REPORT OF THE DIRECTORS

(Including Management Discussion and Analysis)

Your Directors are pleased to present the 30th Annual Report together with the Audited Financial Statements for the year ended 31st March 2012. The Management Discussion & Analysis Report, which is required to be furnished as per the requirement of Stock Exchanges, has been included in the Directors Report so as to avoid duplication and repetition.

ECONOMIC OVERVIEW

During the year, the Indian economy achieved a moderate growth reflecting a dampening of business sentiments, hit by headline inflation, high energy prices and a successive weakening of the Indian Rupee for most part of the year. High interest rates and spiraling prices of raw materials added to the woes. Regulatory issues with respect to environment clearances and land acquisitions slowing the pace of execution of high value projects and sector specific factors like coal and iron ore supply affecting the power, steel and related industries. While agriculture and services sector continued to perform well, this lower than expected growth can be attributed to weakening of industrial growth. The manufacturing sector grew by 2.7% and 0.4% during the second & third quarter respectively. Similarly, Index of Industrial Production (IIP) for first nine months recorded a growth of only 3.6% compared to 8.2% in the previous year. Other contributory factors include the fragile situation in Euro Zone and the spiraling oil prices have had adverse impact on the overall growth of the economy.

While all these factors had their influence on the tepid growth of the Indian economy, it still achieved a higher growth rate than many other emerging economies thereby providing ample evidence of financial prudence and resilience in the country's fiscal policy.

Contrary to the apprehensions, the export sector provided the silver lining by retaining its growth momentum. Industrial sectors like Automobile, Auto Components, Cutting Tools, General Engineering, Machine Tools, Ceramics, Glass and Defence demonstrated better results. While sectors like Aviation, Mining, Construction and Steel experienced lower than projected growth during the year. This anomaly contributed to India's modest GDP (Gross Domestic Product) rate.

With the IIP numbers showing an upward movement from the last quarter of the year, indicates a positive trend after a temporary slowdown. The Government is determined to continue with its fiscal measures to ensure a reversal of the economy to the growth trajectory. In fact, India has the advantage of a huge internal domestic market for goods and services which can generate demand and accelerate growth.

At the global level, we have seen steady flow of good news from the US with respect to improved employment and increased consumer spending. Japan and adjoining countries are likely to pull out of recession after being severely hit by earth quake and floods, post announcement of fiscal stimulus for reconstruction.

SUBSIDIARY COMPANIES

Wendt Grinding Technologies Limited, Thailand

During the year, the devastating flood in Thailand and Tsunami coupled with political and economic turmoil severely impacted the business of your Company's wholly owned subsidiary situated there. Despite this, the subsidiary presented a commendable performance maintaining the top line at Thai Baht 65 Million (Rs.1028 Lacs). The Profit Before Tax was Thai Baht 17.1 Million (Rs.259Lacs) and Profit After Tax was Thai Baht 12 Million (Rs.178Lacs).

In order to improve its brand awareness and create increased recall, your Subsidiary Company participated in major Industrial Trade exhibitions with clear focus on brand building and increasing market reach. It also focused on industry specific product advertising, conducted technical seminars and organized sales meets.

Your Subsidiary maintained leadership position in re-profiling market segment in Thailand. However, completion of solar glass project running for 18 months coupled with floods resulted in significant drop in profiling business. To compensate the reduction in sales & profit, the subsidiary undertook a number of new initiatives aimed at expanding the product basket and ensuring profitable sustained operation. Your Subsidiary has put in place clear processes and business process improvement plans

Facilities

with strict cost controls. Your Subsidiary during the year enhanced understanding of market/region and focus on high contribution products.

Wendt Middle East FZE, Sharjah

Your Company's second wholly owned Subsidiary in Sharjah, Wendt Middle East FZE, achieved an annual sale of AED 2180 (000's) (Rs.283Lacs) during the year which is 150% higher over last year. This higher sales was despite continued economic slowdown and social unrest experienced in the region it operates. The volatility in the primary economic drivers such as Construction, Trading and Oil in the Middle East region was a dampener in our achieving the planned business. Even the re-profiling services did not gain momentum as anticipated due to slowdown which impacted the performance of the Subsidiary.

