SECTION III – RISK FACTORS

An investment in the Equity Shares involves a high degree of risk. You should carefully consider all the information in this Red Herring Prospectus, including the risks and uncertainties described below, before making an investment in the Equity Shares. In making an investment decision, prospective investors must rely on their own examination of us and the terms of the Issue including the merits and risks involved. The risks described below are not the only ones relevant to us, our Equity Shares, the industry or the segment in which we operate. Additional risks and uncertainties, not presently known to us or that we currently deem immaterial may arise or may become material in the future and may also impair our business, results of operations and financial condition. If any of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, our business, results of operations, cash flows and financial condition could be adversely affected, the trading price of our Equity Shares could decline, and as prospective investors, you may lose all or part of your investment. You should consult your tax, financial and legal advisors about particular consequences to you of an investment in this Issue. The financial and other related implications of the risk factors, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are certain risk factors where the financial impact is not quantifiable and, therefore, cannot be disclosed in such risk factors.

To obtain a complete understanding, you should read this section in conjunction with the sections “Industry Overview”, “Our Business” and “Management’s Discussion and Analysis of Financial Position and Results of Operations” on pages 106, 116 and 193 of this Red Herring Prospectus, respectively. The industry-related information disclosed in this section that is not otherwise publicly available is derived from industry sources as well as Government Publications. Industry sources as well as Government Publications generally state that the information contained in those publications has been obtained from sources believed to be reliable but that their accuracy and completeness and underlying assumptions are not guaranteed and their reliability cannot be assured.

This Red Herring Prospectus also contains forward-looking statements that involve risks, assumptions, estimates and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and, in the section titled “Forward-Looking Statements” on page 22 of this Red Herring Prospectus.

Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implications of any of the risks described in this section. Unless the context requires otherwise, the financial information of our Company has been derived from the Restated Financial Information.

Materiality:

The Risk Factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality of Risk Factors:

- *Some events may not be material individually but may be found material collectively;*
- *Some events may have material impact qualitatively instead of quantitatively; and*
- *Some events may not be material at present but may have a material impact in future.*

Classification of Risk Factors

The financial and other related implications of risks concerned, whether quantifiable have been disclosed in the risk factors mentioned below. However, there are risk factors where the impact may not be quantifiable and hence, the same has not been disclosed in such risk factors. The numbering of the risk factors has been done to facilitate ease of reading and reference and does not in any manner indicate the importance of one risk over another.

In this Red Herring Prospectus, any discrepancies in any table between total and sums of the amount listed are due to rounding off.

In this section, unless the context requires otherwise, any reference to “we”, “us” or “our” refers to Airfloa Rail Technology Limited.

The risk factors are classified as under for the sake of better clarity and increased understanding.

INTERNAL RISK FACTORS

- 1. Our business and revenues are substantially dependent on Indian Railways. Any adverse change in policy of the Ministry of Railways, GOI “MoR” may lead to our contracts being foreclosed, terminated, restructured or renegotiated, which may have a material effect on our business and results of operations.**

Our business and revenues are substantially dependent on the policies of the MoR and operations of Indian Railways. Our Company has derived a significant portion of its revenues from the Indian Railways and for the Fiscal 2025, 2024 and 2023 the total revenue from Indian Railways was ₹ 10,715.64, ₹ 7707.94 Lakhs and ₹ 7506.20 Lakhs, respectively, which represents 55.70%, 64.61% and 78.87% respectively our total revenue.

The number of rolling stocks we supply to the Indian Railways is likely to vary from year to year, since we are not the exclusive supplier of rolling stocks to the Indian Railways. Due to any future changes to government policy, the Indian Railways may decide to reduce their spending on the purchase of wagons or change their procurement policy. In addition, there are a number of factors, other than our performance, that are not predictable and could cause our business from the Indian Railways to reduce. For instance, rolling stock manufacturing is a need-based activity, which is dependent on the traffic needs and availability of funds after taking into consideration the replacement of wagons. If we are not able to continue to receive orders in the manner we have in the past from the Indian Railways, it would have a material adverse effect on our results of operations and financial conditions. In addition, during an economic downturn, many of our competitors may be more inclined to take greater or unusual risks or terms and conditions in a contract that we might not deem as standard market practice or acceptable. As a result, we are subject to the risk of losing new awards to competitors thereby adversely impacting our business growth, financial condition and results of operations.

If the Indian Railways reduce their volume of business with our Company, including due to an amendment of the relevant policies to favour public sector enterprises, or a withdrawal of the programmes and policies beneficial to the private sector, or if the Indian Railways do not release any new orders, our Company’s business, financial condition, results of operations and prospects may be adversely affected. Any withdrawal or adverse changes in Government policies may lead to adverse impact on our on-going business and could, materially and adversely affect our financial condition, capital expenditure, revenues, development and our business operation

- 2. We depend on the entities under Indian Railways for a significant portion of contracts in our order book which are awarded on a tender basis. There is no assurance that our bids will be accepted and future contracts will be awarded to us by Indian Railways. This may result in an adverse effect on our business growth, financial condition and results of operations.**

Our revenues in the future depend on the acceptance of bids submitted to the Indian Railways. As of August 28, 2025 our order book from the Indian Railways was ₹ 27,127.73 lakh.

Our railway related projects are awarded by the entities under Indian Railways through competitive bidding processes and satisfaction of other prescribed pre-qualification criteria. We may not be selected for the projects for which we may have submitted a bid. In selecting contractors, Indian Railways generally limits the tender to contractors, who have pre-qualifications based on several criteria including experience, technological capacity and performance, reputation for quality, safety record, financial strength and bonding capacity and size of previous contracts. Further, once prospective bidders satisfy the prequalification requirements of the tender, the project is usually awarded on the basis of price competitiveness of the bid. The growth of our business mainly depends on our ability to obtain new contracts. While we have, in the past, been awarded a number of contracts, we cannot assure you that we will continue to be awarded such contracts. Some of the new entrants may also bid at lower margins in order to be awarded a contract.

- 3. Increases in the prices of raw materials required for our operations could adversely affect our business and results of operations**

We source raw material such as SS Sheet/Coils, MS Pipes, SS Pipes, Foam, Led Lights, Aluminium Extrusions, Aluminium Sheets Glass, Electrical Components, Rubber, Aluminium Alloy Ingots and Paints etc. for our manufacturing operations from a combination of domestic and foreign suppliers. The table below shows the cost of materials consumed.

(₹ in Lakhs)

Particulars	Consolidated	Standalone	
	Fiscal 2025	Fiscal 2024	Fiscal 2023
Total cost of materials consumed	13,343.47	6,179.87	5,475.45

For further risks related to our suppliers, see **“We depend on a limited number of suppliers for raw materials. Any interruption in the availability of raw materials could adversely impact our operations. Further, any failure by our suppliers to provide raw materials to us on time or at all, or as per our specifications and quality standards could have an adverse impact on**

our ability to meet our manufacturing and delivery schedules” on page 41. For definitions of the terms mentioned above, see ***“Definitions and Abbreviations – Industry Related Terms”*** on page 6.

Our inability to procure raw materials on terms more favourable, or at all, may constrain our raw material supply, may adverse effect on our business, financial condition and results of operations. Any increase in price of cost of inputs as well as limitations and/ or disruptions in the supply of such inputs, will adversely affect our business and financial condition. We cannot assure that we shall be able to timely and adequately effect any prices increases corresponding to the input costs escalation. Further, any substantial delay in supply or non-conformance to quality requirements by our suppliers can impact our ability to meet our customer requirements and thus impact our business and results of operations. We typically purchase raw materials based on the order in hand and price trend of upcoming orders.

In addition, the availability and price of our raw materials may be subject to a number of factors beyond our control, including economic factors, environmental factors and changes in government policies and regulations. We cannot assure you that we will always be able to meet our raw material requirements at prices acceptable to us, or at all, or that we will be able to pass on any increase in the cost of raw materials to our customers.

While historically, we have not experienced a shortfall or limited availability of raw materials that has affected our operations, we cannot assure you that there will not be any significant and prolonged interruption or a shortage in the supply of our critical raw materials. Any inability on our part to procure sufficient quantities of raw materials, on commercially acceptable terms, may lead to a decline in our sales volumes and profit margins and adversely affect our results of operations. Further, an increased cost in the supply of raw material arising, from a lack of long-term contracts may have an adverse impact on our ability to meet customer demand for our products and result in lower net revenue from operations both in the short and long term.

4. *Our Subsidiary company is in a similar line of business as us which may involve conflict of interest, which could adversely impact our business.*

Our Subsidiary Company namely, Sree Dakssnaa Aerospace and Defence India Private Limited, is engaged in the similar line of business, as of our Company. Further, we have not entered into any non-compete agreement with the said entity. We cannot assure that our Promoter who has common interest in said entity will not favour the interest of the said entity. As a result, conflicts of interests may arise in allocating business opportunities amongst our Company and our Subsidiary Companies in circumstances where our respective interests’ conflict. In cases of conflict, our Promoter may favour other companies/entities in which our Promoter has interest. There can be no assurance that our Promoter or our Subsidiary Companies or members of the Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. For details regarding Subsidiary Companies, please refer chapter titled ***“Our Subsidiary”***, on page no. 177 of this Red Herring Prospectus.

5. *Our operations are subject to high working capital requirements. If we are unable to generate sufficient cash flows to allow us to make required payments, there may be an adverse effect on our results of operations.*

Majority of the working capital funds of our Company are blocked due to High Inventory Levels, High Debtors, Advance Payments to Suppliers and Requirement of Security Deposits as on March 31, 2025, our Company’s net working capital consisted of ₹ 11,910.87 Lakhs. Further, as on March 31, 2024, our Company’s net working capital consisted of ₹ 7,904.05 Lakhs as against ₹ 5,509.88 lakhs as on March 31, 2023. Additional debt financing could increase our interest costs and require us to comply with additional restrictive covenants in our financing agreements. Additional equity financing could dilute our earnings per Equity Share and investors interest in the Company and could adversely impact our Equity Share price.

Furthermore, the objects of the Issue include funding working capital requirements of our Company. For more information in relation to such management estimates and assumptions, please see ***“Objects of the Issue”*** on page 85. Our working capital requirements may be affected due to factors beyond our control including force majeure conditions, delay or default of payment by our clients, non-availability of funding from banks or financial institutions. Accordingly, such working capital requirements may not be indicative of the actual requirements of our Company in the future and investors are advised to not place undue reliance on such estimates of future working capital requirements.

In the last three (3) financial years, our Company has been able to raise funding from bank as and when the need has arisen and has never delayed and defaulted its financial commitments. However, any failure to service our indebtedness, perform any condition or covenant or comply with the restrictive covenants could lead to a termination of one or more of our credits which may adversely affect our ability to conduct our business and have a material adverse effect on our financial condition and results of operations. We cannot assure you that we will be able to raise additional financing on acceptable terms in a timely

manner or at all. Our failure to renew arrangements for existing funding or to obtain additional financing on acceptable terms and in a timely manner could adversely impact our planned capital expenditure, our business, results of operations and financial condition.

9. *We have been unable to locate certain of our historical corporate records. Our Company was incorporated in 1997 and certain corporate records and documents filed by us with the RoC are not traceable.*

The secretarial records such as certain returns of past allotments of Equity Shares made by our Company, share transfer forms, could not be traced. While we have undertaken extensive search for our records at registered office of the company and on the MCA portal maintained by the Ministry of Corporate Affairs, we have not been able to trace the aforementioned corporate records. In this regard, we have relied on the minutes and statutory registers. Accordingly, we have included the details of the build-up of the share capital of the Company and the build-up of the Promoters' shareholding in our Company in this RHP, by placing reliance on other corporate records such the annual reports filed by corporate entities who were the erstwhile shareholders of our Company and the documents such as Annual Return filed by our Company with the Registrar of Companies.

10. *An inability to comply with repayment and other covenants in the financing agreements or otherwise meet our debt servicing obligations could adversely affect our business, financial condition, cash flows and credit rating.*

Our Company has entered into agreements in relation to financing arrangements with certain banks for working capital facilities, term loans and bank guarantees. As of March 31, 2025 and March 31, 2024, we had total outstanding borrowings of ₹ 5,997.71 lakhs and ₹ 6,380.24 lakhs. The agreements with respect to our borrowings contain restrictive covenants, including, but not limited to, requirements that we obtain consent from the lenders prior to undertaking certain matters including, among others, effecting a merger, amalgamation or scheme of arrangement, change in capital structure of our Company subject to the threshold prescribed for the shareholding of certain shareholders of our Company and effecting change in the constitutional documents or management of our Company. For further details, see "*Financial Indebtedness*" beginning on page 184. As on March 31, 2025 and March 31, 2024, our total secured borrowings amounted to ₹ 5,738.71 lakhs and ₹ 6,051.62 lakhs. Under the terms of our secured borrowings, we are required to create a charge by way of hypothecation on the assets of our Company, together with cash in hand and bank accounts. As these assets are hypothecated in favour of lenders, our rights in respect of transferring or disposing of these assets are restricted. Many of our financing agreements also include various conditions and covenants that require us to obtain lender consents prior to carrying out certain activities or entering into certain transactions. Typically, restrictive covenants under our financing documents relate to obtaining prior consent of the lender for, among others, change in the capital structure, availing additional borrowings, change in ownership or management control, changes in shareholding pattern and management set-up including its constitution and composition, amalgamation, demerger, merger, acquisition, corporate or debt restructuring or similar action. If we fail to meet our debt service obligations or covenants (or do not receive approvals from our lenders to undertake certain transactions) under the financing agreements, the relevant lenders could declare us to be in default of our agreements, accelerate the maturity of our obligations, enforce security, take possession of the assets. As a result, we may be forced to sell some or all of our assets if we do not have sufficient cash or credit facilities to make these repayments.

