listing and trading permission by the Stock Exchanges.

MAAUM is defined as the monthly average assets under management for the month ending on the relevant dates across our schemes.

This Draft Red Herring Prospectus also contains certain forward-looking statements that involve known and unknown risks, assumptions, estimates and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including but not limited to the considerations described below and elsewhere in this Draft Red Herring Prospectus. For details, see “Forward-Looking Statements” on page 32. INTERNAL RISKS

Risks relating to our Business and Operations

1. *One of our equity schemes and eight of our debt schemes have underperformed relative to their respective benchmark indices over a one-year period ended Fiscal 2024. If our investment schemes underperform, our AUM could decrease, negatively impacting our results of operations.*

The performance of our schemes is critical to retaining existing customers and attracting new customers, which is an important factor in our AUM's growth. Our investment strategies can perform poorly for several reasons, including general market conditions, competition, product offerings, investment decisions that we make, and the performance of the companies in which we invest on behalf of our schemes. As our revenue is largely dependent on the value and composition of AUM, any decrease in those aspects of our AUM will likely result a decline in our revenue.

The investment strategies of our schemes may lead them to underperform their relevant benchmarks, or similar investment products offered by our competitors. For instance, as of December 31, 2024, out of the 25 schemes that we managed, one of our equity schemes and eight of our debt schemes have underperformed relative to their respective benchmark indices over a one-year period ended Fiscal 2024.

The table below provides details of our schemes that have underperformed relative to their respective benchmark indices over a one-year period ended Fiscal 2024:

Name of the Scheme Relevant Benchmark	Relevant Benchmark	Inception Date	Total AUM as of December 31, 2024 (₹ billion)
Canara Robeco Small Cap Fund	NIFTY Smallcap 250 Total Return Index	February 15, 2019	125.44

Canara Robeco Corporate Bond Fund	CRISIL Corporate Debt A-II Index	February 7, 2014	1.33
Canara Robeco Gilt Fund	CRISIL Dynamic Gilt Index	December 29, 1999	1.39
Canara Robeco Short Duration Fund	CRISIL Short Duration Debt A-II Index	April 25, 2011	3.43

Note: Scheme underperformance is based on 1 year return of regular plans of schemes to respective 1 year benchmark returns.

For further information, see “Our Business – Mutual Fund Schemes” on page 235.

Any such periodic underperformance, either on an absolute or relative basis, may cause our AUM to decline, which could adversely affect the investment management fees that we earn and our revenue and consequently, may adversely affect our results of operations and financial condition.

2. *Unfavourable market changes and economic downturns may result in customer withdrawals or a decrease in customer transactions, resulting in a decline in our assets under management and management fees, which could significantly and negatively influence our revenue from operations, business prospects, financial conditions, and results of operations.*

Our business, financial condition, revenue from operations, cash flows, and future prospects are heavily influenced by market fluctuations and overall economic conditions, especially the macroeconomic environment in India, which is where we operate and generate our revenue from operations. Our success is reliant on customer

confidence in the broader economy, economic growth rates, household saving trends, and consumer perspectives on financial savings in particular, within India.

Market fluctuations in India and globally may impact our results of operations in a variety of ways, including:

- **AUM Decrease:** If the Indian equity and/or debt markets decline, it may impair the performance of our schemes, which likely will result in a decrease in net cash inflows and a reduction in our AUM. The equity and debt markets in India and globally are, and may continue to be, volatile, which could impact our AUM. On account of a decrease in our AUM, we may experience a fluctuation in our management fees which we charge for managing the assets. There can be no assurance that our AUM and consequently our management fees will not decline going forward on account of a decline in equity and/or debt markets in India.

The table below sets forth details of our total AUM and management fee as of/for the relevant periods/Fiscals:

Particulars	As of / For the nine months ended December 31, 2024	As of / For the nine months ended December 31, 2023	As of / For the year ended March 31, 2024	As of / For the year ended March 31, 2023	As of / For the year ended March 31, 2022
Total Closing AUM (₹ billion)	1,073.32	839.29	887.64	625.44	498.67
Management fee (₹ million)	2,509.04	1,797.86	2,610.91	1,846.44	1,488.84
Total revenue from operations (₹ million)	3,028.92	2,229.05	3,180.90	2,045.95	1,642.17
Management fees as a percentage of revenue from operations (%)	82.84	80.66	82.08	90.25	90.66

- **Customer withdrawals and redemptions:** During periods of market volatility or unfavourable conditions, we may face increased rates of customer withdrawals. Given that our operations predominantly revolve around India-based retail investment schemes with mostly Indian customers, fluctuating or negative economic conditions, both within India and globally, might reduce the disposable income available to these customers for mutual fund investments. This scenario could lead to changes in investment or savings habits in India, resulting in decreased sales and elevated redemption rates. Furthermore, shifts in customer demographics and perceptions regarding our investment offerings, or mutual funds, could adversely impact our AUM and revenue from operations. In cases where redemption requests surpass the available assets for liquidation, we might have to halt redemptions or resort to borrowing funds to satisfy redemption demands. Additionally, customers may decide not to reinvest with us following the conclusion of specific investment transactions and may opt for other investment alternatives which could result in a reduction in our AUM. While there have been no such instances during the nine months ended December 31, 2024, and December 31, 2023, or Fiscals 2024, 2023 and 2022, where we had to halt redemptions or resort to borrowings funds for redemption demands, we cannot assure you that such instances will not happen in future particularly if there is a decline in India equity or debt markets.
- **Decline in systematic transactions:** A substantial share of subscriptions from individual retail customers is generated through systematic transactions, i.e., regular and planned investments into our schemes at fixed intervals through systematic investment plans which offer the advantage of steadily and consistently boosting our AUM. The table below sets forth details of our total SIP count and the total SIP folio count as of December 31, 2024, December 31, 2023, March 31, 2024, March 31, 2023, and March 31, 2022:

Particulars	As of December 31, 2024	As of December 31, 2023	As of March 31, 2024	As of March 31, 2023	As of March 31, 2022
Total SIP count (in million)*	2.35	2.33	2.29	2.32	1.43

Particulars	As of December 31, 2024	As of December 31, 2023	As of March 31, 2024	As of March 31, 2023	As of March 31, 2022
includes STP) (₹ billion)					

* Also see, “– The total SIP count included in this Draft Red Herring Prospectus as of December 31, 2024, and December 31, 2023 and as of March 31, 2024, March 31, 2023, and March 31, 2022 are based on historical reporting criteria and as reported based on the data received from the registrar and share transfer agent (“RTA”). In the event the criteria are modified by the registrar and share transfer agent, our total SIP count may either increase or decrease from the amount as disclosed in this Draft Red Herring Prospectus and accordingly may not be comparable to our historical numbers.” on page 61.

However, volatile market conditions and unfavourable economic performance, whether due to local or global economic factors, could lead to a decrease in retail customers investing in mutual funds, either through systematic means or otherwise. This scenario could, in turn, result in a reduction of inflows through these systematic transactions.

Any of these factors could have a material adverse effect on our business, results of operations, financial condition and business prospects.

3. ***The performance of our equity-oriented schemes has a significant impact on our assets under management and consequently our revenue from operations. As of December 31, 2024, December 31, 2023, March 31, 2024, March 31, 2023 and March 31, 2022, 93.16%, 90.85%, 91.66%, 88.43% and 86.16% of our quarterly average assets under management were from equity-oriented schemes. Underperformance by our equity-oriented schemes may have a disproportionate adverse impact on our business and revenue.***

As of December 31, 2024, out of the 25 schemes that we managed, 14 are equity-oriented schemes (inclusive of 12 equity schemes and two hybrid schemes) and 11 debt-oriented schemes (inclusive of 10 debt schemes and one hybrid scheme) to cater to the diverse requirements of our investor base.

The table below sets forth details of our QAAUM split across asset-wise, i.e., equity-oriented, and debt-oriented schemes as of March 31, 2024, March 31, 2023 and March 31, 2022:

Asset Class	As of March 31, 2024		As of March 31, 2023		As of March 31, 2022	
	Amount (₹ billion)	Percentage of total QAAUM (%)	Amount (₹ billion)	Percentage of total QAAUM (%)	Amount (₹ billion)	Percentage of total QAAUM (%)
Equity-Oriented	798.11	91.66	552.53	88.43	413.19	86.16
Debt-Oriented	72.59	8.34	72.32	11.57	66.37	13.84
Total	870.70	100.00	624.85	100.00	479.56	100.00

The table below sets forth details of our QAAUM split across asset-wise, i.e., equity-oriented, and debt-oriented schemes as of December 31, 2024, and December 31, 2023:

Asset Class	As of December 31, 2024		As of December 31, 2023	
	Amount (₹ billion)	Percentage of total QAAUM (%)	Amount (₹ billion)	Percentage of total QAAUM (%)
Equity-Oriented	1,009.59	93.16	721.07	90.85
Debt-Oriented	74.07	6.84	72.58	9.15
Total	1,083.66	100.00	793.65	100.00

Concentration in equity-oriented schemes poses significant risk factors for our Company. Primarily, equity markets are inherently volatile and subject to fluctuations due to economic, political, and social factors. This unpredictability can adversely affect the value of our equity investments, leading to potential declines in AUM during market downturns. Furthermore, a portfolio heavily skewed towards equity, such as ours, increases vulnerability to sector-specific risks and market sentiments. Additionally, equity-oriented schemes often entail higher management costs due to the active involvement required in market analysis and strategy formulation, which can place a financial strain on our Company during bear markets. If we become subject to additional restrictions in future regarding the asset classes that we are permitted to invest in, the portfolio of our schemes

and products may not be sufficiently diversified to mitigate the effects of potential concentration risk. For further details on the regulation of our investments, see “*Key Regulations and Policies*” on page 258.

Accordingly, on account of our concentration towards equity-oriented schemes, any underperformance of such schemes on account of market volatility may have a disproportionate adverse impact on our business and revenue from operations.

4. ***We are dependent on several key personnel, including our Key Managerial Personnel and Senior Management as well as our investment team, and the loss of or our inability to attract or retain such persons could adversely affect our business, financial condition, results of operations and cash flows.***

We are highly dependent on our Key Managerial Personnel (“KMPs”), Senior Management (“SMPs”) and our investment team for strategic direction and to manage our operations and meet future business challenges. The loss of, or inability to attract or retain, such persons could adversely affect our business, financial condition, results of operations and cash flows. For details in relation to the experience of our KMPs and SMPs, see “*Our Management- Key Managerial Personnel*” and “*Our Management – Senior Management*” on page 298, respectively. If one or more of these individuals were unwilling or unable to continue in their present positions, we may not be able to replace them with persons of comparable skill and expertise promptly, which could have an adverse effect on our business, financial condition, results of operations and cash flows.

The table below provides the number of our employees, investment team, KMPs and SMPs as of December 31, 2024, December 31, 2023, March 31, 2024, 2023 and 2022, respectively, along with their attrition rate for the nine months ended December 31, 2024 and December 31, 2023 and Fiscals 2024, 2023 and 2022:

Particulars	As of December 31, 2024 / Nine months ended December 31, 2024	As of December 31, 2023 / Nine months ended December 31, 2023	As of March 31, 2024 / Fiscal 2024	As of March 31, 2023 / Fiscal 2023	As of March 31, 2022 / Fiscal 2022
Number of employees	291	271	267	250	245
Number of KMPs and SMPs	8	8	8	7	7
Number of investment team personnel (including debt and equity investment team)	25	24	24	24	22
Employee attrition rate (%)	8.20	5.56	8.53	17.43	12.86
KMPs and SMPs attrition rate (%)	-	-	-	14.29	-
Investment team attrition rate(%)	7.41	7.69	7.69	7.69	26.67

Notes:

Respective attrition rate is calculated as number of exits/(opening headcount plus new joiners plus transfer in less transfer out).

We may take a relatively longer period of time to hire and train replacement personnel when skilled personnel terminate their employment with us. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting and retaining skilled employees that our business requires. If we are unable to hire and train replacement personnel in a timely manner or increase our levels of employee compensation to remain competitive, our business, financial results, results of operations and cash flows may be adversely affected. For further details in relation to changes in our KMPs and SMPs, see “*Our Management – Changes in our Key Managerial Personnel and Senior Management in the three immediately preceding years.*” on page 299.

Furthermore, competition for professionals with the necessary experience, reputation and relationships in our industry is intense and we may not be successful in recruiting and retaining the required personnel that perform critical functions in our Company. In addition, our investment professionals and senior sales and investor service personnel have direct contact with our investors and certain distributors. If such personnel were to leave, they may seek to solicit our investors after termination of their employment, and therefore the loss of these personnel could also create a risk that we lose AUM.

5. ***We have licensed the trademarks “Canara” and “Robeco” from Canara Bank and Robeco Holding, respectively and the termination of the trademark license agreements could adversely impact our business and results of operations.***

We do not own the trademarks “Canara” and “Robeco”, which are registered under various classes of the Trademarks Act, 1999, in favour of our Promoters, who own 100% of the shareholding of our Company as of the date of this Draft Red Herring Prospectus.

Pursuant to a trademark license agreement dated September 26, 2007 between Canara Bank, one of our Promoters, and our Company (“**Canara 2007 Agreement**”), Canara Bank granted a non-exclusive, non-transferable, royalty free license to our Company to use the “Canara Bank” trademark and logo (“**Canara Trademark**”) for the purpose of, including but not limited to, preparing, branding, marketing and distributing the fund units of the Canara Robeco Mutual Fund (“**CRMF**”) in India. Subsequently, pursuant to a trademarks license agreement dated April 22, 2025 (“**Canara 2025 Agreement**”) amongst Canara Bank, our Company and CRMF Trustee Private Limited (together with our Company, the “**Licensees**”), the Canara 2007 Agreement will terminate upon completion of the Offer, and the Licensees shall be provided a non-exclusive, non-transferable, non-assignable, non-sublicensable, royalty-free license to use the Canara Trademark, only in combination with the Robeco Trademark (defined below), and consistent with its past usage for the purposes of preparing, branding, marketing and distributing fund units of CRMF, as part of their corporate names (as applicable), domain names and in their corporate material. In accordance with the Canara 2025 Agreement, our Company has agreed to formulate a brand transition plan with an objective to transition to a new brand within the term of the Canara 2025 Agreement such that the new brand does not incorporate any elements of the Canara Trademark or marks which are deceptively similar to the Canara Trademark. The Canara 2025 Agreement is a fixed term agreement and shall terminate, amongst other things, upon the expiration of a period of two years from the date of the agreement, However, in the event either or both of the Licensees have not transitioned away from the Canara Trademark to a new brand within such time, the Canara 2025 Agreement may be extended by one year, in accordance with the terms of the Canara 2025 Agreement.

Furthermore, pursuant to a trademark license agreement dated September 26, 2007 between OCE (formerly known as Robeco Groep N.V.) one of our Promoters, and our Company (“**Robeco 2007 Agreement**”), and subsequently, (upon all the Robeco trademarks being transferred from OCE to Robeco Holding B.V. (“**Robeco Holding**”), an inter-company trademark license agreement dated June 1, 2017 (“**Robeco 2017 Agreement**”) between Robeco Holding, our Company and certain other parties, Robeco Holding granted a non-exclusive, non-transferable, royalty free license to our Company to use the “Robeco” trademark and logo (“**Robeco Trademark**”) for the purpose of, including but not limited to, preparing, branding, marketing and distributing the fund units of CRMF in India. Subsequently, pursuant to a trademarks license agreement dated April 24, 2025 (“**Robeco 2025 Agreement**”) amongst Robeco Holding, our Company and CRMF Trustee Private Limited (together with our Company, the “**Licensees**”), the Robeco 2007 Agreement and Robeco 2017 Agreement will terminate with effect upon completion of the Offer, and the Licensees shall be provided a non-exclusive, non-transferable, non-assignable, non-sublicensable, royalty-free license to use the Robeco Trademark only in combination with the Canara Trademark, and consistent with its past usage for the purposes of preparing, branding, marketing and distributing fund units of CRMF, as part of their corporate names (as applicable), domain names and in their corporate materials. In accordance with the Robeco 2025 Agreement, our Company has agreed to formulate a brand transition plan with an objective to transition to a new brand within the term of the Robeco 2025 Agreement such that the new brand does not incorporate any elements of the Robeco Trademark or marks which are deceptively similar to the Robeco Trademark. The Robeco 2025 Agreement is a fixed term agreement and shall terminate, amongst other things, upon the expiration of a period of two years from the date of the agreement, However, in the event either or both of the Licensees have not transitioned away from the Robeco Trademark to a new brand within such time, the Robeco 2025 Agreement may be extended by one year, in accordance with the terms of the Robeco 2025 Agreement.

For details, see “*Government and Other Approvals – Intellectual Property*” and “*History and Certain Corporate Matters – Shareholders’ agreements and other material agreements*” on pages 418 and 277, respectively.

If our Company is unable to transition away from the Canara Trademark and Robeco Trademarks to new brand(s) within such time as set out under the Canara 2025 Agreement and the Robeco 2025 Agreement, or if these agreements are terminated prior to such transition, this could prevent us from being able to market and distribute our schemes under these arrangements, and any subsequent amendments to the Robeco 2025 Agreement and Canara 2025 Agreement may not be favourable to us, both of which in turn will adversely impact our business, financial conditions and results of operations.

6. *We may not be able to sustain our historical growth in assets under management or revenue from operations or profitability.*

We have witnessed growth in AUM, revenue from operations and profitability during the nine months ended December 31, 2024, and December 31, 2023, and Fiscals 2024, 2023 and 2022, but there can be no guarantee that this growth will continue. The table below sets forth details of our total AUM, total revenue from operations and profit for the year/period as of/for the relevant periods:

Particulars	As of / For the nine months ended December 31, 2024	As of / For the nine months ended December 31, 2023	As of / For the year ended March 31, 2024	As of / For the year ended March 31, 2023	As of / For the year ended March 31, 2022
Total AUM (₹ billion)	1,073.32	839.29	887.64	625.44	498.67
Total revenue from operations (₹ million)	3,028.92	2,229.05	3,180.90	2,045.95	1,642.17

The investment outcomes we deliver for our customers are subject to market risks and volatility. During certain phases, our investment products have thrived due to lucrative opportunities and favourable economic and market conditions. Conversely, there have been times when unfavourable economic and market environments have hindered our investment prospects and returns. Such adverse conditions could recur, and there is a possibility that we may be unable to distinguish and capitalize on profitable investment prospects within our present or future funds, which could negatively impact our revenue, results of operations, and overall business outlook.

We will continue to invest in attracting and retaining skilled investment professionals, distributors as well as opening new branches to increase our geographical presence and undertaking marketing initiatives to attract new customers. However, there can be no assurance that such investment will result into an increase in our total AUM, revenue and profitability, which could adversely impact our business, results of operations and profitability.

7. *Our assets under management could be adversely affected by a lack of suitable investment opportunities or our decision to discontinue certain schemes, which could have an adverse impact of our business, revenue from operations and profitability.*

Our AUM could decline due to several factors, including unavailability of suitable investment opportunities that align with our strategic objectives and customer expectations. Unavailability of appropriate opportunities may become a challenge to sustain or grow our AUM effectively. Furthermore, the potential closure or discontinuation of certain schemes, products, and services also poses a risk to our AUM growth. These closures may arise due to regulatory changes, shifts in market demand, or strategic business decisions. Each of these scenarios could result in a diminished portfolio of offerings, potentially leading to reduced customer investment and withdrawal of funds. These factors could adversely impact our capacity to maintain a competitive edge in our industry, potentially impacting our revenue from operations and long-term business growth.

Furthermore, if we are unable to identify sufficient investment opportunities, our investment performance may decline, and we may have to change the investment objectives of affected schemes. Furthermore, our investment strategy may fall out of favor for various reasons including underperformance and competition which could lead to a decline in assets managed by us. Any inability to promptly re-calibrate or formulate new strategies for investments will adversely affect the growth of our AUM and have an adverse impact on our revenue from operations and overall profit. While we have not discontinued any of our schemes or experienced decline in our AUM during the nine months ended December 31, 2024 and December 31, 2023, or in Fiscals 2024, 2023 and 2022, however, there can be no assurance that going forward, we will not discontinue any of our schemes on account of diminished returns or volatility in markets, which could have an adverse impact on our AUM, business, results of operations and profitability.

8. *We generate a portion of our revenue from operations from offshore advisory services. In the event our agreements for providing such advisory services are terminated, our business, revenue from operations and profitability will be affected.*

We provide offshore advisory services as Indian investment adviser to Robeco Hong Kong Limited (“**Robeco HK**”), one of the members of our Promoter Group and our Group Companies, which acts as an investment manager in the management of investment and re-investment of the assets (including) cash of the various funds it manages. Under the terms of the relevant Indian Investment Advisory Agreements (“**Advisory Agreements**”), we provide the following services to Robeco HK, which, *inter-alia*, includes evaluation of current economic conditions; recommendations regarding the investment portfolio; continuous review and monitoring of existing portfolio and preparation of status reports and analysis and presentation of recommended investments. Under the terms of the relevant Advisory Agreements, we receive advisory fees from the investment management fees received by Robeco HK.

The table below sets forth advisory fees generated for Fiscals 2024, 2023 and 2022 from Robeco HK to our total revenue from operations:

Particulars	For Fiscals 2024		For Fiscals 2023		For Fiscals 2022	
	Amount (₹ million)	Percentage of Total Revenue from Operations (%)	Amount (₹ million)	Percentage of Total Revenue from Operations (%)	Amount (₹ million)	Percentage of Total Revenue from Operations (%)
Advisory Fees	87.72	2.76	60.35	2.95	50.18	3.06

The table below sets forth advisory fees generated for the nine months ended December 31, 2024, and December 31, 2023 from Robeco HK to our total revenue from operations:

Particulars	For nine months ended December 31, 2024		For nine months ended December 31, 2023	
	Amount (₹ million)	Percentage of Total Revenue from Operations (%)	Amount (₹ million)	Percentage of Total Revenue from Operations (%)
Advisory Fees	123.86	4.09	57.08	2.56

Under the terms of the Advisory Agreements, such agreements will remain valid until the relevant investment agreement between Robeco HK and the relevant client of Robeco HK is terminated, which may be terminated by, amongst other things, Robeco HK with a prior notice of three (3) months to our Company. While we have not experienced any termination of such investment agreements and consequently our Advisory Agreements with Robeco HK during the nine months ended December 31, 2024 and December 31, 2023, or Fiscals 2024, 2023 and 2022, we cannot assure you that our Advisory Agreements will not terminate going forward, which could have an adverse impact on our business, revenue from operations and profitability.

9. *As of December 31, 2024, December 31, 2023 and March 31, 2024, March 31, 2023 and March 31, 2022, 75.40%, 76.88%, 76.24%, 78.04% and 79.96% of our monthly average assets under management were generated from third-party distributors. If we are unable to maintain our existing relationship with our third-party distributors or attract new distributors, our business, competitiveness, results of operations and financial condition may be adversely impacted.*

We are dependent on third-party distributor partners for a majority of our MAAUM. As of December 31, 2024, we had 49,412 distribution partners across India, including Canara Bank, 44 other banks, 259 national distributors (“**ND**”) and 49,108 mutual fund distributors (“**MFDs**”).

Our ability to access new customers is dependent on customer base of such third-party distributors, and our access to such customers is subject to certain risks, which includes:

- Termination of our arrangements with such distributors;
- These distributors promoting product and offerings of our competitors on account of incentives offered to them which are better than us and/or on account of change in recommendation basket of the distributors; and
- Any misconduct of the distributors that may impact our business and reputation.

We have terminated services of 444, 1,156, 1,285, nil and four (4) distributors during the nine months ended December 31, 2024, and December 31, 2023, and Fiscals 2024, 2023 and 2022. These terminations were on account of no business generation from these distributors during the relevant periods.

Any failure to secure new distribution relationships or maintain our existing relationships, may adversely affect our competitiveness. As many of our distribution relationships are non-exclusive, our distributors may provide similar services to our competitors or prioritize our competitors' investment product over ours, which could have a material adverse impact on our revenue from operations.

10. Our business is subject to extensive regulation, including periodic inspections by the Securities and Exchange Board of India ("SEBI"), and our non-compliance with existing regulations or SEBI's observations could expose us to penalties and restrictions in the business that we can undertake.

We are regulated by SEBI through the Securities and Exchange Board of India (Mutual Funds) Regulations, 1996, as amended (the "**SEBI Mutual Fund Regulations**"), guidelines, circulars and notifications issued from time to time as applicable for mutual funds, as well as under the Securities and Exchange Board of India (Portfolio Managers) Regulations, 2020, as amended (the "**SEBI PM Regulations**").

The SEBI Mutual Fund Regulations govern a wide range of issues in connection with a mutual fund, including the constitution and management of a mutual fund. The SEBI Mutual Fund Regulations also provide that any change of control, as defined therein, with respect to our Company would require, among other things, prior approval of SEBI and the trustee and we would be required to provide the unitholders with an option to exit on the prevailing net asset value without any exit load.

In addition, SEBI has issued the SEBI PM Regulations which govern portfolio managers. If we fail to comply with any regulations or guidelines, we may be subject to fines, sanctions and court proceedings. Compliance or other costs may rise due to changes in regulations, which may reduce our profit or put us at a competitive disadvantage.

On April 4, 2025, the Company has submitted an application with SEBI surrendering its registration as a portfolio manager under the SEBI PM Regulations, and is currently awaiting confirmation from SEBI on the said surrender.

We are subject to regular scrutiny and supervision by SEBI, such as periodic inspections. SEBI has the power to inspect our books from time to time to ensure that we are in compliance with regulations, based on which SEBI may take such action as it may deem fit, including under the SEBI Act, the SEBI Mutual Fund Regulations, the SEBI PM Regulations and other regulations issued by SEBI, which includes fines and sanctions and, in certain circumstances, could also lead to revocation of our license to function as an asset management company or a portfolio manager, as applicable.

In addition, every scheme we propose to introduce is required to file a draft scheme information document with SEBI for its observations. In the past, in inspection reports and in warning letters, SEBI has, among other things, identified certain deficiencies in our systems and operations, including, amongst others: such as: (i) redemption of investments made in Canara Robeco Equity Tax Saver Fund (ELSS) before completion of the 3 year lock in period; (ii) deficiency in systems with respect to processing of systematic transfer plan (STP) transactions leading to erroneous processing of STP transactions twice during November 14 to November 21, 2022 which impacted 6,089 investors with a total loss of INR 32,75,093.16 suffered by STP-in and STP-out schemes; (iii) instances where transactions were done by entities debarred from the securities market, and splitting of transactions by distributors to earn transaction charges; (iv) splitting of transactions and churning of investments to earn higher B-30 incentives; (v) lack of adequate controls to ensure the Macaulay Duration of the scheme is in line with the

category of schemes; and (vi) inadequate system level checks in place leading to creation of 1,908.252 excess units as part of corporate action in Canara Robeco Liquid Fund.

While we have responded to all such observations made by SEBI in the past and taken the requisite corrective actions to ensure such incidents do not recur, we cannot assure you that SEBI will not make similar or other observations in the future. In the event we are unable to resolve such deficiencies to SEBI's satisfaction, we may be restricted in our ability to conduct our business.

While we seek to comply with all regulatory provisions applicable to us, in the event we are unable to comply with the observations made by SEBI, we could be subject to penalties and restrictions which may be imposed by SEBI. Furthermore, SEBI may initiate proceedings against our Company and its officials or any of the funds we are associated with for any alleged non-compliance with its regulations. Imposition of any penalty or adverse findings by SEBI during any future inspections may have an adverse effect on our business, results of operations, financial condition, cash flows and reputation.

Given the uncertainties and complexity of many of these regulatory actions, their outcome generally cannot be predicted with any reasonable degree of certainty and, accordingly, our provisions for regulatory actions may be inadequate. In addition, while we seek to comply with all regulatory provisions applicable to us, we cannot assure you that we will be able to comply with all observations made by our regulators or obtain or renew (in a timely manner or at all) all regulatory and other approvals, licenses, registrations and permissions required for operating our business, which may result in sanctions, penalties and/or other restrictions in the form of cancellations or suspensions of registrations or approvals and therefore restrict our ability to conduct certain lines of business or otherwise affect our ability to carry on our business. For further details, see "Government and Other Approvals – Material Approvals relating to the business and operations of our Company" on page 416.

11. *As of December 31, 2024 and December 31, 2023 and March 31, 2024, March 31, 2023 and March 31, 2022, 61.41%, 61.86%, 61.77%, 64.64% and 65.37% of our total assets under management were generated from customers located in the Indian states/union territory of Maharashtra, Gujarat, Karnataka, Delhi, and Tamil Nadu. A decrease in our AUM from these states/union territory could adversely impact our business and revenue from operations.*

We generate a significant proportion of our AUM from customers in five Indian states/union territory, which exposes us to certain risks should macroeconomic conditions in those areas deteriorate.

The table below sets forth the AUM generated from customers in our top five states/union territory as of March 31, 2024, March 31, 2023 and March 31, 2022 to our total AUM:

The table below sets forth the AUM generated from customers in our top five states/union territory as of December 31, 2024 and December 31, 2023 to our total AUM:

Total	659.02	61.41	519.13	61.86

This geographical concentration risk can lead to significant exposure to region-specific economic, political, and regulatory changes. For instance, if any of these states were to experience a downturn in their local economy, such as a decline in key industries, natural disasters, or changes in state tax policies, it could adversely impact the financial stability and investment behaviours of our customers in these regions. Additionally, a concentrated customer base from limited geographical locations increases our operational risk, as we may face challenges in effectively managing and deploying resources to cater to a more diverse customer pool. While there have been no such instances during the nine months ended December 31, 2024 and December 31, 2023, or Fiscals 2024, 2023 and 2022, where we witnessed a decline in our AUM or revenue from operations on account of geographic concentration, there cannot be no assurance that we will not witness a decline in our AUM and consequently our revenue from operations going forward, which could adversely impact our business and revenue from operations.

12. *We operate in a competitive industry and our business and results of operations may be negatively affected if we are unable to compete with our competitors.*

Our industry is rapidly evolving and intensely competitive, and we expect competition to continue and intensify in the future. Low barriers to entry have also resulted in a large number of smaller participants entering the market. It is possible that there may in the future be consolidation in the market, amongst the smaller market participants, between such smaller participants and the larger participants, or between the larger participants. Any such consolidation may create stronger competitors in the market overall or leave us at a competitive disadvantage.

Our key listed competitors in the mutual fund space includes Nippon Life Asset Management Company Limited, HDFC Asset Management Company, Aditya Birla Sun Life AMC Limited, and UTI Asset Management Company Limited, amongst others. Mutual funds also compete with products such as insurance, bank deposits, pension products, small savings schemes, as well as gold and real estate. Increased competition may either decrease market share of our AUM or increase brokerage or commission costs, and other acquisition costs which could reduce our profits. Furthermore, mutual funds also face increase competition from exchange traded funds, which are investment vehicles that trade on exchanges like equity stocks while offering diversification and are more economic as they charge lesser fees as compared to actively managed funds. (Source: CRISIL Report)

Our competitors may offer a wide range of financial products and services, at lower investment management fee, with a wider distribution network. Our competitors may receive investor referrals from their affiliates and other departments that provide other financial services. Investors may find it convenient or reassuring to use one platform, or brand to meet all their financial services needs and may choose to give their business to our competitors on that basis. In addition, we rely on our own branches or depend on distributors for the sale of our products, which may require higher investment and operating expenses as compared to our peers. This may adversely affect our market share and ability to grow our business.

New players are also entering into the market as evident from three new fund houses launching their businesses in the year 2023 and one new fund house starting their business in the year 2024. The increased competition will drive fund managers to be more innovative and agile in their investment strategies, as they strive to attract and retain investors. This may lead to the introduction of new fund categories, specialized investment products, and enhanced digital platforms to provide a more seamless and personalized investment experience. (Source: CRISIL Report)

Increased competition may result either in a decrease in AUM market share or force us to reduce our management fees to preserve or market share, either of which would decrease our revenue from operations.

13. *An inability to effectively identify and manage risks associated with our business and operations could have an adverse impact on our business, results of operations, brand reputation and cash flows.*

We are exposed to market risks such as liquidity risk, interest rate risk, credit risk, operational risk and legal risks. The effectiveness of our risk management is limited by the quality and availability of data. Our schemes and other investment products carry their own risks which are guided by directions by SEBI and disclosed in our scheme investment documents.

We have established a system of risk management and internal controls consisting of an organizational risk management framework, policies, risk management system tools and procedures that we consider appropriate for our business operations and continue to enhance these systems. However, in case of any limitations in our risk management system, such as internal controls, risk identification and evaluation, effectiveness of risk control and information communication, our risk management systems and mitigation strategies may not be adequate or

effective to identify or mitigate our risk exposure in all market environments. Our technology platforms may not be able to identify or monitor certain conditions and limits imposed on us through new rules and regulations. Furthermore, with respect to risks involved in investment by schemes, the SEBI has imposed certain obligations on asset management companies to invest a minimum percentage of their AUM in the schemes of their mutual funds, based on the risk value of the respective schemes.

Our business, financial condition and operations could be materially and adversely affected by the corresponding increase in our risk exposure and actual losses experienced as a direct or indirect result of failures of our risk management policies and internal controls. Any hedging/derivative strategies that we may utilize may also not be fully effective or may not adequately cover our liabilities and may leave us exposed to unidentified and unanticipated risks.

While our compensation, incentive plans and internal control systems do not encourage our employees and distributors to take excessive risks, they may make decisions that expose us to risks regardless of our internal control mechanisms. While there have been no such instances during the nine months ended December 31, 2024 and December 31, 2023, or in Fiscals 2024, 2023 and 2022, where we were unable to manage the risks associated with our operations, however, we cannot assure you that we will always be able to effectively monitor and control any excessive risks taken by our employees and distributors, which could have an adverse impact on our business, results of operations and profitability. Our failure to timely adapt our risk management and internal control policies and procedures to our developing business could have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.

14. *We may not be able to implement our strategy at all times, which could impact our ability to achieve our growth strategy and adversely impact our business, results of operations and financial condition.*

Our Company's future performance depends on our ability to implement our growth strategy, which as at the date of this Draft Red Herring Prospectus. For further details in relation to our growth strategies, see "*Our Business – Our Growth Strategies*" on page 230. There can be no assurance that our Company will be successful in implementing the growth strategy. The successful implementation of our Company's strategy objectives will depend on several factors including, but not limited to:

- Our ability to successfully manage our existing schemes;
- Our ability to enhance our portfolio of products and services;
- Our ability to grow our customer base;
- Our ability to grow our distribution network;
- Our ability to attract qualified investment team;
- The effectiveness of our marketing campaigns;
- The competition that we face from incumbent and new players in the markets where we operate;
- Our ability to monitor our operations, controlling costs and maintaining effect quality and service controls; and
- Favorable economic, regulatory and market condition, which are outside of our Company's control.

As a result of any of the above factors, our Company's AUM or revenues may not grow at the same rate as in the past and/or our Company may incur costs without benefitting from the expected revenues of new schemes in the future. Accordingly, our operations may be negatively affected if changes in circumstances, including any of the above factors significantly delay, prevent or hinder us achieving any of our strategy objectives, which in turn would adversely and materially affect our business, results of operations, financial condition and prospects.

15. *Failure to maintain and enhance our brand image may have a negative impact on our business and results of operations. Furthermore, we may incur significant costs in connection with our branding and marketing efforts and some marketing efforts may not be effective in attracting or retaining new customers.*

Based on our experience, brand image is a crucial factor influencing customers' investment decisions in our industry. It is vital to maintain and enhance brand recognition and image to differentiate our products and services and compete effectively. We engage in various marketing campaigns to promote our product offerings and enhance our brand recognition and acceptance.

We are vulnerable to adverse market and customer perception, particularly in the mutual fund industry where customer confidence and trust in the investment returns are critical for business growth. Additionally, as we grow and expand our product offerings, it may become increasingly challenging to provide risk adjusted returns, and

there are no guarantees that we can sustain customer confidence in our product offerings. If customers perceive or encounter a decline in the quality of our products' or services' or feel that our Company has not delivered returns to their satisfaction on their investment, our brand value could be adversely affected, significantly impacting our business operations, financial health, and future prospects. We are also exposed to the risk that litigation, misconduct, operational failure, negative publicity (including through social media) or press speculation could harm our brand and reputation.

We cannot guarantee that our marketing efforts will be well-received and result in attracting new customers or retaining our existing customers, or that we will not need to increase marketing spend in the future. Failure to refine our marketing approaches or to adopt new, more cost-effective marketing techniques would materially affect our business, results of operations, financial condition and prospects.

Our brand and reputation are also partly dependent on our Promoters, Canara Bank and OCE as well as entities affiliated with OCE including Robeco. Our brand reputation could be affected by the conduct or performance of third parties over which we have no control, such as other entities that are part of Canara Bank group as well as entities affiliated with OCE. As the "Canara" brand is closely linked to brands utilized by us, and both Canara Bank and OCE are closely associated with us, any reputational harm to Canara Bank or OCE group entities may also negatively affect our brand and reputation.

