MANAGEMENT DISCUSSION AND ANALYSIS REPORT

OVERVIEW

The global economy did not improve to the extent anticipated at the beginning of the year and during the year it gone slowly. Deceleration in industrial output and exports weakened India's growth significantly. The Indian economy slowed down considerably with Real GDP growth fell to a decade's low of 5% for the 2012-13 financial year on account of poor performance of manufacturing, agriculture and services sector. The rupee remained weak for most part of the year.

INDUSTRY STRUCTURE AND DEVELOPMENT

The Indians' furniture retail market is one of the 14th largest furniture markets in the world due to the rising purchasing power of the Indian middle class population. According to a Cushman and Wakefield report, the demand for residential spaces is forecasted to hit 4.25 million units while the demand for office spaces is expected to hit 400 million sq.ft. between 2010 and 2014. In furniture market, another major segment which drives to it is hotel developments and tourism demand. The furniture sector makes a marginal contribution to India's GDP. Globalization and a good pay package of the middle class India is a great boost for the furniture retail business in India.

The Mid size and small Companies in furniture and related products are terming the financial year 2012-13 as a bad time which did not participate in the growth, instead they are still suffering the wound caused by the burn. The year has witnessed growth in terms of value but not in volume. The furniture producers are visioning a positive trend in the coming year because reality sector is visibly positive on apartment prices. However, more players are added in the manufacturer's list of Particle Board and MDF which increase competition in Particle Boards and MDF which would keep the prices under control and also possibility of cut in profit.

**A. SIGNIFICANT ACCOUNTING POLICIES :****(a) Method of Accounting :**

The Financial Statements are prepared as per historical cost convention and in accordance with the Generally Accepted Accounting Principles in India, the provisions of the Companies Act 1956 , and the applicable Accounting Standards notified under the Companies (Accounting Standards) Rules, 2006. All Income and Expenditures having material bearing on the Financial Statements are recognized on accrual basis.

(b) Use of Estimates :

The preparation of the financial statements in conformity with GAPP requires the Management to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosures relating to contingent liabilities as at the date of the financial statements and reported amounts of income and expenses during the period. Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as the Management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.

(c) Revenue Recognition

Sales are stated inclusive of rebate and trade discount and excluding Central Sales Tax, State Value Added Tax. With regard to sale of products, income is reported when practically all risks and rights connected with the ownership have been transferred to the buyers. This usually occurs upon dispatch, after the price has been determined.

Export Benefits are accounted on accrual basis.

(d) Fixed Asset :

(i) Tangible Fixed Assets acquired by the Company are reported at acquisition value, with deductions for accumulated depreciation [other than "freehold land" where no depreciation is charged] and impairment losses, if any. The acquisition value includes the purchase price (excluding refundable taxes), and expenses directly attributable to assets to bring it to the factory and in the working condition for its intended use. Where the construction or development of any such asset requiring a substantial period of time to set up for its intended use, is funded by borrowings if any, the corresponding borrowing cost are capitalized up to the date when the asset is ready for its intended use.

(ii) Intangible Fixed assets are stated at cost of acquisition or developed.

(iii) All indirect expenses incurred during project implementation and on trial run are treated as incidental expenditure during construction and capitalized.

(iv) Capital Works in Progress are stated at Cost.

(e) Impairment of Assets :

The Management periodically assesses using, external and internal sources, whether there is an indication that an asset may be impaired. An impairment loss is recognized wherever the carrying value of an asset exceeds its recoverable amount. The recoverable amount is higher of the asset's net selling price and value in use, which means the present value of future cash flows expected to arise from the continuing use of the asset and its eventual disposal. An impairment loss for an asset other than goodwill is reversed if, and only if, the reversal can be related objectively to an event occurring after the impairment loss recognized. The carrying amount of an asset other than goodwill is increased to its revised recoverable amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment losses been recognized for the asset in prior years.

(f) Depreciation and Amortisation :

a) Depreciation on fixed assets is provided on SLM method under Section 205 (2) (b) of the Companies Act, 1956 at the rate and in the manner prescribed in schedule XIV of the said Act.

b) Computer Software costs are amortized using the Straight Line Method over estimated useful life of 5 years, as estimated at the time of capitalization.