11. *One of our group entity i.e. Airflow Aerospace And Defence India Private Limited is Voluntarily been struck off.*

We always comply with the statutory obligations applicable to our company, however one of our group company named "Airflow Aerospace And Defence India Private Limited" failed to commence business within one year of its incorporation due to business non-viability. As a result, an application for strike-off under Section 248 of the Companies Act, 2013 was filed with the Registrar of Companies (RoC), Chennai, through Form STK-2 bearing SRN No. AB2169491. As on the date of filing this Red Herring Prospectus, the name of Airflow Aerospace has been struck off from the records of the Ministry of Corporate Affairs (MCA).

Although Airflow Aerospace is not included under the chapter titled “*Group Entities of our Company*” in this Red Herring Prospectus, any perception of failure associated with a company that is or was part of our group may adversely affect our brand image and reputation in the eyes of customers, investors, and other stakeholders. There can be no assurance that such events will not have a negative impact on our business, prospects, or financial performance.

12. *In the past Directors of our company namely Nandhini Manikandan and Sathishkumar Venkatesan have been directors of the company Emrion Technologies Private Limited which was struck off by ROC on Suo-moto basis.*

In the past, two of our Directors, Ms. Nandhini Manikandan and Mr. Sathishkumar Venkatesan, served as directors of Emrion Technologies Private Limited, a company that was struck off by the Registrar of Companies (RoC), Chennai. As per Public Notice STK5/ROC/CHN/S.248(1)/2022 issued by the Ministry of Corporate Affairs, Office of the RoC, Emrion Technologies Private Limited was struck off due to non-payment of the subscription amount committed at the time of incorporation. In addition, the requisite declaration confirming receipt of such subscription amount was not filed within 180 days from the date of incorporation, as required under Section 10A(1) of the Companies Act, 2013.

Although Emrion Technologies Private Limited is not connected in any manner with our current business operations, and our Company has fully complied with all applicable statutory obligations, the prior association of our Directors with a company that has been struck off may be viewed negatively. Such associations could potentially affect the perception of our Directors’ governance track record and, in turn, impact the reputation of our Company. There can be no assurance that this will not adversely affect investor confidence or our business prospects

13. *Our Order Book may not be representative of our future results and our actual income may be significantly less than the estimates reflected in our Order Book, which could adversely affect our results of operations.*

Our Order Book as on a particular date consists of contract value of unexecuted or uncompleted portions of our ongoing projects, i.e., the total contract value of ongoing projects as reduced by the value of projects billed till August 28, 2025. As on August 28, 2025 our Company had an Order Book of ₹ 37,588.65 lakhs, and comprised detail of projects in order book. For further details on our Order Book, see “*Our Business – Order Book*” on page 116 of this Red Herring Prospectus. We may not be able to achieve our expected margins or may even suffer losses on one or more of these contracts or we may not be able to realise the revenues which we anticipated in such projects. In addition, there can be no assurance that we will be awarded the projects that we currently expect or that we will be able to execute agreements for these anticipated projects on terms that are favourable to us or at all.

We may encounter problems executing the projects as ordered or executing it on a timely basis. Moreover, factors beyond our control or the control of our clients may postpone a project or cause its cancellation, including delays or failure to obtain necessary permits, authorizations, permissions, right-of-way, and other types of difficulties or obstructions. Due to the possibility of cancellations or changes in scope and schedule of projects, resulting from our clients’ discretion or problems we encounter in project execution or reasons outside our control or the control of our clients, we cannot predict with certainty when, if or to what extent, a project forming part of our Order Book will be performed and this could reduce the income and profits we ultimately earn from the contracts. Delays in the completion of a project can lead to clients delaying or refusing to pay the amount, in part or full, that we expect to be paid in respect of such project. Even relatively short delays or surmountable difficulties in the execution of a project could result in our failure to receive, on a timely basis or at all, all payments otherwise due to us on a project. These payments often represent an important portion of the margin we expect to earn on a project. In addition, even where a project proceeds as scheduled, it is possible that the contracting parties may default or otherwise fail to pay amounts owed. Any delay, reduction in scope, cancellation, execution difficulty, payment postponement or payment default in regard to our Order Book projects or any other uncompleted projects, or disputes with clients in respect of any of the foregoing, could materially harm our cash flow position, revenues and earnings.

14. *We derive a significant portion of our revenues from a limited number of clients. The loss of any significant clients may have an adverse effect on our business, financial condition, results of operations, and prospect.*

Set out in the table below is the contribution of our top 10 customers to our consolidated revenue from operations in Fiscal 2025, 2024 and 2023.

Particulars	Fiscal 2025		Fiscal 2024		Fiscal 2023	
	Revenue From operations (₹ in Lakhs)	As a % of Revenue from Operations	Revenue From operations (₹ in Lakhs)	As a % of Revenue from Operations	Revenue From operations (₹ in Lakhs)	As a % of Revenue from Operations
Top 10 Customers	17,800.95	92.52%	10,968.54	91.93%	9,047.48	95.07%

Our business heavily relies on our customer base, and the potential loss of any of our customers could have a negative impact on our sales and, consequently, our overall business and financial performance. If we were to lose one or more of our significant or key customers or experience a reduction in the volume of business they provide, it could result in adverse consequences for our business, financial health, and cash flow. We cannot guarantee that we will be able to maintain the same levels of business as we have historically or secure long-term contracts with our major customers on mutually beneficial terms. Additionally, reducing our dependence on a few key customers may pose challenges in the future. Furthermore, factors such as a decline in our product or service quality, increased competition, or shifts in market demand could jeopardize our ability to retain these valuable customers. There is no assurance that we will continue to generate the same amount of business, or any business at all, from these customers, and any loss of their business could significantly impact our revenue and overall financial performance. While our customer mix and revenue streams may naturally evolve with the addition of new clients in the ordinary course of operations, we maintain confidence in our ability to sustain existing business relationships and attract new customers. Nonetheless, it's essential to acknowledge that the continuity of long-term customer relationships and the timely acquisition of new clients are not guaranteed, and uncertainties exist in this regard. Our long-term relationships with the customers are indicative of our quality consciousness and timely execution.

If such claims are determined against Company, there could be a material adverse effect on our reputation, business, financial condition and results of operations, which could adversely affect the trading price of our Equity Shares.

Furthermore, we may not be able to quantify all the claims in which we are involved. Failure to successfully defend these or other claims or if our current provisions prove to be inadequate, our business and results of operations could be adversely affected. Even if we are successful in defending such cases, we will be subjected to legal and other costs relating to defending such litigation, and such costs could be substantial. In addition, we cannot assure that similar proceedings will not be initiated in the future. This could adversely affect our business, cash flows, financial condition, and results of operation. 16. We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, any failure to obtain, retain and renew such approvals and licences or comply with such rules and regulations may adversely affect our operations.

We require several statutory and regulatory permits, licenses and approvals to operate our business, some of which are either received or applied for. Many of these approvals are subject to periodical renewal. Any failure to renew the approvals that may expire, or to apply for the required approvals, licences, registrations or permits, or any suspension or revocation of any of the approvals, licences, registrations and permits that have been or may be issued to us, could result in delaying the operations of our business, which may adversely affect our business, financial condition, results of operations and prospects.

Additionally, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals which may result in the interruption of our operations and may have a material adverse effect on our business, financial condition, cash flows and results of operations. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change, we may incur increased costs, be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. For further details, see “**Key Industry Regulations and Policies**” and “**Government and Other Approvals**” for permits/licenses required for the business on pages 146 and 210, respectively.

17. We may be unable to sufficiently obtain, maintain, protect, or enforce our intellectual property and other proprietary rights

As on date of this Red Herring Prospectus, our Company has application for its logo ‘’, dated December 29, 2024 under class 12 of the under the Trade Mark Act, 1999 which is currently pending. There can be no assurance that we will be able to successfully obtain the registration in a timely manner or at all, which may affect our ability to use the logo in the future. We may not be able to prevent infringement of our trademarks and a passing off action may not provide sufficient protection until such time that this registration is granted.

Pending the registration of the trademark, any third party may use the above-mentioned trademark and we may have a lesser recourse to initiate legal proceedings to protect our intellectual property. Further, our application for the registration of trademark may be opposed by third parties, and we may have to incur significant cost in relation to these oppositions. - 18. We depend on a limited number of suppliers for raw materials. Any interruption in the availability of raw materials could adversely impact our operations. Set out in the table below is the contribution of our top 10 suppliers to Total purchases in Fiscal 2025, 2024 and 2023.

(₹ in Lakhs)

Particulars	Fiscal 2025		Fiscal 2024		Fiscal 2023

Top 10 Suppliers	8,340.64	64.37%	3,902.19	64.86%	2,840	50.90%

We cannot assure that we will be able to get the same quantum and quality of supplies, or any supplies at all, and the loss of supplies from one or more of them may adversely affect our purchases of stock and ultimately our revenue and results of operations. However, the composition and amount of purchase from these suppliers might change as we continue seeking new suppliers for our product for better quality and price in the normal course of business. Though we believe that we will not face substantial challenges in maintaining our business relationship with them or finding new suppliers, there can be no assurance that we will be able to maintain long term relationships with such suppliers or find new suppliers in time.

We source our raw materials from a limited number of third-party suppliers from various geographies including China, United Kingdom, Turkey etc.. We do not have long-term contracts with our suppliers for such raw materials. Our dependence on foreign suppliers subjects us to certain risks and uncertainties which include political and economic instability in the countries in which such suppliers are located, disruptions in transportation, currency exchange rates and transport costs, amongst others. If we fail to (i) receive the quality of raw materials that we require; (ii) negotiate appropriate financial terms; (iii) obtain adequate supply of raw materials in a timely manner, or if our principal suppliers discontinue the supply of such raw materials, or were to experience business disruptions or become insolvent, we cannot assure you that we will be able to find alternate sources for the procurement of raw materials in a timely manner. Moreover, in the event that either our demand increases, or our suppliers experience a scarcity of resources, our suppliers may be unable to meet our demand for raw materials.

While other than in the ordinary course of business, there has not been any reduction or interruption in the supply of raw materials to our Company in the Fiscals 2025, 2024 and 2023, any reductions, or interruptions in the supply of raw materials, and any inability on our part to find alternate sources in a timely manner for the procurement of such raw materials, may have an adverse effect on our ability to manufacture our products in a timely or cost-effective manner. The occurrence of any such event may adversely affect our business, results of operations, cash flows and financial condition.

The fund requirement and deployment, as mentioned in the “Objects of the Issue” on page 85 of this Red Herring Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter Objects of the Issue is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency and the audit committee of the Company will monitor the deployment of funds and provide disclosure for the same as per applicable provisions. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter Objects of the Issue will not vary from the estimated costs or schedule of implementation. Further, there is no guarantee that our future production or capacity utilization levels will match or exceed our historical levels. Under-utilization of our manufacturing capacities over extended periods, or significant under-utilization in the short term could increase our cost of production and our operating costs and adversely impact our business, growth prospects and future financial performance. As of the date of this Red Herring Prospectus, there have been no such instances of under-utilization of our manufacturing capacities over extended periods, or significant under-utilization in the short term in the past. In case of oversupply in the industry or lack of demand, we may not be able to utilize our capacity efficiently. However, as of the date of this Red Herring Prospectus, there have been no such instances in the past three years.

21. Delays or defaults in customer payments could adversely affect our financial condition.

We are exposed to payment delays and/or defaults by our customers and our financial position and financial performance are dependent on the creditworthiness of our customers. Further, we may not receive advance payment from our customers after signing the purchase orders. Delays in customers’ payments may require us to make a working capital investment. If a customer defaults in making payments where we have devoted significant resources or where we have invested significant resources is delayed, cancelled, or does not proceed to completion, it could have an adverse effect on our operating results. For the Fiscal ending March 31, 2025, 2024 and 2023, our trade receivables were ₹ 12,760.04 lakhs on consolidated basis, ₹ 10,170.80 lakhs on standalone basis and ₹ 4,876.74 lakhs on standalone basis, respectively. However, in the past, our Company has not faced any such instance of default but there is no guarantee that the timeliness of all or any part of our customers’ payments and whether they will be able to fulfil their obligations, which may arise from their financial difficulties, cash flow difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur, our financial performance and our operating cash flows may be adversely affected.

To enhance our business operations and prospects, our directors and Key Management Personnel are committed to consistently exercising their shareholder rights in the best interest of our Company, positively influencing our business, operational results, and future prospects.

23. Our Company is yet to place orders for the plant and machinery. Any delay in placing orders or procurement of such plant and machinery may delay the schedule of implementation and possibly increase the cost of commissioning the manufacturing unit.

We intend to utilize a portion of the Net Proceeds for funding capital expenditure requirements. Accordingly, orders worth ₹ 1,367.78 Lakhs, which constitute 100% of the total estimated costs of the machinery and equipment are yet to be placed. There can be no assurance that we will be able to place orders for such plant and machinery, in a timely manner or at all. We have not entered into any definitive agreements to utilize the Net Proceeds for these objects of the Issue and have relied on the quotations received from third parties for estimation of the cost.

We have obtained quotations from vendors for the proposed capital expenditure, most of these quotations are valid for a certain period of time and may be subject to revisions, and other commercial and technical factors. Additionally, in the event of any delay in placement of such orders, the proposed schedule implementation and deployment of the Net Proceeds may be extended or may vary accordingly. We cannot assure you that we will be able to undertake such capital expenditure within the cost indicated by such quotations or that there will not be cost escalations. For further details, please see “*Objects of the Issue*” on page 85 of this Red Herring Prospectus.

The objects of the Issue have not been appraised by any bank or financial institution, and our funding requirement is based on current conditions, internal estimates, estimates received from the third-party agencies and are subject to changes in external circumstances or costs, or in other financial condition, business or strategy. Based on the competitive nature of our industry, we may have to revise our business plan and/ or management estimates from time to time and consequently our funding requirements may also change. Such internal estimates may differ from the value that would have been determined by third party appraisals, which may require us to reschedule or reallocate our expenditure, subject to applicable laws. In case of increase in actual expenses or shortfall in requisite funds, additional funds for a particular activity will be met by any means available to us, including internal accruals and additional equity and/or debt arrangements, and may have an adverse impact on our business, results of operations, financial condition and cash flows. Accordingly, investors in the Equity Shares will be relying on the judgment of our management regarding the application of the Net Proceeds. Further, pursuant to Section 27 of the Companies Act, any variation in the Objects of the Issue would require a special resolution of the shareholders and the promoter or controlling shareholders will be required to provide an exit opportunity to the shareholders who do not agree to such proposal to vary the Objects of the Issue, at such price and in such manner in accordance with applicable law.

