How are we performing?

We are pioneers of the Indian private television entertainment industry. From launching the first entertainment channel, Zee TV in 1992, to launching India's first food channel, Zee Khana Khazana last year, we have been at the forefront of innovation since inception. We were also the first to spot opportunities in the regional markets and launched dedicated regional channels, thereby widening our audience base and brand appeal. Our focus in the coming years is on sports and digital and we have taken significant steps in that direction. With the acquisition of Taj Television, the launch of Ten Cricket and Ten Action+, we hope to bring world-class sports content to our viewers. What we think?

The digital drive led by the exponential growth of DTH has been a significant feature over the last few years making it possible for C&S to reach 80% TV households in India. With the focus shifting towards addressable infrastructure, there will be speeding up of digitization in India going forward.

Increase in internet penetration levels and growth of m-commerce in India are trends that will take shape in the future. The launch of 3G technology in the country along with multiple smart phone applications will considerably expand the market for digital media.

Another trend is the rapid change in consumer preferences as they search for content of their choice and relevance. Likewise with the increase in purchasing power across tier I and II cities, regional and niche programming will gain prominence.

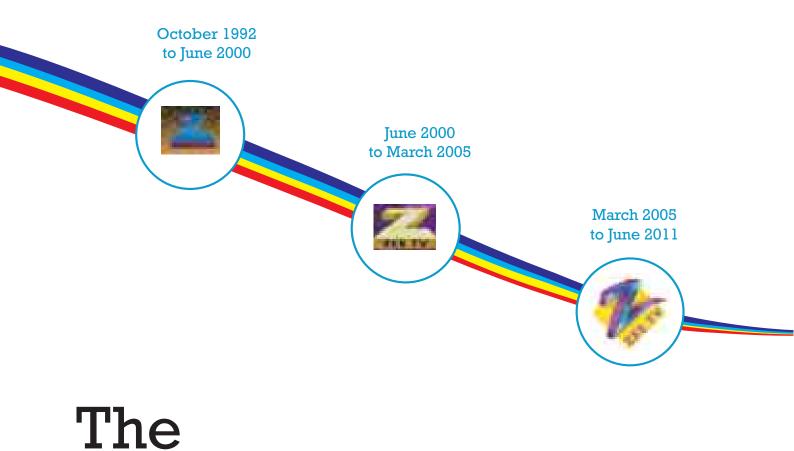

What is changing?

Collaborations and partnerships are on the radar as we strive harder to explore new frontiers. Our first major step in this direction is a partnership with STAR to form a distribution alliance. This landmark event will incentivise digitization, address piracy issues and enable a content revolution in India.

Our passion to create unparalleled entertainment content constantly drives us to think out of the box. We acknowledge that society is evolving, and so is the viewer's preference for entertainment. To stay relevant and contemporary in a world of constant change, we have introduced a new brand logo, with a more engaging tagline and a new positioning.

Why we exist?

"To become the world's leading global media company from the emerging markets. As a Corporation, we will be driven by innovation & creativity and would focus on growth while delivering exceptional value to our customers, our viewers and all our stakeholders".

Why the change?

New ZEE

ZEE's content has evolved phenomenally. With our growing popularity, we revamp our image too, periodically. As part of our latest rebranding initiative, we decided to give our brand a fresh outlook, just like our programming.

The new identity

Designed in-house, the brand identity is marked by vibrancy, effortless style, new-age sensibilities. We identify most though, with its characteristics of breaking away from clichés and norms. We are young, we are enthusiastic.

We carried out extensive research among our viewers to arrive at a new logo and programming content. It stands also for ZEE's optimism — a mirror of the aspirations of millions of Indians. To us, it is full of rigor, and life and the ultimate energy. So this rebranding isn't just on the surface: the approach is thorough, derived from viewer endorsement.

Our new brand identity, positioning and vision was unveiled on June 19, 2011. With these echoes, ZEE steps into a new phase of its growth trajectory. The new identity magnifies our relatable content, our adaptability to societal changes and our capability to creatively innovate. We showcase the credibility we have built over the past two decades, to tell our viewers we have come back stronger, not only than our competitors, but also than our earlier self.