Furthermore, we may also be exposed to adverse publicity relating to the mutual fund industry. If we are unable to maintain our brand name and our reputation, or there is reputational harm to other Canara Bank or OCE group entities, our business, financial condition and results of operations could be materially and adversely impacted. While there have been no major litigation or negative publicity experienced by us during the nine months ended December 31, 2024, and December 31, 2023, or Fiscals 2024, 2023 and 2022, we cannot assure you that as we expand our business presence, instances of negative publicity will not be experienced by us considering the industry in which we operate.

16. *A settlement order in relation to certain alleged violations of the SEBI Mutual Fund Regulations has been passed against our Company, non-compliance of the terms of which (if any) may subject our Company to, among other things, further regulatory consequences.*

Our Company received a show cause notice from SEBI dated October 19, 2022 ("SCN") requiring our Company to show cause as to why an inquiry should not be held and penalty not be imposed, under Sections 15E and 15HB of the SEBI Act, 1992 for the alleged violation of Regulation 38 of the SEBI Mutual Fund Regulations along with certain circulars issued thereunder, pursuant to which our Company filed an application dated August 28, 2023 for settlement of the alleged violations set out in the SCN in accordance with the terms of the SEBI (Settlement Proceedings) Regulations, 2018 ("SEBI Settlement Regulations"). Thereafter, settlement terms in the form of payment of a settlement amount of approximately ₹ 8.5 million was agreed with the Internal Committee of SEBI and approved by the high-power advisory committee constituted under the SEBI Settlement Regulations as well as the panel of whole-time members of SEBI. By way of a letter dated May 7, 2024, SEBI communicated its acceptance of the settlement terms proposed by our Company, which was followed by a settlement order dated June 11, 2024 ("Settlement Order").

The Settlement Order notes disposing of the proceedings initiated under the SCN and contains the standard provisions covered under all settlement orders that SEBI has the right, to restore or initiate proceedings in respect of the same matter in the event it comes to SEBI's notice that our Company has not made full and true disclosures or if our Company has violated the undertakings or waivers filed with SEBI during the settlement proceedings. While the probability of SEBI initiating such proceedings is quite low, in the event SEBI does initiate such proceedings, the same may subject our Company to further regulatory consequences, including adjudicatory penalties or additional remedial measures, and could have an adverse effect on our business, finances and results of operations, as well as on our reputation.

17. *The legislative and regulatory environment in which we operate is subject to change which could adversely impact our business and operational cost.*

The legislative and regulatory landscape within which we operate has experienced considerable change recently. We anticipate that substantial regulatory developments in our industry will continue at a rate surpassing the historical norm, likely subjecting industry players to increased and typically more rigorous regulations. The obligations established by the SEBI aim to maintain the integrity of the financial markets and safeguard customers and other parties interacting with us. As a result, these regulations frequently restrict our operations and/or elevate our expenses, particularly through customer protection and market conduct requirements.

New laws or regulations, or changes (including increasing strictness) in the enforcement of existing laws or regulations, applicable to us and our customers may adversely affect our business. Our ability to function in this environment will depend on our ability to constantly monitor and promptly react to legislative and regulatory changes.

Regulatory changes may have an adverse effect on our business. For example, SEBI vide its Master Circular for Mutual Funds dated June 27, 2024 at paragraph 6.7 has specified certain “core” responsibilities for the trustees of a mutual fund in addition to responsibilities for which trustees may avail services of third party fiduciaries, requirement to constitute a unit holder protection committee (“UHPC”) along with the composition, mandate and responsibilities of the UHPC, timeline for compliance with the requirement of appointing an independent director as chairperson of the board of directors of the trustee company, and frequency of meetings between the board of directors of the trustee company and the asset management company of the mutual fund. Further, SEBI vide circular dated February 27, 2025 on *Timelines for Deployment of Funds Collected by Asset Management Companies in New Fund Offer as Per Asset Allocation of the Scheme* has prescribed new guidelines for asset management companies in relation to deployment of funds raised through New Fund Offers (“NFOs”), wherein asset management companies have been directed to (i) specify achievable timelines in the Scheme Information Document (“SID”) of a scheme regarding the deployment of the funds as per the specified asset allocation of the scheme and garner funds during the NFO accordingly; and (ii) deploy the funds garnered in an NFO within 30 business days from the date of allotment of units. SEBI has also laid out extended timelines in case of exceptional circumstances along with steps to be followed in the event the funds are not deployed as per the asset allocation mentioned in the SID and the prescribed timelines.

Our ability to function in this environment will depend on our ability to constantly monitor and promptly react to legislative and regulatory changes. For further information in relation to key regulations and policies applicable to our operations, please see “*Key Regulations and Policies*” on page 258.

18. *Certain of our corporate records and statutory form filings are not traceable. We cannot assure you that no legal proceedings or regulatory actions will be initiated against us in the future in relation to any such discrepancies.*

We are unable to trace certain statutory form filings made by our Company in the records maintained by our Company or on the online portal of the Ministry of Corporate Affairs (“MCA Portal”) or in the physical records available with the RoC, such as Form 1 filed for incorporation of our Company, Form 18 filed for details of registered office at the time of incorporation, Form 23 filed for change in objects clause of our Memorandum of Association, Forms 25C, 32 and DIR-12 filed for past appointments of certain Directors in 1995, 2009 and 2018 respectively and Forms 23AC and 23ACA for Financial Years 1994 to 2005. In relation to these missing records, we have relied on other supporting documents available in our records and the search report dated April 23, 2025 (“RoC Search Report”) issued by Mehta & Mehta, Company Secretaries, independent practising company secretary (holding a valid certificate of peer review bearing number 3686/2023 and membership number 3667), engaged by our Company, who carried out their inspection and independent verification of the documents available or maintained by our Company, the Ministry of Corporate Affairs, Government of India at the MCA Portal and physical inspections conducted at the offices of the RoC and issued the RoC Search Reports confirming that the relevant statutory filings are also not available at RoC. Further, we have also sent an intimation through our letter dated April 23, 2025, to the RoC informing them of the missing form filings.

Further, certain forms and Board resolutions for share transfers by and to the Promoters are missing, while the dates of certain transfers are not mentioned in the register of transfers maintained by our Company. Additionally, there are inaccuracies in recording the date of the Board resolutions and name of the transferor in such register. Information in relation to such share transfers has been disclosed in the section “*Capital Structure*” beginning on page 94 based on the minutes of meeting of our Board and Shareholders, and register of share transfers, where relevant, and information available to our Company.

While there have been no regulatory proceedings or actions initiated against us in relation to the aforementioned anomalies, inaccuracies or non-availability of the corporate records, we cannot assure you that we will not be subject to legal proceedings, regulatory action or penalties imposed by statutory or regulatory authorities in this respect, which may adversely affect our business, financial condition, results of operations and reputation.

19. ***There has been a delay in filing the Form FC-GPR with the RBI for a bonus issue on September 19, 2024. We may be subject to late submission fees and penalty for such non-compliance, which may adversely impact our reputation and financial condition.***

There has been a delay in filing the Form FC-GPR with the RBI for the issue of 73,285,905 Equity Shares to OCE pursuant to a bonus issue on September 19, 2024, due to administrative reasons. While our Company has filed the Form FC-GPR on April 21, 2025, this may be subjected to payment of a late submission fee, and there can be no assurance that no penalty will be imposed for such delay by the RBI. Any such late submission fee, regulatory action or penalty may adversely affect our reputation and financial condition.

20. ***Any reduction in the total expense ratio as prescribed under the SEBI regulations may impact our revenue and profitability.***

Mutual funds are permitted to charge certain operating expenses for managing a scheme that is, sales and marketing / advertising expenses, administrative expenses, transaction costs, investment management fees, registrar fees, custodian fees, audit fees, amongst others, as a percentage of the scheme's daily net assets. Total expense ratio charged to the scheme is the cost of running and managing a scheme.

All mutual fund scheme expenses (other than those specifically mentioned in the SEBI Mutual Fund Regulations, as required to be borne by the asset management company, trustee or the sponsors) must be borne by the scheme itself rather than the asset management company.

SEBI also prescribes the upper limits with respect to the total expense ratio (which excludes the issue or redemption expenses, whether initially borne by the mutual fund or by the asset management company, but includes the investment management and advisory fee) for (a) fund of funds, (b) index fund scheme or exchange traded fund (c) open ended schemes and (d) close ended and interval schemes.

From time to time these TER limits may be reviewed and revised. For example, with effect from April 1, 2019, TERs for open-ended equity-oriented schemes were reduced from a range (depending on AUM) of 2.5% to 1.75% to the current range of 2.25% to 1.05%. There is a possibility that TER limits may be reduced further in the future.

In addition, the following costs and expenses may be charged to the scheme: (a) brokerage and transaction costs which are incurred for the purpose of execution of trade up to 0.12% of trade value in case of cash market transactions and 0.05% of trade value in case of derivatives transactions; (b) expenses not exceeding of 0.30% of daily net assets, if the new inflows from such cities as specified by SEBI from time to time meet the thresholds provided under the SEBI Mutual Fund Regulations (*the B30 incentive structure has been kept in abeyance by SEBI with effect from March 1, 2023 until further notice*); and (c) additional expenses incurred in connection with investment and advisory fees or other recurring expenses not exceeding 0.05% of daily net assets of the scheme, subject to conditions as prescribed under the SEBI Mutual Fund Regulations.

Any failure to maintain costs for our schemes is likely to reduce the amount of management fees we are able to charge such schemes in compliance with the prescribed TER limits. Further reductions in prescribed TER limits may reduce our revenues and profits and may cause us to decrease our general marketing efforts on behalf of our funds, which could adversely affect our AUM and overall demand for the services we offer.

21. ***If we exceed the limits prescribed under the SEBI Mutual Fund Regulations for reimbursement of expenses to the schemes of mutual funds, our profitability may decrease and cause us to decrease marketing and other efforts.***

Each mutual fund scheme has to provide and account for the expenses incurred by that particular fund. The SEBI has prescribed certain categories of expenses that can be charged to mutual fund schemes by the asset management company as well as the maximum expenses a mutual fund scheme can incur and has prohibited certain categories of expenses from being charged.

An asset management company may charge the fund with investment management and advisory fees, which should be fully disclosed in the fund offer document. Asset management companies may also charge the fund for recurring expenses, including marketing and selling expenses, brokerage and transaction costs, registrar services, trustee fees and expenses, audit and custodian fees, and expenses for investor communication and additional expenses as specified under the SEBI Mutual Fund Regulations from time to time. However, if the actual expenses incurred by the schemes managed by us exceed the limits prescribed in the fund offer documents, we must

reimburse such excess expenses. This reduces our profit and may encourage us to decrease marketing and other efforts on behalf of the schemes for which we cannot charge expenses, which could adversely affect AUM of our schemes managed and consequently our revenue. Additionally, any loss or damage or expenses incurred by us or by any persons authorized by us needs to be borne by us and cannot be met out of the scheme's assets. While there have been no instances during the nine months ended December 31, 2024, and December 31, 2024, or Fiscals 2024, 2023 and 2022, we cannot assure you going forward in future we will not exceed the limits prescribed under the SEBI Mutual Fund Regulations which may result us to reimburse excess expenses.

- 22. Under the SEBI Mutual Fund Regulations, we are required to avoid conflicts of interests in managing the affairs of our schemes and give priority to the interest of our unitholders. Accordingly, any conflict arising between the interests of our shareholders and the interests of our unitholders could have an adverse effect on our business, results of operations and cash flows.**

In accordance with the SEBI Mutual Fund Regulations, we are required to manage our mutual fund schemes in a manner that prioritizes the interests of our unitholders and avoids conflicts of interest. In cases where there is a potential conflict between the interests of our shareholders and those of our unitholders, we will always prioritize the latter. While there have been no such instances in the nine months ended December 31, 2024, or in previous years (2023 and 2022), we cannot assure that similar situations will not arise in the future. If we determine that certain actions are necessary to protect unitholder interests, they may not always align with shareholder interests. However, we will ensure that any such actions do not materially impact our business, financial condition, or results of operations.

- 23. Except for K Satyanarayana Raju, Debashish Mukherjee, Suhail Chander, Ravindran Menon, Nirmala Sridhar and Anuradha Shripad Nadkarni, none of our Directors currently possess experience of being on the board of any Indian listed company in India.**

Except as disclosed below, who are the directors of the Indian companies, which are listed on the Stock Exchanges, none of our Directors possess experience of being on the board of any Indian listed company and accordingly, they may not be adequately well-versed with the activities or industry practices undertaken by the listed company in India. We cannot assure you that this lack of adequate experience will not have any adverse impact on the management and operations of our Company.

Sr. No.	Name of the Director	Particular
1.	K Satyanarayana Raju	- Can Fin Homes Limited - Canara Bank
2.	Debashish Mukherjee	- Can Fin Homes Limited - Canara Bank
3.	Suhail Chander	Bandhan Bank Limited
4.	Ravindran Menon	- Accelya Solutions India Limited - Bank of Baroda
5.	Nirmala Sridhar	Thakral Services (India) Limited
6.	Anuradha Shripad Nadkarni	SBI Cards and Payments Services Limited

Our Company will also be subject to compliance requirements under the SEBI Listing Regulations and other applicable law post listing of the Equity Share on the Stock Exchanges. Our Board is capable of efficiently managing such compliance requirements including by engaging professionals having expertise in managing such compliances.

- 24. We have made incorrect regulatory filings in the past, for which for which no penalties have been imposed by SEBI till date, but we could be subjected to regulatory actions by SEBI in the future.**

Our Company has made certain incorrect filings with SEBI in the past which have been promptly rectified upon becoming aware of the error, however, no penalty has been imposed by SEBI in any such case. A few instances of incorrect filings are as under:

- On February 27, 2025, we inadvertently uploaded a blank file of the daily data on the SEBI Intermediaries Portal (“SI Portal”). Upon becoming aware of the same, we promptly reached out to the SEBI Portal Help team via email dated February 28, 2025 and reuploaded the correct file with their assistance.
- On February 5, 2025, we inadvertently uploaded an incorrect version of the deployment of funds report for the month of January 2025 on the SI Portal. We promptly notified the SEBI Portal Help team on February 6, 2025 seeking their assistance to rectify the error and successfully reuploaded the correct report on February 12, 2025.
- On October 21, 2024, our Company filed its quarterly report for the quarter ended September 30, 2024 with the board of trustees on its activities and compliance with the SEBI Mutual Fund Regulations. One of the annexures to the quarterly report was a broker turnover report prepared by our fund accountant, HSBC, incorrectly reflected the turnover of one of our brokers as ₹ 19,850.20 million instead of ₹ 17,864.85 million, turnover % as 6.70% instead of 6.07% and brokerage paid as ₹ 0.37 million instead of ₹ 0.34 million. This error occurred due to manual data entry by HSBC while preparing this annexure and was discovered by our Company during the internal audit conducted for the same quarter. Our Company promptly informed the board of trustees of the same *vide* email dated January 14, 2025 along with a copy of the revised annexure and assured the trustees that the details have been correctly reflected in the Compliance Test Report for the quarter ended December 31, 2024 filed with SEBI. Further, our Company has obtained a confirmation from HSBC that such manual changes would no longer be required as several system enhancements have been completed at HSBC’s end to prevent such instances from occurring in future.

We cannot assure you that we will, going forward, be able to make the requisite regulatory filings correctly and within the required time period or at all, and may be held liable by SEBI as a consequence. In the event our Company fails to furnish any information or furnishes wrong information relating to the activities of the mutual fund as required under the SEBI Mutual Fund Regulations in the regulatory filings made with SEBI, we may be subjected to an inquiry under the SEBI (Intermediaries) Regulations, 2008 and if any adverse findings are made against us, SEBI may pass an order, amongst other things, prohibiting us from launching any new schemes for a specified period, issuing regulatory censures, imposing fines or sanctions and in extreme circumstances, revocation of our license to function as an asset management company. Given the uncertainties and complexity of many of these regulatory actions, their outcome generally cannot be predicted with any reasonable degree of certainty. Accordingly, our provisions for regulatory actions may be inadequate.

25. Our Registered Office, and all our branches and co-working spaces for sales activities are located on premises that have been leased. If we fail to renew these leases on competitive terms or if we are unable to manage our rental costs, our business and results of operations would be materially and adversely affected.

Our Registered and Corporate Office is leased from a third party and is valid until February 28, 2026. We also have a business continuity office in Mumbai, Maharashtra, India leased from a third party for a period of three years and is valid until September 30, 2026. Furthermore, as of December 31, 2024, we had also leased co-working spaces at 23 cities in India for sales activities. As of December 31, 2024, we had 23 branch offices across India, which have been leased from third-parties, except the branch office in Chennai, Tamil Nadu, which have been leased by one of our Promoters, Canara Bank, which is functioning on a monthly rent.

Most of our lease agreements for our branches contain an early termination clause that permits us to terminate the lease agreement early for the reasons specified therein. While we typically have renewal options for all our leases for our branches, we typically need to renegotiate the terms of renewal with the lessor, who may insist on a significant modification to the terms and conditions of the lease agreement. If a lease agreement is renewed at a rate substantially higher than the existing rate, or if any existing favorable terms granted by the lessor are not extended, we must determine whether it is desirable to renew on such modified terms. While there have been no such instances in the nine months ended December 31, 2024, and December 31, 2023, or Fiscals 2024, 2023 and 2022 where the leases were renewed on terms not favorable to us, if we are unable to renew leases for our branches on acceptable terms or at all, we will have to close or relocate the relevant branch. While we have not faced major issues renewing the leases of our offices in the past, if these lease/ leave and license agreements are not renewed or not renewed on terms favorable to us, we may suffer a disruption in our operations or increased costs, or both, which may affect our business, results of operations and cash flows. In addition, we are subject to a lock-in provision for some of our leases which may restrict our ability to terminate such leases, including in the event the location of the leased premises is no longer profitable. While we have not closed any of our branches or vacated

any of the co-working spaces that we had leased for our sales operations during the nine months ended December 31, 2024 and December 31, 2023, or Fiscals 2024, 2023 and 2022, there can be no assurance that going forward as we expand our branch network, we will not vacate or close any of our branches on account of underperformance or other commercial considerations including rental increase.

While, except as the branch office leased from Canara Bank located in Chennai, Tamil Nadu, there is no conflict of interest with Promoters / Promoter Group members / Group Companies / Directors / KMPs / SMPs or their relatives concerning the leases on which the branches are operating, however, we cannot assure you that such conflict of interest may not arise going forward.

26. *Our investment management agreement may generally be terminated by the counterparties on little or no notice, making our future client and revenue base unpredictable.*

All of our management fee income is derived from our role as asset manager of the Canara Robeco Mutual Fund (administered by CRMF Trustee Private Limited). Therefore, the future and prospects of our business are reliant to a significant extent on maintaining that role. Our investment management agreement with Canara Robeco Mutual Fund may be terminated by CRMF Trustee Private Limited, subject to prior approval of the SEBI and unit-holders, by providing a prior written notice to us and for reasons which include: (i) if our Company goes into liquidation (except voluntary liquidation for the purpose of reconstruction or amalgamation) or if a receiver is appointed for all or a substantial portion of our assets; (ii) if our Company commits a material breach of its obligations under the investment management agreement, which if capable of remedy, is not made good within 30 days of receipt of such notice; or (iii) if CRMF Trustee Private Limited or 75% of the unitholders of Canara Robeco Mutual Fund so desire. Under Regulation 20(2) of the SEBI Mutual Fund Regulations, our appointment as the asset manager of the Canara Robeco Mutual Fund can be terminated by majority of the trustees or by 75% of the unitholders of our schemes. The termination of our investment management agreement with Canara Robeco Mutual Fund would have a significant adverse effect on our revenues, such that our business may not be able to continue. Canara Robeco Mutual Fund (through its trustee company) may also elect to renegotiate the fees we are permitted to charge under the agreement, which could adversely affect our management fees and revenues.

27. *Our Company will not receive any proceeds from the Offer for Sale.*

This Offer consists of only an Offer for Sale of up to 49,854,357 Equity Shares of face value of ₹ 10 each by Canara Bank and OCE. Our Promoters, Canara Bank and OCE, shall be entitled to the entire proceeds from the Offer (net of their portion of the Offer-related expenses) and our Company will not receive any proceeds from the Offer. None of our Directors or Key Managerial Personnel and Senior Managerial Personnel will receive, in whole or in part, any proceeds from this Offer. For further information, see “*The Offer*”, “*Capital Structure*”, and “*Objects of the Offer*” on pages 78, 94 and 119, respectively.

28. *Our Company, Canara Robeco Mutual Fund, Canara Bank, one of our Promoters and certain of our Directors are involved in legal proceedings. Any adverse decision in such proceedings may render us/them liable to liabilities/penalties and may adversely affect our business and results of operations.*

Our Company, Canara Robeco Mutual Fund, Canara Bank, one of our Promoters and certain of our Directors are currently involved in legal proceedings. These legal proceedings are pending at different levels of adjudication before various courts and tribunals. In the event of any adverse rulings in these proceedings or the consequent levying of penalties, we may need to make payments or make provisions for future payments, which may increase our expenses and current or contingent liabilities.

The summary of outstanding litigation involving our Company, Canara Robeco Mutual Fund, Canara Bank, one of our Promoters and our Directors as on the date of this Draft Red Herring Prospectus have been provided below in accordance with the materiality policy adopted by our Board. As of the date of this Draft Red Herring Prospectus, there are no outstanding litigation proceedings involving our Group Company, the outcome of which could have a material impact on our Company. We cannot assure you that any of the outstanding litigation matters will be settled in our favour or that no additional liabilities will arise out of these proceedings. In addition to the above, we could also be adversely affected by complaints, claims or legal actions brought by persons, including before consumer forums or sector-specific or other regulatory authorities in the ordinary course of business or otherwise, in relation to our business operations and services, our technology and/or intellectual property, our branding or marketing efforts or campaigns or our policies. We may also be subject to legal action by our employees and/or former employees in relation to alleged grievances, such as termination of employment. There can be no assurance that such complaints, claims or requests for information will not result in investigations, enquiries or legal actions by any regulatory authority or third persons against us.

29. We are required to obtain, renew or maintain certain statutory and regulatory permits and approvals

required to operate our business, and if we fail to do so in a timely manner or at all, or these requirements are made more stringent, we may be unable to fully or partially operate our business, and our results of operations may be adversely affected.

Our operations are subject to government regulations, and we are required to obtain and maintain several statutory and regulatory permits and approvals under central, state and local government legislation for operating our business generally, including tax registrations, shops and establishment registration and trade license. For instance, in relation to our branches we are required to obtain licenses such as, shops and establishment registrations, trade licenses, goods and services tax registrations, and professional tax registrations. Certain of our material approvals, registrations, permits and licenses may expire in the ordinary course of business and our Company is in the process of renewing such key approvals, as necessary. For further information, see “*Government and Other Approvals – Material approvals relating to the business and operations of the Company*” on page 416.

Many of these approvals are granted for fixed periods of time and need renewal from time to time. While we have applied for renewal of some of the approvals, there is no assurance that such renewals will be issued or granted to us in a timely manner, or at all. If we are not able to renew the approvals in a timely manner or at all, our existing and prospective business and operations may be adversely affected. Further, some of our permits, licenses and approvals are subject to several conditions and we cannot assure you that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals.

There is no assurance that the permits, licenses and approvals granted to us would not be suspended or revoked in the event of accidental non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. If there is any failure by us, through a failure of our employees or Directors, to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or to comply with the applicable regulations or if the regulations governing our business are amended, or if there is a cancellation, suspension or revocation of any of the permits, licenses or approvals granted to us, we may incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business and our operations. For further details, please see “*Key Regulations and Policies*” and “*Government and Other Approvals*” on pages 258 and 416, respectively.

Furthermore, any future transactions with our related parties could potentially involve conflicts of interest which may be detrimental to our Company. There can be no assurance that our Directors and executive officers will be able to address such conflicts of interests or others in the future. 32. There have been delays in payment of statutory dues by our Company during the nine months ended December 31, 2024. Inability to make timely payment of our statutory dues could result us into paying interest on the delay in payment of statutory dues which could adversely affect our business, results of operations and financial condition.

Our Company, in the regular course of its operations, is required to pay certain statutory dues including the employee state insurance contributions, employee provident fund contributions, income tax payments, tax deduction at source, goods and services tax and professional taxes.

Except as stated below, there have been no instances of default in the payment or non-payment of statutory dues, including in relation to Employees State Insurance Corporation, provident fund and income tax by our Company during the nine months ended December 31, 2024, and December 31, 2023 and Fiscals 2024, 2023 and 2022:

33. *Our Promoters will have certain rights post listing of the Equity shares, subject to the approval of the Shareholders by way of special resolution passed in the first general meeting held after the date of listing of our Equity Shares on the Stock Exchanges pursuant to the Offer.*

In the event our Shareholders approve such special rights by way of a special resolution post listing, our Promoters will be able to exert influence over our Board, through its director nomination rights.

34. *Our Statutory Auditors and previous statutory auditors have included emphasis of matters in their respective audit report for the special purpose financials prepared for the nine-months ended December 31, 2024, and December 31, 2023 and Fiscal 2022. There can be no assurances that any similar emphasis of matters will not form part of our financials for the future fiscals/periods, which could subject us to additional liabilities due to which our reputation and financial condition may be adversely affected.*

Our Statutory Auditors and our previous statutory auditors have included emphasis of matters in their respect audit report for the special purpose financials prepared for the nine-month ended December 31, 2024, and December 31, 2023 and Fiscal 2022 as mentioned below:

35. ***Our erstwhile statutory auditors included statements on certain matters specified in the Companies (Auditor's Report) Order, 2020 for Fiscal 2022. If similar modifications and comments are included for our financial statements in the future, the trading price of our Equity Shares may be adversely affected.***

The loss was incurred by investors (and not in the schemes(s) owing to the failure of R & T agents M/s K Fintech to comply with the agreed SOP's while processing the transactions. 36. *We procure insurance policies from third-party insurers to insure critical aspects of our business operations. An inability to maintain adequate insurance cover in connection with our business may adversely affect our operations and profitability.*

We maintain insurance which is typical in our industry in India and in amounts to be commercially appropriate for a variety of risks, including directors & officers liability insurance, professional indemnity insurance, crime insurance, car insurance, office asset insurance, cyber liability insurance, group Mediclaim floater insurance, group personal accidental insurance and group life insurance policy. The table below provides details of our insurance coverage on our total insured assets, as of the dates indicated:

Particulars	As of December 31, 2024 / Nine months ended December 31, 2024	As of December 31, 2023 / Nine months ended December 31, 2023	As of March 31, 2024 / Fiscal 2024	As of March 31, 2023 / Fiscal 2023	As of March 31, 2022 / Fiscal 2022

Particulars	As of December 31, 2024 / Nine months ended December 31, 2024	As of December 31, 2023 / Nine months ended December 31, 2023	As of March 31, 2024 / Fiscal 2024	As of March 31, 2023 / Fiscal 2023	As of March 31, 2022 / Fiscal 2022
Insurance coverage as a percentage of total tangible assets (%)	389.19	457.45	387.99	419.23	526.38

Note:

- (1) *Total tangible assets include residential flats, air conditioners, furniture and fixtures, office equipment, electrical items, leasehold improvements, computers and peripherals, and motor vehicle.*

We may not be insured for certain types of risks and losses that we may also be subject to, as such risks are either uninsurable or that relevant insurances are not available on commercially acceptable terms. Whilst we have made no insurance claims during the nine months ended December 31, 2024 and December 31, 2023, and Fiscals 2024, 2023 and 2022, however in the event we face any losses going forward, we cannot assure you that our claims will be settled in entirety or at all.

Furthermore, we cannot assure you that we will be able to renew our insurance covering all risks at commercially viable terms or at all. To the extent that we suffer loss or damage for events for which we are not insured or for which our insurance is inadequate, the loss would have to be borne by us, and, as a result, our business, reputation, results of operations and cash flows could be adversely affected. Furthermore, our claim records may affect the premiums which insurance companies may charge us in the future. There can be no assurance that in the future we will be able to maintain insurance of the types or at levels which we deem necessary or adequate or at premiums which we deem to be commercially acceptable. If we are unable to pass the effects of increased insurance costs on to our customers, the costs of higher insurance premiums could have a material adverse effect on our profitability.

37. *We do not have any registered trademark. We may not be able to protect trademarks, which may adversely impact our business, reputation and results of operations.*

As of the date of this Draft Red Herring Prospectus, we have no registered trademark including our corporate logo. In the event a third party objected to the registration of a trademark, this would affect our operations, financial condition and results of operations. It is possible that other proprietary information, such as the proposed pricing or product launch information, could be leaked by employees, suppliers and other third parties. If any of these were to occur, on a sustained, material and unmitigated basis, and if the reputation of our Company was to suffer as a result, our competitive position in our markets and our ability to grow our business could be negatively impacted, which would have a material adverse effect on our business, results of operations and financial condition. We may also be subject to claims that we have breached our licensed use of software or otherwise infringed on the intellectual property of third parties, including infringement by service providers who use such licenses to provide services to us. Any of the above matters could have a material adverse effect on our business, results of operations, financial performance and the trading price of our Equity Shares.

If our trademarks are infringed, including as a result of unauthorized use or a failure to protect such rights by the competent authorities in accordance with the regulations of the relevant countries, it may face costly litigation and the diversion of technical and management personnel. Furthermore, the outcome of a dispute may require our Company to enter into royalty or licensing agreements, which may not be available on terms acceptable to our Company, or at all. Any of the above would have a material adverse effect on our business, results of operations, financial condition and prospects. Also see “ - *We have licensed the trademarks “Canara” and “Robeco” from Canara Bank and Robeco Holding, respectively and the termination of the trademark license agreement could adversely impact our business and results of operations.*” on page 39.

38. *Failures in internal control system could cause operational errors which may have an adverse impact on our business, reputation and profitability.*

We are responsible for establishing and maintaining adequate internal measures commensurate with the size and complexity of operations. Our internal audit functions make an evaluation of the adequacy and effectiveness of internal systems on an ongoing basis so that business units adhere to our policies, compliance requirements and internal guidelines. Internal control systems comprising policies and procedures are designed to ensure sound management of our operations, safekeeping of our assets, optimal utilization of resources, reliability of our

financial information and compliance. The systems and procedures are periodically reviewed and routinely tested and cover all functions and business areas. While we believe that we have adequate controls, we are exposed to operational risks arising from the potential inadequacy or failure of internal processes or systems, and our actions may not be sufficient to guarantee effective internal controls in all circumstances. Given the size of our operations, it is possible that errors may repeat or compound before they are discovered and rectified. Our management information systems and internal control procedures that are designed to monitor our operations and overall compliance may not identify every instance of non-compliance or every suspicious transaction. While there have been no instances of internal control failures in our Company in the nine months ended December 31, 2024 and December 31, 2023, or Fiscals 2024, 2023 and 2022, there can be no assurance that going forward, we will be able to identify every instance of non-compliance, which could adversely affect our business, results of operations and financial condition. Furthermore, if internal control weaknesses are identified, our actions may not be sufficient to correct such internal control weakness.

Failures or material errors in our internal systems may lead to inaccurate financial reporting, fraud and failure of critical systems and infrastructure. While we have taken steps to reduce instances of fraud, mis-selling and other forms of misconduct by our agents, employees and distribution partners, including taking action against malpractices, conducting training programs for employees and distributors, we cannot assure you that these measures will succeed in detecting or deterring misconduct or to provide sufficient evidence to conclude investigations of misconduct. Such instances may also adversely affect our reputation, business, results of operations and cash flows. We cannot assure you that that we would be able to prevent frauds in the future or that our existing internal mechanisms to detect or prevent fraud will be sufficient. Any fraud discovered in the future may have an adverse effect on our business, profitability and reputation.

39. Failures in detecting employee, and distributor misconduct could adversely impact our business and subject us to significant legal liability and reputational harm.

We are vulnerable to reputational harm because we operate in an industry in which personal relationships, integrity and the confidence of our customers are of critical importance. Our employees, and distributors could engage in misconduct that adversely affect our business. For example, if an employee were to engage in illegal or suspicious activities, we could be subject to regulatory fines and suffer serious harm to our reputation, financial condition, customer relationships and ability to attract new customers. While we have internal processes to detect, prevent and monitor our employees, and distributors, we may not be successful in identifying or limiting such occurrences. Such misconduct could include, engaging in mis-selling, misrepresentation or fraudulent, deceptive or otherwise improper activities when marketing or selling products, binding us to transactions, hiding unauthorized or unsuccessful activities, such as insider trading, improperly using or disclosing confidential and price sensitive information, making illegal or improper payments, falsifying documents or data, recommending products, services or transactions that are not suitable for our customers; misappropriation of funds, engaging in unauthorized or excessive transactions to the detriment of our customers or not complying with applicable laws or our internal policies and procedures.

We are exposed to the risk of our directors and employees being non-compliant with insider trading rules or engaging in front running in securities markets. While we have taken steps to reduce instances of fraud, mis-selling and other forms of misconduct by our agents, employees and distribution partners, including taking action against malpractices, conducting training programs for employees and distributors, there can be no assurance that these measures will succeed in detecting or deterring misconduct or to provide sufficient evidence to conclude investigations of misconduct. There have been no instances of proceedings initiated against any of our employees or management personnel for fraud, misconduct, insider trading or front running, we cannot assure you that such proceedings will not be initiated going forward on account of non-compliance of regulatory framework.

Our business often requires that we deal with confidential information. If our employees were to improperly use or disclose this information, even if inadvertently, we could be subject to legal action and suffer serious harm to our reputation, financial position and current and future business relationships. It is not always possible to deter employee misconduct, and the precautions we take to detect and prevent such activities may not always be effective. Misconduct by our employees, or even unsubstantiated allegations of misconduct, could result in an adverse effect on our reputation and our business. While we have implemented specific initiatives to reduce the likelihood of such situations occurring or recurring in future, including enhanced due diligence measures for high-risk cases, there can be no assurance that we will not be subjected to fraudulent claims in the future. We may be also subjected to fraudulent behavior and disclosures by customers and third-parties in respect of other areas of operations, including money laundering and forgery. While we have not experienced, any instances of fraudulent claims by customers of third-parties during the nine months ended December 31, 2024, and December 31, 2023,

or Fiscals 2024, 2023 and 2022, however, there can be no assurance that as we expand our customer and distribution base, we will not experience fraudulent claims which may negatively impact our ability to comply with applicable regulations and have an adverse impact on our results of operations, profitability and reputation.

40. *Our failure to comply with anti-money laundering, insider trading, anti-terrorist financing rules, regulations, circulars and guidelines applicable to us issued by regulatory and government authorities could result in criminal and regulatory fines and reputational damage.*

We are required to comply with applicable anti-money laundering and anti-terrorist financing laws and other regulations in India (including the Prevention of Money Laundering Act, 2002 and rules and regulations made thereunder, SEBI (Fraudulent and Unfair Trade Practices relating to Securities Market) Regulations, 2003 and SEBI (Prevention of Insider Trading) Regulations, 2015). These laws and regulations require us to, among other things, adopt and enforce KYC, anti-money laundering (“AML”) and counter-terrorism policies and procedures and report suspicious and large transactions to the applicable regulatory authorities in different jurisdictions.

We, in the course of our operations, run the risk of failing to comply with the prescribed KYC procedures and the consequent risk of fraud and money laundering by dishonest customers despite putting in place systems and controls to prevent the occurrence of these risks as is customary in our jurisdiction. In certain of our activities and in our pursuit of business, we risk inadvertently offering our financial products and services to unsuitable customers despite our KYC and AML policies. Such incidents may result in regulatory action or requirements to invest further in our relevant systems, either of which could result in increased expenses, or in damage to our reputation which could reduce our attractiveness to investors.

41. *Any disruption in our information technology systems or an inability to adapt to newer systems could adversely impact our business and operations.*

We are dependent on the capacity and reliability of the communications, information and technology systems supporting our operations. We are exposed to operational risks, such as trading, data entry or operational errors or interruptions of our financial, accounting, trading, compliance and other data processing systems, whether caused by the failure to prevent or mitigate data losses and other security breaches, or other cyber security threats or attacks, fire or other disaster and power or telecommunications failure, which could result in a disruption of our business, liability to customers, regulatory intervention, or reputational damage, and thus have a material adverse effect on our business. Given our volume of transactions, certain errors may be repeated or compounded before they are discovered and successfully rectified. Our dependence on our automated information technology systems to record and process transactions may further increase the risk that flaws in our technical system will result in losses that are difficult to detect. While our Company has not experienced interruptions, delays and outages in our technology during the nine months ended December 31, 2024 and December 31, 2023, or Fiscals 2024, 2023 and 2022, there can be no assurance that such instances will not occur going forward on account of variety of factors, including infrastructure changes, system failures, human or software errors, physical or electronic break-ins, denial-of-service attacks, or third-party internet provider disruptions.

Although we have back-up systems and cyber security and consumer protection measures in place, our back-up procedures, cyber defenses and capabilities in the event of a failure, interruption, or breach of security may not be adequate. Insurance and other safeguards we use may not be available or may only partially reimburse us for our losses related to operational failures or cyber-attacks. While our Company has not experienced any lapses in our procedures, cyber defense capability during the nine months ended December 31, 2024, and December 31, 2023, or Fiscals 2024, 2023 and 2022, however, there can be no assurance that going forward we will not experience lapses in our cyber defense capabilities, which could have a material adverse effect on our business operations.