24. Our individual Promoters plays key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our Promoter and Executive Directors remain associated with us. Our success also depends upon the services of our key managerial personnel and our ability to attract and retain key managerial personnel and our inability to attract them may affect our operations.

We benefit from our relationship with our individual Promoters and our success depends upon the continuing services of our Promoters and executive Directors who have been responsible for the growth of our business and is closely involved in the overall strategy, direction and management of our business. Our Promoters and executive Directors have been actively involved in the day-to-day operations and management. Accordingly, our performance is heavily dependent upon the services of our Promoters and executive Directors. If our Promoters and executive directors are unable or unwilling to continue in their present position, we may not be able to replace them easily or at all. Further, we rely on the continued services and performance of our key executives and senior management for continued success and smooth functioning of the operations of the Company. If we lose the services of any of our key managerial personnel, it may take reasonable time to locate suitable or qualified replacements and may incur additional expenses to recruit and train new personnel, which could adversely affect our business operations and affect our ability to continue to manage and expand our business. Our Promoters and executive Directors, along with the key managerial personnel, have over the years-built relations with various customers and other persons who form part of our stakeholders and are connected with us. The loss of their services could impair our ability to implement our strategy, and our business, financial condition, results of operations and prospects may be materially and adversely affected. However, we have encountered no such issues in the past, as majority of our promoters and both the Executive Directors have been with our company since its inception.

For further details of our Directors and Key Managerial Personnel, please refer to Chapter titled “*Our Promoter and Promoter Group*” and “*Our Management*” on page no. 169 and 157 respectively of this Red Herring Prospectus.

25. None of the Executive Directors of the Company have experience of being a director of a public listed company.

The Directors of the Company do not have the experience of having held directorship of public listed company. Accordingly, they have limited exposure to management of affairs of the listed company which inter-alia entails several compliance requirements and scrutiny of affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, the company will require to adhere strict standards pertaining to accounting, corporate governance and reporting that it did not require as an unlisted company. The company will also be subject to the SEBI Listing Regulations, which will require it to file audited annual and unaudited quarterly reports with respect to its business and financial

condition. If the company experiences any delays, we may fail to satisfy its reporting obligations and/or it may not be able to readily determine and accordingly report any changes in its results of operations as promptly as other listed companies.

Further, as a publicly listed company, the company will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of the company's disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, the Board of Directors of the company may have to provide increased attention to such procedures and their attention may be diverted from our business concerns, which may adversely affect our business, prospects, results of operations and financial condition. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

26. *Our projects require deployment of labour and depend on availability of labour. In case of unavailability of such labour, our business operations could be affected.*

Our project operations require deployment and our ability to retain labour. In case such labour workforce is unavailable, or we are unable to identify and retain such labour our business could be adversely affected. We cannot guarantee that we may be able to continue with the same on favourable terms or at all. Any such failure may impact the operations, business process and profitability. Additionally, there have been amendments in the labour and Employment related laws, which may have a direct impact on our employee costs and consequently, on our margins. Further, latest amendments in labour laws in India may be led to increasing cost of compliance, wages, social security, Occupational Safety, Health and Working Conditions. We cannot assure you that we will continue to comply with all these labour related laws and that as we continue to grow our business in the future, our labour and employee costs coupled with operating compliances and expenses will not significantly increase. Our employees are not unionized currently. However, there is no assurance that our employees will not seek unionization in the future. In the event that employees at our project sites take any steps to unionize, it may become difficult for us to maintain flexible labour policies and may increase our costs and adversely affect our business.

Further, our business model is human resource intensive and as at July 31, 2025, our Company's work force comprised 281 employees (including employees on contract basis) including our senior management team. Our Company's average attrition rate of employees during the last 3 Fiscals is set out below

Particulars	Fiscal 2025	Fiscal 2024	Fiscal 2023
Employees	39.92%	81.31%	54.12%

Any strikes or lock-outs, work stoppages, slowdowns, shut downs, supply interruptions or costs or other factors beyond our control, may disrupt our operations and could negatively impact our financial performance or financial condition. Additionally, our inability to recruit employees, in particular skilled employees, and retain our current workforce could have a material adverse effect on our business, financial condition and profitability. There can be no assurance that we will not experience slowdowns or shutdowns in the manner described above, or in any other manner, in the future, for reasons which are beyond our control. Any slowdown or shutdown will adversely impact our results of operations, market share and financial condition.

27. *We may encounter delays in the implementation and execution of our orders.*

We have not in the past encountered any delays in relation to the completion of our orders. There can be no assurance that future orders will be completed in the estimated time frame. We cannot assure that all potential liabilities that may arise from delays will be covered or that the damages if any, that may be claimed from customers/third parties for such delay, shall be adequate to cover any loss of profits resulting from such delays. Further, any delay in completing our orders may also result in an increase in the total cost of implementing the contract which could exceed the original estimate or further cost escalation. Such delays and cost overruns will adversely affect our business, cash flows, and results of operations.

28. *We are subject to impact of foreign exchange fluctuation. Any significant movement in foreign exchange rates, could adversely impact our costs of sourcing raw materials through imports, which in turn could adversely impact our operations.*

Our Restated Consolidated Financial Information are reported in the Indian Rupee. Accordingly, our consolidated financial results and assets and liabilities may be materially affected by changes in the exchange rates of foreign currencies, which have fluctuated significantly in recent years. A proportion of our consolidated financial results, assets and liabilities are accounted for in currencies other than the Indian Rupee before being converted into and reported in the Indian Rupees. In addition, the policies of the Reserve Bank of India ("RBI") may change from time to time, which may limit our ability to effectively hedge our foreign currency exposures and may have an adverse effect on our business, financial condition, cash flows and results of operations. To the extent that we incur costs in one currency and make sales in another, our profit margins may be affected by changes in the exchange rates between the two currencies. Since the currency in which sales are recorded may not be the same as the currency in which expenses are incurred, foreign exchange rate fluctuations may materially affect our results of

operations. In the past, our exposure to foreign exchange rate fluctuation risks was mainly derived from import of raw materials we may continue to experience such fluctuations due to ongoing imports

The following table provides a breakdown of materials sourced from domestic suppliers and through imports for the periods indicated:

(₹ in Lakhs)

Particulars	Fiscal					
	2025		2024		2023	
	Amount	% of purchases of raw materials	Amount	% of purchases of raw materials	Amount	% of purchases of raw materials
Raw material sourced from domestic supplier	12,607.66	94.49%	6,086.18	98.48%	5,381.76	98.29%
Raw material sourced through imports	735.81	5.51%	93.69	1.52%	93.69	1.71%

Exchange rate fluctuations can also affect the Indian Rupee value of our monetary assets and liabilities denominated in foreign currencies irrespective of operating results, which could have an adverse impact on the value of our Equity Shares.

29. The average cost of acquisition of Equity Shares by our Promoters is lower than the Issue Price.

30. There have been certain instances of delays in payment of statutory dues by our Company in the past. Any delay in payment of statutory dues by our Company in future, may result in the imposition of penalties and in turn may have an adverse effect on our Company's business, financial condition, results of operation and cash flows.

As a Company, we are required to file GST returns and make payments in respect of Employee Provident Fund with the respectively authorities. However, there are certain inadvertent delays in relation to filing of GST returns in the past for which the Company have paid the penalties and taken the steps to improve the internal system for payment of GST to mitigate the technical difficulties,

These delays were primarily due to server issues and a vendor's representative not filing the returns on the designated due dates.

To address these issues and prevent future delays, we have taken several corrective actions, including:

Increasing Manpower: *We have augmented our team to ensure that there is sufficient coverage to manage the GST filing process efficiently, even in cases of unforeseen technical issues.*

Enhanced Monitoring and Vendor Follow-up: *We have implemented stricter monitoring and internal tracking systems to ensure that all filing deadlines are met without exception. Additionally, we have instituted a more rigorous follow-up process with our vendors to ensure they adhere to filing deadlines, thereby preventing delays caused by external parties.*

Backup Procedures: *We have established backup procedures to handle technical difficulties, including ensuring that alternative systems or personnel are available to complete filings on time.*

Training and Accountability: *Additional training has been provided to our staff to reinforce the importance of meeting compliance deadlines, and accountability measures have been introduced to prevent recurrences.*

However, we cannot assure that we will not be subject to any legal proceeding or regulatory actions, including monetary penalties by statutory authorities on account of any inadvertent discrepancies in our GST filing or EPF payment in future, which may adversely affect our business, financial condition, and reputation.

31. We are completely reliant on third-party logistics service providers for transport of input materials and finished products.

We procure input materials from domestic and international suppliers, which are brought to our manufacturing units through third party logistics providers including overland transport companies. Similarly, our finished products are transported from our manufacturing units to distribution points by overland transport. The logistics service providers are, therefore, integral to our Company's business operations. While we have over the years engaged the services of various logistics service providers for our business operations, we do not have, and we do not propose to enter into, contractual arrangements with such third-party logistics providers. While these third-party logistics service providers have generally, in the past, been reliable, we cannot assure you that they will continue to be available to us as required. If such third-party logistics service providers discontinue their services for a reasonable length of time and, if we are unable to obtain the services of other service providers, our business operations could be adversely impacted, at times, significantly. Moreover, we cannot assure you that we will not be liable for acts of negligence or other acts which may result in harm or injury to third parties. Any such acts could result in serious liability claims (for which we may not be adequately insured) which may, in addition to resulting in pecuniary liability also entail personal liability, which could significantly adversely impact our business operations and financial condition. In addition, our Company also transport input materials and products and from one unit to another unit of our Company's manufacturing facilities for which it relies on its own transport system as well as third-party transporters, for which our Company does purchase any insurance.

32. Our Company has taken short term unsecured loans that may be recalled by the lenders at any time.

As a result, any such demand may affect our business, cash flows, financial condition and results of operations. In the event any of such unsecured lenders seek a repayment of any these loans, our company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. If we are unable to arrange for any such financing arrangements, we may not have adequate working capital to undertake new projects or complete our ongoing projects. However, Company has managed to repay their loan on demand in the past and have intentions to continue doing so through net proceeds from IPO and other alternate means. Therefore, any such demand shall not adversely affect our business, financial condition and results of operations. For further details, see "Financial Indebtedness" on page no. 184 of this Red Herring Prospectus.

34. *We have in the past entered into related party transactions and may continue to do so in the future*

We have entered into and may in the course of our business continue to enter into transactions specified in the Restated Financial Information contained in this Red Herring Prospectus with related parties that include our Promoters, Directors and their relatives. For further details in relation to our related party transactions, see “Related Party Transactions” on page 180. While we believe that all such transactions have been conducted on an arm’s length basis and in the ordinary course of business and as per the Companies Act, 2013 and other applicable laws, there can be no assurance that we could not have achieved more favorable terms. Furthermore, it is likely that we may enter into related party transactions in the future. Further, we hereby confirm that all related party transactions in the future shall be done in an arm length basis in compliance with Companies Act and other applicable laws.

There can be no assurance that such transactions, individually or in the aggregate, will not have a material adverse effect on our financial condition and results of operations.

35. *Our ability to pay any dividends will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our Dividend history refer to the Section “Dividend Policy” on page 179 of the Red Herring Prospectus.

36. *Pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the Shareholders and our Promoters or controlling Shareholders will be required to provide an exit opportunity to the Shareholders of our Company who do not agree to such proposal to vary the objects, in such manner as may be prescribed in future by the SEBI.*

Accordingly, prospective investors in the Issue will need to rely upon our management’s judgment with respect to the use of Net Proceeds. If we are unable to enter into arrangements for utilization of Net proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the proceeds of the Issue and our business and financial results may suffer.

37. *We have issued Equity Shares during the last one year at a price that may be below the Issue Price.*

During the last one year we have issued Equity Shares at a price that may be lower than the Issue Price. For further details, see “Capital Structure” on page 69. The prices at which Equity Shares have been issued by us in last one year should not be taken to be indicative of the Price Band, Issue Price and the trading price of our Equity Shares after listing.

38. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we were not required to incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations.

There can be no assurance that we will be able to satisfy our reporting obligations. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner. Failure of our Company to meet the listing requirements of stock exchange, if any, could lead to imposition of penalties, including suspension of trading in shares of the Company.

39. *Our insurance coverage may not be adequate to protect us against all potential losses to which we may be subject and this may have a material effect on our business and financial condition.*

While we maintain insurance coverage, in amounts which we believe are commercially appropriate, including related to our registered office, our movable property and employees, provide appropriate coverage in relation to fire, explosions, floods, inundations, earthquakes, landslides we may not have sufficient insurance coverage to cover all possible economic losses, including when the loss suffered is not easily quantifiable and in the event of severe damage to our business. Even if we have made a claim under an existing insurance policy, we may not be able to successfully assert our claim for any liability or loss under such insurance policy. Additionally, there may be various other risks and losses for which we are not insured either because such risks are uninsurable or not insurable on commercially acceptable terms. The occurrence of an event for which we are not adequately or sufficiently insured could have an effect on our business, results of operations, financial condition and cash flows.

In addition, in the future, we may not be able to maintain insurance of the types or at levels which we deem necessary or adequate or at rates which we consider reasonable. The occurrence of an event for which we are not adequately or sufficiently insured or the successful assertion of one or more large claims against us that exceed available insurance coverage, or changes in our insurance policies (including premium increases or the imposition of large deductible or co-insurance requirements), could have an effect on our business, results of operations, financial condition and cash flows.