The new 'Z'

As our shows have changed to suit the changing profile of our audience, our logo too, mirrors the freshness of their attitudes. We have aimed to define contemporary in our line up, our style, our outlook, our culture. Sans boundaries, or outlines, the new logo breaks out of the old mould and speaks the language of tomorrow.

Zee TV's aqua blue colour new logo features a stylish font. The new age design with its upward flourish signifies the upward movement of desires and wishes. The abstract form of the 'Z' and vibrancy of aqua blue bring in modernity and freshness to the brand. The unshackling of the 'Z' from the box symbolizes today's woman's zest for life and confidence to go out in the world beyond her home. The overall design has a progressive feel and reflects the idea of looking into the future with hope and depicts a more dynamic and spirited outlook.

Our hero: the Viewer

Our audience is our focal point. Instead of mainstream Hindi film personas, we focus on the common denizen. And though we are not shying away from international formats, we would like our individualistic identity to resound across the shores. We would rather create formats that are popular globally than simply import programming.

In the next five years, we aim to entertain more, seek out more viewer opinions and satisfy the hunger for the best in leisure viewing. We will make it more expansive than our viewers could ever imagine!

Chairman's Letter to the Shareholders

The outlook on the world economy is looking up as most economies are on the way to recovery while India continues to be the focal point for innovation and investments in the Media & Entertainment sector.

We have grown stronger, better equipped and more confident to help shape the future of the Media and Entertainment industry nationally and internationally. This has happened, because we moved forward with a conviction in inspired leadership.

Dear Shareholders,

We have grown stronger, better equipped and more confident to help shape the future of the Media and Entertainment industry nationally and internationally. This has happened, because we moved forward with a conviction in inspired leadership.

Leadership is often misunderstood as being ahead of others. To me, it is first about being ahead of ourselves, fighting the odds, challenging conventions and doing things that we did not think were possible. Leadership is not a static process, but involves dynamic thinking and decisive action. The transformation, however, needs to surpass the speed of change in the external environment. Only then can leadership be sustained. This is what we consider our biggest challenge as well as our biggest success.

We believe inspired leadership is a transition from insight to innovation, fulfilling viewer expectations and also exceeding it, and above all setting trends for other industry players to follow. In a constantly evolving Media and Entertainment industry we continually need to align our business with technology breakthroughs, leverage the emerging market niches that are opening up as a result and respond to the aspirations of a new family of viewers with speed and efficacy.

The outlook on the world economy is looking up as most economies are on the way to recovery while India continues to be the focal point for innovation and investments in the Media & Entertainment sector.

Chairman's Letter

The domestic Media & Entertainment industry has done exceedingly well, growing by over 11% from ₹ 587 billion in 2009 to ₹ 652 billion in 2010. While the Indian economy looks set to reach double digit growth rates ahead, the Media & Entertainment sector is projected to grow at a CAGR of 14% to reach ₹ 1,275 billion by 2015. The Television industry has witnessed aggressive growth as this medium overshadowed all the other available media platforms. India is today the world's third largest TV market with close to 138 million TV Households. The digital drive led by the exponential growth of DTH has been an outstanding feature over the last few years making it possible for C&S to reach 80% of TV households in India. With the focus shifting towards addressable infrastructure there will be a speeding up of digitization in India going forward.

The industry has taken giant strides in technological developments which will benefit the convergence of media. Increase in internet penetration levels and growth of m-commerce in India are trends that will take shape in the future. The launch of 3G technology in the country along with multiple smart phone applications will considerably expand the market for digital media. Broadcasters will have to adapt their strategies and preparedness to exploit the potential presented by these changes in the business environment.

Another trend that can have far reaching implications for Broadcasters is the rapid change in consumer preferences as they search for content of their choice and relevance. Likewise with the increase in purchasing power across tier I and II cities regional and niche programming will gain prominence.

The advertising spends across media was ₹ 266 billion in 2010, contributing 41% to the overall industry revenues. With the addition of new channels and media platforms, advertising is expected to grow further which augurs well for broadcasters.

The Indian Media & Entertainment industry projections look positive. To sustain our leadership we have to be responsible and responsive to the constantly changing viewer preference. Your Company entertains over 500 million viewers across 167 countries of the world. It is one of the largest producers and aggregators of Hindi programming in the world, with an extensive library housing over 1,00,000 hours of television content. We have to continually innovate to cater to this vast family of viewers, and create sustainable value for our shareholders.

