# Management Discussion And Analysis

The Board takes pleasure in presenting your company's third Annual Report for the year 2011-12 along with the compliance report on corporate governance. This Chapter on Management Discussion and Analysis forms a part of the compliance report on Corporate Governance.

#### Overview of the Global Scenario :

2012 has started with widespread concerns of another global recession. Equity market valuation in terms of price earnings ratios in all big markets is not far from low levels seen during financial crisis of 2008/2009. Fears of the crisis moving to Asia as well due to a housing collapse in China have intensified. Sentiment is not far from lows seen at start of 2009, when markets feared a depression following collapse of Lehman Brothers in late 2008.

The significant headwinds that derailed the recovery in 2011 have partly faded and some have even become tailwinds. In particular, the Chinese engine is likely to start pulling again and join US in driving world economy forward. The Euro area recession is likely to be short and euro growth may resume from Q2.That said, growth rates in western economies may remain subdued for a long time, whereas emerging markets may still see a solid growth. Down side risks steming from euro debt crisis are predominant and this crisis would remain with us for long time and we would see bouts of financial turmoil. Due to lower commodity prices inflation is likely to fall sharply leaving room for policy easing.

2012 would be a year of improvement for the global economy and given the overall downbeat sentiment, this could turn out to be a positive surprise.

#### Overview of the Regional Scenario

Slower growth and lower inflationary pressure have created room for monetary and fiscal easing across Asia. This will support a gradual recovery in 2012. China is expected to avoid a hard landing and recover in 2012 supported by fiscal and monetary easing. In Japan, the recovery after the earthquake has temporarily lost steam but should regain speed in H1 2012, supported by reconstruction and stronger exports.

#### Overview of the Domestic Scenario

In India, the slowdown in GDP growth witnessed over last 2 quarters is likely to extend into current fiscal. The slow down has been caused by structural problems, tighter macroeconomic policies, slower growth in OECD countries, worries about global recession, as also the base effect of high growth in agriculture during F.Y. 2010-2011.

In a worsening international scenario, macroeconomic policy room is much more limited. However fiscal stimulus could come from rationalizing government expenditure by expanding investment and cutting subsidies. Investment in infrastructure could alleviate supply bottlenecks and crowd in private investment, with social safety nets cushioning the impact of rising prices.

The Company continues to hold various investments in Kalyani Group companies and expects to earn reasonable returns on the same.

# Notes forming part of the Financial Statements for the year ended 31<sup>st</sup> March, 2012.

#### 1. Company Overview :

The Company is a Non Deposit taking Core Investment Company, as defined in the Core Investment Companies (Reserve Bank) Directions, 2011. Since the Company is not a Systemically Important Non Deposit taking Core Investment Company, it is not required to obtain Certificate of Registration under Sec. 45-IA of the Reserve Bank of India Act, 1934.

- 2. Statement of Significant Accounting Policies :
  - 2.1 Method of Accounting :
    - a) The Company follows mercantile system of accounting and recognizes income and expenditure on accrual basis.
    - b) Financial statements are prepared on historical cost convention. These costs are not adjusted to reflect the impact of the changes in the purchasing power of money.

#### 2.2 Use of Estimates :

The preparation of the financial statements in conformity with the GAAP requires that the Management makes estimates and assumptions, which affect the reported amounts of assets and liabilities, disclosure of contingent liabilities, as at the date of the financial statements, and the reported amounts of revenue and expenses during the year under report. Contingencies are recorded, when it is probable that a liability will be incurred and the amount can be reasonably estimated. Actual results could differ from those estimates.

#### 2.3 Fixed Assets and Depreciation :

#### a) Fixed Assets :

Fixed Assets are stated at their original cost of acquisition including incidental expenses related to acquisition and installation of the concerned assets. Fixed Assets are shown net of accumulated depreciation, wherever applicable and amortization.