40. *Changes in technology may affect our business by making our manufacturing facilities or equipment less competitive.*

Our profitability and competitiveness are to a certain extent dependent on our ability to respond to technological advances and emerging industry standards and practices on a cost-effective and timely basis. Changes in technology may make newer generation manufacturing equipment more competitive than ours or may require us to make additional capital expenditures to upgrade our manufacturing facilities. Our inability to continue to invest in new and more advanced technologies and equipment, may result in our inability to respond to emerging industry standards and practices in a cost-effective and timely manner that is competitive with other manufacturing companies. The development and implementation of such technology entails technical and business risks. However, as of the date of this Red Herring Prospectus, there have been no such instances in the past three years. We cannot assure you that we will be able to successfully implement new technologies or adapt our processing systems to emerging industry standards. If we are unable to adapt in a timely manner to changing market conditions or technological changes, our business and financial performance could be adversely affected.

41. *We face competition from both domestic as well as international players and our inability to compete effectively may have a material adverse impact on our business and results of operations.*

The market in which our company is doing business is highly competitive. Players in this industry generally compete with each other on key attributes such as technical competence, pricing and timely delivery. Some of our competitors may have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in changing market scenario and remain competitive. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

42. *We will continue to be controlled by our Promoter and Promoter Group after the completion of the Issue, which will allow them to influence the outcome of matters submitted for approval of our shareholders.*

As on the date of this Red Herring Prospectus, our Promoter and Promoter Group hold 74.40% of the issued and outstanding paid-up share capital of our Company. As a result, they will have the ability to influence matters requiring shareholders' approval, including the ability to appoint Directors to our Board and the right to approve significant actions at Board and at shareholders' meetings, including the issue of Equity Shares and dividend payments, business plans, mergers and acquisitions, any consolidation or joint venture arrangements, any amendment to our Memorandum of Association and Articles of

Association, and any other business decisions. We cannot assure you that our Promoters and Promoter Group will not have conflicts of interest with other shareholders or with our Company. Any such conflict may adversely affect our ability to execute our business strategy or to operate our business. For further details regarding our shareholding, please refer to chapter titled “*Capital Structure*” beginning on Page 69 of this Red Herring Prospectus.

43. *Our inability to effectively implement our business and growth strategy may have an adverse effect on our operation and growth.*

The success of our business will largely depend on our ability to effectively implement our business and growth strategy. In the past we have generally been successful in execution of our business but there can be no assurance that we will be able to execute our strategy on time and within the estimated budget in the future. If we are unable to implement our business and growth strategy, this may have an adverse effect on our business, financial condition and results of operations.

EXTERNAL RISK FACTORS

45. *Our business and operations are located in India and as such, we are subject to regulatory, economic, social and political uncertainties in India, many of which are beyond our control.*

The Indian economy and capital markets are influenced by economic, political and market conditions in India and globally. We are incorporated in India, and almost all of our business and all of our personnel are located in India. Consequently, our business, cash flows and results of operations will be affected by a number of macroeconomic and demographic factors in India which are beyond our control. In particular, our total income and profitability are strongly correlated to consumer discretionary spending in India, which is influenced by general economic conditions, salaries and employment levels and consumer confidence. Recessionary economic cycles, a protracted economic slowdown, a worsening economy, increased unemployment, increased energy prices, rising interest rates or other industry-wide cost pressures could lead to a decline in our total income and profitability.

While our results may not necessarily track India’s economic growth figures, the Indian economy’s performance affects the environment in which we operate. These factors could have an adverse effect on our business, financial condition, cash flows and results of operations.

Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely affect our business, results of operations, cash flows and financial condition and the price of the Equity Shares.

46. *Changing laws, rules and regulations and legal uncertainties, including any adverse application of corporate and tax laws, may adversely affect our business, cash flows, prospects and results of operations.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, cash flows, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

For instance, GoI has notified the Finance Act, 2021 (“Finance Act”), which introduced various amendments to the taxation laws in India. Under the Finance Act, in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures, on a delivery basis is specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount.

Further, the GoI has announced the Union Budget for the Financial Year 2023 pursuant to which the Finance Act of 2022 has introduced various amendments. Unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules

and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. Further, the GoI introduced new laws relating to social security, occupational safety, industrial relations and wages namely, the Code on Social Security, 2020 (“Social Security Code”), the Occupational Safety, Health and Working Conditions Code, 2020, the Industrial Relations Code, 2020 and the Code on Wages, 2019, which consolidate, subsume and replace numerous existing central labor legislations, were to take effect from April 1, 2021 (collectively, the “Labour Codes”). The GoI has deferred the effective date of implementation of the respective Labour Codes, and they shall come into force from such dates as may be notified. Different dates may also be appointed for the coming into force of different provisions of the Labour Codes. While the rules for implementation under these codes have not been finalized, as an immediate consequence, the coming into force of these codes could increase the financial burden on our Company, which may adversely impact our profitability. For instance, under the Social Security Code, a new concept of deemed remuneration has been introduced, such that where an employee receives more than half (or such other percentage as may be notified by the Central Government) of their total remuneration in the form of allowances and other amounts that are not included within the definition of wages under the Social Security Code, the excess amount received shall be deemed as remuneration and accordingly be added to wages for the purposes of the Social Security Code and the compulsory contribution to be made towards the employees’ provident fund.

Additionally, the Ministry of Electronics and Information Technology has brought about a ‘new regime’ on data protection in India by notifying Digital Personal Data Protection Act, 2023 (“DPDP Act”) on August 11, 2023. The DPDP Act, amongst other obligations, prescribes format for obtaining consent and giving notice for processing of personal data, along with certain legitimate uses for which personal data can be processed. The notification for its implementation is awaited and its rules are yet to be notified.

Unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, cash flows, results of operations and prospects. Uncertainty in the application, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our businesses in the future.

47. *A downgrade in ratings of India, may affect the trading price of the Equity Shares.*

India’s sovereign debt rating could be downgraded due to several factors, including changes in tax or fiscal policy or a decline in India’s foreign exchange reserves, all which are outside the control of our Company. Our borrowing costs and our access to the debt capital markets depend significantly on the sovereign credit ratings of India. Any adverse revisions to India’s credit ratings for domestic and overseas debt by international rating agencies may adversely impact our ability to raise additional external financing, and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of the Equity Shares.

48. *In the past, there have been changes in Indian law related to foreign investments in India. Any such changes or restrictions on foreign investors may adversely affect the trading price of Equity Shares.*

Foreign investment in Indian securities is subject to regulation by Indian regulatory authorities including FEMA. Under foreign exchange regulations which are currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to compliance with sectoral norms and certain other restrictions) provided they comply with the pricing guidelines and reporting requirements specified under applicable law. Further, unless specifically restricted, foreign investment is freely permitted in majority of the sectors up to any extent and without any prior approval of Government of India, but the foreign investor is required to follow certain prescribed procedures for making such investment. Under the Consolidated FDI Policy, 100% foreign direct investment is permitted in a company engaged in manufacturing, under the automatic route, subject to certain conditions specified thereunder.

Further, in accordance with the provisions of the FEMA and the Foreign Exchange Management (Non-debt Instruments) Rules, 2019 as amended from time to time, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares a land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government of India. We cannot assure investors from such jurisdictions that any required approval from the RBI or any other governmental agency can be obtained on any particular terms and conditions or at all. For further information, see “Restrictions on Foreign Ownership of Indian Securities” on page 270. Our ability to raise any foreign capital under the FDI route is therefore constrained by Indian law, which may adversely affect our business, cash flows and financial condition.

49. *Financial instability in other countries may cause increased volatility in Indian financial markets.*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Financial turmoil in Asia, Russia and elsewhere in the world in recent years has adversely affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us.

Furthermore, economic developments globally can have a significant impact on India. In particular, the global economy has been negatively impacted by the conflict between Russia and Ukraine. Governments in the United States, United Kingdom, and European Union have imposed sanctions on certain products, industry sectors, and parties in Russia. The conflict could negatively impact regional and global financial markets and economic conditions, and result in global economic uncertainty and increased costs of various commodities, raw materials, energy and transportation.

In addition, recent increases in inflation and interest rates globally, including in India, could adversely affect the Indian economy. In addition, China is one of India's major trading partners and there are rising concerns of a possible slowdown in the Chinese economy as well as a strained relationship with India, which could have an adverse impact on the trade relations between the two countries. These factors may also result in a slowdown in India's export growth. Any significant financial disruption could have an adverse effect on our business, financial condition, cash flows and results of operation.

50. *If inflation rises in India, increased costs may result in a decline in profits and result of operations may be adversely affected.*

Inflation rates in India have been volatile in recent years, and such volatility may continue. Increasing inflation in India could cause a rise in the costs of third party suppliers and contract manufacturers, rents, wages, raw materials and other expenses. In recent years, India has experienced consistently high inflation, especially and increasingly so in recent months, which has increased the price of, among other things, our rent, raw materials and wages. Further, while the Government of India has previously initiated economic measures to combat high inflation rates, it is unclear whether these measures will remain in effect, and there can be no assurance that Indian inflation levels will not worsen and rise in the future. If we are unable to increase our revenues sufficiently to offset our increased costs due to inflation, it could have an adverse effect on our business, prospects, financial condition, results of operations and cash flows.

51. *The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.*

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined through a book-building process and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in the securities markets in India and other jurisdictions, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

52. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of BSE Limited in a timely manner, or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE Limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

53. *Investors may be subject to Indian taxes arising out of income arising on the sale of and dividend on the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares held as investments in an Indian company are generally taxable in India. Any capital gain realized on the sale of listed equity shares on a Stock Exchange held for more than 12 months immediately preceding the date of transfer will be subject to long term capital gains in India at the specified rates depending on certain factors, such as whether the sale is undertaken on or off the Stock Exchanges, the quantum of gains and any available treaty relief. Accordingly, you may be subject to payment of long term capital gains tax in India, in addition to payment of Securities Transaction Tax ("STT"), on the sale of any Equity Shares held for more than 12 months immediately preceding the date of transfer. STT will be levied on and collected by a domestic

stock exchange on which the Equity Shares are sold.

Further, any capital gains realized on the sale of listed equity shares held for a period of 12 months or less immediately preceding the date of transfer will be subject to short term capital gains tax in India. Further, withholding tax may be applicable on sale of shares by Non- Resident / FII under section 115E and 115AD of the Income Tax Act, 1961.

No dividend distribution tax is required to be paid in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020 and, accordingly, such dividends would not be exempt in the hands of the Shareholders both for residents as well as non-residents. Our Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident Shareholder for the purposes of deducting tax at source pursuant to any corporate action, including dividends.

There is no certainty on the impact of Indian tax laws or other regulations, and which may adversely affect the Company's business, financial condition, results of operations or on the industry in which we operate. Investors are advised to consult their own tax advisors and to carefully consider the potential tax consequences of owning Equity Shares.

54. QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Application (in terms of quantity of Equity Shares or the Application Amount) at any stage after submitting the Application, and Individual Investors are not permitted to withdraw their Application after Issue Closing Date.

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are required to pay the Application Amount on submission of the Application and are not permitted to withdraw or lower their Application (in terms of quantity of Equity Shares or the Application Amount) at any stage after submitting a Application. Individual Investors can revise their Application during the Issue Period and withdraw their Application until the Issue Closing Date. While we are required to complete all necessary formalities for listing and commencement of trading of the Equity Shares on all Stock Exchanges where such Equity Shares are proposed to be listed including Allotment pursuant to the Issue within three Working Days from the Issue Closing Date, events affecting the Investors' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation or financial condition may arise between the date of submission of the Application and Allotment. We may complete the Allotment of the Equity Shares even if such events occur, and such events may limit the Investors' ability to sell the Equity Shares allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline upon listing. QIBs and Non-Institutional Applicants will therefore not be able to withdraw following adverse developments in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows or otherwise, between the dates of submission of their Application Form and Allotment.

55. The Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Issue.

The Issue Price of the Equity Shares is proposed to be determined by us in consultation with the BRLM, through a book-building process. This price is based on numerous factors, as described under "Basis for Issue Price" on page 96, and may not be indicative of prices that will prevail in the open market following the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. In addition, the stock market often experiences price and volume fluctuations that are unrelated or disproportionate to the operating performance of a particular company. These broad market fluctuations and industry factors may materially reduce the market price of the Equity Shares, regardless of our Company's performance. As a result of these factors, we cannot assure you that investors will be able to resell their Equity Shares at or above the Issue Price.

56. Investors may have difficulty enforcing foreign judgments against us or our management.

The Company is a limited liability company incorporated under the laws of India. The majority of our directors and executive officers are residents of India. All of our assets and the assets of our Directors are located in India. As a result, it may be difficult for foreign investors to effect service of process upon us or directors to enforce judgments obtained outside India.

Recognition and enforcement of foreign judgments is provided for under Section 13 of the Code of Civil Procedure, 1908 ("CPC"), on a statutory basis. Section 13 of the CPC provides that foreign judgments shall be conclusive regarding any matter directly adjudicated upon, except: (i) where the judgment has not been pronounced by a court of competent jurisdiction; (ii) where the judgment has not been given on the merits of the case; (iii) where it appears on the face of the proceedings that the judgment is founded on an incorrect view of international law or a refusal to recognize the law of India in cases to which such law is applicable; (iv) where the proceedings in which the judgment was obtained were opposed to natural justice; (v) where the judgment has been obtained by fraud; and (vi) where the judgment sustains a claim founded on a breach of any law then in force in India. Under the CPC, a court in India shall, upon the production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction, unless the contrary appears on record. However, under the CPC, such presumption may be displaced by proving that the court did not have jurisdiction.

India is not a party to any international treaty in relation to the recognition or enforcement of foreign judgments. Section 44A of the CPC provides that where a foreign judgment has been rendered by a superior court, within the meaning of that Section, in any country or territory outside of India which the GoI has by notification declared to be in a reciprocating territory, it may be enforced in India by proceedings in execution as if the judgment had been rendered by the relevant court in India.

However, Section 44A of the CPC is applicable only to monetary decrees not being of the same nature as amounts payable in respect of taxes, other charges of a like nature or of a fine or other penalties. Some jurisdictions including the United Kingdom, United Arab Emirates, Singapore and Hong Kong have been declared by the GoI to be reciprocating countries for the purposes of Section 44A of the CPC. However, the party in whose favor such final judgment is rendered may bring a new suit in a competent court in India based on a final judgment that has been obtained in the United States. The suit must be brought in India within three years from the date of the judgment in the same manner as any other suit filed to enforce a civil liability in India.