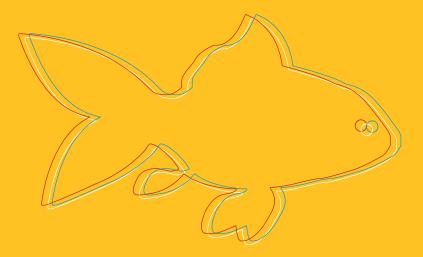

We are also focusing on building scale across the media value chain and exploring cross-media synergies. Collaborations and partnerships are also on the radar as we strive harder to explore other frontiers. Your Company is also committed to enhance operational excellence through greater concentration on cost optimization. Although the global market has improved substantially, fiscal prudence has been one of the biggest lessons we have learnt from the recession.

The thrust on transparency in corporate governance and empowerment of people at all levels will remain a constant endeavor at ZEE. I would like to take this opportunity to thank all members of the ZEE family for their continuous encouragement and support. We will do everything possible to live up to your expectations.

Subhash Chandra Chairman

Over the last decade, India's Media & Entertainment industry has witnessed unprecedented transformation in its speed, breadth, depth and impact. ZEE has been at the vanguard of transformation across media genres, creating benchmarks of excellence.

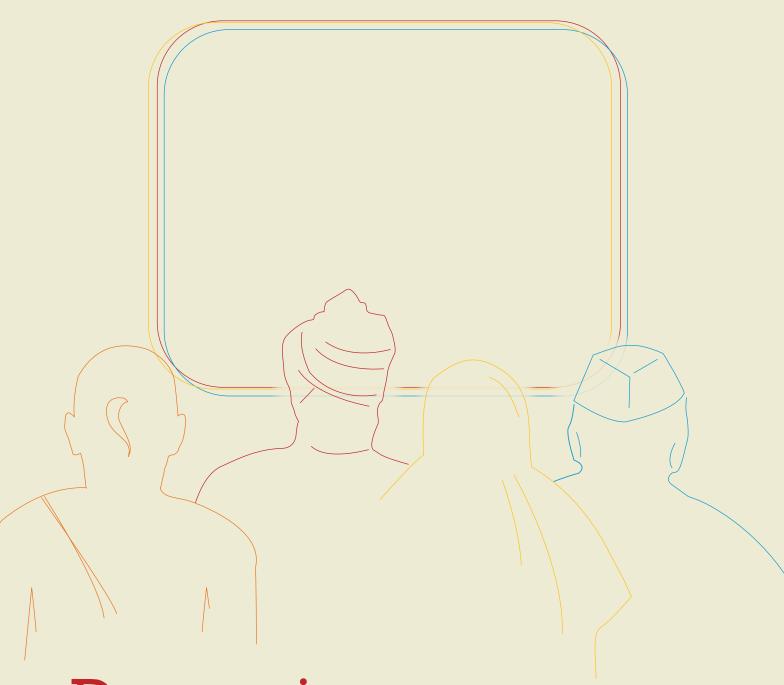

ZEE is the pioneer of entertainment-led broadcasting in India. ZEE is the first private player to launch a 24-hour entertainment channel in a nation where entertainment was synonymous with informational programming from the public broadcaster.

We enjoy the rare distinction of being frontrunners in spawning various genres in the broadcasting industry. ZEE launched India's first 24-hour movie channel — Zee Cinema, which continues to be the preferred choice of movie loving audiences not only in India, but also all over the world. ZEE was the first to offer a TV channel solely dedicated to news in India — Zee News, now operating as a separate company called Zee News Ltd.

The pay channel model came to India with ZEE. As a step towards reducing its dependence on advertising revenues and getting fair value for its content, ZEE was the first broadcaster to go pay.

First to spot the opportunity for Hindi content in international markets

Deepening Regional Roots

Foreseeing potential in regional content creation, we are reinforcing our strength in the segment

ZEE is the first broadcaster to enter the Hindi speaking regional markets with dedicated offerings. Sensing the need for advertisers to enhance regional reach and in order to provide a deeper connect with audiences, ZEE has launched various regional channels over the years.

