The net profit of Rs. 12.64 Crores is 36.03 % lower, as compared to last year's net profit of Rs.19.76 Crores. The decrease in revenue has been mainly due to macro economic reasons: stagnating economic growth across the sectors where the Company's customers operate. The Directors are hopeful that steps will be taken by the present Government to revive the economic growth which could result in an economic upsurge leading to creation of demand for the Company's products / solutions.

To enhance customer reach for its solutions business, the Company has set up Regional Sales Offices in Delhi, Kolkata, Chennai and Pune. It also has resident representatives in Bengaluru and Ahmedabad. The Company has started a special emphasis on service considering its critical impact on customer satisfaction and its ability to act as a force multiplier for future sales. Your Company is also taking initiatives to ramp up its exports business.

Your Company has installed 4 wind turbines of 1.25 MW generation capacities each in Dhule District, Maharashtra.

Opportunities and Threats:

Various competitors, national and international vie with your Company to meet the requirements of customers. Your Company has been taking continuous steps to meet this threat. The efforts of your Company's technology development team and combined with its association with some reputed international cooperation partners, your Company has been able to present improved and advanced technology products to its customers.

Further enhancements have been carried out to the new series of compact and modular Wire Rope Hoists. These hoists, designed with contemporary design technologies and incorporating internationally serviceable robust and proven components and comparable to the best hoists available internationally have already started receiving a favourable response from customers. Similar response has also been received to the new series of contemporary technology electric chain hoists and mechanical hoists.

Additionally, development and improvement activities carried out on the existing product line will enable your Company to effectively face the competition from local and international players who have established a base in India.

Your Company has started making strong endeavours to evolve from being a supplier of material handling products to also be in a position to offer complete and even complex in plant material handling solutions that adds value to its customers. During the CeMAT exhibition in December 2014, your Company launched its advanced cranes to the market Called "iCranes". These represent a significant technological improvement over the existing offerings and comparable to international standards. The floor operated stackers were further developed to include intelligence features to make it not only highly user friendly but also more utilitarian. This new range is being positioned as "i:Stacker".

Competition from the unorganised sector and cheap imports also exists. There is a segment in the market that is swayed purely by price considerations. More so, in a recessionary economic scenario, with dropping industrial output, difficult cash flows and consequent delays in infrastructure projects and investment plans of customers. We however expect that the technological improvements effected in-house and with external technology will enable your Company to consolidate and strengthen its market position, as the market situation starts improving.

Every business has inherent element of uncertainties owing to uncertain factors and managing risk is very critical for success of the enterprise. Business Out-look:

The year closed with the economic scenario still in recessionary mode though with a hint of optimism for the next financial year. Even if one were to be optimistic, given the inherent nature of the capital goods industry, it would need some time for the effects to trickle down and reflect in the demand position as the customer segments will take time to evaluate the situation and commence any new investments. Not only the demand position, but the liquidity situation also needs to see improvement considering the risks involved.

Initial direct costs such as legal costs, brokerage costs, etc., are recognised immediately in the statement of profit and loss.

(M) Earnings Per Share

Basic earnings per share is computed by dividing net profit or loss for the period attributable to equity shareholders by the weighted average number of shares outstanding during the year. Diluted earnings per share amounts are computed after adjusting the effects of all dilutive potential equity shares except where the results would be anti-dilutive. The numbers of shares used in computing diluted earnings per share comprises the weighted average number of shares considered for deriving basic earnings per share, and also the weighted average number of equity shares, which could have been issued on the conversion of all dilutive potential equity shares.

**(N) Taxation**

- (i) Provision for Income tax is made on the basis of the estimated taxable income for the current accounting period in accordance with the Income- Tax Act, 1961.
- (ii) The deferred tax for timing differences between the book profits and tax profits for the year is accounted for using the tax rates and laws that have been enacted or substantially enacted as of the balance sheet date. Deferred tax assets arising from timing differences are recognized to the extent there is virtual certainty that these would be realized in future and are reviewed for the appropriateness of their respective carrying values at each balance sheet date.

(O) Impairment of Assets

The Company assesses at each balance sheet date whether there is any indication that an asset may be impaired. If any such indication exists, the management estimates the recoverable amount of the asset. If such recoverable amount of the asset or the recoverable amount of the cash generating unit to which the assets belongs is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognized in the statement of profit and loss. If at the balance sheet date there is an indication that if a previously assessed impairment loss no longer exists, the recoverable amount is reassessed, and the asset is reflected at the recoverable amount subject to a maximum of depreciated historical cost.

(P) Provisions and Contingent Liabilities

The Company creates a provision when there is a present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

(Q) Operating Cycle

Based on the nature of products/activities of the Company and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non current.

- 40 The previous year figures have been regrouped/reclassified, wherever necessary to conform to the current presentation as per the schedule III.