Further, there may be considerable delays in the disposal of suits by Indian courts. It is unlikely that a court in India would award damages on the same basis as a foreign court if an action were brought in India. Furthermore, it is unlikely that an Indian court would enforce a foreign judgment if that court were of the view that the amount of damages awarded was excessive or inconsistent with public policy or Indian law. It is uncertain as to whether an Indian court would enforce foreign judgments that would contravene or violate Indian law. However, a party seeking to enforce a foreign judgment in India is required to obtain approval from the RBI under the FEMA to execute such a judgment or to repatriate any amount recovered.

57. Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.

Under the Companies Act, a company having share capital and incorporated in India must offer holders of its Equity Shares pre-emptive rights to subscribe and pay for a proportionate number of Equity Shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the Equity Shares who have voted on such resolution. However, if the laws of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, you may suffer future dilution of your ownership position and your proportional interests in us would be reduced.

58. Any future issuance of Equity Shares or convertible securities or other equity linked securities by us may dilute your shareholding and sales of the Equity Shares by our major shareholders may adversely affect the trading price of the Equity Shares.

We may be required to finance our growth through future equity offerings. Any future issuance of our Equity Shares, convertible securities or securities linked to our Equity Shares by us, including through exercise of employee stock options may dilute your shareholding in us. Any future equity issuances by us, including a primary offering, may lead to the dilution of investors' shareholdings in us. Any disposal of Equity Shares by our major shareholders or the perception that such issuance or sales may occur, including to comply with the minimum public shareholding norms applicable to listed companies in India may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences including difficulty in raising capital through offering of the Equity Shares or incurring additional debt. We cannot assure you that we will not issue further Equity Shares or that the shareholders will not dispose of, pledge or encumber the Equity Shares in the future. Any future issuances could also dilute the value of your investment in the Equity Shares.

In addition, any perception by investors that such issuances or sales might occur may also affect the market price of the Equity Shares.

59. A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of the Company, even if a change in control would result in the purchase of your Equity Shares at a premium to the market price or would otherwise be beneficial to you. Such provisions may discourage or prevent certain types of transactions involving actual or threatened change in control of our Company. Under the Takeover Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of the SEBI SAST Regulations.

60. *Rights of shareholders of companies under Indian law may be more limited than under the laws of other jurisdictions.*

Our Articles of Association, composition of our Board, Indian laws governing our corporate affairs, the validity of corporate procedures, directors' fiduciary duties, responsibilities and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive and widespread as shareholders' rights under the laws of other countries or jurisdictions. Investors may face challenges in asserting their rights as shareholder in an Indian company than as shareholders of an entity in another jurisdiction.

61. *Pursuant to listing of the Equity Shares, we may be subject to pre-emptive surveillance measures like Additional Surveillance Measure ("ASM") and Graded Surveillance Measures ("GSM") by the Stock Exchanges in order to enhance market integrity and safeguard the interest of investors.*

SEBI and the Stock Exchanges, in the past, have introduced various pre-emptive surveillance measures with respect to the shares of listed companies in India (the "Listed Securities") in order to enhance market integrity, safeguard the interests of investors and potential market abuses. In addition to various surveillance measures already implemented, and in order to further safeguard the interest of investors, the SEBI and the Stock Exchanges have introduced additional surveillance measures ("ASM") and graded surveillance measures ("GSM").

ASM is conducted by the Stock Exchanges on Listed Securities with surveillance concerns based on certain objective parameters such as share price, price-to-earnings ratio, percentage of delivery, client concentration, variation in volume of shares and volatility of shares, among other things. GSM is conducted by the Stock Exchanges on Listed Securities where their price quoted on the Stock Exchanges is not commensurate with, among other things, the financial performance and financial condition measures such as earnings, book value, fixed assets, net-worth, other measures such as price-to-earnings multiple and market capitalization and overall financial position of the concerned listed company, the Listed Securities of which are subject to GSM.

For further details in relation to the ASM and GSM Surveillance Measures, including criteria for shortlisting and review of Listed Securities, exemptions from shortlisting and frequently asked questions (FAQs), among other details, refer to the websites of the NSE and the BSE.

Upon listing, the trading of our Equity Shares would be subject to differing market conditions as well as other factors which may result in high volatility in price, and low trading volumes as a percentage of combined trading volume of our Equity Shares. The occurrence of any of the abovementioned factors or other circumstances may trigger any of the parameters prescribed by SEBI and the Stock Exchanges for placing our securities under the GSM and / or ASM framework or any other surveillance measures, which could result in significant restrictions on trading of our Equity Shares being imposed by SEBI and the Stock Exchanges. These restrictions may include requiring higher margin requirements, requirement of settlement on a trade for trade basis without netting off, limiting trading frequency, reduction of applicable price band, requirement of settlement on gross basis or freezing of price on upper side of trading, as well as mentioning of our Equity Shares on the surveillance dashboards of the Stock Exchanges. The imposition of these restrictions and curbs on trading may have an adverse effect on market price, trading and liquidity of our Equity Shares and on the reputation and conditions of our Company. Any such instance may result in a loss of our reputation and diversion of our management's attention and may also decrease the market price of our Equity Shares which could cause you to lose some or all of your investment.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Company in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

Justification for “Holding Period” levels

The justifications for the holding levels mentioned in the table above are provided below:

S. No.	Particulars	Details
1.	Inventories	The nature of manufacturing railway rolling stock, passenger coaches, wagons, and locomotives inherently involves high lead time and significant inventory holding due to custom fabrication, batch processing, and complex assembly. The inventory days stood at 265 in Fiscal 2023 primarily due to buildup for projected deliveries and longer production cycles amid supply chain constraints. Subsequently, in Fiscal 2024, inventory days declined to 237, with further normalization to 158 to 156 days in Fiscal 2025 and Fiscal 2026(estimated) . This decreasing trend is expected in coming years due to streamlined procurement, leaner production, and improved material planning aligned with contract execution cycles. Considering the technical complexity and dependence on customized components, a holding level of 150–170 days is reasonable for such a sector. Moreover, the relatively higher inventory days historically were driven by the company’s strategy to maintain buffer stock for uninterrupted assembly lines and to accommodate long supplier lead times. Going forward, inventory days are estimated to stabilize as operations scale and procurement systems mature. The levels are consistent with industry norms for capital-intensive, long-cycle manufacturing sectors with integrated fabrication and assembly operations.
2.	Trade receivables	Trade receivable days are typically elevated in large-scale, government and PSU-oriented industrial manufacturing businesses due to the milestone-based billing and clearance cycles. The company’s trade receivable days ranged from 200 to 230 in between Fiscal 2023 to Fiscal 2025, is due to the extended credit terms common in the rolling stock and railways sector. Payments are often tied to physical inspection, certification, and departmental clearances, especially when dealing with government undertakings. Although receivable days stood at 200 to 230 in prior years, a gradual improvement is expected with receivable days at 195 in Fiscal 2026. For companies engaged in manufacturing high-value capital goods like rail coaches and locomotives, a receivable cycle of 180 to 220 days remains standard due to the nature of buyer organizations (typically PSUs or government bodies) and large-ticket sales. The projected receivable days are reflective of realistic expectations for credit periods extended in B2G (business-to-government) environments and support the company’s conservative yet practical financial planning.
3.	Trade payables	Trade payable days stood at 260 days in Fiscal 2023 and increased to 281 days in Fiscal 2024, Such increase is largely due to the complex procurement process. In several cases,

S. No.	Particulars	Details
		particularly for government orders or projects, materials procured by suppliers must undergo inspection and meet stringent quality standards. When received materials do not meet the required specifications, invoices are held back until necessary compliance is achieved. This practice is well understood and mutually agreed upon with the suppliers. The payables period realigned is estimated to remain in the range of 140 –150 days during Fiscal 2026. Ensuring timely supplier payments to maintain quality and delivery timelines while also managing liquidity prudently. Given the company's integrated manufacturing model and complex vendor base, maintaining payables at 160 to 170 days approx. is considered industry-appropriate. The reduction in payable days proposed with improving cash flows and the company's preparation for expanded operations and compliance with vendor expectations.

Justification for increase in amount of Utilisation of Working Capital from IPO Proceeds

The Company's Utilisation of fund for working capital has been revised from ₹5,246.18 lakhs in the DRHP to ₹5,927.02 lakhs in the RHP, i.e. increase of ₹680.84 lakhs (12.98%). This change has arisen due to reassessment of business projections and operational needs closer to the filing of the RHP. A key reason for the increase is the growth in the Company's order book, which has moved from ₹30,635.67 lakhs as disclosed in the DRHP to ₹37,588.65 lakhs in the RHP. The larger order pipeline requires higher allocation of funds for procurement of raw materials, execution of contracts, and maintaining adequate liquidity across the operating cycle. Further, the Company expects that internal accruals may not be sufficient to fully meet this enhanced requirement and, therefore, a higher portion of IPO proceeds has been allocated towards meeting the working capital needs.

4. General corporate purposes:

The Net Proceeds will be first utilized towards the Objects as mentioned above. The balance is proposed to be utilized for General corporate purposes, subject to such utilization not exceeding 15% of the gross proceeds of the Fresh Issue or 10 crore whichever is lower, in accordance with the SEBI ICDR Regulations. Our Company intends to deploy the balance Net Proceeds, if any, for general corporate purposes, subject to above mentioned limit, as may be approved by our management, including but not restricted to, the following:

- strategic initiatives, partnerships, joint ventures and acquisitions;
- brand building and strengthening of promotional & marketing activities;
- On-going general corporate exigencies or any other purposes as approved by the Board subject to compliance with the necessary regulatory provisions and

The quantum of utilization of funds towards each of the above purposes will be determined by our Board of Directors based on the permissible amount actually available under the head "Utilization of Net proceeds" and the business requirements of our Company, from time to time. We, in accordance with the policies of our Board, will have flexibility in utilizing the Net Proceeds for general corporate purposes, as mentioned above.

Global Economy

Macroeconomic Environment

The global GDP is estimated to grow from USD 110.5 trillion in 2024 to USD 137.8 trillion in 2029. Notably, there is a forecasted global GDP growth rate of 4.5% from 2024 to 2029 due to factors such as easing inflationary pressures and less restrictive monetary policies, and an increase in household income, private consumption and private investments. The global economy continues to display clear signs of resilience with moderate GDP growth despite persistent inflation, trade tensions and geopolitical uncertainties.

Growth in the euro area is expected to decline slightly to 0.8 percent in 2025, before picking up modestly to 1.2 percent in 2026. Rising uncertainty and tariffs are key drivers of the subdued growth in 2025. Offsetting forces that support the modest pickup in 2026 include stronger consumption on the back of rising real wages and a projected fiscal easing in Germany following major changes to its fiscal rule (the “debt brake”). Within the region, Spain’s momentum contrasts with the sluggish dynamics elsewhere. The growth projection for 2025 for Spain is 2.5 percent, an upward revision of 0.2 percentage point from that in the January 2025 WEO Update. This reflects a large carryover from better-than-expected outturns in 2024 and reconstruction activity following floods.

The Middle East and Central Asia is projected to come out of several years of subdued growth, with the rate accelerating from an estimated 2.4 percent in 2024 to 3.0 percent in 2025 and to 3.5 percent in 2026 as the effects of disruptions to oil production and shipping dissipate and the impact of ongoing conflicts lessens. Compared with that in January, the projection is revised downward, reflecting a more gradual resumption of oil production, persistent spillovers from conflicts, and slower than-expected progress on structural reforms.

WORLD ECONOMIC OUTLOOK

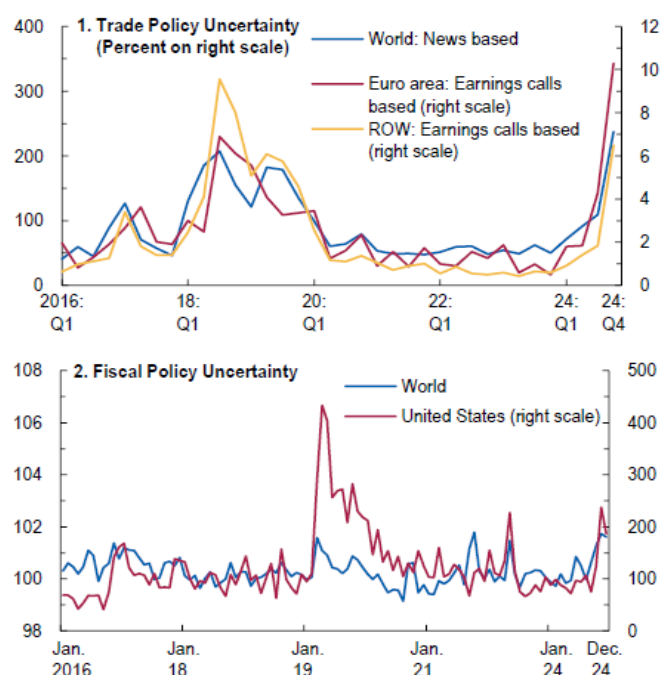

Where inflation is proving more sticky, central banks are moving more cautiously in the easing cycle while keeping a close eye on activity and labour market indicators as well as exchange rate movements. A few central banks are raising rates, marking a point of divergence in monetary policy.

Global financial conditions remain largely accommodative, again with some differentiation across jurisdictions.

Equities in advanced economies have rallied on expectations of more business-friendly policies in the United States. In emerging market and developing economies, equity valuations have been more subdued, and a broad-based strengthening of the US dollar, driven primarily by expectations of new tariffs and higher interest rates in the United States, has kept financial conditions tighter.

Economic policy uncertainty has increased sharply, especially on the trade and fiscal fronts, with some differentiation across countries. Expectations of policy shifts under newly elected governments in 2024 have shaped financial market pricing in recent months. Bouts of political instability in some Asian and European countries have rattled markets and injected additional uncertainty regarding stalled progress on fiscal and structural policies. Geopolitical tensions, including those in the Middle East, and global trade frictions remain elevated.