We understood the need to engage with a local flavor in regional programming and hence introduced original programming catering to each region's tastes. We have entertained a wide milieu of regional consumers by celebrating their festivals, sharing their joys and sorrows and becoming an integral part of their day-to-day lives.

First private broadcaster to launch a 24-hour regional channel in the Hindi speaking market – Zee Marathi in 1999 Driving
Consolidation
and Competence

ZEE is strengthening its presence through acquisitions and alliances to move ahead to the next orbit of growth.

ZEE has been the frontrunner in driving consolidation in the highly fragmented media industry through various alliances and acquisitions

Over the years, ZEE has always been open to acquisitions and alliances that add value for its shareholders. We have driven consolidation in the industry with the acquisitions of Taj Entertainment Networks, 9X Media Pvt. Ltd and ETC Networks.

In an industry first, ZEE entered into a partnership with Star for a distribution alliance (w.e.f. May 2011). This move will help strengthen our leadership position in the distribution industry and create efficiencies in the distribution value chain.

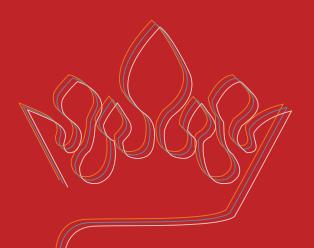

ZEE also believes that its core competency lies in continuous innovation in producing great content. Spending higher neither leads to better programming nor better ratings. This has been proven over the years with our home-grown properties, SaReGaMaPa and Dance India Dance, always featuring at the top of TRP charts.

With a relentless focus on this core competency, we have been able to deliver healthy and strong returns to all our stakeholders over the years.

First broadcaster to innovate with content ranging from India's first reality show to social issue-based fiction shows

Propelling Incremental Innovation

Innovation is not a new phenomenon in the Media & Entertainment industry. The secret lies in gaining acceptability. ZEE has the ability to make its innovations faster and more acceptable to a wider audience community.

At ZEE, innovation is incremental as in other spheres of life; it never comes in one sweeping stroke, but with small and significant steps

ZEE is the first broadcaster to corporatize the Hindi film industry with its foray into feature film production. The first movie, 'Gadar – Ek Prem Katha' still remains one of the all-time highest grossing films at the box-office.

Known for its pioneering original programming, ZEE has produced reality content that has been both, different as well as inspiring. Some of the most memorable shows that we have produced: Antakshari - a family favorite, and Saanp Seedi - a craze for many. ZEE also gave India its first reality show, SaReGaMaPa, which continues to enthral audiences even today.

We have always been conscious of our role as a medium of influencing public perception and introducing societal change. As a result, we address contemporary social issues through our programming content from time to time. Be it raising a voice against domestic violence through 'Ghar Ki Lakshmi-Betiyaan' or generating awareness and sensitivity around the issue of autism through 'Aap Ki Antara' or presenting the harsh reality of girl child-trafficking through 'Agle Janam Mohe Bitiya Hi Kijo' or dealing with the stigma against dark complexion in 'Saat Phere'.

ZEE has always sensed the pulse of the Indian consumers and seen the potential in their discerning demands for specific and evolved entertainment choices. Keeping in mind this opportunity, ZEE has launched Zee Khana Khazana – India's first food channel, Ten Action+ - football channel, Zee Jagran – socio-spiritual channel, Zee Salaam – India's first Urdu Entertainment channel, Zee Talkies – India's first and only Marathi Movies channel. Soon, we will also launch Ten Golf – India's first channel dedicated to golf.

Triumph. Reward. Recognition.

One year. Many emotions.

MD & CEO's Review

I am delighted to present to you our Annual Report for FY 2011, a year in which we sustained our growth momentum and emerged as winners across multiple parameters. In this report, we have outlined the various facets of our leadership and our vision to sustain it, going forward.

The Indian economy has witnessed robust expansion in FY 2011, registering a GDP growth rate of $8.5\,\%$ and is projected to grow at a healthy rate going forward.

India's M&E industry has exceeded the GDP growth rate, growing by 11% to touch ₹ 652 billion in 2010. As expected television took the center stage in the M&E space as media spends by advertisers gained momentum and the digitization drive continued its upward trend.