Your Subsidiary has embarked on new initiatives to consolidate and grow business. It expects to be profitable from the coming financial year.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

In the sections that follow, the information required to be given in the **Management Discussion and Analysis Report** have been provided

GENERAL PERFORMANCE REVIEW

The Indian economy continued to show a modest growth rate of around 6.9% down from earlier projection of 7.3% for the year 2011-12, in the midst of spiraling commodity prices, headline inflation till about third quarter, power shortage, all time high interest rates, political maneuvering and policy logjam besides some of the most noticeable international crisis situations in Europe, China and Japan. Despite these difficult circumstances, economy was still not out of the growth path mainly on account of the domestic demand, internal strength backed by financial prudence. This was visible in segments like Automobile, Auto Component, Engineering, Ceramics, Cutting Tools and some of the other allied industries.

As mentioned in the beginning, during the year, while the domestic business of Wendt (India) Limited grew by 20 %, the export achieved a commendable growth of 35 % over the previous year. With respect to the segmental growth, the Super Abrasive Business grew by 23%. This growth in the Domestic Business has come as a result of increased focus on some of the growing industries such as Automobile, Steel, Engineering, Ceramics, Cutting Tools and Refractories. Your Company's continued efforts and initiatives towards new product and application development in addition to working closely with

customers in the developmental process of import substitutions helped achieving the growth.

The Non-Super abrasive business constituting of machines, precision components and accessories achieved 21% growth over last year. This was possible on account of sustained demand for special machines arising out of capacity expansions and new projects in the Steel sector, better performance by Engineering, Ceramics and Cutting Tool industries.

A steady demand for precision components has also contributed to your company's growth.

Your Company's continued focus on better service levels and direct marketing efforts well-supported with efforts on new product developments, enhancing customer engagement levels has helped to protect its leadership position in the domestic market.

In order to ensure sustained growth in the domestic market, your Company continually endeavors to enlarge the customer base and provide prompt services. Accordingly, during the year, additional two regions were added to its existing 20 regions in the domestic market. This is expected to strengthen your Company's existing network, market presence and have competitive edge over others.

ECONOMIC OUTLOOK

In the back of global economy still remaining volatile and fragile, with the continued fiscal expansion efforts by the Government and recent announcement of rate cut to bolster growth, it is expected that the Indian GDP is likely to achieve a growth of around 7.5 % in the coming year. The targets for expenditure growth and reduction in subsidies set out by the Government seem optimistic and help increase in domestic demand. Better credit availability will set the floor for growth and slowly regain business

confidence. This clearly indicates that more focus is towards driving higher domestic consumption and investments. Also the likely fall in exchange rate will help Indian exporters to gain market share even in the depressed international economic scenario.

Some of the major Industry segments that are expected to sustain the above growth projections are Automobile, Auto-component, General Engineering, Steel, Infrastructure, Housing & Construction, Fertilizer and Cement during 2012-13. Sizeable new investments, capacity expansions including reinstating some of stalled projects, Steel, Automobile, Auto-component, Engineering and Allied industries are certainly expected to take advantage of the opportunities in the coming fiscal year.

INDUSTRY STRUCTURE & DEVELOPMENTS

Given the fragmented structure, the Super abrasive tooling industry is characterized by the presence of few organized players such as your Company and many small time often proprietor-driven companies in the country. Your Company being a major supplier of Super abrasive products enjoys single-source supplier status with many major customers for a wide spectrum of industry. Its growth continues to be dependent on the performance of the various industry segments it addresses. Accordingly, major contribution to your Company's topline in the coming year is expected to come from sectors such as Defence, Aerospace, Automobile, Auto Components, Engineering, Cutting Tools, Steel and Ceramics. Apparently, the same positive impact would be also mirrored in your Company's performance in the coming year as well.

Following the revival of industrial activities in the domestic arena resulting in higher demand for Super

New products

New machines of the year

Abrasive Tooling and in turn the potential growth, your Company would continue to focus on seizing the opportunities in pursuit of higher growth. Accordingly, it has been working on various projects to enhance the product offering besides working on reducing dependency on few specific industries. This has led to development of products for newer applications for many industries and applications namely Aeronautical, Turbine, Defence, Healthcare, Construction, Paper and Printing.