In the Middle East and Central Asia, growth is projected to pick up, but less than expected in October. This mainly reflects a 1.3%-point downward revision to 2025 growth in Saudi Arabia, mostly driven by the extension of OPEC+ production cuts. In Latin America and Caribbean, overall growth is projected to accelerate slightly in 2025 to 2.5%, despite an expected slowdown in the largest economies of the region. Growth in sub-Saharan Africa is expected to pick up in 2025, while it is forecast to slow down in emerging and developing Europe.

INDIAN ECONOMY

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP for FY25 is estimated at Rs. 33.10 lakh crore (US\$ 3.8 trillion) with growth rate of 9.9%, compared to Rs. 30.12 lakh crore (US\$ 3.5 trillion) in FY24. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the second half of FY25. In FY25, India's exports stood at Rs. 37.31 lakh crore (US\$ 433.56 billion), with Engineering Goods (26.88%), Petroleum Products (13.86%) and electronic goods (8.89%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

**India's Gross Domestic Production
(in Us billion)**

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs from 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time periods. The Current Account Deficit (CAD) stood at Rs. 98,095 crore (US\$ 11.5 billion) for Q3 of FY25 as compared to Rs. 88,712 crore (US\$ 10.4 billion) in Q3 of FY24. This was largely due to increase in merchandise trade deficit.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

With the announcement of the implementation of the recommendations of the Eighth Pay Commission, which will be in effect from FY27, there is a possibility that the momentum towards achieving fiscal consolidation targets may be delayed. The fiscal deficit and debt targets, as per the GOI's 2018 amended FRBMA, are 3% and 40% of GDP, respectively. However, achievement of both of these targets is likely to be delayed because of the additional pressure on revenue expenditures due to revised salaries and pensions of government employees. A similar impact would also be felt by the states.

In FY26, the main fiscal policy intervention required would be an attempt to restore infrastructure expansion momentum to support real GDP growth. There would be some positive movement on fiscal consolidation both in FY25 and FY26. Some other changes in

FISCAL DEFICIT IN RELATION TO GDP(%)

the FY26 budget may relate to the revision of import tariffs and some rationalization of personal income tax rate and its deduction structure.

In the medium-term, in view of the impact of Eighth Pay Commission recommendations, the path of fiscal consolidation would lose momentum. We consider that, in the medium-term, real GDP growth can still be maintained at 6.5% and nominal GDP growth at 10.5% with some inter-year variations. A combination of slower nominal GDP growth in FY24 and FY25 and pressure on the INR may push the US\$5 trillion Indian economy milestone from FY28 to FY30. To address this, nominal GDP growth must recover to at least 10.5% beyond FY25, and INR depreciation against the US\$ must be moderated.

Trend in Capital Expenditure

Capital expenditure is the money spent by the government on the development of machinery, equipment, building, health facilities, education, etc. It also includes the expenditure incurred on acquiring fixed assets like land and investment by the government that gives profits or dividend in future.

Capital expenditure, which leads to the creation of assets are long-term in nature and allow the economy to generate revenue for many years by adding or improving production facilities and boosting operational efficiency. It also increases labour participation, takes stock of the economy and raises its capacity to produce more in future.

Foreign Exchange Reserves

India's total foreign exchange reserves stood at USD 688.13 billion as on April 25, 2025, reflecting a stable and healthy external sector position. The reserves almost rose by \$11.83 billion in a month. As of April 4, 2025, India's foreign exchange reserves stood at \$676.3 billion, per the PIB press release.

As of April 25, 2025, India's forex reserves of USD 688.13 billion reflect sound macroeconomic fundamentals and robust reserve management on the part of the RBI. The position of having such elevated reserves indicates the health of India's external sector, reflected in the presence of a controllable current account register, capital inflows that are unaffected and a recovering export performance. It is also a sign of India's greater monetary resilience, that is, a substantial buffer for the central bank to use for interventions in the currency market, if necessary. This serves to stabilize the rupee under conditions of global volatility.

A strong forex reserve position provides better trade resilience as forex reserves stand above 10 months of imports and help to protect against external shocks. "It attracts foreign investment as it lends confidence and is a hedge against sovereign risk premiums. It supports inflation management as the Reserve Bank of India can intervene in the forex market to limit imported inflation, especially from spikes in oil prices as well as commodity prices.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4 % in BE 2023-24 to Rs.10 lakh crore (US\$ 120.12 billion) over Rs. 7.28 lakh crore (US\$ 87.45 billion) in RE 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels. In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

Indian Railway Industry

Overview

The Indian railway system is regarded as the foundation and lifeblood of the economy. Indian railways span thousands of kilometres practically covering the entire nation, making it the fourth largest in the world after the US, China, and Russia. The Railways Board, which has a monopoly over the provision of rail services in India, oversees overseeing the whole infrastructure. Due to its low cost and effective operations, railways continue to be the most popular means of transportation for most Indians when travelling long distances. India's railway network is recognised as one of the largest railway systems in the world under single management. The railway network is also ideal for long-distance travel and movement of bulk commodities, apart from being an energy-efficient and economic mode of conveyance and transport. Indian Railways is the preferred carrier of automobiles in the country.

The government of India has focused on investing in railway infrastructure by making investor-friendly policies. It has moved quickly to enable Foreign Direct Investment (FDI) in railways to improve infrastructure for freight and high-speed trains. At present, several domestic and foreign companies are also looking to invest in Indian rail projects. Indian railways launched Semi-high-speed self-propelled trains that have ultra-modern features like quick acceleration, a substantial reduction in travel time, a maximum speed of 160 kmph, on-board infotainment and GPS-based passenger information system, automatic sliding doors, retractable footsteps and Zero discharge vacuum bio-toilets, CCTV cameras etc. and other contemporary features as per global standards. According to Indian Railways 2023 book, Indian railways plan to market semi-high-speed 'Vande Bharat' trains by 2025-26 to European, South American, and East Asian markets for exporting 'Made in India' trains.

1. World's 4th largest rail network

Indian Railways runs 13,523 passenger trains and 9,146 freight trains daily on its network with passenger trains running at an average speed of 50.6 kmph and freight trains at 24 kmph.

2. Growing Public-Private Partnership (PPP)

Indian Railways is exploring a new public-private partnership (PPP) model to attract private investment to re-develop railway stations. Under this model, investors would receive up to 40% of the total project cost as viability-gap funding (VGF) and be allowed to use the space above platforms and tracks commercially.

Under the hybrid PPP model, bids will be chosen based on the quantum of VGF support required by the private investor. The private developer will be allowed to develop air space to generate additional revenue through commercial activities, including the lease of office space, development of entertainment and recreational facilities, hospitality services, malls and even healthcare facilities.

3. Growth Initiatives

Under the Interim Budget 2024-25, the government allocated US\$ 30.3 billion (Rs. 2.52 lakh crore) to the Ministry of Railways. In 2024-25 Indian railways is planning to Create three important railway routes for moving energy, minerals, and cement efficiently; connecting ports better; and improving busy traffic routes.

The Bairabi-Sairang project aims to create an additional 51.38 km of railway track in northeast India. ▪ Indian Railways launched a new tourism product i.e. theme-based tourist circuit train – ‘Bharat Gaurav’ to showcase India’s rich cultural heritage and magnificent historical places. In March 2024, Prime Minister Mr. Narendra Modi inaugurated infrastructure projects worth Rs. 15,400 crore (US\$ 1.84 billion) in Kolkata, including India’s first underwater metro system, to improve connectivity in West Bengal.

4. Modernisation/Technology Upgradation

Prime Minister, Mr. Narendra Modi inaugurated a significant expansion of India's rail network by introducing 10 new Vande Bharat trains, bringing the total count to over 50 trains covering 45 routes nationwide. Ultra-modern Tejas trains have been introduced on the LHB platform with sleeper coaches over Indian Railways.

Factors affecting the growth in the Indian Railways

1. Growing Demand

The government announced 5,000 km of Metro rail network by 2047 in 100 cities. In 2024-2025, the goal is to upgrade 40,000 conventional rail bogies to meet the ‘Vande Bharat’ standards. In 2023-24, traffic revenue is estimated to be Rs. 2,64,600 crore (US\$ 32.18 billion), comprising 99.8% of the total revenue.

2. Opportunities

In FY23, One Station One Product scheme was launched to provide opportunities for enhanced livelihood through skill development through provision of sale outlets at railway stations across India. Indian Railways witnessed surge in summer travel demand by operating a record-breaking 9,111 trips during the 2024 season, a significant increase from the 6,369 trips in 2022-23, marking a 43% rise.

3. Policy support

Taking cognizance of its significance in overall infrastructural development, the NIP envisages an investment in Indian Railways worth Rs. 11.43 lakh crore (US\$ 138 billion) till 2024-25. Railway Development Authority is spreading the redevelopment of 60 railway stations across India on a PPP Model.

4. Higher investment

Foreign Direct Investment (FDI) inflows in railway-related components stood at US\$ 1.40 billion from April -December 2023. The government has laid an ambitious target to allocate US\$ 1.4 trillion between 2019 and 2023, including investment to the tune of US\$ 750 billion on the railway infrastructure by 2030.

Strong revenue growth for Indian railways

The Indian Railways completed total revenue of Rs. 2.40 lakh crore (US\$ 28.75 billion) by the end of FY24. Indian railways achieved track laying of 5100 Km in FY24.

For FY24:

- Freight revenue is estimated to be Rs. 1,79,500 crore (US\$ 21.83 billion) which is 68% of the traffic revenue.
- The passenger revenue is estimated to be Rs. 70,000 crore (US\$ 8.51 billion), an increase of 9% in 2022-23.

Vision 2024 has been envisaged to achieve targets of 2024 MT freight loading by 2024. Indian Railways has planned to install 1000 MW of solar power plants and about 200 MW of wind plants by 2022-23. Out of this, about 204.82 MW (101.42 MW solar and 103.4MW wind power) of renewable power has already been set up. Indian Railways electrified 6,577 Route Kilometres (RKMs) in CY 2023, bringing the total broad-gauge network electrification to 93.83% of the total (65,556 RKMs).

Gross Revenue Trends (US\$ billions)

Segment-wise revenue growth for Indian Railways

Passenger Earnings (in US\$ billion)

During FY23, the total passenger revenue stood at US\$ 7.64 billion, compared to US\$ 4.98 billion achieved during the same period last year. During the period April 1- January 31, 2023, the revenue generated from the reserved passenger segment stood at US\$ 5.1 billion and revenue from the unreserved passenger segment stood at US\$ 1.4 billion. On a cumulative basis from April-January 2024, railways freight earnings stood at US\$ 16.9 billion against US\$ 16.3 billion over last year, an improvement of 4% compared to last year.

Earnings from Freight (in US\$ billions)

“Hungry For Cargo”, IR has made sustained efforts to improve the ease of doing business and improve the service delivery at competitive prices, resulting in new traffic coming to railways from both conventional and non-conventional commodity streams. The customer-centric approach and work of Business Development Units backed up by agile policymaking helped Railways towards this landmark achievement.

Rising export of railway sector

Indian Railways plans to market semi-high-speed ‘Vande Bharat’ trains by 2025-26, aiming to cover 10-12 lakh kilometres on 75 trains in three years. Indian Railways will target European, South American, and East Asian markets for exporting 'Made in India' trains. India’s export of railways grew at and reached US\$ 1,249.38 million in FY22 as compared to US\$ 633.27 million in FY21.

Export of Railways (in US\$ millions)

ICF (Integrated Coach Factory) of Indian Railways has exported more than 650 rail coaches, shells, and other components manufactured in Chennai based unit during the last few years (till 2022) to 14 countries, including Thailand, Burma, Taiwan, Philippines, Tanzania, Uganda, Vietnam, Nigeria, Bangladesh, Mozambique, Malaysia, Angola and Sri Lanka. ICF has also exported one rake of 1600HP DEMU against the order of two rakes of 1600HP DEMU to neighbouring Nepal railways. 2 DEMU rakes and 160 mainline coaches are also likely to be exported by the ICF to Sri Lanka apart from manufacturing coaches for various high-speed trains on the LHB technology.

Investments/Developments

Following is some of the major investments and developments in India’s railways sector:

It features several modern amenities such as onboard Wi-Fi, GPS-based passenger information system, and CCTV cameras.
- The focus on increasing the use of technology to improve safety and efficiency. This includes the use of CCTV cameras in trains and at stations, the implementation of an Automatic Train Protection (ATP) system to prevent collisions, and the use of GPS-based systems for real-time tracking of trains.
- Indian Railways is also working on upgrading its infrastructure, with a focus on electrification of lines, the construction of new lines, and the redevelopment of existing stations. - Foreign Direct Investment (FDI) inflows in railway-related components stood at US\$ 1.40 billion from April -December 2023.
- In the case of freight earnings, it experienced a year-on-year growth of 20.84%. It stood at US\$ 18.55 billion in FY22 as compared to FY21 which was at US\$ 15.35 billion.
- Freight remains the key revenue-earning segment for Indian Railways, accounting for 75.2% of the total revenue in FY22, followed by the passenger segment.
- Indian Railways aims to achieve 100% electrification of all broad-gauge routes by 2023.
- In July 2021, the South-Central Railway zone announced infrastructure development by doubling the maximum permissible speed to 100 km per hour on the Godavari Bridge. The initiative gave a major boost to the Indian Railways on infrastructure modernisation.
- Since the launch of first 'Kisan Rail' service on August 7, 2020, the Indian Railways have operated a total of 1,040 Kisan Rail services by transporting ~3.38 lakh tonnes of consignment across 72 routes in the country until July 30, 2021.
- The Indian Railways is likely to deliver 58 supercritical as well as 68 critical projects worth more than Rs. 1,15,000 crore (US\$ 15.44 billion) in the next few years. 29 supercritical projects—spanning 1,044 km and costing Rs. 11,588 crore (US\$ 1.5 billion)—have been commissioned. Four projects worth Rs. 1,408 crore (US\$ 189.05 million) have been completed and the remaining projects are targeted for completion by March 2024.
- On July 25, 2021, the Indian Railways Station Development Corporation (IRSDC), a nodal agency of the Ministry of Railways spearheading the re-development of railway stations across the country, claimed that the two railway stations will be redeveloped at an indicative cost of Rs. 1,285 crore (US\$ 172.54 million) in four years.
- The Indian Railways has decided to undertake electrification of Broad Gauge (BG) rail lines in a mission mode and is likely to complete the process by 2023-24. Indian Railways electrified 58,812 Route Kilometres (RKMs) till March 31, 2023, which is about 90% of the total broad-gauge network (65,300 RKMs) of Indian Railways. About Rs. 21,000 crore (US\$ 2.8 billion) is estimated to be spent on electrification of the remaining BG routes.
- In January 2021, Hyundai Motor India Ltd. (HMIL) announced that it has exported 125 cars to Nepal via the Indian Railways. The export is claimed to be eco-friendly and the first-ever by the company. With this step, the company is aiming to reduce its carbon footprint by 20,260 tonnes.
- The Indian Railways completed eight major capacity enhancement projects by taking advantage of the coronavirus lockdown. These projects included three supercritical projects with a combined length of 68km, three critical projects with a combined length of 45km, upgradation of the entire 389km railway line from Jhajha in Bihar to Pandit Deen Dayal Upadhyaya Junction in Uttar Pradesh and a new 82km port connectivity line to Paradip.
- As a part of the Railways' plans to upgrade its network, the Ministry announced that all non-AC sleeper coaches will be replaced by AC coaches for trains running >130 kmph. This move has been taken as a technical necessity for high-speed trains with the bonus of improving the passenger experience.

