Inventory Heavy Model upto FY22

Inventory Heavy Model had several challenges

- **Higher working capital requirements**
 - Inventory-heavy model requires significant capital to maintain stock levels, which lead to continuous increase in working capital requirement.
- **Risk of Inventory Mark down/Obsolescence/Change in trends**
 - Holding inventory increases the risk of items becoming outdated or obsolete, especially in industries driven by fast-changing trends.
 - Unanticipated shifts in consumer preferences can lead to significant markdowns.
- **Continuous Rise in Debt Levels**
 - Financing high working capital leads to rise in Debt levels, which increases the interest costs leading to a negative impact on the PAT margin
- **Difficult to Scale**
 - Inventory model requires significant capital requirement, leads to challenge in scaling and adding more products to the engine.