OPPORTUNITIES & THREATS

Opportunities:

Given the various measures, initiatives and fiscal consolidation process being undertaken by the Government, the Indian growth scenario remains optimistic in the medium to long term basis and it is expected to regain some momentum in the coming year. For most part of the year, the overall sentiment and confidence levels remained positive for your Company as the business is not just dependent on few of the industries but addresses a wide spectrum of the industries. It would continue its approach of exploring new business opportunities in new markets and diverse sectors.

Clearly, this would be done by taking into account your Company's vast experience, knowledge base, comprehensive product range, superior technology and the competitive advantage that emerges from the complimenting combination of Super Abrasive Tools and High Precision Grinding & Honing Machines. Your Company would continue to take advantage of being the provider of **Total Grinding & Honing Solution** by strengthening its approach "from Tools-to- Machines".

Your Company would continue to work on further consolidation of Product Management with more emphasis on end-to-end solution through innovative products, application developmental initiatives and maintaining sustained competitive edge. This is being done by being customer-centric, taking into account the customer requirements, its growth potential, addressability, identifying current gaps and value expectations from the customers.

Your Company has already commenced the initial work on some of the identified new projects. Delapena range of Honing Machines was added to the machine tool basket two years back and your Company has started seeing positive results. As mentioned above, some more new machine models have been planned for introduction during the coming years. In the Precision Component Segment, honing competency would also be considered to further strengthen the Non Super Abrasive Business.

Threats

The Indian Super Abrasive Tool market on one end is populated by many small often unorganized players, proprietary-run concerns. These small players try to capture customers by concentrating in specific regions/products by offering lower prices. On the other end, there are few organized and large players from both domestic and global arena. The large

Engines of Growth

global suppliers heavily rely on tying up with global OEMs for establishing their entry.

In order to maneuver both the ends, your Company continues to adopt unique approach to improve its market presence. While the low end competition is addressed by innovative low cost products, the high end segment is serviced by developing import substitutes based on price-performance measure and value addition.

For your Company, the key success factors continue to be Product & Process Innovation, Application Developments and Market Development for ensuring sustained competitive advantage. Accordingly, in order to stay ahead of the competition and address the market dynamics, your Company constantly harnesses the competency levels and knowledge base of the people in the respective product programs it operates. These efforts are strengthened through offering improved levels of value added services along with paid customer education programs on grinding technology.

BUSINESS OUTLOOK

The Indian Economy is expected to go through period of slow reversal till about the first half of the year 2012-13 in view of the continued inflationary trend, rise in commodity prices and increasing raw material prices as well as continued volatility in some of the developed economies. By taking this into consideration, your Company's efforts will be to retain its leadership position in the domestic market offering its comprehensive range of products, strengthening the network and better market reach and penetration. Needless to say, your Company will continue to intensify its efforts for further improvement in its market presence to address competition posed from both domestic and overseas players.

In the **Super Abrasive Business**, your Company will

lay higher emphasis on product innovation and new product development. In addition it will enlarge industry segments for sustaining growth in the coming year.

shares held in demat form and risks associated with physical certificates such as forged transfers, fake certificates and bad deliveries are avoided.

ii) Register your National Electronic Clearing Service (NECS)/Electronic Clearing Service (ECS)

Shareholders should provide an NECS/ECS mandate to the Company in case of shares held in physical form and ensure that the correct and updated particulars of their bank account are available with the depository participant (DP) in case of share held in demat form. This would facilitate in receiving direct credits of dividends etc from companies and avoiding postal delays and loss in transit.

iii) Encash your Dividend in time

Please encash your dividends promptly to avoid hassles of revalidation/losing your right of claim owing to transfer of unclaimed dividends beyond seven years to Investor Education and Protection Fund.

iv) Support the Green Initiative

To support the 'Green Initiative', members holding shares in demat form are requested to provide their email id to the depository through their concerned depository participant and members holding shares in physical form are requested to provide email id to the Company at investorservices@wendtindia.com or at cs.wendt@karvy.com and also update the email address as and when there is any change.