Road Ahead

Indian Railway network is growing at a healthy rate. In the next five years, the Indian railway market is expected to be the third largest, accounting for 10% of the global market. The government has announced two key initiatives for seeking private investments—running passenger trains by private operators across the railways network and redevelopment of railway stations across the country. According to Indian Railways, these projects have the potential of bringing an investment of over US\$ 7.5 billion in the next five years. Introducing 3,000 new trains over the next four to five years to increase the current passenger capacity of the railways from 800 crore to 1,000 crore, with a focus on meeting the needs of the expanding population.

‘Adarsh’ Station Scheme has been started in 2009-10 and presently, railway stations are upgraded/modernised based on identified need of providing better-enhanced passenger amenities at stations. Under the scheme, 1253 stations have been identified for development, out of which 1215 stations so far have been developed. Indian Railways is also looking at other areas of revenue generation such as the following: a) Change in composition of coaches so that it can push the more profitable AC coach travel; b) Additional revenue streams by monetising traffic on its digital booking IRCTC; and c) Disinvesting IRCTC. The Indian Railway launched the National Rail Plan, Vision 2024, to accelerate implementation of critical projects, such as multitrack congested routes, achieve 100% electrification, upgrade the speed to 160 kmph on Delhi-Howrah and Delhi-Mumbai routes, upgrade the speed to 130 kmph on all other golden quadrilateral-golden diagonal (GQ/GD) routes and eliminate all level crossings on the GQ/GD route, by 2024.

Overview

We are engaged in the manufacturing of components which are used in the rolling stock for the Indian Railways through railway production units like Integral Coach Factory (“ICF”), other coach factories. In addition to manufacturing the rolling stock components, we carry out turnkey interior furnishing projects for Indian Railways. In the aerospace and defence sectors, we manufacture intricate, highly engineered, and vital components. Along with Indian Railways through ICF and other coach factories, we also serve other Rails factories, and global rolling stock OEMs.

Core Business offerings

We have manufactured rolling stock components and implemented turnkey interior furnishing projects for Sri Lankan DEMU and Mainline Export Coaches, Agra-Kanpur Metro Coach, RRTS Coach, Vistadome Coach and Train-18 Vande Bharat Express.

Our Company has been in operation for over 20 years, and we have extensive expertise as a reliable supplier of high-precision forged and machined components for the rolling stock, aerospace, and defence industries, as well as undertaking turnkey interior furnishing projects in railways.

The Company has demonstrated consistent financial performance over the last three financial years, reflecting operational stability and growth. For the Financial Year 2025, the Company reported a consolidated revenue from operations of ₹ 19,238.70 lakhs and total income of ₹19,266.26 lakhs, indicating a significant growth trajectory compared to ₹11,930.36 lakhs in revenue and income, respectively, in FY 2023-24. The Company recorded an EBITDA of ₹4,740.84 lakhs in FY 2024-25, with an EBITDA margin of 24.61%, compared to ₹3,457.92 lakhs and an EBITDA margin of 28.14% in FY 2023-24. The restated profit after tax stood at ₹2,554.76 lakhs in FY 2024-25, representing a PAT margin of 13.28%.

Our Business Operations

The process and step involved in our business operations are as follows: -

1. Work Order

This is the initial step where our Company receives a formal request for products or components required for railway systems such as rolling stock and other related components and equipment. The work order outlines the specifications, quantities, and delivery timelines.

2. Create BOM (Bill of Materials)

Once the work order is in place, a Bill of Materials is created. This document lists all materials, components, and assemblies required to manufacture the product. It serves as a comprehensive guide for procurement and production teams to ensure all necessary items are sourced and available.

3. Material Requirement and Planning

In this phase, our Company assesses the materials needed based on the BOM. The procurement team plans and arranges for the purchase of raw materials, considering lead times, availability, and cost efficiency, ensuring a steady supply for production without excess inventory.

4. Production Planning as per DP (Demand Planning)

Based on demand forecasts, the production team schedules manufacturing activities to align with expected delivery dates. This ensures efficient use of resources, minimizing idle time, and aligning production with customer needs.

5. Production and Control

Here, the actual manufacturing process begins. Production control is implemented to monitor each step, ensuring adherence to quality standards and timelines. This stage involves managing workflow, resource allocation, and supervision to deliver products that meet stringent railway industry standards.

6. Performance and Cost Analysis

After production, our team analyses the performance of the production process. This includes comparing planned vs actual metrics, such as production time, resource utilization, and costs incurred. By identifying inefficiencies and variances, the company gains insights to improve processes and optimize future operations, ensuring cost-effectiveness and operational excellence.

7. Update UR/GL (User Requirements/General Ledger)

Once the production phase is completed, updates are made to the User Requirements (UR) and General Ledger (GL) systems. This step ensures that inventory, financials, and other operational data are accurately recorded. It provides the company with real-time insights for decision-making and ensures compliance with accounting and reporting standards.

8. Billing and Invoice

Following production, the billing and invoicing process is initiated. Accurate invoices are generated based on the completed work or delivered products. This ensures timely payment collection, maintains healthy cash flow, and strengthens customer relationships by providing clear and transparent financial documentation.

9. Package and Ship

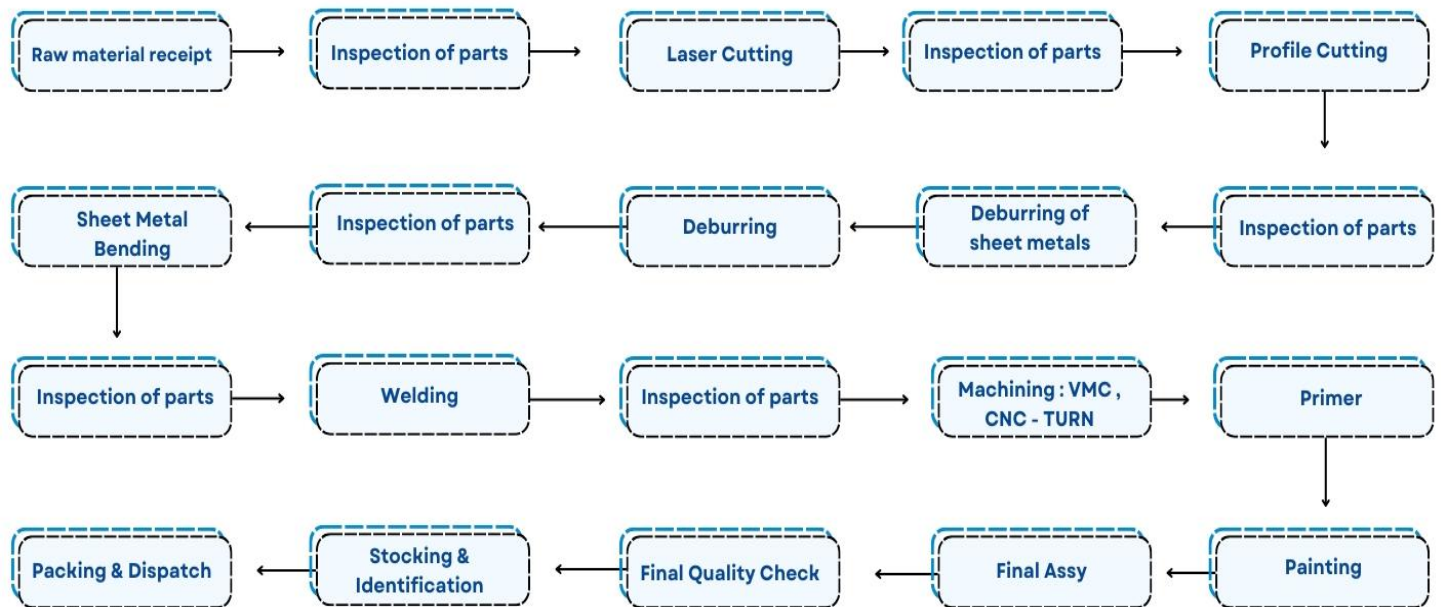

The completed products are then packaged securely to prevent damage during transit. Special attention is given to packaging materials and methods to ensure compliance with industry standards. Once packaged, the products are shipped to clients or designated locations, ensuring timely and safe delivery while enhancing customer satisfaction.

10. Quality Assurance

The final step in the process is quality assurance. This involves rigorous testing and inspection of the manufactured products to ensure they meet or exceed predefined quality standards and customer expectations. Quality assurance is integral to maintaining the company's reputation and ensuring that the delivered products are reliable, durable, and compliant with industry regulations.

Manufacturing Process

Railways

A detail explanation of each step in the production process for the railway components are as follows: -

➤ **Raw Material Receipt**

The process begins with the receipt of raw materials, such as sheet metal, profiles, or other base components. These materials are inspected for quality and compliance with predefined standards. Proper documentation is done, and the materials are sorted for further processing.

➤ **Inspection of Parts**

Before any processing, the raw materials and initial parts undergo a thorough inspection. This ensures that they meet the required specifications, such as dimensions, surface finish, and material properties, preventing issues during subsequent manufacturing stages.

➤ **Laser Cutting**

In this stage, the raw materials are shaped using precision laser cutting technology. Laser cutting ensures clean, accurate cuts suitable for intricate designs and railway components, minimizing waste and maximizing efficiency.

➤ **Deburring of Sheet Materials**

After cutting, sheet metal parts often have sharp edges or burrs that need to be smoothed out. The deburring process eliminates these imperfections, ensuring safety, ease of assembly, and better aesthetics.

➤ **Profile Cutting**

This step involves shaping materials into specific profiles required for railway equipment. Profile cutting is done with high precision to match design requirements and prepare the parts for assembly.

➤ **Sheet Metal Bending**

The processed sheet metal is bent into specific shapes and angles using bending machines. This step is essential for forming parts like enclosures, frames, or panels used in railway equipment manufacturing.

➤ **Welding**

The individual components are joined through welding, creating subassemblies or final structures. This process requires skilled labour and advanced welding techniques to ensure strong and durable joints.

➤ **Machining (VMC, CNC, TURN)**

Certain parts require further precision through machining processes such as Vertical Machining Centers (VMC) or Computer Numerical Control (CNC) turning. This stage ensures exact dimensions and tolerances for critical components.

➤ **Primer Application**

After the parts are fabricated, they undergo primer application. The primer acts as a base layer of coating, protecting the surface from rust and corrosion, and improving the adhesion of paint.

➤ **Painting**

The parts are painted to enhance their durability and aesthetic appeal. Specialized paints are used to ensure they can withstand harsh conditions, like heat, moisture, and wear, commonly experienced in railway environments.

➤ **CMM Inspection**

Post-machining and finishing, a Coordinate Measuring Machine (CMM) is used to inspect parts. This step ensures that the components meet dimensional accuracy and design specifications down to the micrometre level.

➤ **Final Assembly (Final Assy)**

All the inspected and prepared components are assembled into finished products or modules. This step involves precision fitting and adherence to assembly guidelines to create functional railway components.

➤ **Final Inspection**

Before dispatch, the assembled products undergo a final round of inspection to ensure compliance with all quality and design requirements. This step is crucial for maintaining customer satisfaction and safety standards.

➤ **Stocking and Identification**

Once the products are approved, they are stocked in designated areas and properly labelled or identified for easy tracking. This step ensures smooth logistics and order management.