In response to the evolving market opportunities, our efforts in FY 2011 were multi-directional. We moved from altering time bands, to creating fresh, engaging content for enduring viewing pleasure. Extensive genre presence has always been one of our distinctive strengths. We have taken it one step forward, following the launch of Zee Khana Khazana, a 24-hour food channel. Besides, we expanded the sports genre, extending the Ten Sports franchise through Ten Cricket and Ten Action+, focusing on dedicated channels for cricket and football, respectively.

The Indian economy has witnessed robust expansion in FY 2011, registering a GDP growth rate of 8.5% and is projected to grow at a healthy rate going forward.

Board of Directors

MD & CEO's Review

Team ZEE

Our channels are the credible faces of our innovation and operational strengths nationally and internationally and their milestones reaffirm the faith of the viewer community in our efforts. ZEE's flagship channel Zee TV, completed 18 successful years of operation while ETC Channel Punjabi completed 10 years and Zee Marathi 12 years.

Internationally too, we sustained our leadership position with a 33% viewership share, touching 71 million households across 167 countries. In the MENAP region, Zee TV has been acclaimed as the No. 1 channel from Oct 2008 till date.

Widely recognized as one of the most successful media launches of the decade, Zee Aflam has notched an all time high of 39 GRPs. Besides, ZEE in Malaysia has been the consistent No.2 International channel. Zee TV in USA enjoys the highest viewership, while Zing is the No.1 amongst Asian Channels in that market. Zee TV consistently ranks No.1 amongst Asian expatriates in UAE, and has been the No.1 Asian channel in South Africa.

A combination of enhanced multi-genre viewership, improved revenue shares, better operating margins and higher cash flow has made FY 2011 a positive year on all counts. With subscription revenues growing steadily, our revenues and EBIDTA surged 37% and 35%, respectively. The organization's content-focused approach, combined with better monetization of subscription revenues is expected to deliver steady returns in the year ahead.

We are justifiably proud of Zee TV's Pavitra Rishta and Zee Talkies Natarang, which have won awards and accolades nationally and internationally. Also, ZEE was awarded the Top Indian Company under the 'Media and Entertainment' sector at the Dun & Bradstreet - Rolta Corporate Awards 2010.

The drive for consolidation continues relentlessly at ZEE. We increased our stake in Taj Television. We also moved ahead with alliances and partnerships to acquire more capabilities and visibility. Zee Turner Limited has formed a joint venture with Star Den Media Service Private Limited. The new company, Media Pro Enterprise India Pvt. Ltd, will facilitate the redressal of anomalies in the distribution sector, curb piracy and enhance transparency by accelerating the digitization process. These steps would benefit stakeholders across each segment of the value chain.

Business strategy is an evolving process, it demands a pragmatic approach to create differentiation in line with changing industry realities. After six years, we have introduced a new brand positioning and vision statement for ZEE and are stepping into an entirely new phase. The new identity is focused particularly on showcasing relatable content, adapting to changes in society and our innovation capabilities.

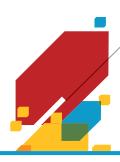

A renewed focus on niche channels is a part of our drive to widen the viewer community. ZEE will be taking significant steps in this direction by launching more niche channels in the future. Besides, to keep abreast with evolving customer preferences, we will target aggressive content delivery strategies by providing content on mobile and other new technologies.

ZEE's aim is to make its presence felt to India's billion-plus population and also extend its international reach through differentiated and innovative content creation across multiple genres of ZEE. This will be possible only through the unrelenting support of our loyal and dedicated teams. Their inspiration, professionalism and commitment add to our laurels and enhance stakeholder value. I take this opportunity to thank each one of them for their invaluable sacrifices, dedication and loyalty to our organization. We promise to continue to work hard and reward your faith in us.

Yours sincerely, **Punit Goenka**MD & CEO

ZEE and Turner International India Pvt. Ltd. came together in February 2002 to form Zee Turner Ltd. with the objective to revolutionize the management of distribution and trade marketing for pay channels in India & some neighboring countries like Nepal and Bhutan. Zee Turner is the country's first bouquet of channels and has been a game-changer in the distribution Industry with its multi-genre offerings.

