#### Mr. Karan Bhagat, MD & CEO, IIFL Wealth & Asset Management:

- The risk averse sentiment during the quarter resulted in clients preferring short-term high-quality liquid instruments or longer-term sovereign / quasi sovereign papers
- Our IIFL-One proposition showed increased traction with 103.3% YoY increase in assets to Rs. 17,720 Crs. This
  validation gives us further confidence to increase investments in people, platform and technology to service our IIFLOne clients
- ARR Assets increased 7.4% YoY to Rs. 62,595 Crs and ARR Revenues increased 20.4% YoY to 535 Crs. Operating
  profits are up 22% QoQ at Rs 94 Crs and down 27.9% YoY to Rs 356 Crs, which is in line with expectations given the
  change in revenue model
- The industry last year has witnessed a squeeze in margins driven by a confluence of factors including highly volatile markets, financial crises, challenging credit markets and regulatory changes
- As a firm, we have anticipated regulatory changes and realigned our business model early to lead the change. In the
  medium term, we expect this to benefit us positively and lead to a healthy consolidation and consequent gain in
  market share
- For over a decade, we have found the right investments for our clients. We remain extremely confident of the growth
  potential of our Wealth and Asset Management businesses in India and look to further consolidate our leadership
  position

- **COVID economic impact:** Global economic growth is likely to fall to multi-decade lows as a result of the economic disruptions due to the COVID pandemic, likely to rebound in 2021
- Coordinated policy response: Policymakers have responded promptly by announcing record monetary and fiscal stimulus
  packages. This has resulted in abundant supply of liquidity, supporting asset prices and keeping interest rates low
- Corporates shift focus to liquidity: Indian corporates have raised more than \$22bn during the year (yearly average \$ 10 bn) through fresh issuances to strengthen balance sheets and build liquidity. Higher availability of capital to market leaders will provide them opportunities to consolidate their positions further
- Savings effect: Lower wage growth and higher unemployment should lead to lower discretionary consumption and higher savings
   leading to opportunities for the wealth and asset management industry

### STRATEGY UPDATE

- Client appetite sharply moved to risk off during the quarter. High net worth Clients showed high inclination towards short term high quality liquid instruments and for the longer term only sovereign / quasi sovereign and bank deposits and funds. This has seem some bit of reversal in the current quarter but safety of capital remains the highest priority
- Asset Managers have had to work hard to mitigate risk in credit specially in open ended strategies. Within our Wealth Management Business we have been largely immune to this, however within the Alternate Assets Management our Real Estate funds is where greater focus and stress testing will be needed in these times
- IIFL One continues to gain traction and that gives us confidence in further enhancing the proposition. We continue to invest heavily around people, platform and technology in this segment. Though the current quarter has been challenging because of documentation related issues we are confident that conversions pick up again from Q2 of FY 21.
- Overall the industry last year has seen squeeze on margins driven by regulatory pressures; market impact; portfolio being skewed towards debt as well as compensation pressures for senior bankers. While in the short term this has resulted in us relooking at our business models and driving change we believe in the medium term it will lead to healthy consolidation and a gain in market share