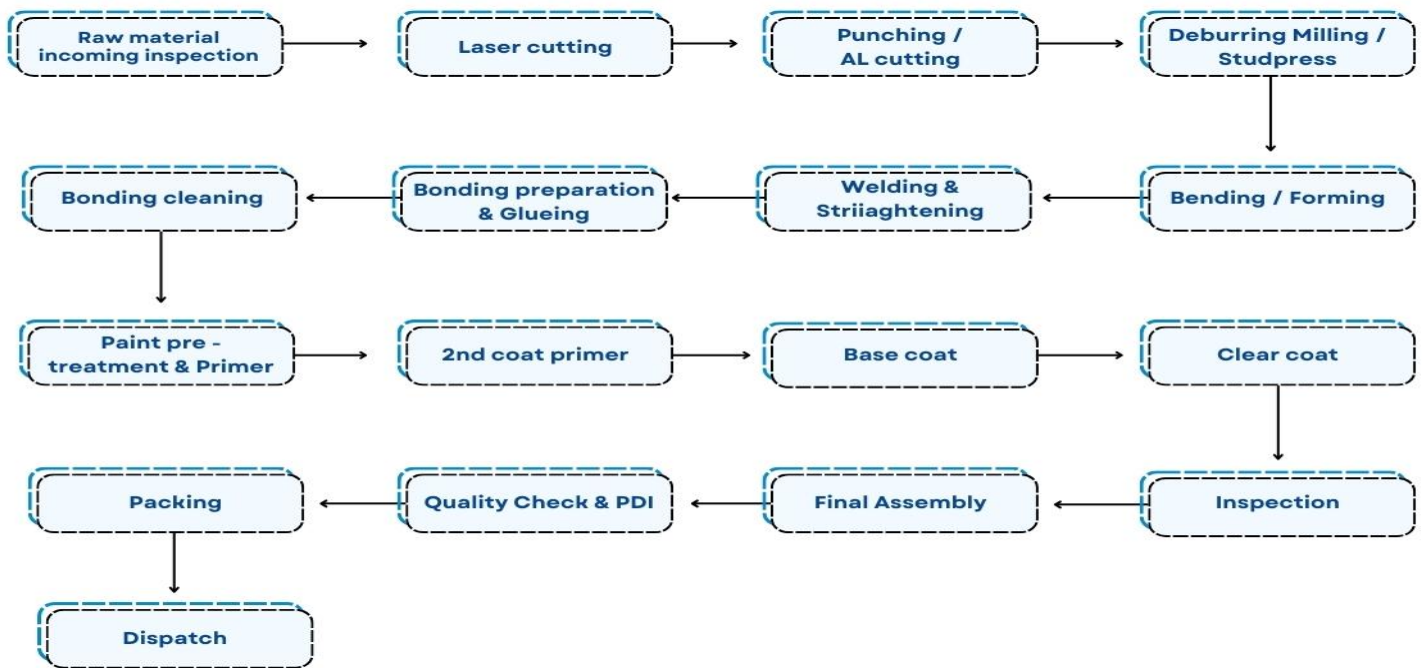

➤ **Packing and Dispatch**

The finished products are carefully packed to prevent damage during transit. They are dispatched to clients or project sites in line with delivery schedules.

➤ **Quality Check**

The final quality check is conducted before shipping to ensure that the products meet all regulatory and industry standards. This last step reinforces our Company's commitment to delivering high-quality railway solutions.

This systematic workflow ensures the production of high-quality, durable, and precise railway components while maintaining efficiency and compliance with industry standards.

A detail explanation of each step in the production process for the aerospace components are as follows: -

➤ **Raw Material Incoming Inspection**

The aerospace manufacturing process starts with the receipt of certified raw materials such as aluminium alloys, titanium, or composite materials. These materials undergo strict quality checks to meet aerospace-grade specifications for strength, weight, and disability.

➤ **Laser Cutting**

Using advanced laser cutting technology, the raw materials are shaped with high precision. This step is critical in aerospace to achieve intricate designs for components like wing panels, fuselage parts, or brackets while minimizing material wastage.

➤ **Punching/AL cutting**

Punching or specialized aluminium cutting is employed to create holes or patterns in lightweight metal sheets. This step is commonly used to produce components for aircraft interiors or structural assemblies, ensuring accuracy and consistency.

➤ **Deburring, Milling, and Stud Pressing**

After cutting, the parts are deburred to remove sharp edges, ensuring safety and proper assembly. Milling is used to achieve high precision and intricate geometries in parts like turbine blades or engine housings. Stud pressing involves embedding fasteners or threaded inserts into components for easy assembly, which is common in aerospace structures.

➤ **Bending/Forming**

Sheet metals or composite materials are bent or formed into specific aerodynamic shapes required for parts such as wing flaps, engine cowlings, or structural reinforcements. This step is carried out with tight tolerances to ensure structural integrity.

➤ **Welding and Straightening**

Components like fuel tanks, structural panels, or engine parts are welded together using aerospace-grade welding techniques (e.g., TIG or laser welding). Post-welding straightening ensures the parts remain within required tolerances and maintain alignment.

➤ **Bonding Preparation & Glueing**

Aerospace components, especially composite materials, often require adhesive bonding. In this step, surfaces are treated (e.g., sanded, primed) for optimal adhesive performance. Glueing is done to assemble parts like composite panels, interior assemblies, or structural joints.

➤ **Bonding Cleaning**

Bonded components are cleaned to remove excess adhesives, ensuring a smooth finish and preventing defects in subsequent stages.

➤ **Paint Pretreatment & Primer**

Parts are prepared for painting through chemical treatments or anodizing to enhance corrosion resistance. A primer layer is applied to improve paint adhesion and protect surfaces from environmental exposure, which is critical for aerospace components exposed to high-altitude conditions.

➤ **2nd Coat Primer**

A second primer coat ensures complete surface coverage and additional protection against oxidation, critical for maintaining the longevity of components like aircraft fuselage panels or landing gear parts.

➤ **Base Coat**

The base coat provides the primary protective and aesthetic layer. For aerospace, special coatings are used that are lightweight, resistant to extreme temperatures, and durable under high-speed airflow or chemical exposure.

➤ **Clear Coat**

A clear coat is applied to enhance the finish, providing UV protection and additional durability. This step is particularly important for exposed components like engine nacelles or aircraft exteriors.

➤ **Inspection**

All parts undergo thorough inspections using advanced techniques like ultrasonic testing, X-ray, or Coordinate Measuring Machines (CMM). This ensures that the components meet aerospace standards and are free from defects that could compromise safety.

➤ **Final Assembly**

The processed components are assembled into larger modules or systems, such as aircraft wings, engine assemblies, or avionics enclosures. This step requires precision and adherence to strict engineering drawings and specifications.

➤ **Final Inspection & Pre-Delivery Inspection (PDI)**

The final assembly undergoes rigorous inspections and testing, including non-destructive testing (NDT) and functional checks. Pre-delivery inspections ensure the systems are airworthy and compliant with regulatory standards.

➤ **Packing**

Aerospace components are packed with extreme care to prevent damage during transit. Specialized packaging materials and techniques are used to protect sensitive parts like avionics systems or turbine blades.

➤ **Quality Check**

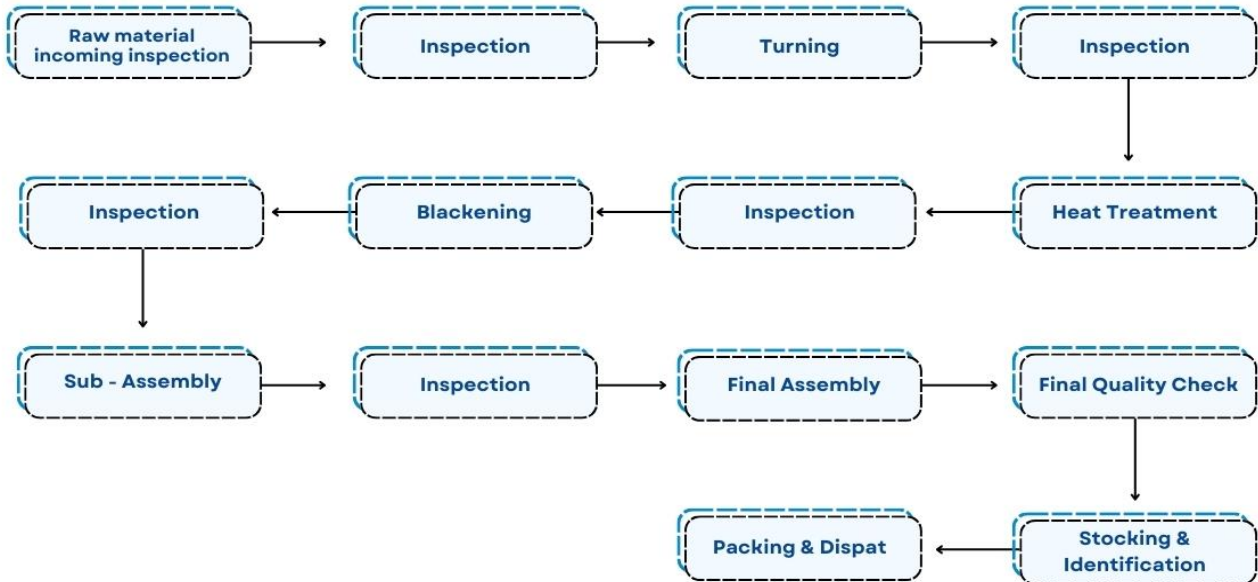

Before dispatch, a final quality check ensures that every step of the manufacturing process has been followed and that the components meet the required certifications.

➤ **Dispatch**

The completed aerospace components are dispatched to customers, which could include aircraft manufacturers or maintenance, repair, and overhaul (MRO) providers. Documentation for traceability, compliance, and certifications accompanies the shipment.

This process ensures that aerospace components meet the rigorous demands of the industry, focusing on safety, reliability, and performance under extreme operating conditions.

Defence

This following process outlines the production and quality assurance of components used in defense systems, where precision, durability, and reliability are critical.

➤ **Raw Material Incoming Inspection**

The process begins with the receipt of raw materials such as high-grade steel, alloys, or composite materials. These materials undergo stringent inspection to verify mechanical properties, chemical composition, and dimensional accuracy. This ensures compliance with defence standards and prevents defects in the final product.

➤ **Inspection**

After receiving the raw materials, they are subjected to a thorough inspection using techniques such as visual checks, ultrasonic testing, or spectrometry. This step ensures that only defect-free materials proceed to the next stage of production.

➤ **Turning**

The raw material is machined using turning operations on CNC lathes to achieve the desired dimensions and shapes for defence components. Precision is vital at this stage to meet exact specifications for parts used in applications such as missile systems, artillery, or armoured vehicles.

➤ **Inspection**

After turning, the machined components are re-inspected to ensure dimensional accuracy and surface finish. This inspection prevents any defective parts from moving further in the production process.

➤ **Heat Treatment**

Heat treatment is applied to enhance the mechanical properties of the components, such as strength, hardness, and toughness. This is essential for defence applications where the parts must withstand extreme conditions like high pressure or temperatures during operations.

➤ **Inspection**

Post heat treatment, the parts are inspected for hardness, microstructure, and any deformations. This ensures that the heat treatment process has achieved the required properties without compromising the integrity of the parts.

➤ **Blackening**

A black oxide coating is applied to the components to improve corrosion resistance and enhance their appearance. This step is critical for components exposed to harsh environmental conditions, such as naval or field equipment.

➤ **Inspection**

After blackening, the parts are inspected to ensure uniform coating and verify that the protective layer adheres to the surface as required. Any inconsistencies are addressed before moving forward.

➤ **Sub-Assembly**

Multiple components are assembled into sub-assemblies. For example, small mechanical or electronic parts might be assembled into modules used in radar systems, weapon mounts, or communication devices.

➤ **Inspection**

The sub-assemblies undergo rigorous inspection to ensure that all parts are properly fitted and functional. This step often involves performance testing to validate the sub-assembly under simulated conditions.

➤ **Final Assembly**

The final product undergoes comprehensive inspection and testing, including dimensional checks, functional tests, and environmental simulations. This ensures that the product meets defence standards and is ready for deployment.

➤ **Stocking & Identification**

Approved components and products are stored securely with proper identification for traceability. Each product is tagged with unique identifiers or serial numbers, which is critical in defence for tracking and maintenance.

➤ **Quality Check**

Before dispatch, a final quality check is conducted to verify all manufacturing and assembly steps were completed as per the design and specifications. Documentation is reviewed to ensure compliance with defence certifications and standards.

➤ **Packaging & Dispatch**

The finished products are packed in secure, protective packaging to prevent damage during transportation. Given the sensitive nature of defence equipment, special care is taken to ensure safe and tamper-proof delivery to the client.

This process ensures that defence components manufactured by our Company are of the highest quality, capable of meeting the rigorous demands of national security and defence operations.

Phased implementation of Unified Payments Interface

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by IIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to upto three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- a) Phase I: This phase was applicable from January 01, 2019 and lasted till June 30, 2019. Under this phase, a Individual Bidder, besides the modes of Bidding available prior to the UPI Circulars, also had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.
- b) Phase II: This phase has commenced with effect from July 01, 2019 and will continue for a period of three months or floating of five main board public issues, whichever is later. Under this phase, submission of the Bid cum Application Form by a Individual Investor through intermediaries to SCSBs for blocking of funds has been discontinued and has been replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase. SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice.
- c) Phase III: Subsequently, the time duration from public issue closure to listing would be reduced to be three Working Days.
- d) SEBI pursuant to its circular bearing reference number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 has reduced the time taken for listing of specified securities after the closure of public issue to 3 working days (T+3 days) as against the present requirement of 6 working days (T+6 days); 'T' being issue closing date. The provisions of this circular shall be applicable, on voluntary basis for public issues opening on or after September 1, 2023 and on mandatory basis for public issues opening on or after December 1, 2023. Our Company may choose to close this Issue within three (03) working days, in accordance with the timeline provided under the aforementioned circular.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked not later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors complaints in this regard, the relevant SCSB as well as the post – Issue BRLM will be required to compensate the concerned investor.

All SCSBs offering the facility of making applications in public issues shall also provide the facility to make application using UPI. The Company will be required to appoint one of the SCSBs as a Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and/ or payment instructions of the Individual Bidders using the UPI.

The processing fees for applications made by Individual Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No: SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue, it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

Anchor Investors are not allowed to withdraw their Bids after Anchor Investors bidding date.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (*earlier known as Department of Industrial Policy and Promotion*) (“**DPIIT**”), issued the FDI Policy, which is effective from October 15, 2020, which subsumes and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. The FDI Policy will be valid until the DPIIT issues an updated circular. Under the current FDI Policy, 100% foreign direct investment is permitted in the Railway Infrastructure and Defense Sector, under the automatic route, subject to compliance with certain prescribed conditions.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the FDI policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI. For further details of the aggregate limit for investments by NRIs and FPIs in our Company, see “**Issue Procedure – Bids by Eligible NRIs**” and “**Issue Procedure – Bids by FPIs**” on page 240.

Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government of India. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made similar amendment to the FEMA Rules. Each Bidder should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Issue in writing about such approval along with a copy thereof within the Issue Period.