To create greater value for this entire distribution value chain, Zee-Turner has recently entered into a 50:50 joint venture with Star-Den to form Media Pro Enterprise India Pvt. Ltd.

The long term vision of this venture is to pool together resources of both the partners so as to address various anomalies of the present analogue distribution market, curb piracy, and introduce transparency by accelerating the pace of digitization in India, which will result in benefits to all stakeholders in the value chain.

Milestone initiative – Distribution alliance with STAR to change the face of the TV distribution landscape in India

INSPIRED LEADERSHIP

We have always positioned ourselves as a trendsetter for the entire industry in broadcast operations. ZEE's superior operational efficiency lies in the flexible and forward-looking Traffic Management and Transmission Play-out system, one of the best in the industry. Use of a superior Broadcast Management System (BMS) has helped us reduce our Transmission Log release time from the initial 72 hours to just a few hours before going on-air, maintaining the ratio of manpower to number of channels at the lowest in the industry.

ZEE's broadcast facility at NOIDA is one of the largest play-out facilities under one roof in all Asia, catering to all ZEE channels including international channels for Europe, USA, SEA, Middle East and Russia

Technology has always been our strength, which enable us to serve 167 countries. A series of measures have been initiated recently in the International Delivery Network to improve functionality. Channels that have been targeted for delivery across Europe and USA are now being hauled via fibre systems, instead of satellite (IS906). The initiative provides a 50% advantage in cost without affecting the quality.

To cater to the overseas market, we offer multiple language subtitles including English, French and Bahasa (Indonesia). The introduction of Arabic subtitles is in the pipeline. Specific dubbed versions (such as Zee TV Russia) are also available. In addition, all international channels comply with the local advertising and content networks using the cue tone facilities provided in the playout system.

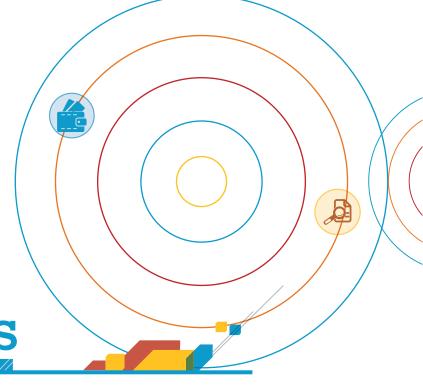

On the other hand, conversion of channels to MPEG4 would result in 40% saving in bandwidth and associated costs, while improving quality. Zee Café, Zee Trendz, Zee Studio, Zee TV Middle East and Zee Khana Khazana are among the first channels to be converted.

International channel broadcasting has also migrated to satellites, such as IS-10 to cover the entire African continent and GEC countries with extending coverage till Eastern Europe.

In the content value chain, the Company has gained multifaceted achievements with the introduction of a Digital Media Asset Management facility. Content transfer is now increasingly being done digitally using file transfer and automatic ingest thus moving towards tapeless operations. In the coming year, the Company expects to achieve significant gain in media management and cost savings by moving to a largely tapeless environment.

To standardize business processes for increased operational efficiency, strengthen internal controls and ensure corporate governance, we have implemented SAP, the world class Enterprise Resource Planning (ERP) system

a mere 1.4 percent in 2009. Television sector grew from ₹ 257 billion in 2009 to ₹ 297 billion in 2010, registering a growth of 15.5%. (Source: FICCI-KPMG Indian Media and Entertainment Industry Report 2011)

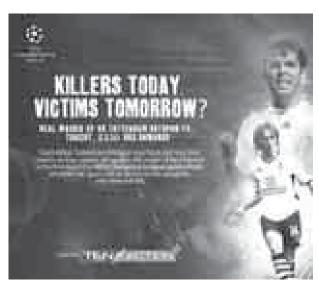

This growth was primarily driven by resurgence of media spends by advertisers across media platforms. The advertising spends across all media accounted for ₹ 266 billion in 2010, contributing to 41 percent of the overall M&E industry revenues. Advertising revenues witnessed a growth of 17 percent in 2010 against a marginal decline of 0.4 percent observed in 2009. (Source: FICCI-KPMG Indian Media and Entertainment Industry Report 2011)

An ever increasing ad spend to GDP ratio, rapid adoption of DTH and digital pay television services, and favourable trends from television heavy advertisers are likely to have a positive impact on the sector going forward.