Furthermore, we also face risks relating to compliance with applicable laws, rules and regulations relating to the collection, storage, use, sharing, disclosure, protection and security of personal information, as well as requests from regulatory and government authorities relating to such data. Many laws and regulations relating to privacy and the collection, storage, sharing, use, disclosure, and protection of certain types of data are subject to varying degrees of enforcement and new and changing interpretations by courts or regulators. For instance, we are required to comply with the Information Technology Act, 2000 (“IT Act”) and the rules notified thereunder. The Digital Personal Data Protection Act, 2023 which received the assent of the President of India on August 11, 2023 (the “DPDP Act”) deals with processing of all personal data in digital form, whether collected digitally or offline and digitalized later for processing. The Data Protection Act requires companies collecting and dealing with high volumes of personal data and who are notified as significant data fiduciaries, such as ours, to fulfil certain additional obligations such as appointment of a data protection officer for grievance redressal and an independent

data auditor to evaluate our compliance with the DPDP Act. It also provides for the establishment of a Data Protection Board of India for taking remedial actions and imposing penalties for breach of the provisions of the DPDP Act. It imposes restrictions and obligations on data fiduciaries, resulting from dealing with personal data and further, provides for levy of penalties for breach of obligations prescribed under the DPDP Act.

Furthermore, as our customer base, number of investment strategies and/or physical locations and technology systems evolve, our operations may be partially impacted by our ability to respond to technological advances and emerging industry standards and practices in a cost-effective and timely manner. We cannot assure you that we will be able to successfully implement new technologies or adapt our processing systems to evolving customer requirements or emerging industry standards. Changes in technology may make newer solutions more competitive than our Company's or may require us to make additional capital expenditure to upgrade our technology. Any inability by our Company, for technical, legal, financial or other reasons, to adapt in a timely manner to changing market conditions, evolving customer requirements or technological changes, could have a material adverse effect on our reputation, business, results of operation and financial condition.

- 42. *The total SIP count included in this Draft Red Herring Prospectus as of December 31, 2024, and December 31, 2023 and as of March 31, 2024, March 31, 2023, and March 31, 2022 are based on historical reporting criteria and as reported based on the data received from the registrar and share transfer agent ("RTA"). In the event the criteria are modified by the registrar and share transfer agent, our total SIP count may either increase or decrease from the amount as disclosed in this Draft Red Herring Prospectus and accordingly may not be comparable to our historical numbers.***

In the mutual fund industry, the total SIP count data, amongst others, are reported to the Association of Mutual Funds in India ("AMFI") by the AMCs/RTAs which are then published on the AMFI website. Pursuant to an email dated April 9, 2025 sent to AMCs and RTAs, AMFI highlighted that there are certain discrepancies in the data reported and actual numbers particularly in relation to total SIP count by the AMCs.

The reconciliation process carried out by AMCs to address discrepancies in SIP account reporting highlights a risk related to inaccuracies in reporting. Variances in the figures for outstanding SIP accounts provided by AMCs/RTAs and the actual numbers present the potential for inaccurate industry reporting, which could undermine investor confidence. Failure to adhere to the reporting standards or implement the prescribed corrective measures, in a timely manner or at all, such as cancelling dormant SIP registrations in accordance with existing guidelines, may expose AMCs to regulatory scrutiny, reputational damage, and subsequent penalties.

Additionally, the identification of root causes, such as under-reporting due to missed communications between Channels/Exchanges and RTAs, or over-reporting due to inclusion of dormant SIPs, signals gaps in data reconciliation processes. While RTAs may have taken corrective one-time measures, there is an ongoing risk of repeat errors if robust, consistent data validation protocols are not enforced. Such deficiencies may delay industry-wide accuracy in reporting, and expose individual AMCs to both operational inefficiencies and reputational risks if their data is found to deviate significantly from the reconciled figures in subsequent audits.

- 43. *Our operations are exposed to risks related to data breaches and cyberattacks. Any disruption in our information technology systems, or those of our third-party service providers may result in the loss of key information or disruption of our business processes, which could adversely affect its business, results of operations and financial condition.***

We maintain significant amounts of highly sensitive customer data, both online and offline. Our systems, or those of third-party service providers, are vulnerable to security breaches, acts of cyber-attacks or sabotage, vandalism or theft, computer viruses, loss or corruption of data, programming or human errors or other similar events. While our Company has not experienced disruptions to its information technology systems due to security breaches or misuse or leak of customer information, which had a material impact during the nine months ended December 31, 2024 and December 31, 2023, or Fiscal 2024, 2023 and 2022, however, there can be no assurance that we will not encounter material disruptions in the future. Any such disruption in our information technology systems, or those of its third-party service providers, including software-as-a-service providers, may result in the loss of key information or disruption of our business processes, which could adversely affect its business, results of operations and financial condition.

Considering such attacks are increasing in sophistication and change frequently in nature, our Company and our third-party service providers may be unable to anticipate these attacks or implement adequate preventative measures, and any compromise of our Company's systems, or those of our third-party service providers, may not

be discovered and remediated promptly, which could result in a loss of data. A security breach, act of cyber-attack or sabotage, vandalism or theft, computer viruses, loss or corruption of data or programming or human error made by our employees may lead to a breach of employees' and customers' data privacy and security. Any such breach may result in the release of such data to third parties against the will of affected parties, which could undermine the privacy of such parties and result in reputational harm. Furthermore, this could adversely affect our Company's performance due to legal proceedings or claims initiated against our Company for failing to preserve the security and confidentiality of data, or failing to comply with the relevant rules on utilizing data. Any such breach or other similar event may also lead to a change of current and potential consumers' behavior in a way that would impact our ability to retain current customers or attract new customers, which would have an adverse effect on our business, results of operation and financial position.

We cannot assure you that we will be successful in continuing to receive uninterrupted and quality services from our third-party service providers. Any disruption or inefficiency in the services provided by our third-party service providers could interrupt our business operations and damage our reputation.

44. *We may need additional capital in the future, and we cannot assure you that we will be able to obtain such capital on acceptable terms or at all.*

Except as disclosed in this Draft Red Herring Prospectus, we are not raising any capital presently and may require additional capital in the future in order for us to maintain our net worth and capital adequacy requirements, remain competitive, pay operating expenses, meet our liquidity needs and offer new products and services. While as of December 31, 2024, our Company has not availed any borrowings, however, we may raise capital from external sources in future to expand our business operations. Our ability to obtain additional capital from external sources in the future is subject to a variety of factors, including:

- our future financial condition, results of operations and cash flows;
- our ability to obtain the necessary regulatory approvals on a timely basis;
- any tightening of credit markets and general market conditions for debt and equity raising activities by competitive companies and other financial institutions; and
- economic, political and social conditions in the geographical markets in which we operate and elsewhere.

We cannot assure you that we will be able to obtain additional capital in a timely manner or on acceptable terms, if at all. Future debt financing could include terms that restrict our financial flexibility or restrict our ability to manage our business freely. Furthermore, the terms and amount of any additional capital raised through issuances of equity securities may result in significant dilution to our shareholders' equity interests.

45. *Our business may be adversely affected by work stoppages, increased wage demands by our employees, or increase in minimum wage, and if we are unable to engage new employees at commercially attractive terms.*

As of December 31, 2024, we had 291 full-time employees. While we have never experienced any major disruptions in our business operations due to employee issues, there can be no assurance that going forward we will not experience any such disruptions. Any employee issues directed against us, could directly or indirectly impact our business, and, if not resolved in a timely manner, could lead to disruptions in our operations. These actions are impossible for us to predict or control and any such event could adversely affect our business, results of operations, financial condition and cash flows.

Furthermore, India has stringent labor legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution, and employee removal, and legislation that imposes certain financial obligations on employers upon retrenchment. For details on labor legislations that may be applicable to our Company, see "*Key Regulations and Policies in India*" on page 258. Our employees are not unionized. However, if our employees seek to unionize, it may become difficult for us to maintain flexible labor policies, which may increase our costs and adversely affect our business.

For further information, see "*Our Business - Employee Training and Human Resources*" on page 254.

46. *We depend on the services provided by certain third-parties for our operations. Any deficiency or interruption in their services could adversely affect our business operations and reputation.*

We engage third-party service providers from time to time for various services for our operations including subject to applicable regulations. We rely on our registrar and transfer agent for to maintain investor records, processing transactions, distributing dividends issuing account statements, and for client support. We also rely on third-party custodians for settling trades. Any failure by the registrar and transfer agent to fulfil its obligations, custodian to execute trade or any other third-party service provider to perform their services in a timely and efficient manner may affect our reputation and business. In the event any of these third parties were to terminate their contractual relationships with us or fail to provide the agreed services to us for any reason, our business, results of operations and cash flows may be materially disrupted, and we may be held liable legally or suffer reputational damage on account of any deficiency of services on the part of such service providers. In addition, if the third-party service providers are subject to data breaches which have the effect of any leaks in customer or operational data, mismanage customer interface, or fail to operate or comply with applicable regulations or governance standards, we could suffer reputational harm and may be subjected to regulatory actions. We cannot assure you that we will be successful in continuing to receive uninterrupted and quality services from our third-party service providers. Any disruption or inefficiency in the services provided by our third-party service providers could interrupt our business operations and damage our reputation. While there have been no instances during the nine months ended December 31, 2024 and December 31, 2023, and Fiscals 2024, 2023 and 2022, where any aspect of our operations were impacted on account of interruption from our third-party service providers, however, there cannot be any assurance that we will not experience such instances going forward, particular, as we attract new customers and expand our product offerings.

Upon completion of the Offer, our Promoters will continue to hold a significant percentage of our post-Offer Equity Share capital. 49. We have declared dividends during the nine months ended December 31, 2024, and December 31, 2023, and Fiscals 2024, 2023 and 2022. Our ability to pay dividends in the future will depend on our earnings, and financial condition.

We have declared interim dividends for the nine months ended December 31, 2024, and December 31, 2023, and dividends for Fiscals 2024, 2023 and 2022. - (1) Dividend paid includes interim dividend and final dividend declared in the annual general meetings for the respective Fiscal.
- (2) Dividend Payout Ratio is calculated as dividend paid divided by net income. Dividend Payout Ratio for the nine months ended December 31, 2024 and December 31, 2023 are on an unannualized basis.
- (3) The net earnings for dividend payout ratio is arrived before other comprehensive income for the period if any.

Any dividends to be declared and paid in the future are required to be recommended by our Board of Directors and approved by our Shareholders, at their discretion, subject to the provisions of the Articles of Association and applicable law, including the Companies Act. Our Company’s ability to pay dividends in the future will depend on several internal and external factors, which, *inter alia*, include (i) profits earned by our Company, (ii) present and future capital requirements, (iii) overall financial position of our Company, and (iv) uncertainty in economic conditions. We cannot assure you that we will be able to pay dividends in the future. 51. This Draft Red Herring Prospectus contains information from third parties, including an industry report prepared by an independent third-party research agency, CRISIL Intelligence, which we have commissioned and paid for to confirm our understanding of our industry exclusively in connection with the Offer and reliance on such information for making an investment decision in this Offer is subject to inherent risks.

We have used the report titled “*Assessment of Mutual Fund industry in India*” dated April 2025 by CRISIL Intelligence appointed on February 4, 2025 (“**CRISIL Report**”), for purposes of inclusion of such information in this Draft Red Herring Prospectus, and exclusively commissioned by our Company for purposes of inclusion of such information in the Offer documents at an agreed fees to be paid by our Company. The CRISIL Report is available on the website of our Company at <https://www.canararobeco.com/company/shareholder-corner>. Our Company, our Promoters, our Directors, Key Managerial Personnel and Senior Management Personnel are not related to CRISIL Intelligence as a consequence of this engagement.

The CRISIL Report is a paid report and is subject to various limitations and based upon certain assumptions that are subjective in nature. Industry sources and publications are also prepared based on information as of specific dates and may no longer be current or reflect current trends. Industry sources and publications may also base their information on estimates, projections, forecasts and assumptions that may prove to be incorrect and may include numbers relating to our Company and peer group companies that differ from those we or such peer group companies record internally. In addition, statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Draft Red Herring Prospectus. There are no parts, data or information (which may be relevant for this Offer), that have been left out or changed in any manner. Accordingly, investors should read the industry-related disclosure in this Draft Red Herring Prospectus in this context.

52. *The mutual fund business in India may be adversely affected by changes in the present favorable tax regime. Any adverse development in tax laws may materially and adversely affect our operations financial condition and future business prospects.*

Any adverse development in tax laws, applicable to mutual fund companies, discontinuance of tax exemptions in relation to mutual fund income, dividend income, tax free bonds, change in applicability of minimum alternate tax rates and any discontinuance of tax benefits to customers on purchase of mutual fund products, may materially and adversely affect our operations financial condition and future business prospects.

Changes in tax laws/regulations, interpretations of such laws or regulations or failure to comply with procedures laid down under such laws/regulations may have a material adverse effect on our business, financial condition and operations. If, as a result of a particular tax risk materializing, the tax costs associated with certain transactions are greater than anticipated, it could affect the profitability of those transactions. In addition, the design of our mutual fund products takes into account a number of factors, including risks and taxation.

We cannot predict whether any tax laws or regulations impacting mutual fund products will be enacted, the nature and impact of the specific terms of any such laws or regulations would have a material adverse effect on our business, financial condition and operations.

53. *We may introduce new products for our customers, and we cannot assure you that such products will be profitable.*

We introduce new products and services in our existing lines of business. During nine months ended December 31, 2024 and December 31, 2023, and Fiscals 2024, 2023 and 2022, we launched one, one, two, two, and two new schemes, respectively. We may incur costs to expand our range of products and cannot guarantee that such new products will be successful once offered. Such failure may be due to factors outside of our control, such as general economic conditions, competition, changing customer demands, or our own errors in judgment of customer demands and product features. Several products that we launch may also require prior approval from the SEBI, which we may not obtain in a timely manner, or at all. While there have been no instances during the nine months ended December 31, 2024, and December 31, 2023, or Fiscals 2024, 2023 and 2022, where we experienced delays in launching a new scheme on account of delays in obtaining approval from the SEBI, however, we cannot assure you that we will not experience such delays going forward which could result in our inability to launch our new schemes / products in a timely manner. If we fail to develop and launch these products successfully, we may lose a part or all of the costs incurred in development and promotion or discontinue these products entirely, which could in turn increase our expenses without a corresponding increase in revenue.

54. *We may be subject to pressures to reduce our investment management fees or fees from advisory services, which could reduce our revenue and profitability.*

From time to time, we encounter fee pressure in respect of our product offerings. In order for us to maintain our fee structure in a competitive environment, we must be able to provide customers with investment returns and

service that will encourage them to be willing to pay our fees. We may not be able to maintain our current fee structure. Fee reductions on existing or future business would have an adverse impact on our income and profitability.

55. *Fluctuations in the market value of our investments could adversely affect our results of operations and financial condition.*

Fluctuations in the market values of our investments could cause us to write down the value of our assets, affect our liquidity and reduce our ability to enforce our security, which could adversely affect our result of operations and financial condition. We have been appointed as the investment manager to Canara Robeco Mutual Fund and receive investment management fees from the mutual fund which is charged as a percent of the AUM and is recognised on accrual basis. The maximum amount of management fee that can be charged is subject to applicable SEBI regulations. The contract includes a single performance obligation (series of distinct services) that is satisfied over time and the investment management fees earned are considered as variable consideration.

Furthermore, we provide advisory services to our clients wherein a separate agreement is entered into with the client. We earn advisory fee which is based on the terms of contract and is recognised on accrual basis. The contracts include a single performance obligation (series of distinct services) that is satisfied over time and the advisory fees earned are considered as variable consideration.

We may not accurately identify changes in the value of our investments caused by changes in market prices, and our assessments, assumptions or estimates may prove inaccurate or not predictive of actual results.

56. *We may engage in strategic transactions and other business combinations that are subject to risks and may adversely affect our business, results of operations and cash flows.*

We may pursue potential strategic transactions and other business opportunities, including acquisitions, consolidations, joint ventures or similar transactions in the future. Our ability to achieve benefits from such business opportunities will depend upon whether we are able to integrate the acquired businesses with our Company in an efficient and effective manner. The integration and the achievement of synergies requires, among other things, coordination of business development and employee retention, hiring and training policies, as well as the alignment of products, sales and marketing operations, compliance and control procedures, and information and software systems. Any difficulties encountered in combining operations could result in higher integration costs and lower savings than expected. The failure to successfully integrate an acquired business or the inability to realize the anticipated benefits of such acquisitions could significantly increase our expenses, which, without a commensurate increase in total revenue, would lead to a decrease in net revenue. In addition, acquired businesses may have unknown or contingent liabilities, including liabilities for failure to comply with relevant laws and regulations, and we may become liable for the past activities of such businesses.

57. *If we are unable to resolve investor grievances in a timely manner, our business and brand reputation may be adversely affected.*

As part of our business, we receive customer grievances on a regular basis for various aspects of our operations. Type of complaints include non-receipt of amount declared under income distribution cum capital withdrawal option, interest on delayed payment of amount declared under income distribution cum capital withdrawal option, non-receipt of redemption proceeds, interest on delayed payment of redemption, non-receipt of statement of account/unit certificate, discrepancy in statement of account, data corrections in investor details, non-updation of changes viz. address, PAN, bank details, nomination amongst others.

The table sets forth certain details in related to investor grievance redressal system during the nine months ended December 31, 2024, and December 31, 2023, and Fiscals 2024, 2023, 2022:

Particulars	Nine months ended December 2024	Nine months ended December 2023	Fiscal 2024	Fiscal 2023	Fiscal 2022
Total complaints	203	178	240	260	225
Complaints Resolved	200	177	240	260	225
Average time taken to resolve customer	3	5	5	6	6

Particulars	Nine months ended December 2024	Nine months ended December 2023	Fiscal 2024	Fiscal 2023	Fiscal 2022
grievance (in number of days)					

While we intend to effectively resolve investor grievances in a timely manner, however, we cannot assure you that as we expand our business operations, we will continue to resolve investor grievances in line with our historical rate, which could adversely impact our business and brand reputation.

58. ***We have in this Draft Red Herring Prospectus included certain non-generally accepted accounting principle financial measures (“Non-GAAP”) and certain other industry measures related to our operations and financial performance. These Non-GAAP measures and industry measures may vary from any standard methodology that is applicable across the industry in which we operate, and therefore may not be comparable with financial or industry related statistical information of similar nomenclature computed and presented by other companies.***

Certain Non-GAAP financial measures and certain other industry measures relating to our operations and financial performance have been included in this Draft Red Herring Prospectus. We compute and disclose such Non-GAAP financial measures and such other industry related statistical information relating to our operations and financial performance as we consider such information to be useful measures of our business and financial performance, and because such measures are frequently used by securities analysts, investors and others to evaluate the operational performance of the industry in which we operate, many of which provide such Non-GAAP financial measures and other industry related statistical and operational information. Such supplemental financial and operational information is therefore of limited utility as an analytical tool, and investors are cautioned against considering such information either in isolation or as a substitute for an analysis of our audited financial statements as reported under applicable accounting standards disclosed elsewhere in this Draft Red Herring Prospectus.

These Non-GAAP financial measures and such other industry related statistical and other information relating to our operations and financial performance may not be computed on the basis of any standard methodology that is applicable across the industry and therefore may not be comparable to financial measures and industry related statistical information of similar nomenclature that may be computed and presented by other companies. For further information, see “Other Financial Information” on page 374.

59. ***Significant differences exist between Ind AS and other accounting principles, such as U.S. GAAP and IFRS, which investors may be more familiar and may consider them material to their assessment of our financial condition.***

Our Restated Financial Information for the nine months ended December 31, 2024, and December 31, 2023, and Fiscals 2024, 2023 and 2022, have been prepared and presented in conformity with Ind AS. Ind AS differs in certain significant respects from Indian GAAP, IFRS, U.S. GAAP, and other accounting principles with which prospective investors may be familiar with in other countries. If our financial statements were to be prepared in accordance with such other accounting principles, our results of operations, cash flows and financial position may be substantially different. Prospective investors should review the accounting policies applied in the preparation of our financial statements and consult their own professional advisers for an understanding of the differences between these accounting principles and those with which they may be more familiar. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Red Herring Prospectus should be limited accordingly.

60. ***The Offer Price, and price-to-earnings ratio based on the Offer Price of our Company, may not be indicative of the market price of our Company on listing or thereafter.***

Our revenue from operations for Fiscal 2024 was ₹ 3,180.90 million, and our price-to-earnings ratio (based on Fiscal 2024 profit for the year) is [●]* at the upper end of the price band. For further information, see “Basis for Offer Price” on page 122. The Offer Price of the Equity Shares is proposed to be determined on the basis of assessment of market demand for the Equity Shares offered through a book-building process, and certain quantitative and qualitative factors as set out in the section titled “Basis for Offer Price - Qualitative Factors” on page 122 and the Offer Price, multiples and ratios may not be indicative of the market price of our Company on listing or thereafter.

* to be updated at Prospectus stage

Accordingly, any valuation exercise undertaken for the purposes of the Offer by our Company would not be based on a benchmark with our industry peers. The relevant financial parameters based on which the Price Band would be determined, shall be disclosed in the advertisement that would be issued for publication of the Price Band.

The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results, market conditions specific to the industry we operate in, developments relating to India, announcements by us or our competitors of significant acquisitions, strategic alliances, our competitors launching new products or superior products, announcements by third parties or governmental entities of significant claims or proceedings against us, volatility in the securities markets in India and other jurisdictions, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

EXTERNAL RISKS

Risks Relating to India

61. Natural disasters, fires, epidemics, pandemics, acts of war, civil unrest and other events could materially and adversely affect our business.

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19, acts of war, terrorist attacks and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition, cash flows and results of operations.

Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our technological infrastructure and generally reduce our productivity and may require us to evacuate personnel and suspend operations. Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

62. Changing laws, rules and regulations in India and legal uncertainties including any adverse application of corporate and tax laws, may adversely affect our business, cash flows, prospects and results of operations.

The regulatory and policy environment in which we operate is evolving and is subject to change. Unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. For instance, the Supreme Court of India has in a decision clarified the components of basic wages which need to be considered by companies while making provident fund payments, which resulted in an increase in the provident fund payments to be made by companies. Any such decisions in future or any further changes in interpretation of laws may have an impact on our results of operations. Any future amendments may affect our tax benefits such as deductions for income earned by way of dividend from investments in other domestic companies.

Further, the GST framework is subject to varying interpretations by different authorities. Any adverse interpretations or changes in the GST regulations could materially impact our cost structure and profitability. Disputes or litigations arising from such interpretations could also result in substantial legal expenses and management time, adversely affecting our business operations and financial condition.

The Government of India has announced the union budget for the Financial Year 2025 (the “**Budget**”), pursuant to which the Finance Act, 2024 has amended the Income-tax Act, 1961, including the capital gains tax rates with effect from the date of announcement of the Budget. We have not fully determined the effects of these recent and proposed laws and regulations on our business. The Parliament of India has passed the Bharatiya Nyaya Sanhita, 2023, the Bharatiya Nagarik Suraksha Sanhita, 2023 and the Bharatiya Sakshya, which have repealed the Indian Penal Code, 1860, the Code of Criminal Procedure, 1973 and the Indian Evidence Act, 1872, respectively, with effect from July 1, 2024. The effect of the provisions of these on us and the litigations involving us cannot be predicted with certainty at this stage. Changes in capital gains tax or tax on capital market transactions or the sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance. For further discussion on capital gains tax, see “ - *Investors*

may be subject to Indian taxes arising out of capital gains on the sale of and dividend on Equity Shares” on page 73.

We cannot predict the impact of any changes in or interpretations of existing, or the promulgation of, new laws, rules and regulations applicable to us and our business. Unfavorable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us, our business, operations or group structure being deemed to be in contravention of such laws and/or may require us to apply for additional approvals. We may incur increased costs and expend resources relating to compliance with such new requirements, which may also require significant management time, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent maybe time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. Further, the Government of India has recently introduced various amendments to the Income Tax Act, vide the Finance Act, 2024. We have not fully determined the impact of these recent and proposed laws and regulations on our business, financial condition, future cash flows and results of operations.

Unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals.

63. *Any adverse application or interpretation of competition laws could adversely affect our business and cash flows.*

The Competition Act, 2002, as amended (the “**Competition Act**”) was enacted for the purpose of preventing practices that have or are likely to have an adverse effect on competition (“**AAEC**”) in certain markets in India and has mandated the Competition Commission of India (the “**CCI**”) to separate such practices. Under the Competition Act, any arrangement, understanding or action, whether formal or informal, which causes or is likely to cause an AAEC is deemed void and attracts substantial penalties.

Furthermore, any agreement among competitors which directly or indirectly involves determination of purchase or sale prices, limits or controls production, or shares the market by way of geographical area or number of customers in the relevant market is presumed to have an appreciable adverse effect on competition in the relevant market in India and shall be void. Furthermore, the Competition Act prohibits abuse of dominant position by any enterprise. If it is proved that the contravention committed by a company took place with the consent or connivance or is attributable to any neglect on the part of, any director, manager, secretary or other officer of such company, that person shall be guilty of the contravention and liable to be punished.

The Competition Act aims to, among others, prohibit all agreements and transactions which may have an AAEC in India. Consequently, certain agreements entered into by us could be within the purview of the Competition Act. Furthermore, the CCI has extra-territorial powers and can investigate any agreements, abusive conduct or combination occurring outside India if such agreement, conduct or combination has an AAEC in India. The effects of the provisions of the Competition Act on the agreements entered into by us cannot be predicted with certainty at this stage. However, since we pursue an acquisition driven growth strategy, we may be affected, directly or indirectly, by the application or interpretation of any provision of the Competition Act, any enforcement proceedings initiated by the CCI, any adverse publicity that may be generated due to scrutiny or prosecution by the CCI, or any prohibition or substantial penalties levied under the Competition Act, which would adversely affect our business, results of operations, cash flows and prospects.

The GoI has also passed the Competition (Amendment) Act, 2023, which has proposed several amendments to the Competition Act, such as introduction of deal value thresholds for assessing whether a merger or acquisition qualifies as a “combination”, expedited merger review timelines, codification of the lowest standard of “control” and enhanced penalties for providing false information or a failure to provide material information.

If we pursue acquisitions in the future, we may be affected, directly or indirectly, by the application or interpretation of any provision of the Competition Act, any enforcement proceedings initiated by the CCI, any adverse publicity that may be generated due to scrutiny or prosecution by the CCI, or any prohibition or substantial penalties levied under the Competition Act, which would adversely affect our business, results of operations, cash flows and prospects.

64. *Investors may have difficulty enforcing foreign judgments in India against us or our management.*

Our Company is incorporated under the laws of India. Our Company's assets are located in India and all of our Company's Directors, Key Managerial Personnel and Senior Management Personnel are residents of India. As a result, it may not be possible for investors to effect service of process upon our Company or such persons in jurisdictions outside India, or to enforce against them judgments obtained in courts outside India.

India is not a party to any international treaty in relation to the recognition or enforcement of foreign judgments. The United Kingdom, Singapore, United Arab Emirates, and Hong Kong have been declared by the GoI to be reciprocating territories for purposes of Section 44A of the Civil Code. Section 44A of the Civil Code provides that where a foreign judgement has been rendered by a superior court, within the meaning of such section, in any country or territory outside of India which the GoI has by notification declared to be in a reciprocating territory, it may be enforced in India by proceedings in execution as if the judgement had been rendered by the relevant court in India. However, Section 44A of the Civil Code is applicable only to monetary decrees not being of the same nature as amounts payable in respect of taxes, other charges of a like nature or of a fine or other penalties. A judgement of a court of a country which is not a reciprocating territory may be enforced in India only by a suit on the judgement under Section 13 of the Civil Code, and not by proceedings in execution. Under the Civil Code, a court in India shall, on the production of any document purporting to be a certified copy of a foreign judgement, presume that the judgement was pronounced by a court of competent jurisdiction, unless the contrary appears on record. However, under the Civil Code, such presumption may be displaced by proving that the court did not have jurisdiction. The Civil Code only permits the enforcement of monetary decrees, not being in the nature of any amounts payable in respect of taxes, other charges, fines or penalties.

Judgments or decrees from jurisdictions which do not have reciprocal recognition with India cannot be enforced by proceedings in execution in India. The United States and India do not currently have a treaty providing for reciprocal recognition and enforcement of judgments in civil and commercial matters. A final judgement for the payment of money rendered by any court in a non-reciprocating territory for civil liability, whether or not predicated solely upon the general laws of the non-reciprocating territory, would not be enforceable in India. Even if an investor obtained a judgement in such a jurisdiction against us, our officers or directors, it may be required to institute a new proceeding in India and obtain a decree from an Indian court. Any such suit must be brought in India within three years from the date of the judgement in the same manner as any other suit filed to enforce a civil liability in India.

However, the party in whose favour such final judgement is rendered may bring a new suit in a competent court in India based on a final judgement that has been obtained in the United States or other such jurisdiction within three years of obtaining such final judgement. It is unlikely that an Indian court would award damages on the same basis as a foreign court if an action were brought in India. Moreover, it is unlikely that an Indian court will award damages to the extent awarded in a final judgement rendered outside India if it believes that the number of damages awarded were excessive or inconsistent with public policy or Indian law. In addition, any person seeking to enforce a foreign judgement in India is required to obtain the prior approval of the RBI under the FEMA to execute such a judgement or to repatriate any amount recovered.

65. *Any adverse change in India's credit rating by an international rating agency could materially adversely affect our business and profitability.*

India's sovereign rating is Baa3 with a "stable" outlook (Moody's), BBB- with a "stable" outlook (S&P) and BBB- with a stable outlook (Fitch). India's sovereign rating could be downgraded due to several factors, including changes in tax or fiscal policy or a decline in India's foreign exchange reserves, which are outside our control. Any adverse change in India's credit ratings by international rating agencies may adversely impact the Indian economy and consequently our ability to raise additional financing in a timely manner or at all, as well as the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our business and financial performance, ability to obtain financing for capital expenditures and the price of our Equity Shares.

66. *Political changes could adversely affect economic conditions in India.*

We are incorporated in India and derive all of our revenue from operations and assets in India and a majority of our directors, KMPs and SMPs are located in India. Our business depends on a number of general macroeconomic and demographic factors in India which are beyond our control. In particular, our revenue and profitability are strongly correlated to user growth in capital markets, which is influenced by general economic conditions,

unemployment levels, the availability of discretionary income and consumer confidence. Recessionary economic cycles, a protracted economic slowdown, a worsening economy, uncertain economic conditions in light of the latest trade disputes in 2025 between the United States and other major economies, rising interest rates or other industry-wide cost pressures could have a material adverse effect on our Company.

Factors that may adversely affect the Indian economy and hence our results of operations and cash flows, may include the macroeconomic climate, including any increase in Indian interest rates or inflation; exchange rate fluctuations; scarcity of credit or other financing in India; prevailing income conditions among Indian consumers and Indian companies; epidemics, pandemics or any other public health crisis in India or in countries in the region or globally; volatility in, and actual or perceived trends in trading activity on India's principal stock exchanges; changes in India's tax, trade, fiscal or monetary policies; political instability, terrorism or military conflict in India or in countries in the region or globally; occurrence of natural or man-made disasters; other significant regulatory or economic developments in or affecting India or its consumption sector; international business practices that may conflict with other customs or legal requirements to which we are subject, including anti-bribery and anti-corruption laws; protectionist and other adverse public policies, including local content requirements, import/export tariffs, increased regulations or capital investment requirements; logistical and communications challenges; downgrading of India's sovereign debt rating by rating agencies; changes in political environment on account of upcoming elections; difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms or on a timely basis; and being subject to the jurisdiction of foreign courts, including uncertainty of judicial processes and difficulty enforcing contractual agreements or judgments in foreign legal systems or incurring additional costs to do so. Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely affect our business, results of operations, cash flows and financial condition and the price of our Equity Shares.

67. Financial instability in other countries may cause increased volatility in Indian financial markets.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Currencies of a few Asian countries have in the past suffered depreciation against the U.S. Dollar owing to various factors. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Financial instability in other parts of the world could have a global influence and thereby negatively affect the Indian economy. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy. These developments, or the perception that any related developments could occur, have had and may continue to have a material adverse effect on global economic conditions and financial markets, and may significantly reduce global market liquidity, restrict the ability of key market participants to operate in certain financial markets or restrict our access to capital. This could have a material adverse effect on our business, financial condition and results of operations and reduce the price of the Equity Shares.

Risks related to the Offer and Equity Shares

68. The determination of the Price Band is based on several factors and assumptions and the Offer Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Offer. Furthermore, the current market price of some securities listed pursuant to certain previous issues managed by the Book Running Lead Managers is below their respective issue prices.

The determination of the Price Band is based on various factors and assumptions and will be determined by our Company in consultation with the BRLMs. Furthermore, the Offer Price of the Equity Shares will be determined by our Company in consultation with the BRLMs through the Book Building Process. These will be based on numerous factors, including factors as described under "Basis for Offer Price" on page 122 and may not be indicative of the market price for the Equity Shares after the Offer.

The market price of the Equity Shares could be subject to significant fluctuations after the Offer and may decline below the Offer Price. We cannot assure you that the investor will be able to resell their Equity Shares at or above the Offer Price resulting in a loss of all or part of the investment. The relevant financial parameters based on which the Price Band would be determined shall be disclosed in the advertisement to be issued for publication of the Price Band. For further details, see "Basis for Offer Price" on page 122.

Furthermore, there can be no assurance that our key performance indicators (“KPIs”) shall become higher than our listed comparable industry peers in the future. An inability to improve, maintain or compete, or any reduction in such KPIs in comparison with the listed comparable industry peers may adversely affect the market price of the Equity Shares. There can be no assurance that our methodologies are correct or will not change and accordingly, our position in the market may differ from that presented in this Draft Red Herring Prospectus.

The disposal of Equity Shares by our Promoters or any of our Company’s other principal shareholders or the perception that such issuance or sales may occur, including to comply with the minimum public shareholding norms applicable to listed companies in India may adversely affect the trading price of the Equity Shares. We cannot assure you that our Promoters and other major shareholders will not dispose of, pledge or encumber their Equity Shares in the future. Furthermore, we cannot assure you that the disposal of the Equity Shares in the future, if any, by our Promoters or other major shareholders will not be at a price higher than the Offer Price.

In addition to the above, the current market price of securities listed pursuant to certain previous initial public offerings managed by the BRLMs is below their respective issue price. For further details, see “*Other Regulatory and Statutory Disclosures – Price information of past issues handled by the BRLMs*” on page 431. The factors that could affect the market price of the Equity Shares include, among others, broad market trends, financial performance, results of our Company post-listing, and other factors beyond our control. We cannot assure you that an active market will develop, or sustained trading will take place in the Equity Shares or provide any assurance regarding the price at which the Equity Shares will be traded after listing.

69. *Subsequent to listing of the Equity Shares, we may be subject to pre-emptive surveillance measures like Additional Surveillance Measure and Graded Surveillance Measures by the Stock Exchanges in order to enhance market integrity and safeguard the interest of investors.*

SEBI and the Stock Exchanges, in the past, have introduced various pre-emptive surveillance measures with respect to the shares of listed companies in India (the “**Listed Securities**”) in order to enhance market integrity, safeguard the interests of investors and potential market abuses. In addition to various surveillance measures already implemented, and in order to further safeguard the interest of investors, the SEBI and the Stock Exchanges have introduced additional surveillance measures (“**ASM**”) and graded surveillance measures (“**GSM**”).

ASM is conducted by the Stock Exchanges on Listed Securities with surveillance concerns based on certain objective parameters such as price-to-earnings ratio, percentage of delivery, client concentration, variation in volume of shares and volatility of shares, among other things. GSM is conducted by the Stock Exchanges on Listed Securities where their price quoted on the Stock Exchanges is not commensurate with, among other things, the financial performance and financial condition measures such as earnings, book value, fixed assets, net-worth, other measures such as price-to-earnings multiple and market capitalisation.

Upon listing, the trading of our Equity Shares would be subject to differing market conditions as well as other factors which may result in high volatility in price, and low trading volumes as a percentage of combined trading volume of our Equity Shares. The occurrence of any of the abovementioned factors or other circumstances may trigger any of the parameters prescribed by SEBI and the Stock Exchanges for placing our securities under the GSM and/or ASM framework or any other surveillance measures, which could result in significant restrictions on trading of our Equity Shares being imposed by SEBI and the Stock Exchanges. These restrictions may include requiring higher margin requirements, limiting trading frequency or freezing of price on upper side of trading, as well as mentioning of our Equity Shares on the surveillance dashboards of the Stock Exchanges. The imposition of these restrictions and curbs on trading may have an adverse effect on market price, trading and liquidity of our Equity Shares and on the reputation and conditions of our Company. Any such instance may result in a loss of our reputation and diversion of our management’s attention and may also decrease the market price of our Equity Shares which could cause you to lose some or all of your investment.

70. *Rights of shareholders of companies under Indian law may be more limited than under the laws of other jurisdictions.*

Our Articles of Association, composition of our Board, Indian laws governing our corporate affairs, the validity of corporate procedures, directors’ fiduciary duties, responsibilities and liabilities, and shareholders’ rights may differ from those that would apply to a company in another jurisdiction. Shareholders’ rights under Indian law, including in relation to class actions, may not be as extensive and widespread as shareholders’ rights under the laws of other countries or jurisdictions. Investors may face challenges in asserting their rights as shareholder in an Indian company than as a shareholder of an entity in another jurisdiction.

71. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares and dividends paid on the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares held as investments in an Indian company are generally taxable in India. A securities transaction tax (“STT”) is levied on equity shares sold on recognised stock exchange. Any capital gain exceeding ₹125,000, realised on the sale of Equity Shares on a recognised stock exchange, held for more than 12 months immediately preceding the date of transfer, will be subject to long term capital gains in India, at the rate of 12.5% (plus applicable surcharge and cess). This beneficial rate is, among others, subject to payment of STT. Further, any gain realised on the sale of Equity Shares held for more than 12 months, which are sold using any platform other than a recognised stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India at the rate of 12.5% (plus applicable surcharge and cess).

Further, any capital gains realised on the sale of Equity Shares held for a period of 12 months or less immediately preceding the date of transfer will be subject to short term capital gains tax in India. Such gains will be subject to tax at the rate of 20% (plus applicable surcharge and cess), subject to STT being paid at the time of sale of such shares. Otherwise, such gains will be taxed at the applicable rates.

Capital gains arising from the sale of the Equity Shares will not be chargeable to tax in India in cases where relief from such taxation in India is provided under a treaty between India and the country of which the seller is resident read with the Multilateral Instrument, if and to the extent applicable, and the seller is entitled to avail benefits thereunder. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain realised upon the sale of the Equity Shares.

The stamp duty for transfer of certain securities, other than debentures, on a delivery basis is currently specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount.

Investors are advised to consult their own tax advisors and to carefully consider the potential tax consequences of owning, investing or trading in our Equity Shares. Any dividends paid by an Indian company will be subject to tax in the hands of the shareholders at applicable rates. Such taxes will be withheld by the Indian company paying dividends. Non-resident shareholders may claim benefit of the applicable tax treaty, subject to satisfaction of certain conditions. We may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source pursuant to any corporate action including dividends. Investors are advised to consult their own tax advisors and to carefully consider the potential tax consequences of owning Equity Shares.

Unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals.

72. *Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may have an adverse effect on the value of our Equity Shares, independent of our operating results.*

Subject to requisite approvals, on listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time taken for such conversion and repatriation transaction charges incurred, if any, may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating the proceeds from a sale of Equity Shares outside India, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by Shareholders. For example, the exchange rate between the Indian Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the returns on our Equity Shares, independent of our operating results.

73. *Our Company’s Equity Shares have never been publicly traded and may experience price and volume fluctuations following the completion of the Offer, an active trading market for the Equity Shares may not develop, the price of our Equity Shares may be volatile may not be indicative of the market price of the Equity Shares after the Offer and you may be unable to resell your Equity Shares at or above the Offer Price or at all.*

Prior to this Offer, there has been no public market for our Equity Shares, and an active trading market may not develop or be sustained after this Offer. Listing and quotation do not guarantee that a market for our Equity Shares will develop or, if developed, the liquidity of such market for the Equity Shares. The Offer Price of the Equity Shares is proposed to be determined through a book building process and may not be indicative of the market price of our Equity Shares at the time of commencement of trading of our Equity Shares or at any time thereafter. Furthermore, the price of the Equity Shares may be volatile, and the investors may be unable to resell the Equity Shares at or above the Offer Price, or at all. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results, market conditions specific to the industry we operate in, developments relating to India and volatility in the Stock Exchanges and securities markets elsewhere in the world.

There has been significant volatility in the Indian stock markets in the recent past, and the trading price of our Equity Shares after this Offer could fluctuate significantly as a result of market volatility or due to various internal or external risks, including but not limited to those described in this Draft Red Herring Prospectus. The market price of our Equity Shares may be influenced by many factors, some of which are beyond our control, including:

- failure of security analysts to cover the Equity Shares after this Offer, or changes in the estimates of our performance by analysts;
- activities of competitors and suppliers;
- future sales of the Equity Shares by us or our shareholders;
- investor perception of us and the industry in which we operate;
- our quarterly or annual earnings or those of our competitors;
- the public's reaction to our press releases and adverse media reports; and
- general economic conditions.

Furthermore, the stock market often experiences price and volume fluctuations that are unrelated or disproportionate to the operating performance of a particular company. Recent stock run-ups, divergences in valuation ratios relative to those seen during traditional markets, high-short interest or short squeezes, and strong and a typical retail investor interest in the markets may also affect the demand for and price of our Equity Shares that are not directly correlated to our operating performance. On some occasions, our stock price may be, or may be purported to be, subject to “short squeeze” activity. A “short squeeze” is a technical market condition that occurs when the price of the stock increases substantially, forcing market participants who have taken a position that its price would fall (i.e. who had sold the stock “short”), to buy it, which in turn may create significant, short-term demand for the stock not for fundamental reasons, but rather due to the need for such market participants to acquire the stock in order to forestall the risk of even greater losses. A “short squeeze” condition in the market for a stock can lead to short-term conditions involving very high volatility and trading that may or may not track fundamental valuation models. As a result of these fluctuations, our Equity Shares may trade at prices significantly below the Offer Price. These broad market fluctuations and industry factors may materially reduce the market price of the Equity Shares, regardless of our Company's performance. There can be no assurance that the investor will be able to resell their Equity Shares at or above the Offer Price.

74. Investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Offer.

Subject to requisite approvals, the Equity Shares will be listed on the Stock Exchanges. Pursuant to applicable Indian laws, certain actions must be completed before the Equity Shares can be listed and trading in the Equity Shares may commence. Investors' book entry, or 'demat' accounts with depository participants in India, are expected to be credited within one working day of the date on which the Basis of Allotment is approved by the Stock Exchanges. The Allotment of Equity Shares in the Offer and the credit of such Equity Shares to the applicant's demat account with depository participant could take approximately two Working Days from the Bid/Offer Closing Date and trading in the Equity Shares upon receipt of final listing and trading approvals from the Stock Exchanges is expected to commence within three Working Days of the Bid/Offer Closing Date. There could be a failure or delay in listing of the Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval or otherwise commence trading in the Equity Shares would restrict investors' ability to dispose of their Equity Shares. There can be no assurance that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this risk factor. We could also be required to pay interest at the applicable rates if allotment is not made, refund orders are not dispatched or demat credits are not made to investors within the prescribed time periods.

75. Any future issuance of Equity Shares or convertible securities or other equity linked instruments by us may dilute your shareholding and sale of Equity Shares by the Promoters may adversely affect the trading price of the Equity Shares.

We may be required to finance our growth, whether organic or inorganic, through future equity offerings. Any future equity issuances by us, including a primary offering, convertible securities or securities linked to Equity Shares including through exercise of employee stock options, may lead to the dilution of investors' shareholdings in our Company. Any future equity issuances by us or disposal of our Equity Shares by the Promoters or any of our other principal shareholders or any other change in our shareholding structure to comply with minimum public shareholding norms applicable to listed companies in India or any public perception regarding such issuance or sales may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences including difficulty in raising capital through offering of our Equity Shares or incurring additional debt. There can be no assurance that we will not issue further Equity Shares or that our existing shareholders including our Promoters will not dispose of further Equity Shares after the completion of this Offer (subject to compliance with the lock-in provisions under the SEBI ICDR Regulations) or pledge or encumber their Equity Shares. Any future issuances could also dilute the value of shareholder's investment in the Equity Shares and adversely affect the trading price of our Equity Shares. Such securities may also be issued at prices below the Offer Price. We may also issue convertible debt securities to finance our future growth or fund our business activities. In addition, any perception by investors that such issuances or sales might occur may also affect the market price of our Equity Shares.

76. Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.

Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to compliance with sectoral norms and certain other restrictions), if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then a prior regulatory approval will be required. Furthermore, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities.

In addition, pursuant to the Press Note No. 3 (2020 Series), dated April 17, 2020, issued by the DPIIT, which has been incorporated as the proviso to Rule 6(a) of the FEMA Rules, investments where the beneficial owner of the Equity Shares is situated in or is a citizen of a country which shares land border with India, can only be made through the Government approval route, as prescribed in the Consolidated FDI Policy dated October 15, 2020 and the FEMA Rules. Furthermore, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/purview, such subsequent change in the beneficial ownership will also require approval of the Government of India. These investment restrictions shall also apply to subscribers of offshore derivative instruments. We cannot assure you that any required approval from the RBI or any other governmental agency can be obtained with or without any particular terms or conditions or at all.

For further information, see "Restrictions on Foreign Ownership of Indian Securities" on page 472.

77. Our ability to raise foreign capital may be constrained by Indian law.

As an Indian company, we are subject to exchange controls that regulate borrowing in foreign currencies. Such regulatory restrictions limit our financing sources and could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that any required regulatory approvals for borrowing in foreign currencies will be granted to us without onerous conditions, or at all. Limitations on foreign debt may have an adverse effect on our business growth, financial condition and results of operations.

78. Qualified Institutional Buyers and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a

Bid, and Retail Individual Investors are not permitted to withdraw their Bids after Bid/Offer Closing Date.

Pursuant to the SEBI ICDR Regulations, Qualified Institutional Buyers (“QIBs”) and Non-Institutional Investors are required to block the Bid amount on submission of the Bid and are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Investors can revise their Bids during the Bid/Offer Period and/or withdraw their Bids until the Bid/Offer Closing date, but not thereafter. While we are required to complete all necessary formalities for listing and commencement of trading of the Equity Shares on all Stock Exchanges where such Equity Shares are proposed to be listed, including Allotment, within three Working Days from the Bid/Offer Closing Date or such other period as may be prescribed by the SEBI, events affecting the investors’ decision to invest in the Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows or financial condition may arise between the date of submission of the Bid and Allotment. We may complete the Allotment of the Equity Shares even if such events occur, and such events may limit the investors’ ability to sell the Equity Shares Allotted pursuant to the Offer or cause the trading price of the Equity Shares to decline on listing. Therefore, QIBs and Non-Institutional Investors will not be able to withdraw or lower their bids following adverse developments in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows or otherwise between the dates of submission of their Bids and Allotment.

79. Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby may suffer future dilution of their ownership position.

Under the Companies Act, 2013 a company having share capital and incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages before the issuance of any new equity shares, unless the pre-emptive rights have been waived by adoption of a special resolution by holders of three-fourths of the equity shares voting on such resolution. However, if the laws of the jurisdiction the investors are located in does not permit them to exercise their pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such jurisdiction, the investors will be unable to exercise their pre-emptive rights unless we make such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for the investor’s benefit. The value the custodian receives on the sale of such securities and the related transaction costs cannot be predicted. In addition, to the extent that the investors are unable to exercise pre-emption rights granted in respect of the Equity Shares held by them, their proportional interest in us would be reduced.

80. A third-party could be prevented from acquiring control of us post this Offer, because of anti-takeover provisions under Indian law.

As a listed Indian entity, there are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company. Under the Takeover Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company subsequent to completion of this Offer. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to our shareholders, such a takeover may not be attempted or consummated because of SEBI Takeover Regulations.

H. Description on the historic use of the KPIs by our Company to analyze, track or monitor the operational and/or financial performance of our Company

In evaluating our business, we consider and use certain KPIs, as presented above, as a supplemental measure to review and assess our financial and operating performance. The presentation of these KPIs is not intended to be considered in isolation or as a substitute for the Restated Financial Information. We use these KPIs to evaluate our financial and operating performance. Some of these KPIs are not defined under Ind AS and are not presented in accordance with Ind AS. These KPIs have limitations as analytical tools.

Further, these KPIs may differ from the similar information used by other companies and hence their comparability may be limited. Therefore, these metrics should not be considered in isolation or construed as an alternative to Ind AS measures of performance or as an indicator of our operating performance, liquidity, profitability or results of operation. Although these KPIs are not a measure of performance calculated in accordance with applicable accounting standards, our Company’s management believes that it provides an additional tool for investors to use in evaluating our ongoing operating results and trends and in comparing our financial results with other companies in our industry because it provides consistency and comparability with past financial performance, when taken collectively with financial measures prepared in accordance with Ind AS.

Investors are encouraged to review the Ind AS financial measures and to not rely on any single financial or operational metric to evaluate our business. See “Risk Factors – Significant differences exist between Ind AS and other accounting principles, such as U.S. GAAP and IFRS, which investors may be more familiar and may consider them material to their assessment of our financial condition.” on page 68.

MACROECONOMIC SCENARIO IN INDIA

As per IMF, Global economy is expected to grow at 3.3% both in 2025 and 2026

As per the International Monetary Fund (“IMF”) (World Economic Outlook – January 2025), global GDP growth prospects for 2025 and 2026 hold steady at 3.3%. The ‘last mile’ of inflation continues to remain sticky across advanced western economies, with the United States, Euro Area and the United Kingdom all recording a pick-up in inflation in November 2024, predominantly driven by core or services. Furthermore, the risks to inflation remain significant going forward, with likely tariffs being imposed by US on imports. US GDP grew at an annualized and seasonally adjusted 2.8% in the third quarter of 2024 from 3.0% in the second quarter on account of further decrease in residential fixed investment and downturn in private-inventory investment. The euro area’s GDP rose 0.4% in the third quarter of 2024 vs a growth of 0.2% in the previous quarter. UK’s economic growth moderated to 0.1% on-quarter in the third quarter of 2024 from 0.5% in the second quarter of 2024, owing to significant slowdown in growth of the services sector.

As per IMF, global headline inflation is expected to decline to 4.3% in 2025 and to 3.6% in 2026 from 5.8% in 2024. China has indicated a more accommodative monetary policy in 2025, taking cues from continuing weakness in economic activity.

India expected to remain one of the fastest growing economies in the world

The Indian economy was amongst the fastest-growing in the world prior to onset of the COVID-19 pandemic. In the years leading up to the global health crisis which disrupted economic activities, the country’s economic indicators posted gradual improvements owing to strong local consumption and lower reliance on global demand. Despite global geopolitical instability in middle east and Russia Ukraine war, India continues to maintain its position as one of the fastest-growing economies globally. In March 2025, the National Statistical Office (“NSO”),

in its second advance estimate of national income, projects the country's real gross domestic product (GDP) to expand 6.5% on-year this fiscal.

Crisil Intelligence expects GDP growth rate to be steady at 6.5% in Fiscal 2026. Private consumption is expected improve further on expectations of healthy agricultural production and cooling food inflation. Softer food inflation should create space in household budgets for discretionary spending. Secondly, the tax benefits announced in Union Budget 2025-2026 and increased allocations towards key asset- and employment generating schemes are expected to support consumption. Easing monetary policy by the Reserve Bank of India ("RBI") is expected to support discretionary consumption. Crisil Intelligence expects the RBI's Monetary Policy Committee ("MPC") to cut the repo rate by 50-75 bps in Fiscal 2026. The central bank's recent liquidity-easing measures and easier regulations for non-banking financial companies are expected to transmit the benefits from an easier monetary policy to the broader economy.

India's economy expected to remain steady at 6.5% in Fiscal 2026

Over the past three fiscals (Fiscal 2022 to 2024), Indian economy has outperformed its global counterparts by witnessing a faster growth. In IMF's Oct 2024 update, it raised the GDP growth forecast for India highlighting India's improved prospect for private consumption particularly in rural areas. Going forward as well, IMF projects that Indian economy will remain strong and would continue to be one of the fastest growing economies.

RBI cuts repo rate by 25 bps, maintains neutral stance

RBI's MPC in its February 2025 meeting unanimously voted to cut the policy rates by 25 basis points, a first since May 2020. The repo rate is now 6.25%, the standing deposit facility rate is 6.00% and marginal standing facility (MSF) rate is 6.50%. Easing inflation and a slowing economy prompted the central bank to cut rates. However, the MPC maintained a neutral stance, which gives it flexibility to remain data- dependent and respond to any global shock. The US Federal Reserve (Fed) reduced the interest rate by 25 bps each in November and December 2024 to 4.25%- 4.50%. The Bank of England (BoE) in February 2025 eased the UK interest rate by 25 bps to 4.5%. Crisil Intelligence expects the MPC to cut rates by 75-100 basis points next fiscal. US tariff hikes, moderating US federal reserve rate cuts and weather-related risks will have bearing on the rate cutting cycle.

Consumer Price Index ("CPI") inflation to average at 4.4% in FY26

Consumer price index (CPI) inflation softened sharply to 4.3% in January 2025 from 5.2% in December 2024 due to easing food inflation. Food inflation eased to 6% in January 2025 from 8.4% in December 2024, led by softer inflation in vegetables, pulses and cereals. Crisil Intelligence expects CPI inflation to continue to soften in Fiscal 2025 to 4.6% and 4.4% in Fiscal 2026 from 5.4% in Fiscal 2024.

Contribution of different sectors to India's growth

The trend in gross value added ("GVA") at current prices by economic activity indicates that financial, real estate and professional services have consistently contributed the highest to GVA (an estimated 23% this fiscal). Total GVA at current prices clocked a compound annual growth rate (CAGR) of 10% between Fiscal 2023 and Fiscal 2025.

Macroeconomic outlook for India (Fiscal 2026)

Macro variables	FY24	FY25P	FY26P	Rationale for outlook
Real GDP (y-o-y)	8.2%#	6.5%#	6.5%	Lower inflation and RBI's rate cuts are expected to lift growth next fiscal, assuming a normal monsoon and lower crude oil prices. Any substantial pick up in investment growth will hinge on accelerating private capex. Exports face headwinds from tariff hikes initiated by the US.
Consumer Price Index (CPI) inflation (y-o-y)	5.4%	4.6%	4.4%	Inflation is expected to move closer to the RBI's target of 4% on expectations of a normal monsoon, high base effect in food inflation and softer global commodity prices. Some uptick is expected in non-food inflation due to an adverse base.

Macro variables	FY24	FY25P	FY26P	Rationale for outlook
10-year Government security yield (Fiscal end)	7.1%	6.7%	6.5%	Rate cuts by RBI, lower inflation and softer crude oil prices are expected to lead to a mild softening of yields in fiscal 2026. A rise in gross market borrowings will cap the downside to yields.
Fiscal Deficit (% of GDP) *	5.6%	4.8%	4.4%	Fiscal consolidation will be made possible via moderating revenue expenditure thrust even as capex focus is broadly maintained. The budget banks on revenue collection to remain robust.
CAD (Current Account Deficit as % of GDP)	-0.7%	-1.0%	-1.3%	Current account deficit (CAD) is expected to increase owing to headwinds to exports from US tariffs. Lower crude oil prices, healthy services trade balance and robust remittances growth will prevent CAD from widening too much.
₹/\$ (March average)	83.0	86.0	87.0	A manageable CAD would mean not much pressure on the rupee, but geopolitical shocks could keep the rupee volatile

Key structural reforms: Long-term positives for the Indian economy

- The government has also launched the JAM trinity (Jan Dhan, Aadhar and Mobile) which aims to link Jan Dhan accounts, mobile numbers and Aadhar cards of all Indian nationals to transfer cash benefits directly to the bank account of the intended beneficiary and avoid leakage of government subsidies.
- India Stack, set of digital infrastructure including Aadhar, UPI, Digi locker, e-KYC and e-Sign has enabled many unbanked citizens to access formal financial services, promoting financial inclusion.
- The GST regime has been stabilizing fast and is expected to bring more transparency and formalization, eventually leading to higher economic growth.
- In recent union budget for 2025-26, limit of foreign direct investment (FDI) in insurance sector has been increased from 74% to 100%, subject to the investment of entire premium in India. This move is likely to increase insurance penetration, which was 3.7% as of fiscal 2024 versus global average of 7%.
- Government launched the Digital India program, on July 1, 2015 with the vision of transforming India into a digitally empowered society and a knowledge-based economy, by ensuring digital access, digital inclusion, digital empowerment and bridging the digital divide. Some of the key initiatives and related progress under Digital India are as follows:
 - Unified Mobile Application for New-age Governance (UMANG) – for providing government services to citizens through mobile. More than 2077 e-Services as of October 2024 and over 489.64 crore worth of transactions have taken place on UMANG as of October 2024.
 - Unified Payment Interface (UPI) is the leading digital payment mechanism, it has onboarded 632 banks and has facilitated more than 16,584.97 million transactions (by volume) worth ₹23.5 trillion in October 2024.
 - Cyber Security: The Government has taken necessary measures to tackle challenges about data privacy and data security through introducing the Information Technology (IT) Act, 2000 which has necessary provisions for data privacy and data security.
 - Common Services Centers – CSCs are offering government and business services in digital mode in rural areas through Village Level Entrepreneurs (VLEs). Over 400 digital services are being offered by these CSCs. As of September 2024, 0.59 million CSCs are functional (including urban & rural areas) across the country, out of which, 0.47 million CSCs are functional at Gram Panchayat level.
- PMAY was introduced in 2015 to provide affordable housing for all by the end of 2022. The timelines were revised to Fiscal 2024 and Fiscal 2025 for PMAY-Gramin and PMAY-Urban respectively due to delays in completion. Execution under the scheme has been encouraging with approximately 2.60 crores houses being completed as of May 2024, out of the targeted 2.95 crore houses. The target for the next five years has been

further increased by approximately 2 crore houses in the Fiscal 2025 budget estimate; a 68% addition to the current target of ~3 crore houses. The move provides an impetus to the real estate sector as well its stakeholders including – developers, engineering, procurement and construction contractors, allied industries such as steel, cement etc.

Overall, these initiatives will improve the digital connectivity of Indians along with boosting business sentiment, thereby creating new opportunities.

Key Growth Drivers

Favourable demographics

India has one of the world's largest youth populations, with a median age of 28 years. About 90% of Indians are below 60 years of age. In 2021, it was estimated that India had the highest share of young working population (15-30 years) compared to major developed and developing countries with the share of 27%. Crisil Intelligence expects that the large share of working population, coupled with rapid urbanization and rising affluence, will propel growth in the economy.

India has the highest young population (15-30 years) with 375 million individuals, among the major economies (2021)

Rising Urbanization

Urbanization is one of India's most important economic growth drivers. It is expected to drive substantial investments in infrastructure development, which in turn is expected to create jobs, develop modern consumer services, and increase the ability to mobilize savings. India's urban population has been rising consistently over the decades. As per the 2018 revision of World Urbanization Prospects, the urban population was estimated at 36% of India's total population in 2023. According to the World Urbanization Prospects, the percentage of the population residing in urban areas in India is expected to increase to 40% by 2030.

Rise in number of nuclear families

Nuclearization refers to the formation of multiple single families out of one large joint family. Each family lives in a separate house, while the ancestral house may be retained or partitioned to buy new houses. Nuclearization in urban areas is primarily driven by changing lifestyle of people, individualism, changing social/cultural attitudes, and increased mobility of labour in search of better employment opportunities. These trends are expected to continue in future.

Increasing per capita GDP

India's per capita net national income at constant price was at 5.5% in Fiscal 2025. As per IMF estimates, India's per capita income (at constant prices) is expected to grow at 5.6% CAGR in real terms from Fiscal 2025 to Fiscal 2027.

Rising Income tax return, indicating a progression towards a formal economy

Income tax returns (“ITR”) filed by individuals has risen from 6 crores in Fiscal 2019 to 7.6 crores in Fiscal 2024. This uptrend reflects increasing tax compliance, growing workforce and underscores India’s progress towards formal economy, improving financial transparency and economic stability. The rise in ITR filings indicates that more individuals are entering the formal financial system, which can lead to better access to credit, insurance, and other financial services.

Household savings expected to increase

India's gross domestic savings as a percentage of GDP rose to 29.2% in 2023 from 28.4% in 2022, highlighting the economy's recovery and improved income levels. Compared with most of the emerging market peers, India had a favourable gross domestic savings rate, which was greater than the global average (28.2% in 2022).

During the pandemic, household savings as a percentage of GDP increased from 19.1% in Fiscal 2020 to 22.7% in Fiscal 2021. However, household savings moderated to 18.6% in Fiscal 2023 and 18.5% in Fiscal 2024, due to households borrowing at a faster pace than they were saving since the pandemic. This was driven by a significant retail credit push by lenders, increased willingness among individuals (particularly the younger demographic) to borrow, and enhanced access to lenders facilitated by technological advancement. Crisil Intelligence expects India to remain a high-savings economy owing to a higher gross domestic savings rate than the global average.

Unlike most other countries, where financial savings dominate, physical assets constitute the majority of household savings in India. In Fiscal 2014, household savings in physical assets stood at 64%. The share decreased to 48% in Fiscal 2021 due to pandemic-induced nationwide lockdowns and slowdown in construction of houses. With the lifting of lockdowns post-pandemic, it surged to 64% in Fiscal 2022 and 72% in Fiscal 2024 owing to an increase in construction of houses.

Crisil Intelligence expects the share of financial assets in net household savings to increase over the next five years, as elevated inflation after the pandemic could have further goaded investors to move to higher-yielding instruments in real terms. Interestingly, households are also opting to hold more cash after enduring the pandemic shock. Mutual fund investments by households have grown faster than in the recent past. Investments through systematic investment plans (SIPs), mostly opted by individuals, continued to rise in Fiscal 2023. Among financial instruments, households are moving away from savings in deposits towards equities, mutual funds and small savings.

Financial penetration to rise with increase in awareness of financial products

Overall literacy in India is at 77.7% as per the results of NSO survey conducted from July 2017 to June 2018, which is below the world literacy rate of 86.5%. However, according to the National Financial Literacy and Inclusion Survey (NCFE-FLIS) 2019, only 27% of Indian population is financially literate indicating huge gap and potential for financial services industry. The survey defines financial literacy as a combination of awareness, knowledge, skill, attitude, and behavior necessary to make sound financial decisions and ultimately achieve individual financial wellbeing.

With the increase in financial literacy, the demand for financial products, especially in smaller cities, has seen a major uptick in recent years. Going forward, CRISIL INTELLIGENCE expects financial penetration to increase on account of the increase in financial literacy.

Financial inclusion on a fast path in India

According to the World Bank's Global Findex Database 2021, the global average of percentage of adult population with an account opened with a bank, financial institution or mobile money provider, was approximately 76% in calendar year 2021. India's financial inclusion has improved significantly over calendar years 2014 to 2021 as adult population with bank accounts increased from 53% to 78% (Source: Global Findex Database) due to the Indian government's efforts to promote financial inclusion and the proliferation of supporting institutions.

Trend in demat accounts in India

India has witnessed a surge in financial literacy, driven by the rise of DIY investment platforms and discount brokers. These platforms have simplified access to stocks, mutual funds and other financial products, making investing easier and more affordable. With zero and lower brokerage fees, real time market insights, and user-friendly apps, retail investors find it easier to access to these products. Government initiatives, digital banking and fintech innovations further boost financial inclusion. In recent years, the participation of individuals in the equity market has increased, driven by factors such as higher financial literacy, a growing middle class, digitalisation and enhanced accessibility. The number of demat accounts in India has grown at 21% CAGR from Fiscal 2014 till Fiscal 2024. The above data points suggest the increasing awareness and willingness of people to participate in capital markets for trading or with a long-term outlook.

Growth in demat accounts since Fiscal 2014

In terms of active accounts, NSE saw 25% CAGR growth between Fiscal 2014 and Fiscal 2024, which increased from 4.29 million to 40.76 million. As of 9 months of Fiscal 2025, it stood at 50.16 million active accounts.

Convenience, affordability, and diversification are drawing new investors in the retail space

Mutual funds invest in a broad portfolio of stocks, bonds, and other securities by pooling the capital of several investors. By spreading risk, diversification reduces the impact of underperformance of an individual investment on the overall portfolio of the investor, providing a balanced and more stable portfolio. Experienced fund managers oversee mutual funds, they access markets, choose investments and modify portfolios in response to shifting market conditions. Retail investors who might lack the time or competence to actively manage their investments are drawn to this expertise. This investment avenue allows retail investors to start investing with a relatively small amount of money, and this affordability allows a larger number of investors to start with their investment journey who may not have significant capital to invest in individual stocks or bonds. The investors can choose among various tailored schemes depending on risk tolerance and financial objectives. Systematic Investment Plans (SIPs) have enabled investors to pay variable amounts at the time and frequency that suits their needs while building discipline in their investments. SIPs allow investors to take advantage of market volatility over time and gain compounding benefits. As these funds are regulated by financial institutions, it increases the confidence of the retail investors.

Active participation in stock market by retail investors to seek higher returns

Government's constant efforts to promote financial literacy have encouraged retail investors to get involved by investing directly in equities. The number of retail investors entering the stock market has increased significantly over the past few years as they seek higher returns. Direct equity has the potential to offer higher returns than

other investment options. It also gives investors greater control over their portfolio. Investing in individual stocks provides retail investors with educational experience. It allows them to learn about financial markets and economic trends promoting financial literacy and unlike mutual funds where investors pay fees for professional management, investing in direct equity allows individuals to avoid these fees potentially leading to lower overall investment cost. Investing in direct equity gives investors more control over their portfolios and they can make decisions based on their own research preference and risk tolerance rather than relying on fund managers. However, retail investors engaging in direct investing in equity face various risks, including the absence of professional guidance, susceptibility to market volatility, limited diversification opportunities, potential emotional decision-making, and a higher risk of financial loss.

Better access and control over investment are driving small cases among retail investors

Small cases are curated portfolios of stocks centered around specific themes or investment strategies, retail investors may appreciate the focus on sectors themes or investment themes that align with their preference or beliefs. Small cases provide investors with better access and control over securities as the shares are credited directly in their demat accounts, which allows them to exit from any investment since there is no exit load on selling small cases. The potential risk and return in small cases are relatively high from mutual funds because they are usually more volatile since the risk is concentrated in a specific strategy or theme.

Digitalization aided by technology to play pivotal role in growth of economy

Technology is expected to play an important role by progressively reducing the cost of reaching out to smaller markets. India has seen a tremendous rise in fintech adoption in the past few years. Among many initiatives by the government, the Unified Payments Interface (UPI) is playing a pivotal role towards financial inclusion. It provides a single-click digital interface across all systems for smartphones linked to bank accounts and facilitates easy transactions using a simple authentication method. The volume of digital transactions has also seen a surge in the past few years, driven by increased adoption of UPI. Apart from the financial services industry, digitalization in other industries like retail will also play an important role in the growth of the economy.

Post pandemic period, Nifty has risen in Fiscal 2021 and Fiscal 2022 due to inflow majorly coming from FIIs in Fiscal 2021 and DIIs in Fiscal 2022. In Fiscal 2024, Nifty has rose riding inflow from both FIIs and DIIs. Mutual funds in India are increasingly holding higher cash reserves due to increased liquidity in the financial markets. This approach allows fund managers to quickly deploy capital when favorable conditions arise.

Trend in Demat accounts in India

The demat accounts in India have grown at 21.5% CAGR from Fiscal 2014 till Fiscal 2024. The above data suggest the increasing awareness and willingness of the people to participate in capital markets for either trading or with a long-term outlook. As of Fiscal 2024, the total demat accounts stood at 152 million accounts. In H1FY25, the total demat accounts reached 175.4 million accounts.

Growth in Demat Accounts since Fiscal 2014 onwards and Active Client Base (as % of Demat Account) has improved substantially during last five years

The NSE Active Client Basis as a % of Demat Accounts increased from almost 20% in Fiscal 2014 to 29.1% in Fiscal 2024. Going forward, CRISIL INTELLIGENCE expects the demat accounts to grow at strong growth over the next five years and Active Client Base on NSE as a % of demat accounts to increase around 45-50%. Increased participation from retail investors is one of the key drivers for capital markets growth. Retail participation is one of the key enablers of rising demand for equity issuances.

Key growth drivers

Key growth drivers for capital market activities are similar to the growth drivers for economic growth as both of these are inter-linked. Some of the key growth drivers for capital markets are demographics of India as in 2022, it is estimated that India has the highest share of young working population (15-30 years) compared to major developed and developing countries with the share of 27%, India's per capita net national income at constant price expanded 7.4% in fiscal 2024, reflecting robust economic growth, increasing trend in India's gross domestic savings as a percentage of GDP, increase in digital payments, etc. Due to increasing per capita income, people have started looking for various financial investment avenues and investing in the capital market. Some of the other growth drivers are:

Structural and Regulatory Changes

The introduction of faster settlement cycles and electronic trading have improved market efficiency. The Securities and Exchange Board of India (SEBI) has implemented various reforms to improve transparency, protect investors, and enhance market efficiency. Initiatives like the Goods and Services Tax (GST), Insolvency and Bankruptcy Code (IBC), and Real Estate Regulatory Authority (RERA) have also contributed to a more organized market.

Increasing Smartphone Penetration in the country will drive growth in mobile stock trading

The rise in smartphone penetration will continue to aid growth of mobile trading among the retail participants. The rise in mobile trading will especially benefit the brokers which continuously invest in Technology and Platforms and thus will be able to provide a superior trading and investing experience as compared to their peers.

Increasing Share of Non-Institutional and Retail Investors to drive growth for the industry

Individual investors (i.e., excluding promoters and institutions) ownership in NSE listed companies has increased steadily over the years, reflecting growing confidence in Indian equity markets. From March 2017 to March 2024, overall retail mutual fund AUM and retail equity mutual fund AUM has increased at a CAGR of 20.8% and 22.9% respectively. Going forward, CRISIL INTELLIGENCE expects significant potential for direct equity investments as the total addressable market including mutual fund folios has seen significant growth in recent times. Moreover, with the increase in financial literacy of investors, direct equity ownership is expected to see an increase in the future.

Regulations and initiatives by SEBI and Exchanges to aid the penetration and growth in capital markets

SEBI has over the past systematically looked to make the Indian Capital Market a more safe and secured industry for investor. The regulator has over time introduced many newer regulations and evolved the existing ones. Some of the regulations and initiatives from the regulator are:

Application Supported by Blocked Amount (ASBA) which is a mechanism used for applying to Initial Public Offerings (IPOs) or Follow-on Public Offerings (FPOs). This mechanism creates a direct channel for flow of funds between the clearing corporation and the investors and ensures reduction in any fraud in handling of investor money by brokers.

Block mechanism facility which involves blocking of shares in the investors' demat whenever he/she wants to make a sale.

Shorter settlement cycle: The markets were functioning on a T+2 settlement cycle for the longest time. In January 2023, T+1 settlement cycle was brought into effect by SEBI. This meant that the trade settlement will be done within a day or 24 hours. The move was made in view of operational efficiency, faster fund remittances, quicker share delivery, and ease of the market participants. Further, in this development, with effect from March 28, 2024, NSDL implemented a beta version of T+0 settlement with 25 scrips and since January 31, 2025, NSDL implemented an option of T+0 settlement in a phased manner to cover additional top 500 scrips based on market capitalization as on December 31, 2024, for all brokers. This places India among the select countries to achieve such an efficient settlement system.

SGX Nifty shifts to GIFT city; GIFT city on the path to become a global hub

The SGX Nifty was shifted to the GIFT city, Gandhinagar in mid-2023. NSE IFSC – SGX Connect was launched in July 2022 which marked the beginning of a transition of liquidity riding on SGX Nifty to NSE IFSC. Starting from July 2023, the SGX Nifty Index was structured from NSE IFSC in Gift City, Gujarat, and was known as the GIFT NIFTY Index, widening the liquidity pool for Nifty products there. This means, that the derivative contracts worth approx. \$750 crore which were earlier traded from Singapore shifted to India. GIFT Nifty includes, GIFT Nifty 50, GIFT Nifty Bank, GIFT Nifty Financial Services and GIFT Nifty IT derivative contracts

There are many initiatives underway with respect to GIFT International Exchange that will help Indian markets extend their reach among global investors through direct engagement. It's expected that Indian entities will soon be allowed to directly list on NSE IFSC. This would help Indian companies access capital from global investors. This brings GIFT city a step closer to the becoming a global competitor to other financial hubs such as Dubai, Mauritius, Singapore etc.

Emerging sectors in India – Sectors such as EVs, semiconductors and electronics expected to dominate investments

PLI and emerging sectors accounted for almost 5% of the capex between fiscal 2019 and fiscal 2023. These two segments are expected to drive the bulk of incremental capex. There is strong investment intent in most emerging sectors. Their scaling would require large capex. Three segments are expected to draw as much as 85-90% of the non-PLI emerging sector capex: EVs, semiconductors and electronics. Transition towards greener sources of fuel and setting up of semiconductor design hubs in India are expected to provide impetus. These segments will require more funds for expansion and therefore will lead to growth in capital market activities.

Demographics profile to aid folio growth in capital markets

As of calendar year 2022, India has one of the largest young populations in the world, with a median age of 28 years. Of India's population, more than 60% is in the working age group, which is 19-59 years of age, and is expected to remain above 60% for one more decade. CRISIL INTELLIGENCE estimates that approximately 90% of Indians are still below the age of 60 in calendar year 2021 and that 63% of them are between 15 and 59 years. In comparison, in calendar year 2020, the United States (US), China and Brazil had 77%, 83% and 86%, respectively, of their population below the age of 60. Further with regards to long-term investment products, the increase in life expectancy and aspirations of the working population (for example, the need to build a strong corpus before retirement) is also increasing, leading to more focus on equity investments in capital markets.