#### b) Depreciation and Amortisation :

- i) Depreciation on fixed assets other than buildings is being provided for under the Written Down Value Method, on pro-rata basis, in consonance with the provisions of Section 205(2)(a) of the Companies Act, 1956, by adopting the rates specified in Schedule XIV, thereto.
- ii) Depreciation on buildings is being provided for under the 'Straight Line Method' on pro-rata basis, in consonance with the provisions of Section 205(2)(a) of the Companies Act, 1956, by adopting the rates specified in Schedule XIV, thereto.

#### 2.4 Investments :

- a) Long Term Investments are carried at cost. Provision for diminution is made to recognize a decline other than temporary, in value of investments.
- b) Short Term Investments are carried at lower of cost and fair value.

#### 2.5 Inventory Valuation :

Inventories comprising shares of companies and land are valued at lower of cost and net realizable price.

#### 2.6 Revenue Recognition :

- a) The Company recognises income on accrual basis. However, revenue recognition is postponed in respect of specific items of income, where the ultimate collection, thereof is uncertain.
- b) Interest income is accrued over the period of the loan / investment.
- c) Dividend is accrued in the year in which it is declared whereby a right to receive is established.
- d) Profit / loss on sale of investments is recognised on the contract date.

#### 2.7 Employee Benefits :

a) Post-employment benefits plan :

Contributions to defined contribution retirement benefit schemes are recognized as an expense when employees have rendered services entitling them to contributions.

For defined benefit schemes, the cost of providing benefits is determined using the Projected Unit Credit method, with actuarial valuation being carried out at each balance sheet date. Actuarial gains and losses are recognized in full in the profit and loss account for the period in which they occur. Past service cost is recognized immediately, to the extent the benefits are already vested. The retirement benefit obligation recognized in the balance sheet represents the present value of the defined benefit obligation as adjusted for unrecognized past service costs, and as reduced by the fair value of the scheme assets. Any asset resulting from this calculation is limited to the present value of the available refunds and reductions in future contributions to the scheme.

b) Short term employee benefits :

The undiscounted amount of short term employee benefits expected to be paid in exchange for the services rendered by the employees is recognized during the period when the employee renders the service. These benefits include compensated absences such as paid annual leave.

c) Long term employee benefits :

Compensated absences which are not expected to occur within twelve months after the end of the period in which the employee renders the related services are recognized as liability at the present value of the defined benefit obligation at the balance sheet date, with actuarial valuation being carried out at each balance sheet date.

#### 2.8 Taxation :

- a) Provision for income tax is made on the basis of taxable income for the current accounting year, in accordance with the provisions of the Income Tax Act, 1961.
- b) Deferred Tax resulting from timing differences of material amounts between Book Profits and Tax Profits is accounted for at the applicable rate of Tax to the extent the timing differences are expected to crystallize, in case of Deferred Tax Liabilities with reasonable certainty and in case of Deferred Tax Assets with virtual certainty that there would be adequate future taxable income against which Deferred Tax Assets can be realized.

#### 2.9 Impairment :

The management has a policy to review at each balance sheet date, the carrying amounts of its assets to determine whether there is any indication that those assets were impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of impairment loss. Recoverable amount is the higher of an asset's net selling price and value in use. In assessing value in use, the estimated future cash flows expected from the continuing use of the asset and from its disposal are discounted to their present value using a pre-tax discount rate that reflects the current market assessments of time value of money and the risk specific to the asset. Reversal of impairment loss is recognized immediately as income in the profit and loss account.

#### 2.10 Earnings per share :

In determining earnings per share, the Company considers the net profit after tax and includes the post tax effect of any extra-ordinary / exceptional item, if any. The number of shares used in computing basic earnings per share is the weighted average number of shares outstanding during the period.

#### 2.11 Provisions, Contingent Liabilities and Contingent Assets :

Provisions are made for present obligations arising out of past events, which are likely to result in an outflow of resources embodying economic benefits at an amount, which can be reliably estimated.

Items not classified as provisions as envisaged above are treated as contingent liabilities, which are disclosed by way of a note and are not provided for in the books of accounts.

Contingent assets are neither recognized nor disclosed.

#### 2.12 Cash flow statement :

Cash flows are reported using the indirect method, whereby profit / (loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.