The new era of digitization has seen DTH adoption going up to 34 million pay DTH households as of March 2011, a growth of more than 60% over the last year. With continued investments in marketing and widespread consumer acceptance of the category, DTH industry is estimated to grow by another 11-12 million households in FY2012. BUSINESS STRATEGY

The key elements of Zee's strategy during the year were (i) to take appropriate steps to safeguard its leadership position in a fiercely competitive environment (ii) to concentrate on additional revenues from digital pay platforms (iii) rationalize on costs across different heads (iv) fortify its expansion in the international markets (v) maintain consistently high standards of corporate governance.

Appropriate steps to safeguard its leadership position in a fiercely competitive environment:

The launch of new shows across network channels along with the tie up of cricket rights and current series rights of programs has helped ensure that in a highly fragmented environment, the network maintained and grew its dominance.

(ii) Concentrate on additional revenues from digital pay platforms:

India is a fast digitizing market and the consumer shift towards digital services is exhibited through the rampant expansion from 21 million pay DTH households at the beginning of the fiscal to 34 million pay DTH households at the end of it. The company gained substantially through this growth and revenues realized by the company for these consumers grew 44% over the last year.

(iii) Rationalize on costs across different heads:

The belief at the Company has always been that higher spends will not necessarily result in sustained incremental viewership. Even in the wake of competition, the network maintained its cost structures though with increased competition our costs also moved up. Better negotiations with suppliers and stricter control on distribution spends will help in further keeping costs under check. EBITDA margins for the Company grew from 26% during first half to 29% during second half of the financial year.

(iv) Fortify its expansion in the international markets:

During the year, the Company undertook various initiatives to further strengthen its dominance in international markets by entering into deals with new platform operators (e.g. MYtv in Russia and Fetch TV in Australia) as well as launching new channels in some of the geographies (e.g., Zee Café in UK). The success of these initiatives has given the management confidence that low cost experiments such as these are an innovative way of enhancing network strength in international markets.

(V) Corporate Governance

ZEE firmly believes that good governance is critical to sustaining corporate development, increasing productivity and competitiveness and creating shareholder wealth. The governance process should ensure that the available resources are utilized in a manner that meets the aspirations of all its stakeholders. Your Company's essential charter is shaped by the objectives of transparency, professionalism and accountability. The Company continuously endeavours to improve on these aspects on an ongoing basis.

While the increasing emphasis on transparency and accountability, standards have been set by various governing bodies on disclosure as well as judiciousness in conduct. ZEE has always tried to go a step further in this direction.

RISK FACTORS

Competition from other players:

The Company operates in highly competitive environment that is subject to innovations, changes and varying levels of resources available to each player in each segment of business.

Ever changing trends in Media sector:

It may not be possible to consistently predict changing audience tastes. People's tastes vary quite rapidly along with the trends and environment they live in. This makes it virtually impossible to predict whether a particular show or serial would do well or not. With the kind of investments made in ventures, repeated failures would have an adverse impact on the bottom line of the company.

Cost of programming mix might affect its bottom line:

The urge to compete and provide the best content to viewers, Zee would have to incur high expenditure to provide an impetus on its programming front from time to time.

The increase in costs might not necessarily perk up its revenues in the same proportion.

Investments in new channels:

The Company may from time to time launch new channels. Content for these channels is obtained from its existing library as well as from programmes acquired in the normal course of its business. The success of any new channel depends on various factors, including the quality of programming, price, extent of marketing, competition etc. There can be no assurance that the Company will be as successful in launching new channels as it has been the case of its existing channels.

Macroeconomic environment:

Macroeconomic environment can be a potential source of risk. The unpleasant trinity of moderating growth, high inflation and monetary tightening can adversely impact advertising revenues of the Company, which forms the largest component of the Company's revenues.