Riding the digital wave – growth of new age fin-tech brokers or discount brokers and increasing mobile penetration to drive retail participation

The emergence of new age fin-tech brokers or discount brokers started gaining prominence from mid 2010s onwards as rising internet and smartphone penetration acted as a tailwind for the segment. These players have

revolutionized the industry with their low-cost digital business model. New age fin-tech brokers or discount brokers due to their low cost of operations have been able to transfer this benefit to their clients by significantly bringing down the cost of investing for them with minimal brokerage fees. Supported by the India's robust digital public infrastructure, cost of onboarding has gone down for the new age fintechs and discount brokers in addition to enabling them to build and scale their operation at a large scale. The mobile and internet-based trading has also witnessed a surge during the period and accordingly, many retail participants chose new age fin-tech brokers or discount brokers over traditional brokers. This was because zero brokerage on equity delivery was a new offering in the industry started by the new age fin-tech brokers or discount brokers. Therefore, rising financial literacy of India's young population (expecting to form a majority of the incremental clients for the brokers), coupled with their technological proficiency, almost zero brokerage feature and comfort of transacting through digital platforms is expected to further supplement the strong impact that technology has on the retail investors thereby enabling them to increase participation in the markets.

Preference for do-it yourself (DIY) models and higher risk-taking ability of Millennials aiding growth especially for Low-Cost Digital Only Discount Brokers

Technology savvy millennials prefer do-it-yourself models where the broker provides minimal services on Research and Advisory side but provide robust technology platform to execute trades. Further, the young population are not only restricted to the cash segment but also trade in the equity derivatives segment. The ease of execution of trades across segments using mobile apps, coupled with rising income levels of individuals and lower option premium per contract has further pushed the growth in the equity derivatives turnover, led by an options segment, for Discount Brokers.

Also, the digital model, where right from account opening to delivery is taken care of digitally, is leading to lower on-boarding costs for Digital Brokers as well. Further, the change in business models from banca-based/branch-based distribution to digital channel has provided level playing field for traditional as well as new age Discount brokers in terms of customer reach, with platform and brokerage being key differentiators.

Demand for wealth advisers is experiencing surge as wealth of the customers rise

As the wealth of customers and per capita income continues to rise, the demand for wealth advisers is experiencing a significant surge. This trend emphasizes the growing complexity of financial portfolios and the increasing need for personalized wealth management services. With higher net worth comes a greater array of investment opportunities, tax considerations, and estate planning intricacies, necessitating expert guidance to navigate effectively.

Wealth advisers play a pivotal role in assisting clients in optimizing their financial resources, mitigating risks, and achieving their long-term objectives. This rising demand highlights the importance of a skilled and knowledgeable advisory workforce capable of delivering tailored solutions to meet the evolving needs of affluent individuals and families.

Rising demand for corporate debt issuance

Capital markets have over the years played a pivotal role in development of Indian Economy. As India is surging ahead to become an economic powerhouse, Indian Capital Market is expected to play a greater role and remain in forefront in the days ahead. One of the crucial elements of Indian Capital Market is Corporate Bond Market. Persistent effort by the Government and SEBI in the last few years enabled a nascent Corporate Bond Market to move in the direction of maturity. Also, many companies have equity issuances through IPOs over the last couple of years, as they raise capital to finance their growth opportunities. As the economy grows and businesses gain scale, more companies are expected to explore raising equity from capital markets.

On the demand side, retail participation, index linked funds, and mechanisms to improve liquidity will be enablers. Besides this, attracting foreign capital is crucial to bridging the emerging supply-demand gap, especially given the crowding-out by gilts stemming from the huge borrowing programme of the government.

CRISIL INTELLIGENCE believes that the following measures will enable the Indian debt Capital Market to play an important role:

- Implementing the draft Reserve Bank of India (Credit Derivatives) Directions, 2021, to facilitate the development of the credit default swaps (CDS) market. This will allow banks, NBFCs, insurers, pension funds, mutual funds, alternate investment funds and foreign portfolio investors to write CDS

- Enhancing retail participation via tax sops to investments in debt mutual funds – similar to equity-linked savings schemes – and ensure parity in capital gains tax between equity and debt products.
- Improving liquidity in the market by fast-tracking the setting up of the institution to provide secondary market liquidity to corporate bonds, develop the Limited Purpose Clearance Corporation for corporate bond repos, and allow corporate bonds as collateral under the Reserve Bank of India's liquidity adjustment facility window
- Attracting both domestic and foreign capital through exchange traded funds and other index-linked bond funds, which offer lower costs, more transparency, better liquidity and potential to build diversified portfolios
- ESG profiling of Indian corporates to attract foreign capital into the Indian debt capital markets

Increasing Smartphone Penetration in the country will drive growth in mobile trading

The rise in smartphone penetration will continue to aid growth of mobile trading among the retail participants. The rise in mobile trading will especially benefit the brokers, which continuously invest in Technology and Platforms and thus will be able to provide superior trading and investing experience as compared to its peers.

MUTUAL FUNDS INDUSTRY IN INDIA

Evolution of the mutual fund industry

The initial years (1963-87)

The Indian mutual fund industry has a history of over 50 years, starting with the passing of an Act for the formation of the Unit Trust of India (UTI), a joint initiative of the Government of India and the RBI in 1963. The Act came into force on February 1, 1964, with the formation of UTI. It was regulated and controlled by the RBI until 1978, and thereafter by the Industrial Development Bank of India. UTI launched its first scheme, Unit Scheme 1964, in 1964 and its AUM reached ₹ 67 billion by 1988.

Entry of public sector banks (1987-1993)

In 1987, other public sector banks entered the mutual fund space. SBI Mutual Fund was set up in June 1987, followed by the launch of Canbank Mutual Fund in December 1987. Subsequently, other entities such as Life Insurance Corporation of India, Punjab National Bank, Indian Bank, Bank of India, General Insurance Corporation of India, and Bank of Baroda opened their own mutual fund houses, taking the industry assets to ₹ 470 billion by 1993 end.

Formal regulation and entry of private sector mutual funds (1993-2003)

Seeing the rise in demand for mutual funds, and with the onset of economic liberalization in the country, the industry was opened to the private sector in 1993. The year also saw the introduction of the first formal mutual fund regulations, Securities and Exchange Board of India (SEBI) (Mutual Fund) Regulations, 1993. All mutual funds, except UTI, were under the ambit of these regulations, which were later replaced by SEBI (Mutual Fund) Regulations, 1996. Similarly, SEBI introduced SEBI (Portfolio Managers) Regulations, 1993, for the regulation of portfolio management services and SEBI (Alternative Investment Funds) Regulations, 2012 for the regulation of alternative investment funds. The Association of Mutual Funds in India (AMFI), a member association of the mutual fund industry, was incorporated in August 1995. It recommends and promotes best practices and the code of conduct to its members.

Kothari Pioneer Mutual Fund (now merged with Franklin Templeton Mutual Fund), started in July 1993, was the first private sector mutual fund in the country. This triggered the entry of various mutual fund houses, both domestic and foreign, taking the number of providers at the end of January 2003 to 33 and the total AUM to ₹ 1,218 billion.

Development of regulatory landscape (2003-present)

In February 2003, following the repeal of the UTI Act, 1963, UTI was bifurcated into two separate entities. One is the Specified Undertaking of the UTI with an AUM of Rs 298 billion as of January 2003. The Specified

Undertaking of UTI, functioning under an administrator and under rules framed by the central government, is not subject to SEBI (Mutual Fund) Regulations, 1996. The other is UTI Mutual Fund. Sponsored by State Bank of India (SBI), Punjab National Bank, Bank of Baroda, and Life Insurance Corporation of India, UTI Mutual Fund is registered with SEBI and functions under SEBI (Mutual Fund) Regulations, 1996. With this bifurcation, and several mergers among other private sector funds, the mutual fund industry entered its current phase of consolidation and growth.

Classification of mutual funds

By structure

Open-ended schemes can be purchased and redeemed on any transaction day. They do not have a fixed maturity period, i.e., schemes are available for subscription and repurchase on a continuous basis. The number of units of an open-ended scheme can fluctuate, i.e., increase or decrease every time the fund house sells or repurchases the existing units. A mutual fund may stop accepting new subscriptions for open-ended schemes from investors but is required to repurchase investor units at any time.

Closed-end schemes can be purchased only during the new fund offer period and redeemed only at maturity. However, the funds are listed on stock exchanges (as mandated by regulation), where investors can sell their units to other investors. The units may trade on the exchange at a premium or discount to their issue price.

Interval funds are close ended mutual fund which has a fixed number of shares that are not traded in the open market, however the shares can be purchased or sold back to the fund during specific periods.

By fund management style

Passive funds are schemes that attempt to mimic a particular index. They include exchange-traded funds (ETFs) and index funds. The efficiency of these funds is generally evaluated by monitoring their tracking error. Tracking error reflects how efficiently a scheme can replicate the returns of its underlying total return index daily. It is measured by calculating the standard deviation of difference between the daily returns and the underlying total return index of the scheme. A low tracking error indicates efficiency in managing the scheme.

Active funds attempt to generate higher returns than their benchmark index by actively managing the portfolio. An active fund investor relies on the expertise of a fund manager who buys and sells securities based on his/her research and judgment of the market.

Another important aspect of active versus passive funds is the difference in expense structures. Expenses for passive funds are typically lower than that for active funds due to lower fund management cost associated with the former.

By asset class

There are five broad categories of mutual fund schemes by asset class – equity, hybrid, debt, solution-oriented, and other schemes. Each category, in turn, offers a plethora of funds, as shown in the tables below.

Equity schemes

Historical AUM growth

Robust growth in Indian mutual fund AUM

The Indian mutual fund industry has experienced significant growth over the past six years, driven by a thriving domestic economy, substantial inflows, and increased participation from individual investors. The industry is witnessing a surge in growth, driven largely by the equity space, where assets have increased significantly over the past decade.

This shift is attributed to retail investors transitioning from traditional debt products to equity funds, resulting in a substantial rise in equity investments. Retail mutual fund AUM as a proportion of individual deposits in scheduled commercial banks has risen from 17% in March 2020 to 30% as of March 2024 indicating increase investor participation in mutual funds.

The Fiscal 2024 was particularly notable, where the business has shown robust development and weathered obstacles with the industry benefiting from a strong equity market, robust economic growth, and heightened investor engagement.

AUM (Quarterly Average AUM) surged by approximately ₹ 14 lakh crore, reaching a record high of ₹ 54.13 lakh crore by March 2024, up from ₹ 40.51 lakh crore in March 2023. As of December 2024, the quarterly average AUM stood at ₹ 68.62 lakh crore having grown at 39% year on year. Over the five-year period, the quarterly average AUM grew at a CAGR of 17.2%, increasing from ₹ 24.48 lakh crore in March 2019 to ₹ 54.13 lakh crore in March 2024. Between Fiscal 2022 to fiscal 2024, the quarterly average AUM grew at a CAGR of 18.8%. The most notable growth was observed in Fiscal 2024, with a 33.6% jump, driven by an expanding investor base, primarily comprising individual investors. The outstanding performance of equity-oriented funds, significant progress in hybrid funds, and the rising popularity of systematic investment plans (SIPs) which have seen higher participation by individual investors, were key factors contributing to this growth. Individual AUM from retail and high net worth investors constituted 55% of total AUM as of March 2019 which increased to 63% as of December 2024. During Fiscal 2025, monthly SIP contribution remained consistently above ₹ 20,000 crores from April 2024 to February 2025, highlighting consistent performance of SIP.

The trajectory of the mutual fund industry in the last year is indicative of its adaptability to shifting market conditions as well as its durability. These insights can act as a compass for investors as they make their way through the complex financial landscape, enabling them to make well-informed decisions and capitalize on the industry's potential for long-term success.

Net inflow of mutual funds increased 365% year on year in Fiscal 2024

In Fiscal 2021, led by the resurgence of investor interest despite the COVID-19 pandemic, aggregate inflows totaled ₹2,14,743 crore. Inflows continued to remain strong in fiscal 2022, with ₹2,46,729 crore flowing in, mainly through equity funds. However, debt mutual funds witnessed heavy outflows of up to ₹1,84,252 crore in Fiscal 2022 due to lower returns and rising interest in equity market, which showed strong growth. The trend continued in fiscal 2023, where debt mutual funds and liquid funds witnessed outflows of ₹1,11,808 crore and ₹94,404 crore, respectively, as they offered muted returns to investors owing to tightening of monetary conditions both globally and in India, due to rising inflation. Moreover, with RBI increasing interest rates in Fiscal 2023, bank fixed deposits became more attractive and acted as a roadblock in bringing new investors to mutual funds. On the other hand, in Fiscal 2023, equity mutual funds witnessed the second highest inflows in the last five fiscals. Moreover, existing investors continued to invest in mutual funds through SIPs. Retail participation increased, with monthly inflows into mutual funds through the SIP route increasing from approximately ₹11,863 crore in April 2022 to approximately ₹14,276 crore in March 2023. In February 2025, monthly SIP contribution stood at ₹ 25,999 crores.

In Fiscal 2024, equity mutual funds witnessed the highest inflows in the last five fiscals, which reflects continued confidence of investors in equity-oriented schemes, despite volatility. Aggregate Inflows stood highest in Fiscal 2024 in the last 5 fiscals with ₹3,54,701 crore flowing in, mainly through equity funds. However, debt mutual funds and liquid funds witnessed outflows of up to ₹18,044 crore and ₹19,401 crore respectively in Fiscal 2024.

The mutual fund industry witnessed robust inflows across a broad range of equity categories, including small, mid, multi-cap, flexi-cap, large, and mid-cap, as well as sectoral and thematic funds. Notably, the composition of schemes underwent a shift, with equity-oriented schemes gaining traction and debt-oriented schemes experiencing a decline in proportion.

Open-ended funds have contributed maximum to India's mutual fund AUM

As of December 2024, open-ended funds made up 99.6% of the total assets under management (AUM). These funds encompass a range of categories, including debt, equity, hybrid solutions, and other funds such as index funds, gold ETFs, other ETFs, and funds of funds that invest overseas. Within open-ended funds, equity-oriented funds held the largest share at 45.9%. This growth can be attributed to ongoing investments from existing mutual fund investors and an increase in retail investors.

On the other hand, debt mutual funds accounted for 23.5% of AUM as of December 2024, down from 23.8% as of March 2024, due to significant outflows resulting from low returns and rising interest rates. Hybrid, solution-oriented, and other funds contributed 13.1%, 0.8%, and 16.7%, respectively, to the AUM.

In contrast, close-ended funds, which only include debt and equity-oriented schemes, accounted for a mere 0.4% of the total AUM as of December 2024. Within close-ended funds, debt-oriented AUM dominated with an 83.7% share, while equity-oriented AUM stood at 16.3%.

Interval funds, which also offer both debt and equity-oriented schemes, are another component of the mutual fund landscape. Overall, the distribution of AUM across different types of funds reflects the preferences and risk appetites of investors in the market as of December 2024.

Share of passive funds low in industry AUM, but has risen steadily over a small base

In contrast to the US and other developed nations, where passive asset management dominates, India has been slower to adopt passively managed ETFs and index funds. Nevertheless, as investor awareness grows, and the benefits of lower costs and ease of investment become more apparent, passive funds are gaining popularity. This is evident in the significant increase in their average AUM share, from 1.4% in March 2016 to 16.0% in December 2024. The average AUM of passive funds surged to ₹10,99,664 crore by December 2024. As of December, 2024, ETFs held assets worth ₹8.3 lakh crore, while index funds had assets of ₹ 2.7 lakh crore.

Index funds and exchange-traded funds (ETFs) have added a record number of investment accounts in 2024. The growth is largely attributed to the increasing popularity of sectoral and thematic investment, which has now extended to the passive investment space. The rising trend of retail investors opting for passive funds has been building up over the past few years, fueled by growing awareness and a slew of new fund launches in 2024.

In India, passive investing has been gaining traction for several years, as reflected in the significant increase in assets under management (AUM). The launch of innovative index funds and ETFs in 2024 has further accelerated this growth. As awareness about passive investing continues to grow, financial advisors are increasingly recommending these funds to their clients. Additionally, high net worth individuals (HNIs) and family offices are also shifting their investments towards passive funds, drawn by their cost-effectiveness and the inconsistent performance of actively managed funds.

AMCs having higher share of these funds can better cross-sell other products to their retail base and, thus, save on costs incurred for marketing and business acquisition of retail customers. High growth potential of this fund category also makes it an attractive segment for AMCs, and the large chunk of institutional mandates makes managing the funds more profitable.

Ageing of mutual fund AUM

Equity schemes having age of more than 24 months had the highest share of AUM of ₹18,61,810 crore as on March 31, 2024. It shows that investors are preferring long term investments in equity due to positive returns that equity-oriented schemes have given. Non-equity schemes of age greater than 24 months having a share of ₹ 6,97,815 crore of AUM was the second highest contributor as investors move towards safer debt mutual funds.

Age-wise AUM distribution shows long-term investment in equity oriented mutual funds gaining traction

Systemic Investment Plans

Systematic Investment Plans (SIPs) offer numerous advantages, including the ability to overcome emotional biases during market uncertainty, the capacity to accumulate large investments from smaller amounts, and tax benefits associated with Equity-Linked Savings Schemes (ELSS) through SIPs. By promoting steady and diversified inflows, SIPs have contributed to the growth and stability of the market, reducing overall volatility. The monthly inflows through SIPs have demonstrated a consistent upward trend, rising from ₹ 8,055 crore in March 2019 to ₹25,999 crore in February 2025. Over the longer term, the monthly average SIP inflows have grown at a compound annual growth rate (CAGR) of 21.3%, increasing from ₹7,724 crore in Fiscal 2019 to ₹23,447 crore in 9 months ended Fiscal 2025. Furthermore, the yearly SIP contributions have shown significant growth, with a 25.20% year-on-year increase in Fiscal 2023, and this momentum has continued into Fiscal 2024, which saw a 27.73% jump in yearly SIP contributions.

In the Fiscal 2024, net inflows through Systematic Investment Plans (SIPs) surged to approximately ₹2 lakh crore, marking a significant increase from the previous fiscal year's ₹1.55 lakh crore. As of March 2024, SIP assets totaled ₹10.71 trillion, comprising over 20% of the industry's total assets up from 9% as of Fiscal 2020. By December 2024, SIP assets had grown to ₹13.63 trillion constituting 18% of total mutual fund AUM. The number of SIP accounts also witnessed substantial growth, reaching nearly 8.4 crore with an average monthly addition of around 17 lakh accounts. By the end of December 2024, the total number of SIP accounts had further increased to approximately 10.32 crore.

SIPs' stability has proven essential in directing industry flows and giving investors a methodical and disciplined approach. Popularity of equity funds, rising participation of investors, recent investor education initiatives, and apparent benefits of SIPs to households that traditionally did not invest in mutual funds indicate that growth in inflows from SIPs is expected to accelerate over the foreseeable future. This is expected to make SIPs an increasingly important component in overall AUM growth. Increase in retail AUM has been primarily on account of SIPs as they make it easier for retail investors to participate by allowing them to invest small, manageable sums regularly. This method not only draws in more retail investors but also boosts the overall retail contribution to SIP AUM, building a larger, more stable asset base over time.

Monthly average SIP contribution clocked a CAGR of 21.3% between fiscal 2019- and nine-month Fiscal 2025

SIP AUM clocked a CAGR of 32.1% between Fiscal 2019 and Fiscal 2024

Investor Profile of the industry

Individuals outpace institutional investors in terms of AUM

Traditionally, the majority of the industry's assets were controlled by institutional investors, primarily comprising corporates. However, there has been a notable shift in recent years, with the share of institutional investors, including corporates, banks, financial institutions, foreign institutional investors, and foreign portfolio investors, declining from 47.78% in March 2020 to approximately 36.89% in December 2024. The mutual fund industry has experienced a significant increase in participation from individual households in recent years, driven by factors such as growing financial awareness, improved financial inclusion, enhanced access to banking channels, and the increased adoption of technology by non-bank distributors. As a result, individual investors are now playing a more prominent role in the industry, marking a significant change in the investor landscape.

Holding patterns suggests retail investors are at par with high net-worth individuals in equity AUM

High net-worth individuals are the highest contributor in equity mutual funds AUM as of 31st December 2024. Their share in equity AUM has increased from 43.7% as of March 2023 to 44.8% as of December 2024. This was because of a higher push of equity products by AMC's and distributors owing to their relatively higher profitability

and expense ratios. The share of retail investors decreased from 43.4% as of March 2023 to 42.7% as of December 2024.

In terms of debt AUM, corporates emerged as the leaders having total share of 57.5%. The share of high net-worth individuals in debt mutual funds AUM has decreased from 40.7% as of March 2023 to 32.1% as of December 2024.

Corporates also had highest share in liquid funds AUM and ETFs AUM with 77.7% and 87.4% of holdings respectively, as of December 31, 2024. FIIs have the minimum holdings across all types of AUM.

T30-B30 analysis of mutual fund AUM

As of December 2024, the monthly average AUMs in the top 30 (T30) cities stood at ₹ 56.50 trillion compared with ₹12.83 trillion for beyond the top 30 (B30) cities as per AMFI data. SEBI has reclassified top 15 (T15) and beyond the top 15 (B15) as T30 and B30, respectively in April 2018, to encompass a wider set of cities that have lower penetration after seeing the share of B15 cities improve regularly in previous years.

According to Crisil Intelligence, the share of T30 AUM as a proportion of aggregate industry AUM decreased to 81% in December 2024 from 85% in March 2019. Conversely, the share of B30 AUM increased to 19% from 15% over the same period, illustrating the rising importance of higher-growth B30 cities.

Increasing share of direct sales in Mutual Funds

In September 2012, the SEBI mandated mutual fund houses to offer products through the direct route alongside distributors. Asset managers launched a slew of direct plan offerings from January 2013. Consequently, share of direct plans in overall Mutual Fund AUM increased between March 2015 and December 2024. As of December 2024, AUMs under direct plans now represent 46.0% of aggregate industry AUM, up from 33.9% share as of March 2015. While the direct plans' share in retail has been increasing, regular plans still account for a 54.0% share of overall MF AUM and is expected to maintain its dominance owing to new investors gaining awareness about MFs and increased participation from B30 cities. Though mix of direct channel has increased in both Retail and Institutional segment, increase in retail participation has led to blended direct channel mix being rangebound.

Going forward, we expect increasing investor awareness and integration of user interfaces through digital channels to further growth in direct plan AUMs. Direct plans offer the benefit of lower expense ratios to investors compared with regular plans. They also allow AMC's to directly connect with investors without depending on intermediaries.

Direct plans gain traction, Regular plans continue to dominate mutual fund AUM

Rise in share of direct plans is across both individual and institutional investors

The rise in share of direct plans is attributed to various campaigns and investor education initiatives undertaken by the mutual industry, which has caused a shift towards direct plans. However, given the trend in the industry such as increasing presence of first-time investors, popularity of MFs beyond larger cities, low awareness of nuances of financial products amongst a large section of investors and need for guidance from a trusted intermediary in the wake of increasing market volatility, CRISIL Intelligence believes regular plans will continue to constitute a majority share in the overall individual mutual fund AUM.

Delhi which include cities such as Mumbai, Pune, Bengaluru, Ahmedabad, Kolkata, Vadodara, etc. serve as major hubs for mutual funds' investments as they are driven by factors such as financial prominence (presence of financial hubs, government entities), investor demographics (growth number of retail investors, presence of HNIs, growing investor awareness, greater technological penetration) and historical significance.

Growth of AUM to continue at a CAGR of 16-18% between Fiscal 2024 and Fiscal 2029

The Indian mutual fund market is expected to grow rapidly in the future. The sector is still strong because of the financialization of savings, rising financial literacy, structural initiatives by government and faster digital adoption have aided the expansion. The industry is well positioned for future success given the flexibility and resiliency demonstrated over the past year, even in the face of headwinds from the global economy. In the long term, i.e., between Fiscal 2024 and Fiscal 2029, the overall industry's AUM is projected to sustain a high growth trajectory of 16-18% CAGR, reaching approximately ₹ 115-120 lakh crore. This growth in the mutual-fund industry is expected to be driven by:

- Technological advancements, digitalization and rising internet and smartphone penetration facilitating ease of investments and distribution of mutual funds
- Rising popularity of SIPs with the majority of unique investors choosing SIP route for entering mutual funds market
- Rising inflows in thematic or sectoral mutual funds schemes with increased risk appetite of investors
- Higher disposable income and investable household surplus
- Increase in aggregate household share of financial savings within the savings pie
- Increase in per capita disposable income
- Deeper regional penetration as well as better awareness of mutual funds as an investment vehicle
- Perception of mutual funds as long-term wealth creators driven by 'Mutual Fund Sahi Hai' campaign

Mutual fund AUM expected to reach approximately ₹ 115-120 lakh crore in Fiscal 2029

Equity AUM to grow at 20-21% between Fiscal 2024 and Fiscal 2029

CRISIL Intelligence expects the Equity AUM to grow at 20-21% CAGR, the second fastest growth amongst all MF categories, over March 2024 to March 2029. ETFs are expected to grow fastest, clocking an approximately 22-23% CAGR over the next 5 years, as passive investing continues to grow in popularity.

Growth trend shows equity AUM to reach approximately ₹ 77 lakh crore in Fiscal 2029

From March 2024 to March 2029, CRISIL Intelligence expects the debt mutual segment to grow at a slower rate of 10-11% CAGR as they will continue to get affected due to high-interest rate scenario in the medium term.

CRISIL Intelligence expects liquid/money market segment to grow at approximately 8-9% CAGR between March 2024 to March 2029.

Evolving landscape of Mutual Funds

The advent of technology has revolutionized India's mutual fund industry, vastly expanding its reach, simplifying the investment process, and increasing transparency, thereby driving substantial growth.

The integration of technology has drastically reduced processing times, streamlining tasks that once required days, weeks, or multiple in-person visits into mere seconds, accessible through a smartphone. This paradigm shift has prompted Mutual Fund Distributors (MFDs) to recognize the vast potential of technology in revolutionizing their business models and driving expansion.

By embracing technology, MFDs have been able to boost efficiency, expand their customer base, and provide enhanced services. As a result, technology has become a key driver of growth in industry, bringing about a positive disruption that is propelling mutual funds towards substantial expansion and development.

The mutual fund industry is experiencing a seismic shift as technology continues to advance, revolutionizing the way investments are made. Digital platforms have made it easier for investors to access information and make informed decisions in real-time, while robo-advisors provide personalized investment guidance with ease. Additionally, artificial intelligence (AI) is transforming the fund management landscape by leveraging advanced data analysis and automation. By empowering investors with the knowledge and skills needed to thrive in this new environment, the industry can unlock the full potential of technology and foster a more informed and confident investor base.

Although this growth has introduced new risks, mutual fund companies are proactively mitigating them through ongoing system enhancements, robust security measures, and investor awareness initiatives. As technology continues to penetrate deeper into India, its positive influence on mutual fund investments and financial inclusion is expected to increase exponentially over the next decade.

Mutual Fund Industry sees growth in smaller cities

India's mutual fund industry is witnessing a notable shift, with smaller cities, referred to as Beyond 30 (B-30) cities, emerging as significant growth drivers, alongside the established Top 30 (T-30) cities such as Delhi, Mumbai, and Bengaluru. Historically, T-30 cities have accounted for approximately 75-80% of the total assets under management (AUM), owing to their mature financial markets and higher financial literacy.

However, B-30 cities, which are mid-sized and have limited financial infrastructure, are rapidly catching up. As of September 2024, while T-30 cities still dominate the MF landscape, B-30 cities are experiencing double-digit annual growth in AUM, surpassing their T-30 counterparts. This surge can be attributed to increasing financial awareness and enhanced distribution channels in these smaller cities, which are now making a significant contribution to the mutual fund sector. According to AMFI data, as of December 2024, the mutual fund industry's assets from Beyond 30 (B30) locations accounted for 19% of the total assets. Assets from B30 increased from ₹ 9.08 trillion in December 2023 to ₹ 12.83 trillion in December 2024, representing an increase of 41%.

Use of Artificial Intelligence and Data Analytics

Tailored guidance is a key driver of client satisfaction in the financial sector, and mutual funds are now able to offer bespoke investment solutions with the advancements in data analytics and artificial intelligence. AI and Data Analytics are used by mutual funds to help make improved investment decisions for its clients by analyzing large datasets and also offering personalized investment advice.

Passive Investing's Growth

Passive funds continued to see growth in assets; the segment continued to benefit from institutional investment flows into exchange traded funds (ETFs) from investors such as provident funds. Over the next few years, index funds and ETFs likely play a major role in passive investing. These funds are easy to invest, and hence consistently attract investors with their steady returns. As per AMFI data, In the Fiscal 2023-2024, this category saw inflows of ₹ 42,000 crore as opposed to the approximately ₹61,000 crore received by the entire passive funds category. By 2030, passive investing is expected to emerge as a leading trend, driven by the growing popularity of exchange-traded funds (ETFs) and index funds, which will likely prompt an increase in AUM share from 12% as of March 2024 to 15% as of Fiscal 2029.

Sustainability and ESG Investing

The mutual fund industry is poised to benefit from the growing trend of environmental, social, and governance (ESG) investing, as Indian investors increasingly seek to align their investments with their personal values and contribute to a more sustainable future. With the rising awareness of social and environmental issues, ESG funds that prioritize sustainability, ethics, and social responsibility are gaining traction, presenting a significant opportunity for the industry to expand its offerings and cater to this emerging demand. By introducing more ESG-

focused products, mutual fund companies can tap into this trend, attract socially conscious investors, and capitalize on the growing interest in responsible investing.

Growing wave of enthusiasm from Millennials and Youth

The Indian mutual fund industry is witnessing a surge in interest from millennials and Gen Z, who are driving the adoption of digital investment platforms. As a tech-savvy generation, they are naturally drawn to online investing tools, mobile apps, and robo-advisors, creating a fertile ground for the industry to tap into. By leveraging digital channels and educational content, mutual fund companies can effectively engage with young investors, introducing them to a range of wealth-building products and services. With their long-term investment horizon, younger investors present a significant opportunity for the industry to build lasting relationships, foster loyalty, and shape their investment habits from an early stage, ultimately paving the way for sustained growth and success.

Pension and Retirement-themed Investment Fund

The demographic shift in India, characterized by an aging population and inadequate pension systems, creates a lucrative opportunity for mutual funds focused on retirement planning. By 2030, retirement funds are expected to play a vital role in catering to the financial requirements of the expanding elderly population. Long-term SIPs with tax incentives and age-based funds that adjust asset allocation as retirement approaches are likely to gain popularity.

Key growth drivers & enablers for mutual fund industry

Mutual fund penetration

Mutual fund assets in India have seen robust growth, especially in recent years, driven by a growing investor base due to increasing penetration across geographies, strong growth of the capital markets, technological progress, and regulatory efforts aimed at making mutual fund products more transparent and investor friendly.

Although mutual fund AUM as a percentage of GDP has grown from 4.3% in Fiscal 2002 to 18.2% in Fiscal 2024, penetration levels remain well below those in other developed and fast-growing peers.

India's Mutual Fund AUM-to GDP ratio picked up to 18.2% in Fiscal 2024

India's mutual fund penetration (AUM to GDP) is significantly lower than the world average of 63% and also lower than many developed economies such as the US (122%), France (81%), Canada (84%) and the UK (58%) and key emerging economies such as Brazil (79%) and South Africa (47%).

AUM as % of GDP (Q1 CY 2024)

Demographics profile to aid folio growth in capital markets

As of calendar year 2024, India has one of the largest young populations in the world, with a median age of 28 years. Of India's population, more than 60% is in the working age group, which is 19-59 years of age, and is expected to remain above 60% for one more decade. CRISIL Intelligence estimates that approximately 90% of Indians are still below the age of 60 in calendar year 2021 and that 63% of them are between 15 and 59 years. In comparison, in calendar year 2020, the United States (US), China and Brazil had 77%, 83% and 86%, respectively, of their population below the age of 60.

Further with regards to long-term investment products, the increase in life expectancy and aspirations of the working population (for example, the need to build a strong corpus before retirement) is also increasing, leading to more focus on equity investments in capital markets.

Rise in saving capacity of individuals

As per capita income of the country rises, so does the disposable income. The increase in disposable income can fuel growth in various investment assets such as mutual funds. The increase in number of ITR filings also indicate the positive growth of the mutual fund industry. ITR filings require individuals to plan their taxes, which can lead to an increased awareness of tax-saving investments, such as ELSS (Equity-Linked Savings Scheme) mutual funds. As the level of financial literacy among investors increases, they are more likely to invest in safer asset classes such as mutual funds. Mutual funds have also started to invest in stocks listed outside the country thus helping individuals diversify their investments.

Increasing awareness about capital markets and growing market penetration among the population to aid Industry Growth

Indian capital market's penetration is low at approximately 13% with 188.1 million demat accounts as of January 2025. The total demat accounts increased from 21.84 million in March 2014 to 185.30 million in March 2024, growing at 23.8% CAGR during the period. The demat growth suggests the increasing awareness and willingness of the people to participate in capital markets for either trading or with long-term outlook. The young population of India is keen to learn the art of investing in the capital markets and has access to digital content for the same. This rising awareness and ease of investing is encouraging more individuals to participate in the capital markets. CRISIL Intelligence expects this trend is likely to continue, as more individuals open demat accounts and thus expand their financial savings.

Demand for wealth advisers is experiencing surge as wealth of the customers rises

As the wealth of customers and per capita income continues to rise, the demand for wealth advisers is experiencing a significant surge. This trend emphasizes the growing complexity of financial portfolios and the increasing need for personalized wealth management services. With higher net worth comes a greater array of investment

opportunities, tax considerations, and estate planning intricacies, necessitating expert guidance to navigate effectively.

Wealth advisers play a pivotal role in assisting clients in optimizing their financial resources, mitigating risks, and achieving their long-term objectives. This rising demand highlights the importance of a skilled and knowledgeable advisory workforce capable of delivering tailored solutions to meet the evolving needs of affluent individuals and families.

Increasing Share of Non-Institutional and Retail Investors to drive growth for the industry

Individual investors (i.e., excluding promoters and institutions) ownership in NSE listed companies has increased steadily over the years, reflecting growing confidence in Indian equity markets. In terms of market capitalization, the value of individual investors' direct equity ownership in NSE listed companies has grown at a CAGR of 22% between March 2019 and March 2024. From March 2019 to March 2024, overall retail mutual fund AUM and retail equity mutual fund AUM has increased at a CAGR of 20% and 23% respectively. Moreover, retail investors have been actively investing in IPOs, driven by strong sentiments, the success of several listings and the potential for quick gains. Over the past few years, IPOs have seen significant oversubscriptions as well. Further, the number of IPOs in India has been rising steadily, driven by strong economic growth, favourable market conditions, and a surge in investor participation. In 2023 and 2024, India witnessed 243 and 317 IPOs across various sectors such as technology, financial services, healthcare, and consumer goods.

Going forward, CRISIL Intelligence expects a significant potential for direct equity investments as the total addressable market including mutual fund folios has seen significant growth in recent times. Moreover, with the increase in financial literacy of investors, equity ownership is expected to see an increase in the future.

Capital markets to remain an attractive part of financial savings

Between Fiscal 2013 and Fiscal 2023, the net financial savings increased at a CAGR of approximately 6.8% as compared to approximately 9.0% for saving in physical assets between the same period. This led to a decline in household savings in physical assets from 66% in fiscal 2013 to 71% in fiscal 2023. Due to an increase in financial literacy and awareness, the relative outperformance of financial assets over recent years, and the Indian government's efforts to fight the shadow economy, CRISIL Intelligence expects the share of financial assets as a proportion of net household savings to increase over the next five years. The rise in financial assets is expected to further boost the financial investments under mutual funds ("MFs"), equity, pension schemes, insurance and alternate assets.

Unlike most other countries, where financial savings account for a significant proportion of savings, physical assets including gold and silver account for most household savings in India. Household savings in physical assets witnessed an increase to 71% in Fiscal 2023 from 64% in Fiscal 2014. The share of savings in physical assets dipped during Fiscal 2021 (covid pandemic year) to 48% due to nationwide lockdowns and slowdown in household construction. Post Covid, during Fiscal 2022 with opening of lockdown's share increased significantly to 64% and further to 71% in Fiscal 2023, due to rise in construction of houses.

Going forward, CRISIL Intelligence expects the share of financial assets as a proportion of net household savings to increase over the next five years as elevated inflation after the pandemic could have further goaded investors to move to higher-yielding instruments in real terms.

Increased digitalization to support digital distribution of mutual funds

Technology is conducive for India, considering its demographic structure where the median age is less than 30 years. The young population is tech savvy and at ease with using it to conduct the entire gamut of financial transactions. With increasing smartphone penetration and faster data speed, consumers are now encouraging Digitalization as they find it more convenient. Digitalization is expected to help improve efficiency and optimize costs. Players with better mobile and digital platforms are expected to draw more customers and emerge as winners in the long term.

Mobile penetration: Higher mobile penetration, improved connectivity, and faster and cheaper data speed, supported by Aadhaar and bank account penetration, have led India to shift from being a cash-dominated economy to a digital one.

Riding the digital wave – growth of new age fin-tech brokers and increasing mobile penetration to drive retail participation

The emergence of new age fin-tech brokers started gaining prominence from mid 2010s onwards as rising internet and smartphone penetration acted as a tailwind for the segment. These players have revolutionized the industry with their low-cost digital business model. New age fin-tech brokers due to their low cost of operations have been able to transfer this benefit to their clients by significantly bringing down the cost of investing for them with minimal brokerage fees. Supported by the India's robust digital public infrastructure, cost of onboarding has gone down for the new age fin-techs in addition to enabling them to build and scale their operation at a large scale. Therefore, rising financial literacy of India's young population (expecting to form a majority of the incremental clients for the brokers), coupled with their technological proficiency, almost zero brokerage feature and comfort of transacting through digital platforms is expected to further supplement the strong impact that technology has on the retail investors thereby enabling them to increase participation in the markets.