Slowdown in DTH/Digital rollout:

The uptake of pay digital services by subscribers has been a very encouraging sign for all broadcasters. Internationally most broadcasters derive a greater share of their revenues from the subscription revenues whereas in India the under-declaration in the analogue cable system has led to broadcasters being more dependent on advertising revenues, which tend to cyclical in nature and more affected by the macro economic factors. The

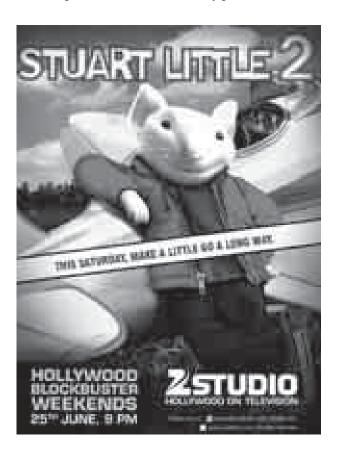

industry expects pay digital services to grow at over 25% CAGR in the next three years and Zee is likely to benefit heavily from this rapid growth. A slowdown in growth of digital services may lead to incremental profit margins being impacted.

Increased competitive environment in the Hindi General Entertainment Space:

The Hindi GEC genre is amongst the key genres for all advertisers and hence is most lucrative to all the TV broadcasters. Any new competition in the space can have an impact on the Company's revenues.

Sluggish consumer uptake in the international markets:

ZEE has been a pioneer in the international markets and has the highest market share amongst all South East Asian broadcasters across Europe and USA. Indian content in these markets serves the preference of a niche audience and ZEE has strong relations with distribution platforms in these markets giving management the confidence that the Company will retain market share in key geographies. In the given slowdown, consumers may find it difficult to upgrade their packages and the value growth from these markets may get affected.

Cannibalization of analogue cable revenues due to increased digital pay revenues:

The television distribution system in India is primarily analogue in nature and continues to be impacted by the rampant underdeclaration and piracy by the last mile cable operators. With the advent of digital pay TV services such as DTH and digital cable, a clear shift in consumer preference has emerged with all of the expansion in the cable and satellite adoption coming on the back of these digital services. Though analogue cable is still under-reported, this expansion of digital DTH services may lead to cannibalization of analogue cable revenues in the near term.

Increase in cost of acquisition for some of the key sports properties:

While a significant amount of rights have been signed on by the Company for leading sports properties, any future contracts may be at higher costs, which may put pressure on margins of the company.

The Company may be exposed to foreign exchange rate fluctuations:

The Company receives a significant portion of its revenues and incurs a significant portion of its expenses in foreign currencies, particularly US dollars and UK pounds. Accordingly, the Company is exposed to fluctuations in the exchange rates between those currencies and the Rupee, the Company's reporting currency, which may have a substantial impact on its revenues and expenses.

Background:

Zee Entertainment Enterprises Limited (hereinafter referred to as 'the parent company', 'the Company' or 'ZEEL') together with its subsidiaries and associates (collectively known as "the Group") derives revenue mainly from advertisements and subscription. The Group also generates revenue through sale of television programs ,movie distribution and Educational services (demerged during the year (Refer Note 19)).

Basis of Consolidation 2.

- The Consolidated Financial Statements (CFS) of the Group are prepared under Historical Cost Convention under going concern basis in accordance with Generally Accepted Accounting Principles in India and the Accounting Standard -21 on "Consolidated Financial Statements" issued by the Institute of Chartered Accountants of India (ICAI), to the extent possible in the same manner as that adopted by the parent company for its separate financial statements by regrouping, recasting or rearranging figures, wherever considered necessary.
- The CFS is prepared using uniform accounting policies for transactions and other events in similar transactions except that one of the subsidiary provided the liability on account of retirement benefit on estimated basis as per local laws instead of actuarial basis. This liability represents 19.43% of total gratuity and leave encashment liability of the group as at the year end.
- iii The consolidation of the financial statements of the parent company and its subsidiaries is done to the extent possible on a line-by-line basis by adding together like items of assets, liabilities, income and expenses. All significant inter-group transactions, unrealized inter-company profits and balances have been eliminated in the process of consolidation. Minority interest in subsidiaries represents the minority shareholders proportionate share of the net assets and net income.
- The CFS includes the Financial Statements of the parent company and the subsidiaries (as listed in the table below). Subsidiaries are consolidated from the date on which effective control is acquired and are excluded from the date of transfer/disposal.