Inflows in mutual funds to strengthen with retail participation

Total AUM of retail investors stood at ₹18,81,426 crore as on December 31, 2024. It was mainly driven by the interest of retail investors in equity oriented and gold ETF mutual fund schemes. Total AUM of retail investors in equity schemes amounted to ₹15,82,926 crore and accounted for 84.1% of the total retail investors' AUM at the end of December 2024.

In the long term, with expectations of higher returns from the capital markets, the fund flow into equity funds is expected to be high. Increasing share of mutual funds in the financial savings of households, driven by expectations of higher and stable returns, is a key factor that is expected to contribute to fund inflows, especially into passive and equity fund categories.

Factors such as financial awareness and retirement planning to further contribute to the growth of Indian mutual fund industry

The low mutual fund penetration in India is largely due to the lack of awareness. However, penetration is increasing owing to various government initiatives towards investor education and awareness. SEBI has directed AMC's to annually set aside at least 2 basis points ("bps") of their daily net assets for spending on investor-education initiatives such as boosting awareness about capital market investment products. Such spending is

expected to rise along with growing industry AUM, thereby helping deepen mutual fund penetration among new investors, particularly in B30 markets. Crisil Intelligence believes that investor education, coupled with better risk management and transparency within the mutual fund industry, will boost investor confidence and lead to increased investments and growth in the industry. Moreover, retirement has the potential to significantly improve penetration among households. EPFO's move to invest 15% of its fresh accretion into ETFs has boosted the industry, thereby illustrating how mutual funds can be promoted as a vehicle for retirement planning in India. The substantial proportion of the young population offers huge potential for retirement planning.

Threats and challenges for mutual fund industry

Market volatility

The sentiments surrounding elections, both at the national and state levels, can introduce significant volatility in the capital markets as investors react to the potential policy changes and their implications for different sectors and industries. Furthermore, geopolitical events, such as trade disputes, military conflicts, and diplomatic tensions, can also contribute to market instability. Persistently high inflation, which has been a significant challenge for India and global economies, can further exacerbate market volatility. This increased volatility highlights the importance of long-term investment strategies, diversification, and professional fund management to weather the market turbulence.

Increased competition from Exchange Traded Funds (ETFs)

ETFs are investment vehicles that trade on exchanges like equity stocks while offering diversification and are more economic as they charge lesser fees as compared to actively managed funds. ETFs are passively managed investments. If actively managed funds are not generating desired returns, investors shift to passively managed ETFs which are lower in cost. Shift towards ETFs can lead to slower overall topline growth for AMCs, as they may see a decline in AUM in actively managed funds and a corresponding increase in AUM in ETFs. Hence increase in passive investing might lead to slower growth of AMCs,

Increased competition with new players entering the market

Notably, the industry will see a few more players going forward including Old Bridge Capital Management and Unifi Capital. Also, Jio Financial Services (JFS) joined hands with BlackRock to launch mutual fund business in India. The increased competition will drive fund managers to be more innovative and agile in their investment strategies, as they strive to attract and retain investors. This may lead to the introduction of new fund categories, specialized investment products, and enhanced digital platforms to provide a more seamless and personalized investment experience.

Technological shifts in Indian mutual fund industry

India has been witnessing increased use of automated technology such as artificial intelligence and AI-based services, chat bots, intelligent agents, digital assistants and many other app-driven services across all industries. Increasingly, we are witnessing a rising number of do it yourself (DIY) investors, some of whom prefer to directly invest in the markets instead of opting for the mutual fund route. The asset management companies of India will have to cope with this technological and attitudinal shift and reduce costs, develop new and innovative products, alpha generation and provide ease of investing to investors. However, it is also feared that increased implementation and usage of advanced technologies such as robo-advisors may disrupt the industry leading to loss of jobs and losing out the relevance of fund managers. It is important to strike a balance so that use technology can stimulate growth and bring in more efficiencies in the industry rather than disruptions.

Removal of indexation benefits on debt mutual funds

The government in Budget 2023 brought amendments as per which no Long-term Capital Gains (LTCG) tax benefits will be applicable to several investment vehicles such as debt mutual funds, gold funds, exchange-traded funds, international funds and certain category of hybrid mutual funds. With effect from 1st April 2023, capital gains made on such mutual funds will be added to income and taxed as per the slab rates applicable. Consequently, the removal of the indexation benefit for debt mutual funds is likely to diminish their appeal to long-term investors. Additionally, there is an increased likelihood that investors may shift their focus towards bank deposits due to these changes.

High interest rates will continue to pose a challenge for debt mutual funds in India

Interest rate hikes affect both debt and equity markets. The RBI's Monetary Policy Committee ("MPC") kept raised policy rates by 40 bps in May 2022. This was followed by 50 bps in June 2022, 50 bps in August 2022, 50 bps in September 2022, 35 bps in December 2022 and another hike of 25 bps in February 2023, thus bringing the repo rate to 6.5%. The Reserve Bank of India's (RBI) MPC in its February 2025 meeting unanimously voted to cut the policy rates by 25 basis points, a first since May 2020. However, high rates would continue to pose risks for mutual funds industry in India.

Low financial literacy keeps clogging the growth of Indian mutual fund industry

The mutual fund industry in India continues to face hindrances arising for the country wide lack of financial literacy. The deficiency of understanding about mutual fund products, schemes and investments impedes potential investors from making informed decisions, thereby restricting the flow of new capital into the sector. Limited channels of information about financial literacy hinder the mutual funds industry from capitalizing the wider populace. Development of newer distribution channels, education initiatives, regular interactions within the wider investor community in English and vernacular languages will play a critical role in building trust, retaining investors and increasing penetration of products.

Competition from other financial instruments such as Direct Equity investments and ULIPs

Investors have been gradually reallocating their savings to mutual funds in recent years. However, insurance products such as unit-linked investment products (ULIPs), which provide dual benefits of protection and long-term savings, are competing for market share with mutual funds. But ULIPs have higher costs due to the insurance component and returns may be potentially lower and subjected to market risks. Direct equity investments offer higher potential returns at the risk of higher volatility, higher requirement of product understanding and higher risk appetite. Mutual funds, with their professional management, diversification, wide product choice and risk diversification continue to be competitive with other investment vehicles.

Developing Investor Faith

Despite the significant expansion of the mutual fund industry, many individuals remain uncertain about investment options. As of 2023, a mere 8% of India's population invests in mutual funds, a relatively low percentage compared to developed nations, where traditional investments like fixed deposits and gold are still preferred. A major obstacle for industry is changing this mindset and establishing trust. Although awareness is increasing in urban areas, rural regions and smaller towns continue to lack knowledge about mutual funds. Residents in these areas often have a limited understanding of the benefits and potential of mutual funds, leading to hesitation. To address this, the mutual fund sector must focus on educating investors about the inner workings of mutual funds, their capacity for long-term growth, and the security of investing in funds managed by professionals.

Regulatory Challenges

The Indian mutual fund industry operates within a regulatory framework that, while important, can sometimes impede progress. Alterations to tax laws, investment rules, and compliance standards can perplex investors and complicate the investment process. To foster ongoing investor trust, the industry must stay abreast of these regulatory changes while maintaining transparency.

Competition

Online AI platforms and AI advisors are one of the challenges in the mutual fund industry. These services provide direct advice at lower costs than traditional distributors. For instance, robo-advisors offer low priced, automated investment advice. This shift creates tough competition for independent distributors. Banks and large firms, with their resources, can easily match these services. They use aggressive marketing and sophisticated technology to offer better prices. This might make it hard for independent distributors to compete with the big names.

Distributors Commission grew at 13.4% CAGR over FY15-FY24

As per AMFI data, Mutual funds distributors average AUM witnessed a healthy growth of approximately 15.3% CAGR over Fiscal 2015 to Fiscal 2024 and reached ₹18.64 trillion in Fiscal 2024. The gross commission paid to distributors increased to ₹148.50 billion with a CAGR of 13.4% between Fiscals 2015 and 2024. While there was a decline in overall commission for the top mutual fund distributors in Fiscals 2020 and 2021 due to regulatory changes related to expense ratio and volatile market conditions towards the end of the year due to COVID-19 pandemic, there was high Y-o-Y growth in distributor's commission in Fiscals 2023 and 2024, which can be attributed to rise inflows in SIPs which boosted the share of distributors in mutual fund AUM.

Going forward, CRISIL Intelligence expects distributor AUM to grow at an overall CAGR of 15-17% between Fiscal 2024 and Fiscal 2029 owing to increasing penetration of IFAs and NDs in B30 cities and strong growth coming from rising customers confidence towards equity funds. During the same time commission revenue is also projected to grow at a 13-15% CAGR between Fiscal 2024 and Fiscal 2029 to reach ₹ 273.6 billion.

Regulatory scenario in mutual funds and mutual fund distribution industry

Segregation of Advisory and Distribution Activities

In September 2020, SEBI implemented the following changes:

- No person involved in distribution of securities shall use the nomenclature “Independent Financial Adviser” or “Wealth Adviser” or any other similar name unless registered with SEBI as investment adviser
- An individual investment adviser shall not provide distribution services
- Investment adviser shall, wherever available, advice direct plans (non-commission based) of products only
- A non-individual investment adviser shall have client level segregation at group level for investment advisory and distribution services

- The same client cannot be offered both advisory and distribution services within the group company

The segregation of advisory and distribution activities is likely to impact the prospects of few fintech platforms which provide advisory services to its clients through robo-advisory services or other curated products and also distribute 'regular' mutual fund products to earn revenue through commission fees. The revised SEBI Regulations would force such platforms to choose between distribution and advisory and either charge fees for advisory or act only as distributor platform.

SEBI mandates inter-operable platform across RTAs

In a circular dated July 26, 2021, SEBI proposed a common transaction platform across Registrar and Transfer Agents (RTAs) for the purpose to streamline and ease mutual funds transaction taking place across different forums. The platform will –

- Provide one stop solution for investors to undertake any non-financial transaction such as KYC updation
- Provide services related to report generation to the MF investors
- Provide financial transactions services to MF investors

The implementation of platform is likely to ease the overall processes for MF investors and also act as a one stop solution especially for DIY investors. Over the long run, the platform can also provide its API for integration with fintechs.

The Securities and Exchange Board of India (SEBI) has proposed key measures for the mutual fund (MF) industry. The capital market regulator, in its annual report for 2022-23, said the measures could be introduced in the forthcoming years to adapt to the dynamic changes in the mutual fund asset management ecosystem.

One of the key changes proposed by SEBI is the amendment to the rules governing the Total Expense Ratio (TER) charged by mutual funds. The primary objectives behind these proposed changes are to increase transparency and exert greater control over the costs borne by investors in mutual fund schemes. The regulator is considering lowering the maximum permissible TER levels, which would directly impact on the profitability of fund management operations for AMCs. As a result, industry players will need to carefully review their expense structures and fund management practices to ensure compliance with the upcoming TER regulations.

In addition, the regulator has encouraged the launch of simplified and more affordable mutual fund products, commonly referred to as "MF Lite" or "Mutual Fund Lite." These MF Lite funds typically have lower minimum investment requirements and simpler investment strategies compared to traditional mutual fund schemes. The goal is to make mutual fund investment more accessible to retail investors, especially those with smaller investment amounts. This presents both challenges and opportunities for AMCs, as they evaluate the viability of introducing MF Lite options to cater to this emerging investor segment and diversify their product offerings.

These MF Lite funds typically have the following salient features:

- Lower minimum investment requirements, often as low as ₹500 or ₹1,000.
- Simpler investment strategies focused on broad market index tracking or basic asset allocation.
- Lower management fees and other charges compared to traditional mutual fund schemes.

These regulatory changes pose significant implications for the mutual fund industry as a whole. Asset management companies will have to closely monitor the developments and take proactive measures to adapt their products, services, and operations to comply with the evolving industry landscape.

Other regulatory updates

SEBI has issued various circulars from time to time for effective regulation of the Mutual Funds Industry in India. Some of the recent regulatory actions taken by SEBI are provided hereunder:

- Considering the emergence of passive funds as an investment product for retail investors and various advantages associated with passive investing, SEBI issued a circular on Development of Passive Funds in May 2022. In the said circular, SEBI introduced norms for Debt Exchange Traded Funds (Debt ETFs) / Index Funds which provided that the AMCs shall ensure that the constituents of the index are aggregated at the issuer level, the constituents of the index have a credit rating, defined maturity, adequate liquidity, diversification, etc. Norms related to Corporate, G-sec and Hybrid Debt ETFs/Index Funds were

provided. SEBI also made it mandatory for all AMCs to appoint at least two Market Makers (MMs) for ETFs who provide continuous liquidity on the stock exchange platform. The said circular also provided credit risk based single issuer limits for debt ETFs/ Index Funds in order to effectively manage the risk associated with such investments, and rebalancing period and disclosure norms for Equity ETFs/Index Funds.

- In November 2022, SEBI introduced a similar credit rating based single issuer limit for actively managed mutual fund schemes to avoid any inconsistencies in investment by mutual funds in debt instruments of an issuer.
- In April 2023, SEBI made it compulsory for all AMCs to file all final offer documents only digitally to the dedicated email id, as part of its go green initiatives.
- In May 2023, SEBI issued a circular on mutual funds investment in the name of minor through legal guardian. As per the said circular, SEBI made it mandatory for all AMCs that all the redemption proceeds shall be credited only in the verified bank account of the minor (the account that the minor may hold with the parent/legal guardian after completing all KYC formalities, irrespective of the source of payment for subscription. In May 2023, SEBI also issued a consultation paper on review of total expense ratio charged by Asset Management Companies to help increase transparency to its unitholders.
- In June 2023, SEBI allowed mutual funds to participate in repo transactions on listed AA and above rated corporate debt securities, Commercial Papers and Certificate of Deposits.
- In June 2023, SEBI issued circulars for online platforms such as Paytm and Grow, which offer direct mutual funds schemes under single platform. The new regulations require that these platforms should register as an agent of AMCs or as stockbrokers. But in both cases, these platforms are allowed to handle only direct mutual fund schemes.
- In August 2023, Zerodha and Helios Capital received SEBI's nod for launching mutual fund business in India.
- In February 2024, SEBI released a consultation paper to seek comments from stakeholders on proposed ease of doing business initiatives for Mutual Funds. The paper aims to simplify and streamline the processes, reducing the regulatory burden and enhancing the overall efficiency of the mutual fund industry. The feedback sought from the industry and the stakeholders would be useful for SEBI to frame fresh policies, so as to simplify the processes of compliance and operational issues.
- In May 2024, SEBI has released a consultation paper to seek comments from stakeholders on proposals to facilitate investments by Indian Mutual Funds in overseas mutual funds or unit trusts that invest a portion of their assets in Indian securities. The paper aims to provide a framework for Indian Mutual Funds to invest in overseas funds, while ensuring that the investments are made in a transparent and regulated manner.
- In June 2024, SEBI released several key papers aimed at improving mutual fund operations and transparency. On June 07, it proposed more flexibility for mutual funds to participate in Credit Default Swaps allowing better risk management and potential returns. Later on, June 11, SEBI issued a settlement order related to Canara Robeco Mutual Fund's compliance lapses during April 2020-March 2021, leading to improved oversight. Finally on June 28, SEBI issued a consultation paper mandating mutual funds to disclose risk-adjusted returns, helping investors understand the balance between risk and returns for better decision making.
- In July 2024, SEBI notified the Securities and Exchange Board of India (Mutual Funds) (Amendment) Regulations, 2024 to amend the Securities and Exchange Board of India (Mutual Funds) Regulations, 1996. Earlier, Clause 9(c) of the Seventh Schedule stated that no mutual fund [scheme] shall make any investment in the listed securities of group companies of the sponsor which is in excess of 25 percent of the net assets. After the 2024 regulations amendment, an exception to the above provision has been added which provides that investments by equity-oriented exchange traded funds and index funds may be done which may be subject to the conditions specified by the Board.
- In December 2024, SEBI announced the launch of the Mutual Funds Lite (MF Lite) framework for passively managed mutual fund schemes. MF Lite is a mutual fund that consists only of index funds, exchange-traded funds (ETFs), or funds of funds (FoFs) and other mutual funds. The current regulatory

provisions for mutual funds do not distinguish between active and passive schemes, leading to unnecessary barriers and costs for entities focused solely on passive funds. The MF Lite framework is set to address these issues by offering a flexible and less strict system, promoting ease of entry and increased market liquidity.

- SEBI has stipulated that effective from financial year Fiscal 2023 to Fiscal 2024, all the Indian mutual funds will have to follow Indian Account Standards (IND AS). This will ensure standardization of the valuation of portfolios, disclosures and also provisions made by mutual funds.

SEBI has issued a circular for mutual funds in 2011 with respect to transaction charges charged by mutual fund distributors.

WEALTH MANAGEMENT

Industry Overview

Depending on goals and constraints of clients, the wealth management industry provides professional investment advice, financial planning and management services that best suits their requirement. It also provides value-added services, such as investing in art and antiques, and helps clients in philanthropic activities. The wealth management industry has seen robust growth over a low base, because of fresh investments from household savings going into organized financial assets, and increasing need for customization, with clients typically asking advice for asset management, financial planning, tax planning, estate planning, and succession planning.

Type of wealth management services

Advisory: In this type of service, investment decisions can be at the wealth management company's discretion or solely taken by the client. This is typically for HNIs and UHNIs. As the smaller investors are not accustomed to paying a fee for wealth management advice, the fee-based advisory model has not yet matured in India. Many wealth managers refrain from offering fee-based advisory services, instead focusing on commission from transactions.

Distribution: This type of service is primarily transaction-oriented, where the client assigns the wealth manager to execute specific transactions related to his/her wealth management. However, investment planning, decisions and further management remain vested with the client. This service is offered for products, such as mutual funds, ETFs, portfolio management services, alternative investment funds, tax-free bonds, and fixed deposits. These services are also offered by brokerage firms, apart from the wealth management firms.

Custody, servicing, and safekeeping of assets: A wealth manager is only entrusted with management, administration, and oversight of the process of investment. All investment planning, investment decisions, and execution are done by the client.

Family office: Family office services provide large businesses and families with customized solutions to manage their wealth better, and aid in succession planning. It offers services, such as tax planning and wealth management, philanthropy, will execution, and estate planning. Family offices charge fees based on the percentage of assets managed above the fixed amount of fees. Approximately 25-30 bps is the typical yield charged. Family offices is ideal if the portfolio is over ₹ 1 billion.

Industry outlook for Wealth Management in India

The wealth management industry in India is still at a very nascent stage. It has huge potential to become a high-growth market supported by a young affluent investor base, improving wealth levels, strengthening regulatory environment, and an increasing share of organized players, including banks, independent wealth advisors, and brokers, who act as financial advisors. The thrust on customization, technology dependence, rising awareness, and thrust on financial assets as against physical assets is expected to create large opportunities for the wealth management industry in India. In terms of offerings, family office solutions and estate planning have been seeing increasing demand in recent years.

Crisil Intelligence estimates India's wealth management industry, including banks and broking companies offering such services, assets to be at around ₹ 33.3 trillion in Fiscal 2025. CRISIL Research projects the market to grow at a CAGR of 12-14% over March 2024 to March 2027 and cross ₹ 45.1 trillion by Fiscal 2027. This is expected to be supported by significant under penetration compared to other developed economies, increasing population of affluent clients, increase shift from physical assets to financial assets and increasing complexity of assets amid rising competition.

The net average fees earned by the advisory services is in the range of 30-50 bps of AUA, with the fees being on the higher side for mass affluent and HNI customers compared with UHNIs. Sometimes, these advisory fees are capped up to a fixed amount for HNIs and UHNIs customers. For distribution, the average fee is approximately 1-1.5% of the AUA for equity products with similar or marginally lower trail yields and 0.1-0.5% of AUA for debt products. For alternative assets, the average upfront distribution fee is 2-3% of AUA with no trail commission. Firms have been trying to optimize their cost to income ratios through appropriate investments in talent acquisition, technology, and tools.

The AIF Industry has displayed a strong growth trajectory between Fiscal 2019 and September 2024

Over the past five years, AIF has become one of the key segments in private markets in India. AIF commitments have been growing at a steady pace seeing a 32% CAGR between March 2019 and March 2024, with a total commitment of ₹11,349 billion as on March 31, 2024, and ₹12,431 billion as on September 30, 2024. The segment is expected to remain one of the fastest growing managed products categories over the next few years as more and more high net worth individuals (HNIs), ultra-HNIs and institutional investors seek out differentiated products that give them an option to diversify and generate better returns on their investments.

As of September 30, 2024, the AUM for alternative investments in India stood at ₹12.4 trillion and is expected to grow at approximately 29-31% between March 2024 and March 2030 and reach approximately ₹53 - 56 trillion by March 2030.

Category II AIFs have been at the forefront in the AIF space, contributing to 79% of AIF commitments raised, 69% of the funds raised, and 64% of the investments made by the end of September 2024. This denotes their prominence and influence within the AIF market. Moreover, the registration of 195 new AIFs during Fiscal 2024 further magnifies the growing interest and participation in this sector, bringing the total number of registered AIFs to 1,283 by the end of Fiscal 2024. This indicates a robust and expanding landscape for alternative investments in India.

Investments made refer to the amount invested by the AIFs. Investments made as a percentage of funds raised rose from 82% as of March 2017 to 90% as of September 2024. The increase was steady over the past five years, which would generally mean that after the fundraising process is completed, the investment managers and AIFs have been deploying the capital and making investments for the investors.

Growth drivers for AIFs in India

AIFs have become widely popular in India because they offer investors a wide range of alternative assets, including private equity, real estate and infrastructure. They provide diversification beyond traditional asset classes such as listed equities, bonds, currencies, or gold and also offer potential for higher returns. Further, the experience of established managers, growing pool of UHNI and HNI and the increase in domestic capital flow and regulatory support are expected to aid the growth of this industry.

Indians have traditionally invested in fixed income instruments, especially bank fixed deposits. However, with investors becoming more aware, there has been a slow but steady change in investor attitude with their focus shifting towards capital market products. They are finding these products more attractive. AIFs are becoming more attractive for HNIs, ultra- HNI's and institutional investors because the SEBI has been proactively trying to bring in more transparency in the industry.

- **Diversification Benefits**

AIFs offer diversification benefit beyond traditional asset classes and may generate higher returns due to their exposure to a wider range of assets and specialized investment strategies.

- **Emergence of experienced managers**

Experienced and established managers offer a proven ability to navigate different market conditions. Their operational expertise and acumen along with a consistent track record across multiple funds and business cycles enhances their reputation and helps scale investments across asset classes.

- **Growing pool of eligible investors including UHNIs, HNIs and institutions**

Over the past couple of years, the number of ultra-high net worth individuals/high net worth individuals (UHNI/HNI) and domestic capital flow from institutions in India have increased significantly. The increase in UHNI/HNIs and rise in awareness along with the availability of AIFs have led to a surge in demand. This has also resulted in increased requirement for professional advice.

- **Domestic capital flow increasing**

SEBI's proactiveness in bringing in many regulatory changes are expected to help reverse the investment mix in favour of domestic investors in the coming years. In recent years domestic institutional investors, such as retirement funds and insurance companies, have been allowed to invest in AIFs. This will be a major growth driver for the industry.

- **Supply surplus**

Over the last few years, the start-up culture in India has been thriving. As per the government data, since the launch of startup India initiative in 2016 the total number of recognised start-ups in the country stands at over 146,000 entities as on September 15, 2024. The PE industry has shown strong growth over the last decade with new investors rushing to invest in start-ups in India. The dynamic nature of the underlying supply will also ensure there are enough exit options which will also boost investor confidence.

- **Financial Deepening**

Along with the advantage of demographics in the country, there is a flourishing financial ecosystem as well. Increasing credit penetration encourages growth in startups and MSMEs thereby creating opportunities for alternative investment funds to facilitate investment and infuse capital into these sectors thereby leading to overall economic expansion.

- **RBI allowance of foreign investment**

Category III AIF with foreign investment are permitted to make portfolio investments in only those securities or instruments in which an FPI can invest under the Foreign Exchange Management Act rules or regulations made thereunder. In May 2021, SEBI, in consultation with RBI, doubled the overseas investment limit for AIFs from USD750 million to USD1500 million.

- **Increasing investment opportunities in cities beyond Tier 1**

Tier 1 cities are usually the hub for majority of the VC and PE investments in India as they have well developed infrastructure, stable and growing economy, better technology, and many other advantages. While AIFs have preferred Tier 1 cities for making investments, lately, they have started shifting their focus to cities beyond Tier 1 as the activity has increased considerably mainly due to rise in entrepreneurship and talent in these cities and towns.

Product Development Cycle

Our product development cycle includes identifying opportunities based on markets, consumer needs, market/industry trend analysis and analysing peer product bouquets. Before launching a new product, our teams analyse investor requirements, feedback from our distributors, its differentiated positioning, scalability and feasibility. Based on the above analysis and feedback, the investments, and sales and products team develop a new product strategy and presents a proposal for the launch of a new product. Depending on the nature of the product or scheme, it may progress through some or all our product development cycle stages of research and idea generation, screening and selection of ideas, concept development and testing of product features, approval of new products, and pre-marketing activities. Once the proposal is approved internally, approval from our Board and subsequently from the regulator is sought.

New fund offerings that were launched during the last three Fiscals and the current fiscal, include the Canara Robeco Banking and PSU Debt Fund, Canara Robeco Mid-Cap Fund, Canara Robeco Multi-Cap Fund, Canara Robeco Manufacturing Fund and Canara Robeco Balance Advantage Fund.

Systematic Transactions

Majority of our schemes have features that allow for regular investments or withdrawal, which we refer to as systematic transactions. We believe that the systematic investment approach offers customers the opportunity to invest smaller amounts over longer periods of time and helps mitigate the risk of market timing. We offer the following types of systematic transactions.

- **Systematic Investment Plans (“SIPs”)**

SIP is a disciplined, risk mitigating and a convenient way to invest in mutual funds regularly. Customers have option to invest a fixed amount at regular intervals. Customers opting for SIPs are expected to benefit from rupee cost averaging, an investment technique of buying a fixed amount of a particular investment at regular intervals, regardless of the price. The customer purchases more units when the NAVs are low and fewer units when the NAVs are high. This technique allows a customer to invest over a period as opposed to purchasing units on a lump sum basis. SIPs encourage investment discipline among customers as a fixed amount is invested on a regular basis. Customers can visit our website (www.canararobeco.com/tool-goal-planner/sipcalculator) to calculate the monthly investment amount to achieve their financial goal.

- **Systematic Transfer Plans (“STPs”)**

STPs allow customers to periodically transfer a certain amount of funds or units from one scheme to another at regular intervals.

- **Systematic Withdrawal Plan (“SWP”)**

Customers in need for cash flow on a periodic basis may opt for SWP for cash flows on a monthly or a quarterly basis.

The table below sets forth certain information in relation to our SIP AUM as of the respective date:

Investment and Research Team and Investment Strategy

Our investment teams are supported by in-house research, product and risk management teams. Our equity and fixed income fund divisions have distinct investment teams and investment processes. Collaboration within each team occurs through an interactive process and the final investment decisions are taken by the respective fund managers. The head of each team is responsible for the overall performance of the funds they supervise and can intervene as needed. The investment performance of our mutual funds is supported by our experienced and professional investment team and our comprehensive investment processes.

We handle a diverse range of investment products, guided by clearly defined investment policies that outline our investment goals and objectives. Our investment approach is disciplined and structured, allowing us to make risk-weighted decisions aligned with the scheme’s investment objectives. Our internal team of analysts follows specific sectors and companies, providing insights to our fund managers. Regular meetings and presentations facilitate interaction between fund managers and research analysts. They continually enhance their analysis and investment strategies by attending company presentations and reviewing research from external brokerage firms and rating agencies. The decision to include new companies in their coverage is made collaboratively with the fund managers. Additionally, our economic analyst concentrates on both global and domestic macro-economic conditions.

Equity Investment Approach

Our equity investment philosophy rests on one core belief, i.e., investing in companies (underlying businesses) and not the focus on short term stock prices. We focus on long term risk adjusted wealth creation and tend to look past short-term noise at marketplace. Our investment objective thus is to invest in robust growth-oriented businesses, run by competent management at a reasonable valuation. Our goal is also to identify catalysts for medium term earnings and capital efficiency deviations for earnings growth and re-rating of the businesses.

Our investment process includes the following steps to achieve our desired portfolio.

- **Ideation of stock / business:** Our ideation is both top down and bottom up. However, the selection in universe is solely based on merit of individual business on bottom-up basis. The ideation phase involves top-down parameters like macro-economic parameter monitoring, identifications of themes, using quant models to throw possible opportunities amongst others. Our investment team tracks macro parameters, themes, business cycles closely to identify opportunities and risks. Bottom-up stock ideation can come from various sources like in-house research, annual report reading, management meetings, broker research reports, broker conferences, channel checks amongst others. Once the primary ideation has happened on account of any of the above, the idea goes to respective sector analyst for detailed analysis, which eventually is presented to the fund management team and decision is arrived for or against the idea being evaluated for investments.
- **In-Depth Analysis / Filtering of idea:** The in-depth analysis focuses on three (3) parameters namely:
 - **Business Analysis:** The process starts with analysing business in terms of strengths and weaknesses of business, scalability of business, financial history and parameters of the company on absolute basis and against its peers. This involves looking at past financials; revenue growth rates, operating margins, asset turns, working capital cycles etc to establish what kind of growth/capital efficiency dynamics of the business. It also involves identifying / analysing if the business has any distinct advantages in terms of scale, brand, distribution, technology/IP, regulatory advantages etc. This business and financial analysis helps to establish if the quality of business is below average / average / above average.

- *Management Analysis:* The process involves evaluation of the management on its ability to execute and its intent to share with minority shareholders. The ability of management gets tested by looking at historical peer analysis of financial parameters like business strategies and success rates from past, revenue growth rates, cost structure efficiency, operating margin trends, capital structure management, asset turns, cash flow cycle management etc. The intent (to share with minority shareholders) of management gets tested in capital allocations and corporate governance practices. Team looks at all past capital allocation instances and how they played out. We spend considerable time on understanding the corporate governance issues such as accounting practices (aggressive or conservative), board of director constitution, compensation structure of promoters/ board members, related party transactions, capital allocation thought process etc. Once the primary/secondary research is done on these parameters, team meets management to understand queries around several aspects around business and financials, before concluding on quality of management.
- *Valuation analysis:* Valuation analysis for us is combination of evaluating relative valuation parameters, discounted cash flows and most importantly intrinsic value driven by scalability of business, ability of management to execute and capital efficiency of existing and incremental capital deployment. We use all traditional relative valuation multiples such as price to earnings ratio, price to book ratio, enterprise value to earnings before interest, taxes, depreciation and amortization, and enterprise value to sales, amongst others. Scenario analysis models different possible future outcomes based on various assumptions.

If the business/ idea under consideration satisfies basic criterion on quality of business, management and valuation, it detailed note on company is prepared by sector analyst, approved by Head of Equities and then is included in investment universe by Compliance/ Risk department.

- Portfolio Construction: The process primarily entails adhering to the scheme category mandate to organize a portfolio for the respective fund. Portfolio construction involves adhering to the mandate of the product, sensitivity to benchmark of the product, liquidity/concentration parameters, risk parameters amongst others. Portfolio construction within risk parameters is a prerogative of respective fund manager and review mechanism is in place through team reviews, investment committee reviews and reviews by the Board.

Fixed Income Investment Approach

Our investment philosophy for fixed income is focussed on safety, liquidity and return, with an endeavour to deliver consistent risk adjusted returns. With particular focus on safety, credit selection is an important pillar for the overall investment process. The fixed income credit investment process involves the following steps:

- Credit Selection: We have implemented an internal credit risk assessment framework for company selection, and the amount and tenure limits are based on merit of the company. The credit research team conducts its research, based on the internal credit risk framework, and recommends companies fitting the internal criteria.
- Credit Research: Our credit research team follows strict research process while assessing the credit quality of various companies within the overall guidelines of our internal credit risk framework. The research is carried out broadly on three main areas, *i.e.*, business, management and financial parameters. With focus on company profitability, the research seeks out companies having long term profit history.
- Credit Approval Process: Our investment committee, which includes chief executive officers and chief investment officers of both debt and equity, is responsible for approving all credit proposals recommended by the credit analyst. Detailed discussions are carried out in the investment committee at which the credit limits are approved based on the overall risk assessment. On basis of these approvals, an investment universe is created containing the companies and limits up to which investments can be made, both in short term as well as long term instruments. The fixed income instruments include bonds, debentures, commercial papers and certificate of deposits. If there are some companies belonging to same promoter group, then a group limit is further created.
- Credit Monitoring: All companies in the investment universe are monitored on a regular basis by the analysts based on quarterly/ yearly results of the investee companies, interaction with company managements, and external company research reports.
- Portfolio Construction: For fixed income products, our portfolio managers manage their funds based on their views on macro-economic factors such as growth, inflation, liquidity and interest rates, both from global as well as local perspective. Duration management forms an important tool in fixed income schemes and our fund managers endeavor to add value by adjusting portfolio durations based on their interest rate views as well as shape of yield curve, spread within yield curve or across yield curves, in trying to identify relatively undervalued papers and constructing a well-diversified portfolio.

Marketing

We undertake strategic marketing initiatives to enhance our visibility and brand recognition through a multi-channel approach. We have two-pronged marketing approach, i.e., general awareness to expand brand visibility and product marketing for current and prospective customers and distributors.

We leverage social media platforms to create visibility, developing customer engaging videos and posts to reach a wider audience. Furthermore, the use of key personnel interviews and product coverage in both print and electronic media serves to strengthen brand presence and credibility. Additionally, strategic branding efforts extend to physical locations, ensuring consistent brand visibility in branch offices and distributor locations.

Our product marketing initiatives centre on modern communication methods, using digital and social media platforms to effectively disseminate scheme communications, including scheme videos and banners. This is complemented by a product communication plan that incorporates various media such as advertisements, brochures, emailers, presentations, posters, and banners, providing comprehensive and accessible product literature to current and potential customers. Operations

Systems and processes form the backbone of our operations with extensive focus on internal controls, minimizing operational risks, scalability and bringing about efficiency to meet various timelines. We continuously endeavour to keep upgrading our systems and re-engineer our processes to ensure regulatory compliance and governance.

Our operations function caters to the mutual fund schemes being managed by our Company as an asset manager to Canara Robeco Mutual Fund. The primary responsibilities include investment administration, banking, expense administration, monitoring asset valuation and dissemination of reports, and co-ordination with the registrar.

Our mutual fund scheme operations are broadly classified into the following:

- *Investment administration operations:* This function ensures that trades executed by our investment team are settled and securities acquired or liquidated for respective schemes are either received or delivered against consideration. As required by SEBI regulations, we have appointed SEBI registered custodians and depository participants for all our schemes. They hold our securities and facilitate trade settlements, while investments in government securities are held in the securities and general ledger account maintained with the Public Debt Office of the Reserve Bank of India and settled through the Clearing Corporation of India Limited.
- *Banking operations:* We maintain relationships with banks in India for enabling smooth receipt of our customer's funds as investments in our schemes. These banks collect money from customers for subscription towards units on our behalf and facilitate prompt payout of funds to customers against redemptions requested and dividends declared. As part of our digital initiatives, we have been encouraging our customers to use our online services.
- *Fund accounting operations:* While expense administration of the mutual fund schemes is managed in-house, accounting of our schemes is carried out by our outsourced fund accounting service provider and all assets held by respective schemes are valued daily in accordance with the valuation policy of the respective schemes. The fund accountant accounts for the units subscribed or redeemed, trades executed, valuation of securities, accrual of incomes and expenses daily and the net asset value of the respective scheme or plan is computed. Net asset value information is disseminated to registrar and uploaded to various platforms in the public domain followed by dissemination of reports.

All operational activities are subject to audit. We have appointed concurrent auditors who validate the net asset value computation prior to release. We have appointed statutory auditors as required under relevant regulations for our schemes. They audit the mutual fund scheme accounts. The auditor also audits application systems used by us. Our audit committee reviews the auditors' reports and the audited financials, and these are placed before our Board and the board of our trustee company.

Compliance Framework

We have a dedicated compliance team which monitors our compliance with the applicable regulations including the SEBI (Mutual Funds) Regulations, 1996 and applicable circulars and notifications issued by SEBI from time to time as well our compliance with the various best practice circulars and guidelines issued by the Association of Mutual Funds in India ("AMFI") from time to time.

Our compliance team is led by our Chief Compliance Officer whose primary responsibilities include monitoring compliance with the applicable regulations, policies and processes, reporting, creating awareness of regulatory changes, and safeguarding investor interests through transparent disclosures. The Chief Compliance Officer updates our Board and our Audit Committee at their meetings on various compliance matters. The compliance team stays abreast of changes in regulatory requirements, liaises with the regulator, business intermediaries, AMFI and industry players, provides training to the relevant functions and facilitates implementation of new regulatory requirements. The compliance team presents regular reports to the Board, highlighting regulatory updates and compliance status.

Furthermore, in accordance with applicable regulations, we are subject to various audits and inspections such as statutory audit, internal audit, SEBI inspection, systems audit, cyber security and cyber resilience audit amongst others. To comply with applicable statutory requirements, we have established robust systems and processes and have implemented several internal policies and procedures. We have a compliance manual, which lists the applicable regulatory requirements, regulatory timelines and assigns responsibility to the concerned business functions for compliance. We have a Code of Conduct and Ethics Policy, Personal Securities Trading Policy, Policy for leakage or suspected leakage of Unpublished Price Sensitive Information, Whistle Blowing Policy, Policy on Institutional Mechanism for identification and deterrence of potential market abuse and policies such as accessible usage policy for internet and data, risk management policy, information transfer policy to prevent unauthorized access or copying or transmission of data, policy on privacy & security of information, social media usage policy, incident management policy, investment policy, valuation policy, stewardship code and voting rights policy, amongst others, for internal compliance. We review and update these policies and manuals periodically.

Risk Management

We have a comprehensive risk management framework in accordance with SEBI regulations to effectively manage key risks. Risk management is integrated with major business processes such as strategic planning, operational management, and investment decisions to ensure consistent consideration of risks in all decision-making.

Our risk management framework is designed to:

- reduce the frequency and impact of unexpected losses;
- increase awareness, accountability, and transparency of operational risks;
- improve the effectiveness of processes and controls;
- ensure that risks are managed within defined risk limits as per regulations and internal limits;
- enhance the risk and control culture; and
- protect our brand's reputation.

Our risk management framework provides guidance with respect to management for all risks relevant for our Company and the schemes of Canara Robeco Mutual Fund. To ensure an effective and integrated risk management process, our Company has defined three lines of defense model - first line of defense comprises the heads of the respective departments; second line of defense comprises oversight functions, i.e., risk management, infosec and compliance; and the third line of defense is the internal auditor.

Our Board approved risk management framework lists out our approach to risk management and the roles and responsibilities of all stakeholders. Our Board level Audit Committee and Risk Management Committee are responsible for overseeing the risk management framework, reviewing the key risks and mitigation strategies, and ensuring the effectiveness of risk management policies and procedures. Our senior management also ensures that the risk management framework is effectively implemented within all areas of respective functions. Our Company continuously adapts to industry best practices that address regulatory changes, organizational structure, emerging technologies, dynamic market conditions, and business growth. We utilize various risk management tools such as incident reporting, risk and control self-assessment, and risk register, whereby risk owners are involved in the ongoing assessment and improvement of risk management and controls. Additionally, internal auditor carries out internal control reviews and provides an independent report to the Audit Committee on the adequacy and effectiveness of risk management framework and internal controls of the organization. Our statutory auditor carries out a review of our internal controls over financial reporting to the extent of the scope laid out in their audit plans. All significant audit observations and follow-up actions thereon are periodically reported to the Audit Committee and closely monitored for effective implementation.

Investor Awareness

We are committed to promote financial literacy through various investor education programmes and initiatives across the country. This include creating and distributing various investor education collaterals, advertisement in various magazines and conducting investor awareness programmes.

Furthermore, in the year 2024, we initiated the “Nivesh Bus Yatra”. Buses were transformed into classrooms where we conducted investor education programs for the public. These sessions covered investment basics and financial planning with a special focus on SIPs, STPs, and SWPs.

The images below set forth highlights of “Nivesh Bus Yatra”:

Digital Eco-system and Cyber-Security

Our digital ecosystem includes a corporate portal and an application for investors, a transaction portal for distributors, and a dedicated platform for investor education. Mutual fund schemes are classified under five groups, namely, equity schemes, debt schemes, hybrid schemes, solution oriented schemes and other schemes. These five groups are further divided into various categories, including multi cap fund, large cap fund, large & mid cap, mid cap fund, small cap fund, dividend yield fund, value fund/ contra fund, focused fund, sectoral / thematic fund, equity linked savings scheme, flexi cap fund, overnight fund, liquid fund, ultra short duration fund, low duration fund, money market fund, short duration fund, medium duration fund, medium to long duration fund, long duration fund, dynamic bond, corporate bond fund, credit risk fund, banking and PSU fund, gilt fund, floater fund, arbitrage fund, conservative hybrid fund, retirement fund, children’s fund, index fund etc. Further, the scheme characteristics and scheme type of each existing scheme were to be suitably modified to be aligned with the relevant category. Further, mutual funds were required to analyse each of their existing schemes in light of the specified categories and submit their proposals to SEBI, upon receipt of due approvals from their trustees. Such proposals were required to specify the course of action such as winding up, merger or changes in the fundamental attributes in respect of the existing schemes that were not in alignment with the categories specified in the said circulars. Any such action required approval of the trustee of the mutual fund and in case of a merger or change in any fundamental attribute, an exit option was required to be provided to the unitholders at the prevailing NAV without any exit load. Pursuant to observations issued by SEBI in this regard, mutual funds were required to carry out necessary changes within a period of three months.

Intellectual Property Laws

Intellectual property in India enjoys protection under both common law and statute. Under statute, India provides for trademark protection under the Trade Marks Act, 1999, copyright protection under the Copyright Act, 1957, and design protection under the Designs Act, 2000. The above enactments provide for protection of intellectual property by imposing civil and criminal liability for infringement.

The Trade Marks Act, 1999 (the “Trade Marks Act”)

The Trade Marks Act governs the statutory protection of trademarks and prevention of the use of fraudulent marks in India. It provides for the application and registration of trademarks in India. It also provides for exclusive rights to marks such as brand, label, and heading and to obtain relief in case of infringement for commercial purposes as a trade description. Under the provisions of the Trade Marks Act, an application for trade mark registration may be made with the Controller General of Patents, Designs and Trademarks by any person or persons claiming to be the proprietor of a trade mark, whether individually or as joint applicants, and can be made on the basis of either actual use or intention to use a trade mark in the future. Once granted, a trade mark registration is valid for 10 years unless cancelled, subsequent to which, it can be renewed. If not renewed, the mark lapses and the registration is required to be restored to gain protection under the provisions of the Trade Marks Act. The Trade Marks Act prohibits registration of deceptively similar trademarks and provides penalties for infringement, falsifying or falsely applying for trademarks. Further, pursuant to the notification of the Trade Marks (Amendment) Act, 2010, simultaneous protection of trade mark in India and other countries has been made available to owners of Indian and foreign trade marks. It also seeks to simplify the law relating to the transfer of ownership of trade marks by assignment or transmission and to bring the law in line with international practices.

h) Measurement of fair values

A number of the Company's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.

The Company has an established control framework with respect to the measurement of fair values. Measurement of fair values includes determining appropriate valuation techniques.

The objective of valuation techniques is to arrive at a fair value measurement that reflects the price that would be received on sale of asset or paid to transfer the liability in an orderly transaction between market participants at the measurement date.

Valuation models that employ significant unobservable inputs require a higher degree of judgement and estimation in the determination of fair value. Judgement and estimation are usually required for selection of the appropriate valuation methodology, determination of expected future cash flows on the financial instrument being valued, determination of probability of counterparty default and selection of appropriate discount rates.

The management regularly reviews significant unobservable inputs and valuation adjustments.

Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques.

When measuring the fair value of an asset or a liability, the Company uses observable market data as far as possible. If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use. The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability

3 Material Accounting Policy Information

3.1 Cash and Cash Equivalents

Cash and cash equivalents include cash on hand and other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value.

3.2 Financial Instruments

i) Recognition and initial measurement

All financial assets and financial liabilities which are not recognised at Fair value through Profit and Loss are initially measured at fair value plus transaction cost that are directly attributable to its acquisition or issue.

ii) Classification and subsequent measurement

Financial assets on initial recognition

A financial asset is classified and measured at :

- Amortised Cost
- Fair Value through Other Comprehensive Income (FVOCI)
- Fair Value through Profit and Loss (FVTPL)

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the company changes its business model for managing financial assets.

Financial asset at amortized cost

A financial asset is measured at amortised cost if it meets both of the following conditions and is not recognised at FVTPL:

- The asset is held within a business model where objective is to hold assets to collect contractual cash flow; and
- The contractual terms of the financial asset give rise on specified dates to cashflow that are solely payments of Principle and interest on principal amount outstanding using effective interest rate (EIR) method. Amortised cost is calculated by considering any discount or premium on acquisition and fees or costs that are an integral part of the EIR and reported as part of interest income in the Statement of Profit and Loss. The losses, if any, arising from impairment are recognized in the Statement of Profit and Loss.

Financial assets at fair value through other comprehensive income (FVOCI)

A Financial asset is measured at FVOCI if it meets both of the following conditions and is not designated as FVTPL:

- The asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- The contractual terms of the financial asset give rise on specified dates to cashflow that are solely payments of Principle and interest on principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at fair value. Interest income is recognized using the effective interest (EIR) method. The impairment losses, if any, are recognized through Statement of Profit and Loss. The loss allowance is recognized in OCI and does not reduce the carrying value of the financial asset. On derecognition, gains and losses accumulated in OCI are reclassified to the Statement of Profit and Loss.

Financial assets at fair value through Profit and Loss(FVTPL)

Any financial asset, which does not meet the criteria for classification as at amortized cost or as FVOCI, is classified to be measured at FVTPL.

Financial assets included within the FVTPL category are measured at fair value with all changes recognized in the Statement of Profit and Loss.

Equity instruments at FVOCI

The Company subsequently measures all equity investments at FVTPL, unless the Company has elected to classify irrevocably some of its equity investments as equity instruments at FVOCI, when such instruments meet the definition of Equity under Ind AS 32 Financial Instruments: Presentation and are not held for trading. Such classification is determined on an instrument-by-instrument basis.

Gains and losses on these equity instruments are never recycled to the Statement of Profit and Loss. Dividends are recognized in the Statement of Profit and Loss as dividend income when the right of the payment has been established, except when the Company benefits from such proceeds as a recovery of part of the cost of the instrument, in which case, such gains are recorded in OCI. Equity instruments at FVOCI are not subject to an impairment assessment.

Financial liabilities

Classification, subsequent measurement, gains and losses

Financial liabilities are classified as measured at amortised cost or FVTPL. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognised in Statement of Profit and Loss. Other Financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in the Statement of Profit and Loss. Any gain or loss on derecognition is also recognised in the Statement of Profit and Loss.

Initial recognition and measurement

All financial liabilities are recognized initially at fair value and, in the case of payables, net of directly attributable transaction costs.

The Company classifies all financial liabilities as subsequently measured at amortized cost, except for financial liabilities at FVTPL. Liabilities which are classified at FVTPL, including derivatives that are liabilities, shall be subsequently measured at fair value.

Derecognition

Financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset.

If the Company enters into transactions whereby it transfers assets recognised on its balance sheet, but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

Financial liabilities

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire.

Impairment of financial instruments

The Company recognises loss allowances using the expected credit loss (ECL) model for the financial assets which are not classified as Fair Value Through Profit and Loss or Equity investments at FVOCI. Expected credit losses are measured at an amount equal to the 12-month ECL, unless there has been a significant increase in credit risk or the assets have become credit impaired from initial recognition in which case, those are measured at lifetime ECL. The amount of expected credit losses (or reversal) that is required to adjust the loss allowance at the reporting date is recognised as an impairment gain or loss in the Statement of Profit and Loss.

Measurement of expected credit losses

Expected credit losses are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the Company in accordance with the contract and the cash flows which the Company expects to receive).

Presentation of allowance for expected credit losses in the balance sheet

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

Write off

The gross carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. This is generally the case when the Company determines that the counter party does not have assets or sources of income that could generate cash flows to repay the amounts. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures for recovery of amounts due.

Off-setting financial instruments

Financial assets and liabilities are offset and the net amount is presented in the balance sheet where there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

3.3 (A) Property, plant and equipment

i) Recognition and measurement

Items of property, plant and equipment (PPE) are measured at cost less accumulated depreciation and any accumulated impairment losses.

The cost of an item of property, plant and equipment comprises:

- a its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates.
- b any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by the Management.

Income and expenses related to the incidental operations, not necessary to bring the item to the location and condition necessary for it to be capable of operating in the manner intended by management, are recognized in the Statement of Profit and Loss.

If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted and depreciated for as separate items (major components) of property, plant and equipment.

Any gain or loss on disposal of an item of property, plant and equipment is recognized in the Statement of Profit and Loss.

ii) Subsequent expenditure

Subsequent expenditure is capitalized only if it is probable that the future economic benefits associated with the expenditure will flow to the Company.

iii) Depreciation

Depreciation on property, plant and equipment is provided on WDV basis as per the estimated useful life and in the manner prescribed in Schedule II of the Companies Act, 2013 except for certain assets.

Following is the summary of useful lives of the assets as per management's estimate and as required by the Companies Act, 2013.

Description of Assets	Useful Lives (In years)	Method of Depreciation
Residential Flats	60 years	Written Down Value
Office Equipment's	5 years	Written Down Value
Computers - Servers & Networks	6 years	Written Down Value
Computers - End User Devices, Such As, Desktops, Laptops, Etc	3 years	Written Down Value
Air conditioners	5 years	Written Down Value
Furniture & Fixtures	10 years	Written Down Value
Electrical Items	5 years	Written Down Value
Motor Vehicles	8 years	Written Down Value

iv) Derecognition

The cost and related accumulated depreciation are eliminated from the financial statements upon sale or retirement of the asset and the resultant gains or losses are recognised in the Statement of Profit and Loss. Assets to be disposed off are reported at the lower of the carrying value or the fair value less cost to sell.

v) Capital work in progress

Projects under which property plant and equipment are not ready for their intended use are carried at cost less accumulated impairment losses, comprising direct cost, inclusive of taxes, duties, freight, and other incidental expenses.

(B) Other Intangible Assets

i) Recognition and measurement

Intangible assets are recognized when they are separately identifiable, under control of the Company, and from which future economic benefits are expected to flow to the entity. Intangible assets including computer software are measured at cost. Such other intangible assets are subsequently measured at cost less accumulated amortisation and any accumulated impairment losses.

Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure is recognized in the Statement of Profit and Loss as incurred.

Amortization is calculated to write off the cost of intangible assets less their estimated residual values over their estimated useful lives using the straight-line method, and is included in depreciation and amortization in the Statement of Profit and Loss. Amortization method, useful lives and residual values are reviewed at the end of each financial year and adjusted, if required

ii) Amortisation of Intangible assets

Intangible assets are amortised on straight line basis over a period of three years from the date on which such asset is first utilized.

iii) Derecognition

Intangible assets are derecognized on disposal or when no future economic benefits are expected to arise from its continuous use, and the resultant gains or losses are recognized in the Statement of Profit and Loss.

iv) Intangible Assets Under Development

The intangible assets under development includes cost of intangible assets that are not ready for their intended use on the date of balance sheet less accumulated impairment losses, if any.

3.4 Impairment of non-financial assets

The Company's non-financial assets, other than deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

The recoverable amount of an asset or goodwill is the higher of its value in use and its fair value. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to it.

An impairment loss is recognised if the carrying amount of an asset or goodwill exceeds its estimated recoverable amount. Impairment losses are recognised in the Standalone Statement of Profit and Loss.

An impairment loss in respect of goodwill is not subsequently reversed. In respect of other assets for which impairment loss has been recognised in prior periods, the Company reviews at each reporting date whether there is any indication that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. Such a reversal is made only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

3.5 Leases

The Company as a lessee: The Company's leased assets classes primarily consist of leases for office on lease and other assets. The Company assesses whether a contract contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether: (i) the contract involves the use of an identified asset (ii) the Company has substantially all of the economic benefits from use of the asset through the period of the lease and (iii) the Company has the right to direct the use of the asset. At the date of commencement of the lease, the Company recognizes a right-of-use asset ("ROU") and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases) and low value leases. For these short-term and low value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.

Certain lease arrangements includes the options to extend or terminate the lease before the end of the lease term. ROU assets and lease liabilities includes these options when it is reasonably certain that they will be exercised. The right-of-use assets are initially recognized at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or prior to the commencement date of the lease plus any initial direct costs less any lease incentives. They are subsequently measured at cost less accumulated depreciation and impairment losses. Right-of-use assets are depreciated from the commencement date on a straight-line basis over the shorter of the lease term and useful life of the underlying asset. Right of use assets are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount (i.e. the higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets.

The lease liability is initially measured at the present value of the future lease payments. The lease payments are discounted using the company's incremental borrowing rate. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made.

Lease liabilities are remeasured with a corresponding adjustment to the related right of use asset if the Company changes its assessment, where it will exercise an extension or a termination option. Lease liability and ROU asset have been separately presented in the Balance Sheet and lease payments have been classified as financing cash flows.

3.6 Revenue recognition

i) Rendering of services

The Company recognizes revenue from contracts with customers based on a five step model as set out in Ind AS 115, Revenue from Contracts with Customers to determine when to recognize revenue and at what amount.

Revenue is measured based on the consideration specified in the contract with a customer. Revenue from contracts with customer is recognized when services are provided and it is highly probable that a significant reversal of revenue is not expected to occur. If the consideration promised in a contract includes a variable amount, the Company estimates the amount of consideration to which it will be entitled in exchange for rendering the promised services to a customer. The amount of consideration can vary because of discounts, rebates, refunds, credits, price concessions, incentives, performance bonuses, or other similar items. The promised consideration can also vary if an entitlement to the consideration is contingent on the occurrence or non-occurrence of a future event.

ii) Nature of Services

a) Asset Management Services

The Company has been appointed as the investment manager to Canara Robeco Mutual Fund. The Company receives investment management fees from the mutual fund which is charged as a percent of the Assets Under Management (AUM) and is recognised on accrual basis. The maximum amount of management fee that can be charged is subject to applicable SEBI regulations.

The contract includes a single performance obligation (series of distinct services) that is satisfied over time and the investment management fees earned are considered as variable consideration.

b) Advisory Services

The Company provides advisory services to its clients wherein a separate agreement is entered into with the client. The Company earns advisory fee which is based on the terms of contract and is recognised on accrual basis.

The contracts include a single performance obligation (series of distinct services) that is satisfied over time and the advisory fees earned are considered as variable consideration.

Canara Robeco AMC provides advisory services to Robeco HK for the funds invested in the Indian market.

The advisory fees is charged based on the rates defined in the agreements entered into between Canara Robeco Asset Management Company and Robeco HK.

3.7 Employee benefits

i) Short-term employee benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided. A liability is recognised for the amount expected to be paid, if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee, and the amount of obligation can be estimated reliably.

ii) Defined contribution plans

A defined contribution plan is a post-employment benefit plan under which the Company pays fixed contributions into an account with a separate entity and has no legal or constructive obligation to pay further amounts. The Company makes specified periodic contributions to the credit of the employees' account with the Employees' Provident Fund Organisation. Obligations for contributions to defined contribution plans are recognised as an employee benefit expense in the Statement of Profit and Loss in the periods during which the related services are rendered by employees.

National Pension System (NPS)

NPS is a defined contribution plan. In case employee opts for NPS, the Company contributes a sum not exceeding 10% of basic salary plus dearness pay, if any, of the eligible employees' salary to the NPS. The Company recognises such contribution as an expense as and when incurred.

iii) Defined benefit plans

Gratuity

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan. The Company's net obligation in respect of the defined benefit plan is calculated by estimating the amount of future benefit that employees have earned in the current and prior periods, discounting that amount and deducting the fair value of any plan assets.

The calculation of the defined benefit obligation is performed periodically by a qualified actuary using the projected unit credit method. When the calculation results in a potential asset for the Company, the recognised asset is limited to the present value of economic benefits available in the form of any future refunds from the plan or reductions in future contributions to the plan ('the asset ceiling'). In order to calculate the present value of economic benefits, consideration is given to any minimum funding requirements.

Remeasurement of the net defined benefit liability, which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest), are recognised in Other Comprehensive Income. The Company determines the net interest expense/income on the net defined benefit liability/asset for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period to the then-net defined benefit liability/asset, taking into account any changes in the net defined benefit liability/ asset during the period as a result of contributions and benefit payments. Net interest expense and other expenses related to defined benefit plans are recognised in the Statement of Profit and Loss.

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service ('past service cost' or 'past service gain') or the gain or loss on curtailment is recognised immediately in the Statement of Profit and Loss. The Company recognises gains and losses on the settlement of a defined benefit plan when the settlement occurs.

iv) Other long-term employee benefits

The Company's net obligation in respect of long-term employee benefits other than post employment benefits, which do not fall due wholly within 12 months after the end of the period in which the employees render the related services, is the amount of future benefit that employees have earned in return for their service in the current and prior periods; that benefit is discounted to determine its present value, and the fair value of any related assets is deducted. The obligation is measured on the basis of an independent actuarial valuation using the projected unit credit method. Remeasurement gains or losses are recognised as profit or loss in the period in which they arise.

v) Short Term Compensated Absences

Compensated absences which accrue to employees and which are expected to be paid within twelve months immediately following the year end are reported as expenses during the year in which the employees performs the services that the benefit covers and the liabilities are reported at the undiscounted amount of the benefit.

3.8 Scheme Expenses

New fund offer expenses, and other expenses not chargeable to schemes, in accordance with applicable circulars and guidelines issued by SEBI and Association of Mutual Funds in India (AMFI), are borne by the Company and are part of other expenses in Statement of Profit and Loss account.

3.9 Income Tax

Income tax expense comprises current and deferred tax. It is recognized in the Statement of Profit and Loss except to the extent that it relates to items recognized directly in equity or in other comprehensive income (OCI).

Current tax

Current tax is measured at the amount expected to be paid in respect of taxable income for the year in accordance with the Income Tax Act, 1961. Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. It is measured using tax rates enacted or substantively enacted at the reporting date.

Current tax assets and current tax liabilities are offset only if the Company has a legally enforceable right to set off the recognized amounts, and it intends to realize the asset and settle the liability on a net basis or simultaneously.

Deferred tax

Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

Deferred tax assets are reviewed at each reporting date and based on management's judgment, are reduced to the extent that it is no longer probable that the related tax benefit will be realized; such reductions are reversed when the probability of future taxable profits improves.

Unrecognized deferred tax assets are reassessed at each reporting date and recognized to the extent that it has become probable that future taxable profits will be available against which they can be used.

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date.

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset only if:

- a. the Company has a legally enforceable right to set off current tax assets against current tax liabilities; and
- b. the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority.

3.10 Foreign Currency transactions

Transactions in foreign currencies are translated into functional currency at the exchange rates at the dates of the transactions or an average rate if the average rate approximates the actual rate at the date of the transaction.

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate prevailing at the reporting date. Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated into the functional currency at the exchange rate when the fair value was determined. Non-monetary assets and liabilities that are measured based on historical cost in a foreign currency are translated at the exchange rate at the date of the transaction and are not retranslated.

All foreign exchange gains and losses are presented in the Statement of Profit and Loss.

3.11 Provisions and Contingent Liabilities

A provision is recognized when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. When the effect of the time value of money is material, the Company determines the level of provision by discounting the expected cash flows at a pre-tax rate reflecting the current rates specific to the liability. These are reviewed at each Balance sheet date and adjusted to reflect the current best estimates.

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. A present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or reliable estimate of the amount cannot be made, is termed and disclosed as contingent liability.

3.12 Segment reporting

The Company's operating segments are established on the basis of those components of the Company that are evaluated regularly by the Executive Committee (the 'Chief Operating Decision Maker' as defined in Ind AS 108- 'Operating Segments'), in deciding how to allocate resources and in assessing performance. These have been identified taking into account the nature of products and services, the differing risks and returns and the internal business reporting systems. Basis of such evaluation, the Company concluded it operates in a single reportable segment.

3.13 Earnings per share (EPS)

The basic earnings per share is computed by dividing profit after tax attributable to the equity shareholders by the weighted average number of equity shares outstanding during the reporting period.

The diluted earnings per share is computed by dividing profit after tax attributable to the equity shareholders by the weighted average number of equity shares outstanding plus the weighted average number of equity shares that would be issued on the conversion of all the dilutive potential ordinary shares into ordinary shares.

The number of equity shares used in computing diluted earnings per share comprises the weighted average number of shares considered for deriving basic earnings per share and also weighted average number of equity shares which would have been issued on the conversion of all dilutive potential shares, unless they are anti-dilutive.

3.14 Dividends on Equity Shares

Final dividends on shares are recorded as a liability on the date of approval by the shareholders and interim dividends are recorded as a liability on the date of declaration by the company's Board of Directors.

3.15 Trade receivables

Trade receivables that do not contain a significant financing component are measured at transaction price.

3.16 Standards Issued/Amended but not Effective

There is no new standards which have been issued but not yet effective.

The sensitivity analysis have been determined based on reasonably possible changes of the respective assumptions occurring at the end of the reporting period, while holding all other assumptions constant.

The sensitivity analysis presented above may not be representative of the actual change in the projected benefit obligation as it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumptions may be correlated.

Furthermore, in presenting the above sensitivity analysis, the present value of the projected benefit obligation has been calculated using the projected unit credit method at the end of the reporting period, which is the same method as applied in calculating the projected benefit obligation as recognised in the balance sheet.

Risks associated with defined benefit plan**(i) Interest Rate Risk**

A fall in the discount rate which is linked to the G-Sec rate will increase the present value of the liability requiring higher provision. A fall in the discount rate generally increases the fair value of the assets depending on the duration of asset.

(ii) Salary Risk

The present value of the defined benefit plan liability is calculated by reference to the future salaries of members. As such, an increase in the salary of the members more than the assumed level will increase the plan's liability.

(iii) Investment Risk

The present value of the defined benefit plan liability is calculated using a discount rate which is determined by reference to market yields at the end of the reporting period on government bonds. If the return on plan asset is below this rate, it will create a plan deficit. Currently, for the gratuity plan in India, it has a relatively balanced mix of investments in money market instruments and public deposits.

(iv) Asset Liability Matching Risk

The plan faces the ALM risk as to the matching cash flow. Since the plan is invested in lines of Rule 101 of Income Tax Rules, 1962, this generally reduces ALM risk.

(v) Mortality Risk

Since the benefits under the plan is not payable for life time and payable till retirement age only, plan does not have any longevity risk.

(vi) Concentration Risk

The plan has a concentration risk as all the assets are invested with the insurance company and a default will wipe out all the assets. Although probability of this is very low as insurance companies have to follow stringent regulatory guidelines which mitigate risk.

During the year, there were no plan amendments, curtailments and settlements.

35 SEGMENT REPORTING

The Company is in the business of providing asset management services to the Fund and portfolio management/ advisory service to clients. First-time Adoption of Ind AS

These financial statements, for the year ended March 31, 2023, are the first financial statements which the Company has prepared in accordance with Ind AS. For periods up to and including the year ended March 31, 2022, the Company has prepared its financial statements in accordance with Previous GAAP.

Accordingly, the Company has prepared financial statements which comply with Ind AS applicable for years ended on March 31, 2023, together with the comparative period data as at and for the year ended March 31, 2022, as described in the significant accounting policies. In preparing these financial statements, the Company's opening balance sheet was prepared as at April 01, 2021, the Company's date of transition to Ind AS. This note explains the principal adjustments made by the Company in restating its Previous GAAP financial statements, including the Balance Sheet as at April 01, 2021 and the financial statements as at and for the year ended March 31, 2022

Optional exemptions availed and mandatory exceptions

In preparing these Ind AS financial statements, the Company has availed certain exemptions and exceptions in accordance with Ind AS 101, as explained below. The resulting difference between the carrying values of the assets and liabilities in the financial statements as at the transition date under Ind AS and Previous GAAP is recognised directly in equity (retained earnings or another appropriate category of equity).

A. Exemptions and Exceptions Availed

A.1 Ind AS mandatory exceptions

A.1.1 Estimates

On assessment of the estimates made under the Previous GAAP financial statements, the Company has concluded that there is no necessity to revise the estimates under Ind AS. However, estimates that were required under Ind AS but not required under Previous GAAP are made by the Company for the relevant reporting dates reflecting conditions existing as at that date.

A.1.2 Classification and measurement of financial assets

The Company has classified the financial assets in accordance with Ind AS 109 based on facts and circumstances that exist on the date of transition.

A.2 Ind AS optional exemptions

A.2.1 Deemed cost - Property Plant and Equipment and Other Intangible Assets

The Company has elected to continue with the carrying value for all of its Property, Plant and Equipment and Other Intangible Assets as recognised in the financial statements as at the date of transition to Ind AS, measured as per the previous GAAP and use that as its deemed cost as at the date of transition.

CANARA ROBECO ASSET MANAGEMENT COMPANY LIMITED

Notes to the Restated Financial Information

A.2.2 Leases

The Company has opted for modified retrospective approach as per IND AS 101. Accordingly lease liability is computed on the date of provision to IND AS and ROU Asset is recorded at an amount which is equal to the lease liability.

B. Reconciliations between Previous GAAP and Ind AS

For the purposes of reporting as set out in note 2, the Company has transitioned its basis of accounting from Previous GAAP to Ind AS. The accounting policies set out in note 3 have been applied in preparing the financial statements for the year ended March 31, 2023, the comparative information presented in these financial statements for the year ended March 31, 2022 and in the preparation of an opening Ind AS balance sheet at April 01, 2021 (the 'transition date').

In preparing the opening Ind AS balance sheet, amounts reported in financial statements prepared in accordance with Previous GAAP have been adjusted. An explanation of how the transition from Previous GAAP to Ind AS has affected the financial performance and financial position is set out in the following tables and the notes that accompany the tables.

Notes to Reconciliation

I Investments

Under the Previous GAAP, current investments were valued at the lower of cost or market value. Long-term investments were stated at cost of acquisition or at amortised cost, if acquired at a premium over face value. Premium over face value was amortised over the remaining period to maturity on a straight-line basis. Provision for diminution was recognised for a decline, if any, which was other than temporary in the value of Long Term investments.

a) Investments in units of Mutual Funds

Under Ind AS, Investments in units of Mutual Funds are measured at FVTPL as they do not meet the SPPI criterion (solely payments of principal and interest).

b) Investments in Equity Shares

Under Ind AS, investments in equity instruments are to be measured at FVTPL.

II Other items

a) Security Deposits

Under previous GAAP, interest free Security deposits given for various office premises taken on lease were valued at cost. Under IND AS, these are treated as financial assets measured at fair value.

b) Lease Payments

Under previous GAAP, lease payments were recognised in Profit & Loss account on actual basis. Under IND AS, for future lease payments, ROU asset and lease liability is recognised. ROU asset is depreciated on a straight line basis over the tenure of the lease. Lease liabilities are subsequently adjusted with interest and lease payments.

III Deferred Tax:

Previous GAAP requires deferred tax accounting using the income statement approach, which focuses on differences between taxable profits and accounting profits for the year. Ind AS 12 requires entities to account for deferred taxes using the balance sheet approach, which focuses on temporary differences between the carrying amount of an asset or liability in the balance sheet and its tax base.

IV Actuarial gain and loss

Under the Previous GAAP, the actuarial gains and losses arising on defined benefit plan were forming part of the Statement of Profit and Loss for the year. Under Ind AS, remeasurement i.e. actuarial gains and losses are recognised in Other Comprehensive Income (net of tax). The concept of Other Comprehensive Income did not exist under Previous GAAP.

A. Fair value measurements

"Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions (i.e., an exit price), regardless of whether that price is directly observable or estimated using a valuation technique. In order to show how fair values have been derived, financial instruments are classified based on a hierarchy of valuation techniques, as explained below"

Fair value of cash and cash equivalents, bank balances, trade & other receivables, other financial assets, trade payables and other financial liabilities approximate their carrying amounts largely due to current maturities of these instruments. Accordingly, fair value hierarchy for these financial instruments have not been presented above.

For the purpose of disclosure, price provided by valuation agency is considered as the fair value of financial assets that are measured at amortised cost.

The hierarchy used is as follows:

Level 1 — Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities. Investment in open ended Mutual Funds are included in Level 1

Level 2 — Inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices). Investment in close ended Mutual Funds and Debt Securities that are not traded in active market are included in Level 2

Level 3 — Inputs are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data. Investment in unlisted Debt Securities, unlisted Equity Instruments, Alternative Investment Funds and Venture Capital Fund are included in Level 3.

The financial instruments are categorized into three levels based on the inputs used to arrive at fair value measurement as described below:

Financial instruments	Valuation techniques
Mutual funds	On the basis of latest NAV/Market price available
Equity instruments	The investment is recognised at the fair value
Alternative Investment Funds	Net Asset Value (NAV) provided by issuer fund which is arrived at based on valuation from independent valuer for unlisted portfolio companies, quoted price of listed portfolio companies and price of recent investments.

In order to assess Level 3 valuations, the management reviews the performance of the alternative investment funds on a regular basis by tracking their latest available financial statements/financial information, valuation report of independent valuers, recent transaction results etc. which are considered in valuation process.

B. Financial Risk Management

Risk management is an integral part of the business practices of the Company. The Company's primary focus is to foresee the unpredictability of financial markets and seek to minimise potential adverse effects on its financial performance. The financial risks are managed in accordance with the Company's risk management policy which has been approved by the Risk Committee of Board of director's. The Company's Risk Committee has overall responsibility for managing the risk profile of the Company. The purpose of risk management is to identify potential problems before they occur, so that risk-handling activities may be planned and invoked as needed to manage adverse impacts on achieving objectives.

The Risk Committee of the Company reviews the development and implementation of the risk management policy of the Company on periodic basis. The Risk Committee provides guidance on the risk management activities, review the results of the risk management process and reports to the Board of Directors on the status of the risk management initiatives.

The Company has exposure to the following risks arising from Financial Instruments:

Financial instruments	Valuation techniques
Cash and cash equivalents, trade & other receivables, financial assets measured at amortised cost	Credit Risk
Financial liabilities	Liquidity Risk
Recognised financial assets not denominated in ₹	Market Risk - Foreign Currency Risk
Investments in debt securities	Market Risk - Interest Rate Risk
Investments in equity securities, units of mutual funds, measured at FVTPL, alternative investment funds	Market Risk - Price Risk

1 Liquidity Risk :

Liquidity risk is defined as the risk that the Company will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset. Liquidity risk arises because of the possibility that the Company might be unable to meet its payment obligations when they fall due as a result of mismatches in the timing of the cash flows under both normal and stress circumstances. Such scenarios could occur when funding needed for illiquid asset positions is not available to the Company on acceptable terms.

To limit this risk, management has adopted a policy of managing assets with liquidity in mind and monitoring future cash flows and liquidity on a regular basis. The Company has developed internal control processes for managing liquidity risk.

The Company maintains a portfolio of highly marketable and diverse assets that are assumed to be easily liquidated in the event of an unforeseen interruption in cash flow. The Company assesses the liquidity position under a variety of scenarios, giving due consideration to stress factors relating to both the market in general and specifically to the Company.

The table below analyses the Company's financial liabilities into relevant maturity pattern based on their contractual maturities for all financial liabilities.

Exposure to credit risk is mitigated through regular monitoring of collections, counterparty's creditworthiness and diversification in exposure.

Amount ₹ in Millions

Particulars	31-Dec-24	31-Dec-23	31-Mar-24	31-Mar-23	31-Mar-22

Expected Credit Loss (ECL) on Financial Assets

The Company continuously monitors all financial assets subject to ECLs. In order to determine whether an instrument is subject to 12 month ECL (12mECL) or life time ECL (LTECL), the Company assesses whether there has been a significant increase in credit risk or the asset has become credit impaired since initial recognition. The Company applies following quantitative and qualitative criteria to assess whether there is significant increase in credit risk or the asset has been credit impaired:

- Historical trend of collection from counterparty
- Company's contractual rights with respect to recovery of dues from counterparty
- Credit rating of counterparty and any relevant information available in public domain.

ECL is a probability weighted estimate of credit losses. It is measured as the present value of cash shortfalls (i.e. the difference between the cash flows due to the Company in accordance with contract and the cash flows that the Company expects to receive).

The Company has two types of financial assets that are subject to the expected credit loss:

- Trade & other receivables
- Cash and cash equivalent

Trade and Other Receivables

Exposures to customers' outstanding at the end of each reporting period are reviewed by the Company to determine incurred and expected credit losses. Historical trends of collection from counterparties on timely basis reflects low level of credit risk. As the Company has a contractual right to such receivables as well as control over preponderant amount of such funds due from customers, the Company does not estimate any credit risk in relation to such receivables.

Cash and Cash Equivalents

The Company holds cash and cash equivalents and other bank balances as per note 4. The credit worthiness of such banks and financial institutions is evaluated by the management on an ongoing basis and is considered to be high.

(XV) Restatement of Effect of Standard issued /Amended but not Effective

During the preparation of the restated financial statements for the year ended March 31, 2023 the management identified an prior period error in the Standards issued/ Amended but not Effective.

The Ministry of Corporate Affairs (MCA) notifies new standards or amendments to the existing standards under 440 Companies (Indian Accounting Standards) Rules as issued from time to time. On March 31, 2023, MCA amended the Companies (Indian Accounting Standards) Amendment Rules, 2023, applicable from April 1, 2023 as below:

Ind AS 1 – Presentation of Financial Statements

The amendments require entities to disclose the material accounting policies rather than significant accounting policies. Accounting policy information, together with other information, is material when it can reasonably be expected to influence decisions of primary users of general purpose financial statements

Ind AS 8 – Accounting Policies, Changes in Accounting Estimates and Errors

This amendment distinguish between accounting policies and accounting estimates. The definition of a change in accounting estimates has been replaced with a definition of accounting estimates. Under the new definition, accounting estimates are “monetary amounts in financial statements that are subject to measurement uncertainty”. Entities develop accounting estimates if accounting policies require items in financial statements to be measured in a way that involves measurement uncertainty.

Ind AS 12 – Income Taxes

This amendments has clarify how companies account for deferred tax on transactions such as leases and decommissioning obligations. The amendments narrowed the scope of the recognition exemption so that it no longer applies to transactions that, on initial recognition, give rise to equal and offsetting temporary differences.

The Company has evaluated the amendments and there is no impact on its financials statements

Non-GAAP measures

In addition to our results determined in accordance with Ind AS, we believe the following non-GAAP measures are useful to Bidders in evaluating our operating performance and liquidity including such as, cost to income ratio, return on net worth, return on equity, profit after tax margin and dividend payout ratio. We use the following non-GAAP financial information to evaluate our ongoing operations and for internal planning and forecasting purposes.

We believe that non-GAAP financial information, when taken collectively with financial measures disclosed in financial statements and prepared in accordance with Ind AS, may be helpful to Bidders because it provides an additional tool for Bidders to use in evaluating our ongoing operating results and trends and in comparing our financial results with other companies in our industry because it provides consistency and comparability with past financial performance. However, our management does not consider these non-GAAP measures in isolation or as an alternative to financial measures of our performance and liquidity that is not required by, or presented in accordance with Ind AS, IFRS or U.S. GAAP. Further, these non-GAAP Measures are not a measurement of our financial performance or liquidity under Ind AS, IFRS or U.S. GAAP and should not be considered in isolation or construed as an alternative to cash flows, profit for the period/years or any other measure of financial performance or as an indicator of our operating performance, liquidity, profitability or cash flows generated (used in) by operating, investing or financing activities derived in accordance with Ind AS, IFRS or U.S. GAAP.

Non-GAAP financial information is presented for supplemental informational purposes only, has limitations as an analytical tool and should not be considered in isolation or as a substitute for financial information disclosed in financial statements and presented in accordance with Ind AS. Non-GAAP financial information are not standardised terms, hence a direct comparison of these non-GAAP Measures between companies may not be possible and these measures may be different from similarly titled non-GAAP measures used by other companies. Other companies may calculate these non-GAAP measures differently from us, limiting its usefulness as a comparative measure. Non-GAAP financial measures are not required by, or presented in accordance with, Ind AS, Indian GAAP, IFRS or U.S. GAAP. For further details, see *“Risk Factors – We have included in this Draft Red Herring Prospectus certain non-GAAP financial measures and certain other industry measures related to our operations and financial performance. These non-GAAP measures and industry measures may vary from any standard methodology that is applicable across the industry and therefore may not be comparable with financial or industry related statistical information of similar nomenclature computed and presented by other companies.”* on page 67.

For a reconciliation of non-GAAP measures, see *“Management’s Discussion and Analysis of our Results of Operations – Non-GAAP Financial Measures”* on page 402.

OVERVIEW

For details in relation to our business, see "Our Business" on page 221.

SIGNIFICANT FACTORS AFFECTING OUR RESULTS OF OPERATIONS

Our financial condition, results of operations and cash flows are affected by a number of factors, including the following:

Composition and Investment Performance of Our Schemes

Our ability to attract and retain AUM, as well as our profitability, is heavily impacted by our investment performance, which drives the value of AUM (in terms of capital appreciation, as well as client attraction and retention) on which the management fees are calculated.

We manage a well-diversified portfolio of equity, debt, and hybrid schemes, including large and mid-cap fund, a large cap fund, a flexi cap fund, a small cap fund, an aggressive hybrid fund a multi-cap fund, a mid-cap fund, a focused fund, gilt fund, a medium to long duration fund, a low duration fund, a liquid fund, an ultra-short term and a short-term fund to cater to the diversified requirements of our customers.

We have a strong equity-oriented schemes mix. As of December 31, 2024, out of the 25 schemes that we managed, 14 are equity-oriented schemes (inclusive of 12 equity schemes and two hybrid schemes) and 11 debt-oriented schemes (inclusive of 10 debt schemes and one hybrid scheme).

Our QAAUM generated from our equity-oriented schemes have grown from ₹ 413.19 billion as of March 31, 2022 to ₹ 798.11 billion as of March 31, 2024 at a CAGR of 38.98%. Consequently, our share of equity-oriented QAAUM to our total QAAUM has increased from 86.16% as of March 31, 2022 to 91.66% as of March 31, 2024 and was 90.85% as of December 31, 2023 and 93.16% as of December 31, 2024. According to the CRISIL Report, we had the third highest share of equity-oriented AUM amongst the top 20 AMCs in India and the highest share of equity-oriented AUM as compared to the top 10 AMCs in India, as of December 31, 2024.

The table below sets forth details of our QAAUM split across asset-wise, i.e., equity-oriented, and debt-oriented schemes as of December 31, 2024, December 31, 2023, March 31, 2024, March 31, 2023 and March 31, 2022:

Particulars	As of December 31, 2024	As of December 31, 2023	As of March 31, 2024	As of March 31, 2023	As of March 31, 2022	CAGR (%) (March 31, 2022 to March 31, 2024)
	(in ₹ billion)					
QAAUM	1,083.66	793.65	870.70	624.85	479.56	34.75
- Equity-Oriented	1,009.59	721.07	798.11	552.53	413.19	38.98

Our investment approach is research-driven, incorporating macroeconomic sector analysis, business cycle tracking, and in-house fundamental research at the stock level. We assess management quality, conduct team discussions, and derive valuations based on insights from research and sector specialists. This disciplined approach has contributed to the consistent performance of our managed schemes and delivered robust returns.

For details in relation to performance of our managed schemes, please see “Our Business – Business Operations – Mutual Funds” on page 235.

Distribution Capabilities and Technology

Our business, and AUM is and will remain dependent on our distribution capabilities and our integrated digital eco-system.

We have a multi-channel sales and distribution network through which we offer products and services to our customers. Our multi-channel sales and distribution network includes third-party distributors and sales through our branches and digital platforms.

We have a pan India geographical presence serving customers directly in more than 23 cities across 14 states and two (2) union territories with a network of 23 branches as of December 31, 2024. Our branch presence across India is also supported by our third-party distribution partners. As of December 31, 2024, we had 49,412 empaneled distribution partners across India, including Canara Bank, 44 other banks, 259 ND and 49,108 MFDs.

We have witnessed a growth in investments from B-30 cities (i.e., cities beyond the top 30 cities in India), which exceeds the industry average, highlighting our strategic focus on penetrating these emerging markets and potential

to further grow our presence. We had the second highest share of B30 AUM as of December 2024 and highest share of B30 AUM as compared to the top 10 AMCs. (Source: CRISIL Report)

Our automation and digitalization initiatives are targeted to improve customer convenience, accessibility, digital payment options, customer service and engagement. Our digital initiatives to attract new customers include an investor mobile application “Canara Robeco Mutual Fund App” available on android and iOS platforms, direct investment opportunity through “smartinvest” available on our website; and initiation of eKYC. We also market our schemes online through our website and mobile application.

While we remain focused on enhancing our customer experience, we are also committed to improving convenience for our mutual fund distributors, both individual and corporate. We offer a paperless online empanelment process for our distributors. Once empanelled, distributors gain access to the smarT MFD portal which is a digital platform that provides transaction handling, real-time transaction status tracking, and full access to investor information which they have onboarded. This initiative emphasizes our attention to supporting our distributors, ensuring their operations are as efficient and user-friendly as possible.

Macroeconomic Conditions in India and Global Trade Volatility

Our business, financial condition, results of operations and prospects are significantly affected by general economic conditions and particularly macroeconomic conditions in India, where we conduct our business and generate all our revenue. While our business tends to benefit from increased consumer confidence in the overall economy, adverse macroeconomic conditions in India may affect the investment performance of our schemes and products, reduce the demand for our schemes and products, increase redemptions in our schemes and otherwise adversely affect our results of operations. Key factors affecting the performance of our business include overall economic growth parameters, household savings rates, consumer preferences towards financial savings, the impact of regulatory developments on the Indian economy and Indian demographics. Fiscal and monetary dynamics such as volatility in interest rates, inflation and foreign exchange rates as well as the uncertain economic conditions in light of the latest trade disputes in 2025 between the United States and other major economies may affect the performance of our schemes. These factors in varying degrees affect the quantum of household savings and their proportion invested in mutual funds relative to other competing products such as physical assets including real estate and gold and financial savings such as bank deposits, provident funds and insurance. Macroeconomic conditions in India affect the performance of our schemes, which in turn may affect our assets under management and consequently affect our revenue.

Competition in the AMC market in India

Our fee structure and our expenses depend on the competitive landscape in which we operate. We face significant competition from companies seeking to attract customers’ financial assets, including traditional and online brokerage firms, other mutual fund companies and larger financial institutions. Mutual funds also compete with products such as insurance, bank deposits, pension products, small savings schemes, as well as gold and real estate. Furthermore, mutual funds also face increased competition from exchange traded funds, which are investment vehicles that trade on exchanges like equity stocks while offering diversification and are more economic as they charge lesser fees as compared to actively managed funds. (Source: CRISIL Report)

Our competitors may offer a wide range of financial products and services, at lower investment management fee, with a wider distribution network. Our competitors may receive investor referrals from their affiliates and other departments that provide other financial services. Investors may find it convenient or reassuring to use one platform, or brand to meet all their financial services needs and may choose to give their business to our competitors on that basis. In addition, we rely on our own branches or depend on distributors for the sale of our products, which may require higher investment and operating expenses as compared to our peers. This may adversely affect our market share and ability to grow our business.

New players are also entering into the market as evident from three new fund houses launching their businesses in the year 2023 and one new fund house starting their business in the year 2024. The increased competition will drive fund managers to be more innovative and agile in their investment strategies, as they strive to attract and retain investors. This may lead to the introduction of new fund categories, specialized investment products, and enhanced digital platforms to provide a more seamless and personalized investment experience. SUMMARY OF MATERIAL ACCOUNTING POLICIES

Cash and Cash Equivalents

Cash and cash equivalents include cash on hand and other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value.

Financial Instruments

Recognition and initial measurement

All financial assets and financial liabilities which are not recognised at Fair value through Profit and Loss are initially measured at fair value plus transaction cost that are directly attributable to its acquisition or issue.

Classification and subsequent measurement

Financial assets on initial recognition

A financial asset is classified and measured at:

- Amortised Cost;
- Fair Value through Other Comprehensive Income (FVOCI); and
- Fair Value through Profit and Loss (FVTPL);

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the company changes its business model for managing financial assets.

Financial asset at amortized cost

A financial asset is measured at amortised cost if it meets both of the following conditions and is not recognised at FVTPL:

- The asset is held within a business model where objective is to hold assets to collect contractual cash flow; and
- The contractual terms of the financial asset give rise on specified dates to cashflow that are solely payments of Principle and interest on principal amount outstanding using effective interest rate (EIR) method. Amortised cost is calculated by considering any discount or premium on acquisition and fees or costs that are an integral part of the EIR and reported as part of interest income in the Statement of Profit and Loss. The losses, if any, arising from impairment are recognized in the Statement of Profit and Loss.

Financial assets at fair value through other comprehensive income (FVOCI)

A Financial asset is measured at FVOCI if it meets both of the following conditions and is not designated as FVTPL:

- The asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- The contractual terms of the financial asset give rise on specified dates to cashflow that are solely payments of principle and interest on principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at fair value. Interest income is recognized using the effective interest (EIR) method. The impairment losses, if any, are recognized through Statement of Profit and Loss. The loss allowance is recognized in OCI and does not reduce the carrying value of the financial asset. On derecognition, gains and losses accumulated in OCI are reclassified to the Statement of Profit and Loss.

Financial assets at fair value through Profit and Loss (FVTPL)

Any financial asset, which does not meet the criteria for classification as at amortized cost or as FVOCI, is classified to be measured at FVTPL.

Financial assets included within the FVTPL category are measured at fair value with all changes recognized in the Statement of Profit and Loss.

Equity instruments at FVOCI

The Company subsequently measures all equity investments at FVTPL, unless the Company has elected to classify irrevocably some of its equity investments as equity instruments at FVOCI, when such instruments meet the definition of Equity under Ind AS 32 Financial Instruments: Presentation and are not held for trading. Such classification is determined on an instrument-by-instrument basis.

Gains and losses on these equity instruments are never recycled to the Statement of Profit and Loss. Dividends are recognized in the Statement of Profit and Loss as dividend income when the right of the payment has been established, except when the Company benefits from such proceeds as a recovery of part of the cost of the instrument, in which case, such gains are recorded in OCI. Equity instruments at FVOCI are not subject to an impairment assessment.

Financial liabilities

Classification, subsequent measurement, gains and losses

Financial liabilities are classified as measured at amortised cost or FVTPL. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognised in Statement of Profit and Loss. Other Financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in the Statement of Profit and Loss. Any gain or loss on derecognition is also recognised in the Statement of Profit and Loss.

Initial recognition and measurement

All financial liabilities are recognized initially at fair value and, in the case of payables, net of directly attributable transaction costs.

The Company classifies all financial liabilities as subsequently measured at amortized cost, except for financial liabilities at FVTPL. Liabilities which are classified at FVTPL, including derivatives that are liabilities, shall be subsequently measured at fair value.

Derecognition

Financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset.

If the Company enters into transactions whereby it transfers assets recognised on its balance sheet, but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

Financial liabilities

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire.

Impairment of financial instruments

The Company recognises loss allowances using the expected credit loss (ECL) model for the financial assets which are not classified as Fair Value Through Profit and Loss or Equity investments at FVOCI. Expected credit losses are measured at an amount equal to the 12-month ECL, unless there has been a significant increase in credit risk or the assets have become credit impaired from initial recognition in which case, those are measured at lifetime ECL. The amount of expected credit losses (or reversal) that is required to adjust the loss allowance at the reporting date is recognised as an impairment gain or loss in the Statement of Profit and Loss.

Measurement of expected credit losses

Expected credit losses are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the Company in accordance with the contract and the cash flows which the Company expects to receive).

Presentation of allowance for expected credit losses in the balance sheet

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

Write off

The gross carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. This is generally the case when the Company determines that the counter party

does not have assets or sources of income that could generate cash flows to repay the amounts. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures for recovery of amounts due.

Off-setting financial instruments

Financial assets and liabilities are offset and the net amount is presented in the balance sheet where there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

Property, plant and equipment

Recognition and measurement

Items of property, plant and equipment (PPE) are measured at cost less accumulated depreciation and any accumulated impairment losses.

The cost of an item of property, plant and equipment comprises:

- its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates.
- any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by the Management.

Income and expenses related to the incidental operations, not necessary to bring the item to the location and condition necessary for it to be capable of operating in the manner intended by management, are recognized in the statement of profit and loss.

If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted and depreciated for as separate items (major components) of property, plant and equipment.

Any gain or loss on disposal of an item of property, plant and equipment is recognized in the statement of profit and loss.

Subsequent expenditure

Subsequent expenditure is capitalized only if it is probable that the future economic benefits associated with the expenditure will flow to our Company.

Depreciation

Depreciation on property, plant and equipment is provided on WDV basis as per the estimated useful life and in the manner prescribed in Schedule II of the Companies Act, 2013 except for certain assets.

Following is the summary of useful lives of the assets as per management's estimate and as required by the Companies Act, 2013.

Description of Assets	Useful Lives (In years)	Method of Depreciation
Residential Flats	60 years	Written Down Value
Office Equipment's	5 years	Written Down Value
Computers - Servers & Networks	6 years	Written Down Value
Computers - End User Devices, Such As, Desktops, Laptops, etc	3 years	Written Down Value
Air conditioners	5 years	Written Down Value
Furniture & Fixtures	10 years	Written Down Value
Electrical Items	5 years	Written Down Value

Motor Vehicles	8 years	Written Down Value
----------------	---------	--------------------

Derecognition

The cost and related accumulated depreciation are eliminated from the financial statements upon sale or retirement of the asset and the resultant gains or losses are recognised in the Statement of Profit and Loss. Assets to be disposed off are reported at the lower of the carrying value or the fair value less cost to sell.

Capital work in progress

Projects under which property plant and equipment are not ready for their intended use are carried at cost less accumulated impairment losses, comprising direct cost, inclusive of taxes, duties, freight, and other incidental expenses.

Other Intangible Assets

Recognition and measurement

Intangible assets are recognized when they are separately identifiable, under control of the Company, and from which future economic benefits are expected to flow to the entity. Intangible assets including computer software are measured at cost. Such other intangible assets are subsequently measured at cost less accumulated amortisation and any accumulated impairment losses.

Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure is recognized in the Statement of Profit and Loss as incurred.

Amortization is calculated to write off the cost of intangible assets less their estimated residual values over their estimated useful lives using the straight-line method, and is included in depreciation and amortization in the Statement of Profit and Loss. Amortization method, useful lives and residual values are reviewed at the end of each financial year and adjusted, if required.

Amortisation of Intangible assets

Intangible assets are amortised on straight line basis over a period of three years from the date on which such asset is first utilized.

Derecognition

Intangible assets are derecognized on disposal or when no future economic benefits are expected to arise from its continuous use, and the resultant gains or losses are recognized in the Statement of Profit and Loss.

Intangible Assets Under Development

The intangible assets under development includes cost of intangible assets that are not ready for their intended use on the date of balance sheet less accumulated impairment losses, if any.

Impairment of non-financial assets

The Company's non-financial assets, other than deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

The recoverable amount of an asset or goodwill is the higher of its value in use and its fair value. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to it.

"An impairment loss is recognised if the carrying amount of an asset or goodwill exceeds its estimated recoverable amount. Impairment losses are recognised in the Standalone Statement of Profit and Loss."

An impairment loss in respect of goodwill is not subsequently reversed. In respect of other assets for which impairment loss has been recognised in prior periods, the Company reviews at each reporting date whether there is any indication that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. Such a reversal is made only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

Leases

Our Company as a lessee: Our Company's leased assets classes primarily consist of leases for office on lease and other assets. Our Company assesses whether a contract contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether: (i) the contract involves the use of an identified asset (ii) the Company has substantially all of the economic benefits from use of the asset through the period of the lease and (iii) our Company has the right to direct the use of the asset. At the date of commencement of the lease, our Company recognizes a right-of-use asset ("ROU") and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases) and low value leases. For these short-term and low value leases, our Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.

Certain lease arrangements include the options to extend or terminate the lease before the end of the lease term. ROU assets and lease liabilities includes these options when it is reasonably certain that they will be exercised. The right-of-use assets are initially recognized at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or prior to the commencement date of the lease plus any initial direct costs less any lease incentives. They are subsequently measured at cost less accumulated depreciation and impairment losses. Right-of-use assets are depreciated from the commencement date on a straight-line basis over the shorter of the lease term and useful life of the underlying asset. Right of use assets are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount (i.e. the higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets.

The lease liability is initially measured at the present value of the future lease payments. The lease payments are discounted using the company's incremental borrowing rate. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made.

Lease liabilities are remeasured with a corresponding adjustment to the related right of use asset if the Company changes its assessment, where it will exercise an extension or a termination option. Lease liability and ROU asset have been separately presented in the Balance Sheet and lease payments have been classified as financing cash flows.

Revenue recognition

Rendering of services

Our Company recognizes revenue from contracts with customers based on a five step model as set out in Ind AS 115, Revenue from Contracts with Customers to determine when to recognize revenue and at what amount.

Revenue is measured based on the consideration specified in the contract with a customer. Revenue from contracts with customer is recognized when services are provided and it is highly probable that a significant reversal of revenue is not expected to occur. If the consideration promised in a contract includes a variable amount, the Company estimates the amount of consideration to which it will be entitled in exchange for rendering the promised services to a customer. The amount of consideration can vary because of discounts, rebates, refunds, credits, price concessions, incentives, performance bonuses, or other similar items. The promised consideration can also vary if an entitlement to the consideration is contingent on the occurrence or non-occurrence of a future event.

Nature of Services

Asset Management Services

The Company has been appointed as the investment manager to Canara Robeco Mutual Fund. The Company receives investment management fees from the mutual fund which is charged as a percent of the Assets Under Management (AUM) and is recognised on accrual basis. The maximum amount of management fee that can be charged is subject to applicable SEBI regulations.

The contract includes a single performance obligation (series of distinct services) that is satisfied over time and the investment management fees earned are considered as variable consideration.

Advisory Services

The Company provides advisory services to its clients wherein a separate agreement is entered into with the client. The Company earns advisory fee which is based on the terms of contract and is recognised on accrual basis.

The contracts include a single performance obligation (series of distinct services) that is satisfied over time and the advisory fees earned are considered as variable consideration.

Canara Robeco AMC provides advisory services to Robeco HK for the funds invested in the Indian market.

The advisory fees are charged based on the rates defined in the agreements entered into between our Company and Robeco HK.

Employee benefits

Short-term employee benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided. A liability is recognised for the amount expected to be paid, if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee, and the amount of obligation can be estimated reliably.

Defined contribution plans

A defined contribution plan is a post-employment benefit plan under which our Company pays fixed contributions into an account with a separate entity and has no legal or constructive obligation to pay further amounts. Our Company makes specified periodic contributions to the credit of the employees' account with the Employees' Provident Fund Organisation. Obligations for contributions to defined contribution plans are recognised as an employee benefit expense in the statement of profit and loss in the periods during which the related services are rendered by employees.

National Pension System ("NPS")

NPS is a defined contribution plan. In case employee opts for NPS, our Company contributes a sum not exceeding 10% of basic salary plus dearness pay, if any, of the eligible employees' salary to the NPS. Our Company recognises such contribution as an expense as and when incurred.

Defined benefit plans

Gratuity

"A defined benefit plan is a post-employment benefit plan other than a defined contribution plan. The Company's net obligation in respect of the defined benefit plan is calculated by estimating the amount of future benefit that employees have earned in the current and prior periods, discounting that amount and deducting the fair value of any plan assets."

The calculation of the defined benefit obligation is performed periodically by a qualified actuary using the projected unit credit method. When the calculation results in a potential asset for the Company, the recognised asset is limited to the present value of economic benefits available in the form of any future refunds from the plan or reductions in future contributions to the plan ('the asset ceiling'). In order to calculate the present value of economic benefits, consideration is given to any minimum funding requirements.

Remeasurement of the net defined benefit liability, which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest), are recognised in Other

Comprehensive Income. The Company determines the net interest expense/income on the net defined benefit liability/asset for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period to the then-net defined benefit liability/asset, taking into account any changes in the net defined benefit liability/ asset during the period as a result of contributions and benefit payments. Net interest expense and other expenses related to defined benefit plans are recognised in the Statement of Profit and Loss.

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service ('past service cost' or 'past service gain') or the gain or loss on curtailment is recognised immediately in the Statement of Profit and Loss. The Company recognises gains and losses on the settlement of a defined benefit plan when the settlement occurs.

Other long-term employee benefits

The Company's net obligation in respect of long-term employee benefits other than post employment benefits, which do not fall due wholly within 12 months after the end of the period in which the employees render the related services, is the amount of future benefit that employees have earned in return for their service in the current and prior periods; that benefit is discounted to determine its present value, and the fair value of any related assets is deducted. The obligation is measured on the basis of an independent actuarial valuation using the projected unit credit method. Remeasurement gains or losses are recognised as profit or loss in the period in which they arise.

Short Term Compensated Absences

Compensated absences which accrue to employees and which are expected to be paid within twelve months immediately following the year end are reported as expenses during the year in which the employees performs the services that the benefit covers and the liabilities are reported at the undiscounted amount of the benefit.

Scheme Expenses

New fund offer expenses, and other expenses not chargeable to schemes, in accordance with applicable circulars and guidelines issued by SEBI and Association of Mutual Funds in India (AMFI), are borne by our Company and are part of other expenses in statement of profit and loss account.

Income Tax

Income tax expense comprises current and deferred tax. It is recognized in the Statement of Profit and Loss except to the extent that it relates to items recognized directly in equity or in other comprehensive income (OCI).

Current tax

Current tax is measured at the amount expected to be paid in respect of taxable income for the year in accordance with the Income Tax Act, 1961. Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. It is measured using tax rates enacted or substantively enacted at the reporting date.

Current tax assets and current tax liabilities are offset only if our Company has a legally enforceable right to set off the recognized amounts, and it intends to realize the asset and settle the liability on a net basis or simultaneously.

Deferred Tax

Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

Deferred tax assets are reviewed at each reporting date and based on management's judgment, are reduced to the extent that it is no longer probable that the related tax benefit will be realized; such reductions are reversed when the probability of future taxable profits improves.

Unrecognized deferred tax assets are reassessed at each reporting date and recognized to the extent that it has become probable that future taxable profits will be available against which they can be used.

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date.

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset only if:

- the Company has a legally enforceable right to set off current tax assets against current tax liabilities; and
- the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority.

Foreign Currency transactions

Transactions in foreign currencies are translated into functional currency at the exchange rates at the dates of the transactions or an average rate if the average rate approximates the actual rate at the date of the transaction.

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate prevailing at the reporting date. Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated into the functional currency at the exchange rate when the fair value was determined. Non-monetary assets and liabilities that are measured based on historical cost in a foreign currency are translated at the exchange rate at the date of the transaction and are not retranslated.

All foreign exchange gains and losses are presented in the statement of profit and loss.

Provisions and Contingent Liabilities

A provision is recognized when our Company has a present obligation as a result of past events, and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. When the effect of the time value of money is material, our Company determines the level of provision by discounting the expected cash flows at a pre-tax rate reflecting the current rates specific to the liability. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of our Company. A present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or reliable estimate of the amount cannot be made, is termed and disclosed as contingent liability.

Earnings per share

The basic earnings per share is computed by dividing profit after tax attributable to the equity shareholders by the weighted average number of equity shares outstanding during the reporting period.

The diluted earnings per share is computed by dividing profit after tax attributable to the equity shareholders by the weighted average number of equity shares outstanding plus the weighted average number of equity shares that would be issued on the conversion of all the dilutive potential ordinary shares into ordinary shares.

The number of equity shares used in computing diluted earnings per share comprises the weighted average number of shares considered for deriving basic earnings per share and also weighted average number of equity shares which would have been issued on the conversion of all dilutive potential shares, unless they are anti-dilutive.

Dividends on Equity Shares

Final dividends on shares are recorded as a liability on the date of approval by the shareholders and interim dividends are recorded as a liability on the date of declaration by our Board.

Trade receivables

Trade receivables that do not contain a significant financing component are measured at transaction price

Nirmala Sridhar, one of our Company's Directors, along with ten others ("**Petitioners**"), filed a civil suit dated July 28, 2022, before the Gujarat High Court ("**High Court**") against Bank of Baroda ("**Defendant**") for salary and service benefit parity. The petitioners were earlier serving in Dena Bank, Vijaya Bank, and Bank of Baroda. The Government of India ("**GOI**") decided to merge Dena Bank and Vijaya Bank in the Defendant Bank with effect from April 1, 2019. For Operational efficiency a Board-approved new position was created by the Defendant designated as General Manager – Chief Coordination ("**GM-CC**"), and the petitioners were selected as GM-CC after a board-approved interview process. On August 30, 2019, GOI allowed Public Sector Banks to introduce the position of Chief General Manager ("**CGM**") with increased pay scale. The Petitioners then approached the High Court stating that roles of GM-CC and CGM being identical, the pay structure and all benefits including pension should also be identical. Phased implementation of UPI for Bids by RIBs as per the UPI Circulars.

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of, *inter alia*, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by UPI Bidders through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019, until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RIB had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019. and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 has decided to extend the timeline for implementation of UPI Phase II until March 31, 2020. Subsequently, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II until further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds was discontinued and replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continued to be six Working Days during this phase.

SEBI through its circular SEBI/HO/CFD/DIL2/CIR/P/2022/45 dated April 5, 2022, prescribed that all individual bidders applying in initial public offerings opening on or after May 1, 2022, where the application amount is up to ₹500,000, shall use UPI. Individual investors bidding under the Non-Institutional Portion bidding for more than ₹200,000 million and up to ₹500,000 million, using the UPI Mechanism, shall provide their UPI ID in the Bid cum-Application Form for Bidding through Syndicate, sub-syndicate members, Registered Brokers, RTAs or CDPs, or online using the facility of linked online trading, demat and bank account (3 in 1 type accounts), provided by certain brokers.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("**T+3 Notification**"). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Offer shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

This Offer is mandatorily being made under Phase III of the UPI Mechanism.

The processing fees for applications made by UPI Bidders using the UPI Mechanism may be released to the SCSBs only after such banks provide a written confirmation, in compliance with the SEBI RTA Master Circular in a format as prescribed by SEBI, from time to time, and such payment of processing fees to the SCSBs shall be made in compliance with circulars prescribed by SEBI and applicable law.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using UPI. Our Company will be required to appoint one of the SCSBs as the Sponsor Bank(s) to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the UPI Bidders.

Individual investors bidding under the Non-Institutional Portion bidding for more than ₹ 200,000 and up to ₹ 500,000, using the UPI Mechanism, shall provide their UPI ID in the Bid-cum-Application Form for Bidding through Syndicate, sub-syndicate

members, Registered Brokers, RTAs or CDPs, or online using the facility of linked online trading, demat and bank account (3 in 1 type accounts), provided by certain brokers.

SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 (“**UPI Streamlining Circular**”), to the extent not rescinded by the SEBI ICDR Master Circular in relation to the SEBI ICDR Regulations, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Streamlining Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one Working Day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Further, in terms of the UPI Circulars, the payment of processing fees to the SCSBs shall be undertaken pursuant to an application made by the SCSBs to the Book Running Lead Managers, and such application shall be made only after (i) unblocking of application amounts for each application received by the SCSB has been fully completed, and (ii) applicable compensation relating to investor complaints has been paid by the SCSB.

For further details, refer to the General Information Document available on the websites of the Stock Exchanges and the Book Running Lead Managers. RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The responsibility of granting approval for foreign investment under the Consolidated FDI Policy (defined herein below) and FEMA has been entrusted to the concerned ministries / departments.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry (formerly Department of Industrial Policy and Promotion), Government of India (“**DPIIT**”) issued the Consolidated FDI Policy Circular dated October 15, 2020, with effect from October 15, 2020 (the “**Consolidated FDI Policy**”), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that: (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI. The RBI and the concerned ministry/department are responsible for granting the approval for foreign investment under the FDI Circular and FEMA.

Pursuant to the FDI Policy, FDI of up to 100% of the paid-up share capital is permitted under the automatic route in our Company

All investments under the foreign direct investment route by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country will require prior approval of the Government of India. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government of India.

With effect from April 1, 2020, the aggregate limits for FPI investments are the sectoral caps applicable to our Company. Each Bidder should seek independent legal advice about its ability to participate in the Offer and in our Company. In the event a prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar in writing about such approval along with a copy thereof within the Bid/ Offer Period.

by the SEBI and the Board of Trustees, or the Trustee Company, as the case may be, if required under Applicable Law.

Permitted Transfers

78A.3 Notwithstanding any other provision of the Articles but subject to Applicable Law, including any Approvals as may be required, a Sponsor may at any time Transfer all or part of the Shares held by it to an Affiliate subject to (i) such Affiliate agreeing in writing to be bound by the terms and conditions of the Articles by executing a Deed of Adherence (if applicable), and (ii) such Shareholder continues to qualify as a sponsor as per the MF Regulations.

Right of First Refusal

78A.4.1. Each Sponsor shall have the right to Transfer any or all of its Shares to a third party in accordance with this Article 78A.4, provided it can deliver reasonable proof of the sale agreement with such third party. If a Sponsor proposes to so Transfer its Shares to such third party, the other Sponsor shall have a right of first refusal ("First Refusal Right") with respect to such Transfer as provided in this Article 78A.4.

78A.4.2. If either of the Sponsors ("Transferring Shareholder") proposes to Transfer the Shares held by it in the AMC, the Transferring Shareholder shall send a irrevocable written notice open for acceptance within 30 (thirty) days of the date of the notice ("Transfer Notice") to Canara Bank or ORIX, as the case may be ("Offeree"), which notice shall state (i) the number of Shares to be Transferred ("Offered Shares"); (ii) the consideration expected by the Transferring Shareholder for the Offered Shares ("Offer Price"); and (iii) the other terms and conditions (including the price) of the proposed Transfer (if any) ("Sale Terms").

78A.4.3 The Offeree shall have the right, exercisable through the delivery of a written notice ("Acceptance Notice"), to purchase the Offered Shares, subject to Applicable Law, at the Offer Price and on the Sale Terms, within a period of 30 (thirty) days after delivery of a Transfer Notice ("Offer Period"). An Acceptance Notice shall be irrevocable and shall constitute a binding agreement by such Offeree to purchase the Offered Shares. Any notice containing other terms than the Offer Price of Sale Terms or a simple rejection or no response to the Transfer Notice shall constitute a rejection of the Transfer Notice ("Rejection Notice"). Upon receipt of the Rejection Notice the Offeree and the Transferring Shareholder shall discuss (in good faith) to arrive at a mutually acceptable price for the Offered Shares within a period of 30 (thirty) days from the date of the Rejection Notice. If the Offeree and the Transferring Shareholder do not arrive at a mutually acceptable price within the aforesaid period of 30 (thirty) days then the Transferring Shareholder may sell the Offered Shares in accordance with Article 78A.4.5.

78A.4.4 The completion of any purchase of Offered Shares by the Offeree shall be held at the Principal Office of the AMC at 11:00 a.m. local

time 60 (sixty) days after the expiry of the Offer Period or at such other time and place as the parties to the transaction may agree. If any Approval is required for the transfer, the aforesaid period shall be extended until the receipt of such Approval. At such completion, the Transferring Shareholder shall deliver certificates representing the Offered Shares concerned, accompanied by duly executed instruments of Transfer. Such Offered Shares shall be free and clear of any Encumbrance (other than Encumbrances arising hereunder or attributable to actions by the Offeree), and the Transferring Shareholder shall give the customary representations and warranties with respect to itself and the Offered Shares concerned. The Offeree purchasing the Offered Shares shall deliver, at such completion, payment in full of the Offer Price or price arrived at in accordance with Article 78A.4.3, as applicable, subject to deduction of withholding tax (if any). At such completion, all of the parties to the transaction shall execute such additional documents as may be necessary or appropriate to effect the sale of the Offered Shares to the Offeree.

78A.4.5 If the Offeree does not elect to purchase the Offered Shares under Article 78A.4.3, the Transferring Shareholder may sell its Shares to any third party (“**Permitted Transferee**”); provided, however, that (i) the price for the sale to the transferee is a price not less than the Offer Price (“**Third Party Price**”) and the sale is otherwise on terms and conditions no less favourable to the Transferring Shareholder than the Sale Terms; and (ii) the Transfer is made within 180 (one hundred and eighty) days after the expiry of the Offer Period. The Transferring Shareholder shall provide the other Shareholder (i.e. Canara Bank or ORIX, as the case may be) with evidence of its compliance with Article 78A.4. If the Transfer is not completed within 180 (one hundred and eighty) days after the expiry of the Offer Period, the Offered Shares shall again become subject to the transfer restrictions set out at Article 78A.1 above.

78A.5 Notwithstanding the above, if required, the Parties will mutually agree on other shareholders as partners or sponsors for the AMC and agree to negotiate (in good faith) to induct them based on the terms of the Articles, provided however that (a) the 49% (forty nine percent) equity interest of ORIX and (b) the shareholding of Canara Bank which would qualify it as a sponsor under the MF Regulations, shall not be diluted in any manner whatsoever. For avoidance of doubt, it is clarified that if it is mutually agreed by the Parties to induct a third party as a partner or sponsor for the AMC, the First Refusal Right under this Article 78A.4 and the Tag Along Right under Article 78A.6 shall not apply for the Transfer of Shares by Canara Bank to such third party.

Tag Along Right

78A.6 In the event, the Offeree does not exercise its First Refusal Right, then the Offeree may within the Offer Period, by a written notice to the Transferring Shareholder, demand the Transferring

Shareholder to require such Permitted Transferee to purchase from the Offeree all of its Shares (“**Tag Along Shares**”) in the AMC (“**Tag Along Right**”) at the Third Party Price and on terms no less favourable than those offered to the Transferring Shareholder for its Shares. The Transferring Shareholder shall not Transfer its Shares to the Permitted Transferee unless the Permitted Transferee simultaneously purchases the Shares of the Offeree and pays to the Offeree the Third Party Price for its Shares.

The completion of any purchase of Offered Shares and Tag Along Shares by the Permitted Transferee shall be held at the principal office of the AMC at 11:00 a.m. local time 180 (one hundred and eighty) days after the expiry of the Offer Period or at such other time and place as the Parties to the transaction may agree. If any Approval is required for the transfer the aforesaid period shall be extended until the receipt of such Approval. At such completion, the Shareholders shall deliver certificates representing the Offered Shares and the Tag Along Shares concerned, accompanied by duly executed instruments of Transfer. Such Shares shall be free and clear of any Encumbrance (other than Encumbrances arising hereunder or attributable to actions by the Permitted Transferee), and the Shareholders shall give the customary representations and warranties with respect to themselves and the Offered Shares and the Tag Along Shares.
